OUTWARD MAIL OF JULY 2.—SUEZ, JULY 11.—The Messageries Maritimes steamer Djemnah, with the outward French mail, for China and Japan, left here to-day for Aden.

DUTCH OUTWARD MAILS.—SOUTHAMPTON, JULY 13.—The Nederland Company's steamship Voorwaarts left here to-day for Batavia, Samarang, Sourabaya, &c., with the Netherlands mails, a large number of saloon passengers, 370 Dutch troops, £20,000 in specie, and a full cargo.

TELEGRAMS FROM THE FAR EAST.

BURMAH.

(TIMES TELEGRAM.)

RANGOON, JULY 12.—When Sir D. Forsyth was present, the King appeared willing to concede all that was required ; but after Sir D. Forsyth left, the King wrote to Lord Northbrook refusing to British troops a passage through his territory, and consequently great distrust prevails here.

SIMLA, JULY 14.—The official *Gazette* publishes a resolution of the Viceroy notifying the conclusion of the Burmah mission. With reference to the refusal of the King of Burmah to permit the passage of a British escort through his territory, the Viceroy is confident that the fresh communications now being made will attain the desired object and result in the maintenance of friendship between Great Britain and Burmah.

RANGOON, JULY 14.—According to reports received here, an insurrectionary movement has broken out in the neighbourhood of Khamo, in Burmah.

CENTRAL ASIA.

BERLIN, JULY 13.—The Russian *Invalide* says that Yakoob Khan, who keeps a garrison of 10,000 men at his capital, has despatched 12,000 others to guard his Eastern frontiers against the Chinese. All these troops are armed with breechloaders and drilled *à l'Européenne*.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—July 13, at Falmouth, from Bassein, Nordstjernen ; 14, from Rangoon, for Bremen, Meltke ; from Macassar, Johannes ; 15, at London, from Manila, Canaan ; from Sarawak, Asterion ; Hankow (str.), from Hankow ; at Falmouth, from Rangoon, Albert Wilhelm ; at Queenstown, from Rangoon, Sempione ; 16, at New York, from Batavia, Skimmer of the Waves ; 17, at London, from Hankow, Glenfalloch (str.) ; at Falmouth, from Rangoon, A. H. Willie ; off Isle of Wight, from Maulmein, Eliza Campbell ; 18, at Falmouth, from Maulmain, Gibson Craig ; from Bassein, Eagle ; from Rangoon, Edward Barrow ; at Liverpool, from Rangoon, Fearnought.

DEPARTURES.—July 15, from Liverpool, for China, Orestes (str.) ; 12, from Amsterdam, for Macassar, Maria Anna Catharina Elisabeth ; for Singapore, Nicolaas Witsen ; 16, from London, for Hong Kong, Teviot (str.) ; from Cardiff, for Galle, Tabor ; for Hong Kong, Joachim Christian ; 15, from Rotterdam, for Batavia, John Howard (str.) ; 17, from Cardiff, for Galle, Malia P. ; for Hong Kong, America.

LAID ON.—At London, for Colombo, Scawfell.

SPOKEN.—Mary Queen of Scots, from Portsmouth to Galle, June 10, 6.39 N., 22.21 W. ; Dorset, from Colombo, to London, June 3, 10 S., 12 W. ; Mary, from Flushing, to Batavia, June 10, 4.17 N., 21.31 W. ; Urania, from Batavia, to Amsterdam, June 12, 5 N., 23 W. ; Deogaum, from Nagasaki, to London, June 9, 6.20 N., 25 W.

CASUALTY.—The French barque Comète, from Singapore to Marseilles, destroyed by fire in Banca Straits, is posted at Lloyd's ; crew saved, with the exception of second officer. Portsmouth, July 17, put in : Teviot (str.), from London for China, with main feed broken.

MISCELLANEOUS.—Aden, July 4th, arrived, Holland (str.), from Nieuwe Diep and left 5, for Batavia. Passed, July 3, Borneo (str.), from Nieuwe Diep, for Atchin.—Port Said, July 12th, sailed, Braemar Castle, from Foochow, for London ; 18, arrived from London, for China and Japan, Naples, Malta. July 18, passed, from London, for China and Japan, Paraguay (str.)

THE MURDER OF MR. MARGARY.

THE reply of Lord DERBY to the question of Lord STRATHEDEN and CAMPBELL on the subject of the mission proposed to be despatched from Peking was hardly satisfactory. Considering that H.M. Government have not given any information on this subject since the promise made by Mr. DISRAELI some six weeks ago, we quite expected that Lord DERBY would have availed himself of the opportunity to make a statement on the whole subject of the attack on the Expedition. The advices received through the ordinary channels have been very contradictory. In the report of the reply of Lord DERBY it will be observed that no allusion is made to the Chinese Commissioner who is to accompany Mr. GROSVENOR and Mr. BABER, and this is the most important item. We trust that Lord CAMPBELL will not rest satisfied with the very scant information afforded. The following is the report of the subject :—

HOUSE OF LORDS.

(July 16th.) Lord STRATHEDEN and CAMPBELL asked Her Majesty's Government when the projected mission from Peking to inquire into the circumstances attending the murder of Mr. Margary would proceed, and of what persons it was intended to compose it.

The Earl of DERBY said that two gentlemen had been appointed to attend the inquiry which would take place in reference to the murder of Mr. Margary. One was Mr. Grosvenor, the Second Secretary of Legation in the diplomatic service in China, and the other was Mr. Colborne Baber, in the Consular Service. The selection of those gentlemen had been made by Mr. Wade, and it had been approved of by Her Majesty's Government. It was intended that those gentlemen should set out on their journey to the place of inquiry at the end of next month, as the Government were quite aware of the inexpediency of not allowing any unnecessary delay to take place, but there were some difficulties to overcome in regard to the long land journey through Southern China, and it would be necessary to wait until the great heats incident to that climate were over. The very object of the inquiry which those gentlemen would attend was to ascertain accurately all the facts and circumstances of the case, and therefore it was out of his power to discuss those circumstances now.

THE *Russian World* directs the attention of the Russian Government to the proceedings of the Americans in the Ochotsk Sea, and counsels them to take instant measures for neutralising the efforts of the United States of America to gain a footing on the Kurile Isthmus. If, it says, we let the Americans establish themselves there, a conflict between Russia and the United States will sooner or later become unavoidable, and in case of a war between the two Powers Japan will be against us. A war of this nature might also possibly bring about a separatist movement in Siberia.

THE "Occidental and Oriental" Company's steamer *Oceanic* arrived at San Francisco on the 29th ult., with advices from Yokohama to the 18th ult.

THE Madrid *Imparcial* states that a Chinese diplomatic agent will come to Madrid, and Chinese Consuls be appointed in Cuba.

LONDON: MONDAY, JULY 19, 1875.

THE NEW SEASON'S TEAS.

ONCE more we have a repetition of perhaps one of the most unaccountable phases of mercantile madness which occurs in any branch of business throughout the world. Ten steamers with 25,000,000 lbs. of the new season's tea have been despatched from Hankow during the space of ten days, and in two months the total shipments from China amount to near 50,000,000 lbs., or about one-third of the supply for the whole year. On what grounds has this undue pressure been carried out? Can it be assumed that the dealers in England are ready and eager to buy and stock themselves against a possible short crop? This has proved fallacious ever since the opening of the Suez Canal. Year after year has it been demonstrated that the dealers will only buy when the market is forced down by continuous "sales without reserve," in fact, completely smashed, as far as the importers are concerned. When we turn to the China end and to the buyers at Hankow, who so prematurely open the market and load off these steamers with such reckless haste that even the time necessary for despatching consignees' letters and bills of lading is not given, we are equally at a loss to account for the course pursued. What is the necessity, we ask, for the overstrained anxiety for "opening the market" when the results are shown, and proved year after year, to leave nothing but loss? Why cannot the buyers exercise the same mercantile wisdom as the Chinese seller? Why give in to the prices demanded when they have decidedly the best position, as the buyers, with the dollars ready. On this last occasion the market was opened on May 12, an earlier date than ever known. It is idle to suggest that the Chinese can hold out longer than buyers. The tea *must* be sold to foreigners, and being on the spot, ready for shipment, incurs certain expenses every day it is not sold and delivered. We repeat, with proper tact, the buyer has decidedly the best of it as to the power of commanding the opening price and in the quantity shipped off. There is no real necessity to force the enormous shipments we have recorded in the first two months. To assume that merchants of responsibility and capital are the men who enter on such wild and reckless operations is not reasonable; we can only conclude that this extraordinary folly is owing to a competition forced on by firms of no responsibility or capital, but who are unfortunately countenanced by banks who accept their drafts. That such a magnificent trade as the China Tea trade, should be so injudiciously handled as to be only a source of worry and loss to importers, is one of the most astounding spectacles on record in any branch of mercantile affairs.

THE WATER SUPPLY OF SHANGHAI.

THREE months' ago, when noticing the Customs' Medical Reports for the half-year ending March 31, 1874, we briefly alluded to Dr. JAMIESON'S remarks on the highly unsatisfactory state of the water supply at Shanghai, and we are glad to find that there is now some reasonable prospect of this condition of affairs being changed for the better before long, though we must own to some surprise that in a settlement, situated as Shanghai is, a matter of such vital importance to the well-being of the inhabitants should have been neglected, if not treated with supreme indifference, for so many years. We can understand that small settlements, like those, for instance, on the Yangtsze, whose municipal affairs are necessarily administered with extreme economy, and in which there is no room for private enterprise, are obliged to rest content with their daily supplies of mud and water, drawn from the bosom of the Great River, and trust implicitly in the virtues of alum and filters for their protection, but with Shanghai the case is totally different.

For some few years past the subject of the water supply has, we believe, been fitfully agitated in Shanghai, but as the agitation never led to any practical result, we must suppose that tolerably pure water was looked upon as too great a luxury for the inhabitants of the model settlement. More recently two companies,—the Shanghai Waterworks Company and the Loonghwa Company—have been proposed for the attainment of this most desirable object, but neither of these, it would seem, is destined to make its fortune out of the necessities of the settlement, for the Municipal Council is prepared to deal with the question of the water supply, and probably, all things considered, the matter will be best left in their hands. At the annual meeting of the ratepayers, held on the 18th of May, a resolution was passed, after a lengthy discussion, and after two hostile amendments had been negatived, authorising the Council "to take such steps as "may appear necessary to have the estimates for the water-"supply, as proposed in the Report from the Works' Com-"mittee, submitted to some competent authority; if re-"quisite, to engage an engineer for the purpose, and on such "report—if favourable—to obtain tenders from responsible "firms for carrying out the scheme which appears most "feasible." Mr. PURDON, the Chairman of the Council, introduced the resolution to the meeting with some very sensible remarks, which, as the result of the debate showed, carried conviction to the minds of the majority of those present. Sir EDMUND HORNBY started three objections to the proposal, the chief being "that anything "which a private company can do and is willing to try to "do, and which legitimately falls within the province of "a private company to do, private enterprise ought to be "allowed to effect." Much of the discussion which followed hinged upon this objection, in bringing forward which Sir EDMUND appears to have lost sight of a growing opinion in this country that matters of such great importance to the community as gas and water supply will be better entrusted to the management of a public body responsible for its actions to that community than to private and comparatively irresponsible companies. Mr. KESWICK made short work of the Chief Judge's objections, and maintained that "it was a public and not a private matter to provide water for a community." Later on in the meeting he spoke more explicitly, observing that "he thought the ratepayers should consider very "carefully before deciding whether it would not be better "to have a scheme from the Council [rather than those pri-"vate undertakings mentioned above] under such manage-"ment that they would be able to deal with it. They should "be careful not to part with the authority the Council has. "To him it was clear that the supply of water should be "a Municipal affair, as much as the care of the roads and "jetties, and not issue in a private undertaking. As a mat-"ter of finance also, if there were sufficient prospect of "emolument to induce two rival schemes, if the advantages "appeared such to private companies, it was right for the "Council to undertake the work. They would find private "individuals still ready to invest, and there could be no "fear of the tax involving hardship on the community." Mr. J. B. TOOTAL'S amendment, moved in the interests of the proposed Shanghai Water Works Company, and ably seconded by Dr. JAMIESON, did not find favour with the meeting after the common-sense way in which Mr. PURDON, and more especially Mr. KESWICK had put the whole question. In his speech Mr. TOOTAL made an allusion to "Hongkew wharves," which Mr. KESWICK very soon disposed of, and he was also very hard on the land renters. "He appealed," he said, "to the ratepayers, not the land "renters. The land renters,—where were they? Ab-"sentees, most of them, living on turtle and in luxury, "whilst their agents here were blocking up our homes and

Digitized by Google

"filling our streets with Chinese, and filth, and disease." But it was of no use, for the ratepayers would not listen to the voice of the charmer, and refused to give permission to the Shanghai Water Works Company to break up their streets. Mr. T. W. KINGSMILL'S attempt to shelve the question for a month met with no better fate, and the original resolution was then carried, which, we hope, will result in the Municipal Council being able, at no distant date, to give the settlement that supply of good, wholesome water, which it needs so much.

THE COMPRADORE SYSTEM.

AMONG the causes which have contributed to the number of frauds and defalcations which have had to be lamented in China there is probably none which has worked more powerfully than the Compradore system, especially in the lax manner in which it has been often conducted. Originating in the old days of China, when our relations with the natives were of a totally different character to what they are at present, the system of entrusting large funds and extensive business interests to the exclusive conduct of native employés has been perpetuated into times when neither the necessities of trade nor the advantages to be obtained by the position of the native so employed continue to exist. It is true that the functions of the Compradore have been of late years considerably curtailed; but he has not been even now reduced to the position which he ought to occupy under the altered state of things. The Compradore is no longer the only medium of communication between the native and foreign merchant; and consequently a large proportion of the sales and purchases are now conducted without him. But in many houses the Compradore is still entrusted almost exclusively with the monetary affairs of the business, and there does not appear any longer a necessity for a functionary of this kind. A native shroff is, of course, necessary for the conduct of such transactions as would in the ordinary course of a home business be managed by a cashier; but it is not necessary that large funds should now pass through the Compradore's hands, as was the case in former days, when the facilities for conducting business were very different from what they are now. At present there are numerous banks, with branches in all the leading ports of China, who are perfectly willing to undertake all such business for their clients, and to whom all funds of magnitude should be entrusted, in the same way as is done with the bankers of mercantile firms at home. No merchant would ever think of having thousands of pounds for a single day in his strong box, much less of entrusting it to any single employé, and there is in the present day no reason whatever why so obviously imprudent a system should be adopted in China. There have been several cases of late years in which the danger of such a course has been amply manifested, and although the Compradore is "secured," there is always great difficulty in getting the money from his sureties, and even when this can be done, the trouble, anxiety, and uncertainty which must always result from defalcations of the kind are uncompensated for. Altogether it is evident that the day has come when, if we wish to maintain our own in China, we must conduct business upon a much more rigid system than has hitherto been the case. It is true that of late years there has been an improvement upon the old extremely happy-go-lucky style of doing things in China, which has ruined many a house and blighted the career of many a promising young man; but there is still a great want of more prudence, care, and foresight, of more discipline and order in the conduct of business, before matters will be upon anything like a satisfactory footing. Above all, we are confident that the China trade will never regain its old standing and reputation until the sporting and speculative tendencies which have grown up like a rank weed from the fitful prosperity which followed the opening of the new ports in 1860 be entirely done away with, and until there be a higher appreciation of experienced, sound and reliable men in opposition to the shrewd, talented, speculative, and too often unscrupulous young sparks who have hitherto been the ideal of the "smart" commercial man in China. Private operations by employés in houses ought to be rigidly stamped out. The indulgence in time bargains, and other speculative transactions by men who have neither the experience nor the capital necessary to conduct such operations, has been the chief cause of the defalcations. Those who occupy positions of influence in the mercantile world should set their faces against all such practices, and give more encouragement to the less showy but steady, persevering, and reliable workers who must in all places form the great staple of the respectable and sound portion of any mercantile community.

WITH reference to the recent proceedings in the National Assembly of France, regarding the subsidy of the Messageries Maritimes, we understand that the Committee of the Assembly to which the Bill for terminating the mail contracts with the Company was referred, has received a communication from the Minister of Finance, who stated the result of certain negotiations which were opened. He announced that the Company had consented to a diminution of one million of francs on the amount of the subsidy, and to convey gratuitously the families of functionaries travelling on Government service. On the other hand, the Company demanded modifications in some of its services, and the extension of all the contracts to a uniform date in the year 1888. The committee has ratified this arrangement, and will recommend its adoption.

AT a valedictory dismissal in the Missionary College at Islington, the Church Missionary Society took leave of the Rev. J. BATES and the Rev. R. PALMER, who are shortly returning to their work in China; and also of the following additions to the missionary staff:—The Rev. J. C. HOARE and the Rev. W. S. BRERETON; and Mr. G. LANNING, who takes charge of the Mission School at Shanghai.

THE EASTERN TELEGRAPH COMPANY.

The half-yearly meeting of the shareholders in the Eastern Telegraph Company (Limited) was held on the 13th inst., at the City Terminus Hotel, Cannon-street, for the purpose of receiving a report from the directors, together with a statement of accounts, and declaring a dividend. The chair was occupied by Mr. John Pender, M.P.

The Chairman having briefly alluded to the figures as given in the report, said that, speaking of cables generally, he might say the principal expenditure of the company had been on the Lisbon cable. Whether the cable was defective or was not laid down properly at first he did not know; but, on the other hand, the Red Sea cable had cost the company comparatively nothing since it was laid. The engineer's report showed that none of the company's cables exhibited signs of electrical deterioration; but, on the contrary, the longer they remained in the water the greater was the improvement in the insulation, as the statistics showed that there had been a general and gradual improvement, and in some cases the insulation showed an improvement of from 45 per cent. to 75 per cent., so that experience showed, therefore, that submarine cables would be rather long-lived than otherwise. The traffic to Egypt had not increased in the manner in which the directors could have wished, even with the extra facilities which had been afforded. The reason was that trade had been so bad that gentlemen hesitated before expending a sovereign in sending a telegram. The Indian traffic remained much the same as when he addressed the shareholders six months ago, and the company was suffering from the badness of trade in another sense, because gentlemen were devoting their ingenuity to inventing and perfecting codes, so that twice or thrice as much could be put in one word than hitherto, or, in other language, "packed" messages were sent—a thing which the company had complained of at first. The position of the reserve fund was this, that it had been increased to £159,000, of which £70,000 was invested in good Government stock and £60,000 in cable capital in stores, which could be at any moment recouped by the issue of the surplus shares, amounting to 10,300, and the balance was at the bankers', lent upon first-class security. When the company took over the Levant system the board thought it would cost £250,000, but they only issued debentures for £200,000, and so the reserve had been kept in working. He concluded by moving the adoption of the report. Lord William Montagu Hay briefly seconded the motion.

A conversational discussion ensued, in which Messrs. E. J. Herapath, G. Baraham, W. Fox, J. Veeres, F. Walker, G. Ford, and S. Haywood took part. In reply to questions, the Chairman said the company was only getting half the amount for messages which it received at first, so that, though the traffic had increased, yet there had been no corresponding increase in the profit, though the cost of working the traffic had been considerably augmented. In bad times the work of the directors was much more onerous than when things were going on prosperously. Looking at the risk which submarine cables ran he thought they ought not to be satisfied with a return of less than 10 per cent. The report was adopted, and the dividend of 2s. 6d. per share, making 5 per cent. for the year, declared.

The proceedings closed with a unanimous vote of thanks to the chairman and his colleagues.

Monetary and Commercial.

The absurdity of maintaining the old custom of six months' sight bills against shipments from China was fully demonstrated in the drafts drawn against the teas per *Glenartney*, which vessel arrived and landed her cargo before many of the drafts were even presented. When sailing ships took four months to come home, *via* the Cape, there was some sort of necessity for the six months' usance, but it is needless now, and fraught with injury to both bankers and responsible merchants.

At a meeting of the creditors of Messrs. Rainbow, Holberton, and Co., 15A, St. Helen's-place, merchants, a statement of affairs prepared by Messrs. Turquand, Youngs, and Co. showed the total debts to be £61,515, with assets £6,336. The liabilities on account of A. Collie and Co. amounted to £53,170. Resolutions were passed to liquidate the estate by arrangement, and Mr. John Weise, of Messrs. Turquand, Youngs, and Co., was appointed trustee, with Messrs. Phelps and Sedgwick as solicitors to the estate. Sympathy for Messrs. Rainbow and Co. was expressed by the creditors.

It is announced that the half-yearly interest due 1st August next on the Imperial Government of Japan Customs Loan for £1,000,000 will, together with the bonds drawn on the 6th May last, be paid on and after the 3rd proximo at the counting-house of Messrs. J. Henry Schroder and Co.

The directors of the Globe Telegraph and Trust Company announce that, subject to the final audit, the accounts show a balance available for dividend which will enable them at the general meeting on the 30th inst. to recommend the declaration of a final dividend of 3s. per share on the preference shares, making, with previous quarterly payments, 6 per cent. for the year ending 18th July, 1875, and of 2s. 6d. per share on the ordinary shares, making, with previous distributions, 5 per cent. for the year ending the same date.

The report of the Ouvah Coffee Company for the year ending May 31 states that the sales amount to 9,372 cwt. of coffee, as against 9,447 cwt. the previous year, and the net average price realised per cwt. is 87s. 4d., against 95s. 9d. for 1872-73. The net profit for the year, after paying all expenses in Ceylon and London, is £18,136. To this has been added the amount of £2,608 brought forward from last year's operations, making in all £20,744. But of this sum £2,000 has been placed to reserve, as a substitute for the debentures paid off in January last; an *ad interim* dividend of 10s. per share has already been paid, and the directors now recommend the payment of a further dividend of £1 per share, making 15 per cent. for the year. There will then remain a balance of £3,744 unappropriated.

The report on the position of business in the Manchester Market is again devoid of interest, the transactions having continued on the same limited scale so long prevalent. There is no very appreciable change in values, but there has been a more general desire to meet buyers' views, though the reductions asked for have only in a few cases been conceded; business is consequently checked. Yarns show more weakness than goods, but in both the increase of stocks is beginning to be felt.

At a special meeting of the shareholders of Hester and Co. (tea merchants), it was resolved, after the difficulties under which the company was labouring had been explained by the chairman, to voluntarily wind up the company, with Mr. Charles T. Marzetto and Mr. H. M. Carter as liquidators, with authority to sell the assets of the company, and the company to be called the Tea Company (Limited), in other words, to reorganise the company.

The solicitors of Messrs. J. P. Westhead and Co., of Manchester, have issued a circular, in which they inform the creditors that after a careful examination of the affairs of the firm and of its individual partners, by Messrs. Delloitte and Halliday, public accountants, the assets are found to be sufficient, not only to pay all liabilities in full, but also to show a very large surplus. The circular adds :—"It is impossible for the senior partner at his time of life actively to direct a large business, and under the advice of his friends, and with the concurrence of his partners, he has therefore decided to transfer the assets and business of the firm to a company to be formed with limited liability."

An insurance case, that of Ionides *v.* the London and Provincial Insurance Company, which lasted during the whole of the past week in the Court of Queen's Bench, is worthy of notice, if only for the proof it affords of the necessity for reforms in our method of legal procedure, and for the light it casts upon the law's delay. This case was on the cause list for trial no less than three years ago, but the sittings closed before it could come on, and it has been awaiting its turn ever since. The legal sittings in the Queen's Bench terminated on the 10th inst., but it was arranged that a special day should be fixed to conclude it.

The deliveries of tea from the bonded warehouses in London for the week ended the 10th inst. amounted to 3,104,611 lbs., of which 2,218,741 lbs. was for home consumption, 526,657 lbs. was removed coastwise, 322,856 lbs. was exported, 32,393 lbs. was removed coastwise for shipment, and 3,964 lbs. was for ships' stores. The duty received was £55,469, being an increase of nearly 20 per cent. on the preceding week.

Messrs. Davidson and Co. have been appointed Lloyd's agents at Ningpo.

Delays of two or three days have occurred in the delivery of telegrams from China, the wires being out of order.

There has been a fair inquiry for Bar Silver; the price, however, remains as last quoted, viz., 55 11-16d. per oz. standard. Mexican Dollars have realised 54½d. per oz.

The amount of bullion per P. and O. Steamer *Khiva*, from Southampton on the 15th inst., was :—In silver to Penang, £10,000; to Singapore, £10,000; to Hong Kong, £9,372; to Shanghai, £1,000; total, £30,372.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for June show that the declared value of the exports in the month was £18,336,129, against £19,367,613 in June last year, or a decline of 5¼ per cent., and the total for the first six months of this year amounts to £109,843,350, against £117,831,214 in the corresponding period in 1874, a decrease of 6¾ per cent. The value of the imports in June was £31,948,826, against £34,028,658 in the same month last year, or 6½ per cent. less, and for the six months £183,844,087, against £186,398,369 in 1874, or a diminution of 1½ per cent., but 1 per cent. more than in the first half-year in 1873. Considering the commercial disturbances which took place last month, these figures can hardly be deemed to be unsatisfactory; but the effect on the exports of cottons is apparent, while in the majority of other articles, manufactured iron excepted, there has been an actual increase in the quantities shipped. In textile fabrics cotton yarn shows a decrease of 8 per cent. in quantity and 10 per cent. in value; cotton piece goods a decrease of 18¾ per cent. in quantity and 15 per cent. in value (almost exclusively in the exports to British India); linen yarn, an increase of 21 per cent. in quantity and 37 per cent. in value; linen piece goods, an increase of 5 per cent. in quantity and 1 per cent. in value; woollen yarn, an increase of 25¼ per cent. in quantity and 26¾ per cent. in value; woollen cloths, an increase of 1¾ per cent. in quantity and 4½ per cent. in value; worsted stuffs an increase of 1 per cent. in quantity, but a decrease of 1½ per cent. in value; iron and steel an increase of 5 per cent., in quantity, but a decrease of 13 per cent. in value. Coal shows an increase of 31 per cent. in quantity, but the increase in value is only 4 per cent. In the imports, corn shows a total of value of £1,906,600, against £2,551,528 last year, or a decrease of 25 per cent.; but the decrease in the quantity is only about 3 per cent. Raw cotton has decreased 22 per cent. in quantity and the same in value; flax decreased 16 per cent. in quality and 13 per cent. in value; raw silk decreased 46 per cent. in quantity, but as much as 51 per cent. in value; wool increased 37½ per cent. in quality and as much as 50½ per cent. in value. Tea has increased 12 per cent. in the total value, but the quantity entered for home consumption has increased only about 2 per cent.; the total value of coffee has decreased 13¾ per cent., and the quantity entered for home consumption about 14 per cent.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East :—

COTTON YARN.

ARTICLES OF IMPORT.

There has been no change of any importance in the Produce Markets during the week. Large supplies of Tea have met a dull market, and prices show considerable decline. The market for Coffee and Rice has slightly improved, but all other articles continue very quiet.

TEA.

The market the past week has been in a very unsettled state, owing to forced sales, and prices compared with the range for Teas, ex Glenartney, show in some cases a decline of 4d. per lb. Prices are by no means low, but owing to the excessive price paid in China the out-turn to importers is a loss of 1d. to 4d., with a few exceptions. Dealers are still very cautious buyers, believing that with the enormous supplies to arrive during the next few weeks prices will settle down to a lower range; they are determined not to buy forward, having suffered heavy losses through depreciation on Scented Green Teas, by reason of over supplies from China. Quotations are 1s. 1d. to 1s. 5d. for good common Shantam to medium quality tarry Oonam kinds, 1s. 4d. to 1s. 8d. for good to medium Oopacks, 1s. 9d. to 2s. for fine Pekoe flavoured kinds Ooanfa and Ningchow, 2s. 1d. to 2s. 6d. for finest quality. New-make Congou sells at public sale at 10d. to 10½d. for ordinary common, being full quotations, but really good quality from this district realises only 1s. to 1s. 1d. per lb. Scented Caper could not well be worse; old Season's have sold at 6d. to 8d. per lb. below the counterparts of some six to eight months' since, and new-leaf generally is most disappointing, being deficient in scenting properties. The low prices ruling for months past should long since have checked supplies, but nothing short of absolute ruin will remedy the disastrous business.

Messrs. Goddard, and Co.'s Circular says:—The market, which was very quiet at the date of our last, with the cargo of one steamer of New Season's Moning to hand, has given way considerably with further arrivals; privately, sales were most difficult, the trade refusing to buy, and at auction prices have fallen 2d. per lb. for the medium to fine grades, of which the bulk consists, the finest and choice qualities, which are comparatively more scarce, have better maintained their value. Privately sales have been made as low as 1s. 1d. Deliveries from London, from 1st to 12th instant, inclusive, or ten days, 1875, 5,130,624 lbs., against ten days, 1874, 4,946,550 lbs. Imports, deliveries, and stocks in London, from 1st January to 30th June:—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
44,551,359	60,469,554	80,274,576	88,058,693	53,573,346	50,821,304

Messrs. Arthur Capel and Co.'s Circular says:—Since last week four more steamers have arrived with new season's black-leaf Congous, thus largely increasing our supplies on offer, whilst the demand still remains very inactive; nor is this to be wondered at in the face of the evident anxiety on the part of some importers to realise, several parcels having been offered at public auction without reserve even before the Teas were in the warehouse. The result has been a decline of fully 2d. per lb. on the fair kinds, 1d. to 1½d. on medium to good medium, and 1d. per lb. on fine kinds, and even at this reduction the trade buy only sparingly, whilst up to the present time exporters have scarcely bought at all.

Congous.—Red-leaf kinds: There is no change to notice in prices in these kinds. Some arrivals of new season's Pak Lins have met only with a moderate demand, prices ranging from 2s. to 2s. 3d. per lb., the quality being hardly up to last season's. Black-leaf kinds: Old season's show no change in prices, sales being to a moderate extent. In new, fair kinds have sold from 1s. to 1s. 2d. per lb., fair to good medium from 1s. 3½d. to 1s. 8d., fine from 1s. 9d. to 2s. 2d., and finest 2s. 4d. to 2s. 7d. per lb., showing a marked decline on the opening rates for all but finest qualities. New-make kinds have been neglected, and prices for common are ½d. per lb. lower. Some new season's Oolongs have been sold from 1s. 2d. to 1s. 8d. per lb.; in old but little has been done. Souchongs remain without change. *Scented Teas.*—Canton Capers of new season sell very slowly, the bulk of them being deficient in scent, and prices have been rather easier. A few parcels of fine have sold at full prices. Orange Pekoes: Common to fair have sold from 11d. to 1s. 1d. per lb.; fine remain firm. In Foo Chow kinds, both of Caper and Orange Pekoe, there is nothing of interest to report. *Green Teas.*—The market remains dull and inactive; but very few parcels have been offered at auction, and privately it is difficult to sell; prices show no material change.

Messrs. W. J. and H. Thompson's Circular says:—Since our last, four steamers have arrived from Hankow, but the trade generally showing no inclination whatever to buy, only a trifling amount has changed hands, and these at rather irregular rates, but lower, for all fair to good medium grades. Foochow Congous: Some parcels of new Paklings have been sold from 2s. to 2s. 3d. per lb. As regards old imports there is little of any kind left in first hands; quotations are unaltered. Black-leaf Congous: Several parcels of fair to medium grades have been sold at auction at 1s. 1½d. to 1s. 6d. per lb., showing 1d. to 2d. decline; good to fine, a few sales made privately at 1s. 7d. to 1s. 10d. per lb., at about 1d. per lb. decline; fine to finest are generally held for late prices. Tayshan Congous: Fair to medium have been sold at 1s. 1d. to 1s. 4d. per lb. In Scented Teas there is no new feature. Good common Scented Orange Pekoes, new import, have been sold at 10½d. Green Teas are without any inquiry.

	1875. lbs.	1874. lbs.
United Kingdom stock, on June 30, 1875, was estimated at	58,500,000 ...	61,500,000
Cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included	13,354,000 ...	2,956,000
Export of New Season's Tea, from the whole of China, to July 12, on the water, is estimated at about, against same time last year	44,000,000 ...	44,000,000
	115,854,000 ...	108,456,000

SILK.

The market has shown no alteration during the week. In the public sales of China Silk Piece Goods on the 14th inst. the few Pongee Handkerchiefs offered, 550 pieces only, sold well at 18s. for plain white, 19s. 10d. for figured white, 18s. for plain crimson, and 23s. 6d. for figured crimson; 50 pieces of Pongee Silks, 30 yards, were sold, and of 1,000 pieces plain white China Silks, 13 yards by 15 inches, thin silky quality, 500 were sold at 8s.; 350 plain white Crape Shaws were bought in at full prices.

COFFEE.—The market has continued very firm, and moderate supplies of Plantation Ceylon at sale have been taken off readily at prices in favour of the importer. Quotations:—Plantation Ceylon, triage and ordinary 82s. to 96s., small to low middling 98s. 6d. to 104s., middling to fine middling 104s. 6d. to 110s., bold 111s. to 118s., peaberry 124s. 6d. to 127s. 6d.; 100 bags Manila sold, Zambranza at 87s. to 83s.

COTTON.—The tone of the market has been quiet, and the sales, which are confined to spot parcels, are at about previous rates, viz.—Tinnivelly, 5¼d. to 5⅝d.; Western Madras, 4 9-16d. to 5d.; Salem, 5½d.; Bengal, 4⅜d.

CANES.—In auction, 119,992 Tonking were bought in at ⅜d. to ¾d.; 4,000 sold at ½d. 22,000 Yellow Bamboo bought in at 1½d. and 18,000 Whanghee at 1⅝d. to 2d.; 52,250 Partridge small part sold at ¾d. to 2d., the bulk bought in at 1⅞d. to 2½d., and 900 Manoo at 7d. each.—Rattans, 2,200 bundles Singapore sold at £15 5s. to £21 5s. per ton.

COIR GOODS.—The public sales have been small, and passed off with moderate spirit. Prices underwent very little change, but occasionally were rather favourable for buyers.

COCOA-NUT OIL.—There has been a steady market, new Ceylon ruling at £37; Cochin at £43 to £43 10s.; but until the quality of recent arrivals is known, which will determine the price of fine, business is suspended.

PLUMBAGO.—In auction, 28 barrels Ceylon sold, lump at 15s. 6d. to 16s., chips at 9s. 6d., dust at 8s. 3d. per cwt.

PEPPER.—*Black* in auction met a steady demand, and brought quite previous rates, but only 1,127 bags were offered, of which 870 bags sold—viz., 178 bags Singapore at 5½d. for fair current and one small lot at 5⅝d., 183 bags Saigon at 4½d. and 516 bags Penang at 4⅝d. to 4½d. per lb. *White* was also steady. Of 496 bags offered, 396 bags sold, fair Singapore at 6⅝d. and common at 6½d. per lb.

RICE.—The market has somewhat improved, and the demand has been steady for floating cargoes of soft grain, prices closing firmer. On the spot 200 tons old heated Bengal have changed hands at 10s. 7d. per cwt. The coast cargo Rangoon, per J. W. Holmes, 1,397 tons, has been taken at 5s. 2½d., Bremen; also the cargo Rangoon, per Winchester, 1,405 tons, at same price, for Bremen. Capsie Glen, containing 793 tons Rangoon, at 8s. 3d.; Dovre, containing 1,823 tons Bassein, April sailing, at 7s. 10½d.; and Adelina, containing 732 tons Bassein, May sailing, at 8s. per cwt. Thursday 1,500 bags old Necransie sold at 7s. 9d., cash, and three cargoes afloat at firmer prices, one of 1,400 tons Rangcon at 8s. 1½d., ex ship; one of 730 tons ditto, at 8s. 3d., Continental terms; and of 1,000 tons Necransie, at 7s. 10½d., Continental terms.

SUGAR.—A quiet tone has continued to pervade the market, but some improvement in the demand for West Indian sorts has been manifested. In East India kinds nothing has been done.

SPICES.—*Cinnamon:* 50 packages bought in at 2s. 4d. to 2s. 11d., and 200 bags Chips at 6d. per lb. *Mace* is unchanged. *Nutmegs:* But few parcels offered, and full rates obtained for the portion sold. Of 20 packages Penang 15 cases sold, fine brown, average 68 nuts to the lb., at 4s. 1d., 77's at 3s. 9d., and 130's at 2s. 6d. to 2s. 7d.

TAPIOCA.—547 bagsSingapore bought in, good bold at 2⅝d. per lb.

TIN continues dull, and a further reduction has occurred. Quotations are:—Straits on the spot, £78 10s.; afloat £78; Banca, £89; Billiton, £83 per ton.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 30s To Singapore: 19s. To Batavia and Sourabaya: 23s. To Galle: 21s.

CASUALTIES.

PORTLAND, O., JUNE 21.—The Forward, Strachan, which arrived here June 10, from Hong Kong, struck the ground on entering the Swash Channel, whilst in charge of a pilot, and continued to strike for a distance of about two to three cables' lengths, when she beat over into the South Channel, with part of false keel carried away. The master states that she makes very little water at present, and as far as can be ascertained has sustained only trifling damage. She will be surveyed as soon as the cargo is discharged.

MISCELLANEOUS.

GIBRALTAR, JULY 11.—Passed, Glenfalloch (str.), from Hankow, for London.

PORT SAID.—Arrived, July 4, Glenfalloch, from Hankow, and proceeded for London; Stentor, from Liverpool, for China; 14, Gordon Castle, from Hankow, for London; County of Sutherland, from Liverpool, for Batavia.

SUEZ, JULY 8.—Arrived, Lotus, from Hankow, for London; Sumatra, from Batavia, for Nieuwe Diep; 10, State of Virginia, Agamemnon, both from Foochow, for London;, 11, Braemar Castle, from Foochow, for London.

ST. HELENA.—Passed, June 13, Usko, from Rangoon; 16, Ole Smit Ploug, from Akyab, both for Falmouth; 18, Baron van Pallandt van Rosendaal, from Batavia, for Amsterdam.

PAU TAH.—In consequence of the damage received by this steamer through striking on Roseneath Point, she will remain in dock about two or three weeks; some of the plates will have to be removed from her bottom, and sundry other defects made good before she will be ready to take another trial trip. Captain Gibbon, who took out the Daybreak for the China Merchants' Steam Shipping Company, in Jan. 1873, has arrived from China, and will take command of the Pau Tah so soon as she is ready for Sea.

FUNG SHUI.—This steamer, now building at Messrs. Denny Brothers, Dumbarton, for the China Merchants' Steam Shipping Company, is a sister ship to the Pau Tah, and will be launched next month.

LAUNCHES.

Another steamer has been built by Messrs. John Roach and Son, of Chester, Pennsylvania, and was launched from their yard on the 5th ult., for the Pacific Mail Steamship Company; this fine vessel is 3,000 tons burden, and has accommodation for 153 cabin and 1,200 steerage passengers; on leaving the ways she was named City of New York.

NOTICE TO MARINERS.

China.—Pescadores Islands.—Intended Light on Litsitah Point.—The Customs Department at Shanghai has given notice that a lighthouse will shortly be erected close to the present native light tower on Litsitah point, south-west extremity of Fisher island. The light will be a *fixed* white light, elevated about 220 feet above the level of the sea, and in clear weather should be seen from a distance of fifteen miles. The illuminating apparatus will be dioptric or by lenses, of the fourth order. The tower will be of iron, and circular in shape, 33 feet high, painted black, and the dwellings and boundary wall white. Approximate position, lat. 23° 32′ 45″ N., long. 119° 28′ 15″ E.

China.—Amoy Harbour.—With reference to Notice to Mariners, No. 84, dated 15th June, 1875, on the construction of a lighthouse and intended exhibition of a light on Tsing-seu island, information has been received that the above light is intended to supersede the one which it was contemplated to exhibit on Chih-seu island, and which was mentioned in Notice to Mariners No. 110, dated 1st Oct., 1870.

THE receipts of the Sues Canal Company in June reached 2,115,000f. received from 108 vessels, against 1,429,373f. and 82 vessels in 1874 and 1,699,017f. and 87 vessels in 1873. The tolls in the first six months amounted to 15,259,170f., against 12,611,949f. in the first half of 1874, and 11,846,309f. for 1873. The increase in the traffic is even greater than shown by the receipts, as during the first five months of 1874 the dues were levied on the gross tonnage.

SUNDRIES PER "LATHLEY RICH," FROM NEW YORK, FOR YOKOHAMA, JUNE 17.

3 bxs. harness		3 do. vices	20 doz.

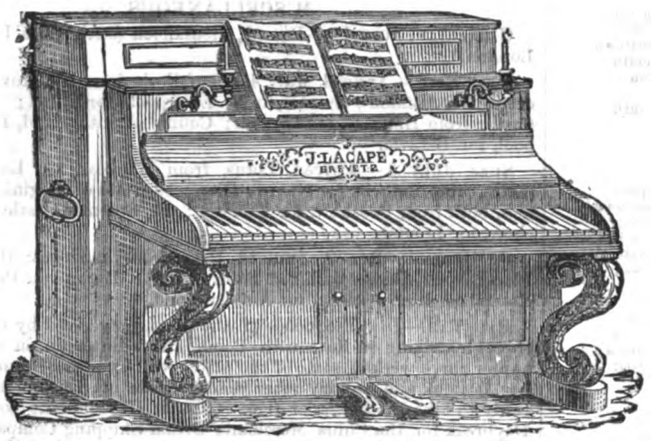
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. Orders should be accompanied either by a remittance, or a reference for payment in London. All communications to be addressed, and remittances made payable, to

LONDON—Show Rooms, 45, Oxford-street, W.

BIRMINGHAM—Manufactory and Show Rooms, Broad-street. Established 1807.

NOTICE.

MESSRS. JUSTUS LEMBKE and Co., of Hong Kong, have established a BRANCH of their Firm at HAMBURG, under the charge of Mr. PAUL EHLERS, who is authorised to sign the Firm per procuration.

Part First now ready.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—By GEORGE ASHDOWN AUDSLEY, Architect; and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says:—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

For particulars apply to the Secretary, at the Publishing Office, 13, Hackin's Hey, Liverpool; or to

H. SOTHERAN and Co., London.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,
48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Makers of Epps's Glycerine Jujubes (throat irritation).

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter, or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s. 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL BACKHOUSE & CO., LEEDS

* By Pacific mail *via* San Francisco received July 19.

THE MAILS, &c.

The French mail, bringing the above advices from China and the Straits Settlements, was delivered, *via* Marseilles, on the 23rd inst., being three days early. There are no later Japan advices. The next inward (P. and O.) mail, with advices, Yokohama 9th Shanghai, 13th, Hong Kong 19th, Singapore 27th June, which is due, *via* Brindisi, on Monday next, the 2nd proximo, left Galle on the 9th inst, one day later.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Djemnah*, July 21.—From Yokohama: Mr. Bryner. From Shanghai: Mr. Carr and family, Mr. Gallagher, Mr. Bailey, Mr. Bateman. From Hong Kong: Messrs. Casanova, Kerr, Smith, Hart, Berger, Caldera. From Saigon: Messrs. Gras, Gadras, Pegollo. From Batavia: Mr. De Wiet. From Singapore: Messrs. Hinniknott, De Equiradu, Negus, Mulet, Chevillard, Mac Smith. From Galle: Messrs. Robertson, Wealey, Herring, Anderson, Jaunet, Mr. and Mrs. Boyd, Mr. and Mrs. Rudd.

PASSENGERS OUTWARD.

Per P. and O. steamer *China*, from Brindisi, July 26.—To Shanghai: Mr. W. H. Tapp.

Per P. and O. steamer *Bokhara*, from Southampton, July 29.—To Yokohama: Mr. and Mrs. Jackson and two children. To Shanghai: Mr. F. J. Marshall. To Hong Kong: Navigating Lieut. J. Dixon, Lieut. H. H. Harward. To Singapore: Major R. W. Davies. To Ceylon: Mr. J. P. Gadesden.

Per P. and O. steamer *Lombardy*, from Southampton, Aug. 12.—To Hong Kong: Mrs. E. Moore. To Ceylon: Mr. Cowley.

Per P. and O. steamer *Malta*, from Venice, Aug. 20.—To Yokohama: Rev. and Mrs. S. G. McLaren.

Per P. and O. steamer *Baroda*, from Brindisi, Aug. 9.—To Singapore, Mr. Robertson.

Per French steamer *Anadyr*, from Marseilles, August 1.—To Yokohama: Mr. Seconda Salla. To Batavia: Mr. Van B. Vaanders. To Singapore: Mr. and Mrs. Van der Erb.

Per French steamer *Djemnah*, from Marseilles, Aug. 15.—To Galle: Mr. Thackwell, Mr. A. Gray.

Per French steamer *Tigre*, from Marseilles, Aug. 29.—To Galle: Capt. Fairlie, Mr. Elphinstone, Mr. and Mrs. Cameron.

Per French steamer *Asa*, from Marsellles, Sept. 12.—To Shanghai: Mr. J. C. Farnham. To Saigon: Mr. A. Spooner.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Shanghai: Mr. and Mrs. Vardel.

Per French steamer *Iraouaddy*, from Marseilles, Oct. 10.—To Singapore: Mr. and Mrs. Goldie, Mrs. Spooner, Mrs. K. B. Spooner.

Per steamer *Glenartney*, from London, July 23.—To Singapore: Mrs. H. Brown, Mrs. and Miss Vaughan.

Per steamer *Antenor* (Holt's line), expected to arrive July 26.—From Shanghai: Mr. R. W. Hurst.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 19th inst., and published in our last issue.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

If a western traveller had arrived at this place from Europe, *via* Russia, on the morning of the 21st May, he would, if he had stood on the Bund at eight o'clock in the morning, when the usual daily gun was fired from the British gunboat and the flag of England hoisted, have been astonished to see the foreign anchorage of the port of Tientsin without a single foreign merchant vessel moored in it, either steamer or sailing vessel; and might, if he had never read of the trade of Tientsin, have naturally jumped to the conclusion that there was very little foreign trade carried on in this part of China. The next morning, at the same hour, the foreign merchant shipping was represented in this port by an American three-masted schooner, laden with Fuhchow wood.

About noon on the 21st May the regiment—one thousand strong—of foreign-drilled foot soldiers, armed with muzzle-loading Enfields, which had been ordered to Newchwang by the command of the Central Government, marched down the Taku-road, situated at the west of the British settlement, for Taku; where it embarked in the C. M. S. N. Co. steamer *Yungching* and the Chinese gunboat *Chinhai*, on the 23rd. On the 27th, the cavalry, five hundred strong, and the horses of the artillery, also left Tientsin for Newchwang, but proceeded there by land, through the Shanghai Pass, and not by sea. It is stated that the commander of the forces at Tientsin, General Chin, was obliged to enrol, in order to make up the complement called for by the Central Government, a number of the men of the Southern legion, people say about thirty per cent. of the forces going to Newchwang. These are quite the men, from what we have hitherto heard of them, likely to join the insurgents as soon as they can conveniently do so, after reaching the field of action and coming face to face with rebels.

On the morning of the 24th May, about seven o'clock, a south-west gale began, and all day we had it continue, with much local dust. What is now wanted at Tientsin to make us drink the full cup of bitterness is an earthquake to shake the roofs of our houses over our heads; after that a change may take place in our favour, to make a residence in Tientsin bearable. The 24th was the Queen's birthday. As the gale prevented the British gunboat being dressed with her flags, and as the residents near to the men-of-war anchorage have objected to the vessels-of-war firing salutes, Her Majesty's subjects at Tientsin have had to dispense with any celebration of the day, and to be content with simply wishing her many returns of it.

Digitized by Google

I hear of a very serious burglary committed about a month ago at the house of Mr. Boad, at Taku, and for which no redress has yet been obtained. It seems that Mrs. Boad was awoke one night, in her husband's absence, by hearing people in the room, and on asking them what they were doing, received the cool reply, "belong rob the house." And two of the burglars forthwith attempted to strangle her. Being a strong woman she was fortunately able to save her life, but could not prevent the robbers decamping with their gains. The case has been reported by Mr. Vice-Consul Middleton, and Li Hung-chang promised Mr. Mongan that he would send orders to have the thieves arrested. Nothing has, however, yet been done, and it is important that the case should be again urged strongly on the authorities. The Chinese about Taku are a very rowdy lot, and, if they find these ruffians are not arrested, will draw their own conclusions that foreigners are powerless to obtain redress, and may be robbed and maltreated with impunity. We ought to insist on the establishing of some better means of keeping order at Taku. The officials, if they can be so called, who are at present charged with the duty, live in places where Shanghai people would not like to see their Chinese servants housed, and have not much better pay than those servants receive. How can they be expected to keep up a fitting position, or to inspire respect among the people? It is no use urging the present case on them; it must be taken higher, and redress be insisted on.

I have no political news from Peking. Here, likewise, nothing has taken place of importance to be mentioned in the Press; I am told that altogether two thousand men—foot, horse, and artillery—left this place and Taku for the seat of trouble in Manchuria. The rumour is that some natives of Tientsin are the leaders in the insurrection, and that their forces have up to the present been beating the Imperial forces wherever they have met in the field. They are said to be fully armed with foreign rifles, and even field-pieces of foreign make. The population here have no hopes that the force which has just left here will be able to stand up against the rebels. We shall soon hear, I imagine, of a fresh war-tax being levied to pay for the expenses incurred through an army being sent from China proper to Manchuria.

The correspondent of the *Celestial Empire* writes:—In reply to the joint letter of the Consuls to the Viceroy setting forth the facts of the finding of the picture representing the massacre of foreigners by Chinese, a reply has been received, which is everything that could be desired. Attention is called to the fact that on the occasion of former complaints, the pictures were seized and the blocks destroyed, and a proclamation issued by the Taoutai. The present case is taken to be that of ignorant persons in remote and rural districts, beyond the natural observation of officials. The Tientsin and Customs Taoutais are ordered to send deputies to the place in question, to join the local magistrates in a thorough search for these pictures and the blocks, punishing offenders according to law. They are also to issue interdictory proclamations enjoining local officials to make inquiries, and to check idle rumours among rustic people, and this in the interest of the welfare both of Chinese and foreigners. If the subordinate officials concerned manifest the least energy in the case, there is some reason to hope that we shall have seen the last of a style of painting which has never been popular among the foreign community.

SHANGHAI.

The present mail brings advices from this port to the 6th June; no later mail from London had been received. The following summary of news is from the *North China Herald*:—

In view of the decision given by the arbitrators in the Yang-king-pang Encroachment case, the French Council ask the English Council to join them at once in determining a future bund line. The construction of the Honan-road bridge will be at once gone on with. This bridge, it will be remembered, was ordered before the difficulty about proportionate payment arose, and is paid for in equal shares by each municipality. A piece of land necessary to widen the Rue du Consulat near the Bund has been bought at the rate of Tls. 5,000 a mow; another piece near the Rue Montauban has been bought at the rate of Tls. 1,000; the Jesuit Fathers have given up some other portions gratuitously. The Council have delayed deciding upon Messrs. Butterfield and Swire's application to build a shed on their wharf. The constitution of an assessment committee was resolved on, in the manner previously mentioned. The Council wish to decide on a line of demarcation for the quays on the Hwangpoo, off the French Concession, agreeing with the frontage line of the other settlements; the work has been entrusted to Mr. Kingsmill. The plan will be submitted to the Consuls when decided on, with a representation of the necessity for a uniform line being decided on.

The English Council are in correspondence with the Trustees of the General Hospital about plans, site, &c. The knowledge that the lease of the building on the French Bund expires on the 31st December evidently weighs on the trustees, but it would seem impossible that a new hospital can be built and ready for occupation before that date, so there is no object in deciding hurriedly. An arrangement to continue for a while in the present building, or some other interim arrangement, will have to be made anyhow. A rather warm correspondence has passed between the two Councils, on the subject of Yang-king-pang bridges. The French Council threaten to "appeal in the proper quarter" to have the discussion as to the proportion of expenditure on the two bridges decided in another manner than that proposed by the English Council, which they say is equivalent to trying whose patience will last longest. We do not exactly see where the authority exists, that is to constrain this municipality to spend more money on bridges than it chooses. The proposal to halve the cost is a strictly fair one, and we presume it will be adhered to. It is unfortunate that the division of the foreign settlement into two municipalities allows such questions to arise. The Council took the opportunity of Mr. Mitchel's departure from Hong Kong to acknowledge the desire he has always shown to consult the convenience of the community in working the Post-office.

The A. D. C. have given their fifth and last performance for the season, and, with marvellously good luck, hit upon a cool night for the event. On the day the first announcement was made the thermometer stood at 88. Thanks to the subsequent change of weather, it had fallen to 67, and people could look forward with pleasure to the evening's entertainment. The pieces selected were *Tweedleton's Tail Coat*, *Cox and Box*, and *My Dress Boots*. The first and last were rather trifling pieces, of which we can only say that the most was made by the actors. *Cox and Box* was the great success of the evening, and we think we may say of the season.

A Naval Court of Inquiry sat at the British Consulate on the 4th June, to investigate the circumstances attending the wreck of the British brig *Georgina*, on the Block-house shoal, on the night of the 9th May. The Court censured Captain Mitchell for running so far up the Yangtsze at night without a pilot; but, taking all the facts into consideration, returned him his certificate of competency.

The magistrate of Quinsan has come down to Shanghai for the purpose of trying the two men concerned in the attack on Mr. Cooper. But owing to the unavoidable absence of Mr. Cooper and others of the witnesses, Mr. Medhurst has arranged with him to let the case lie over till their return, when the magistrate will either come down again, or, if he prefer, try the case in the presence of a Consular officer at Quinsan. The wounded man has also been produced, and was examined by Dr. Johnston. The Quinsan magistrate, Mr. Davenport, and Chen, the magistrate of the Mixed Court, were present. The man was led in in the usual Chinese style—when it is thought necessary to make a pretence of grave injury—supported by a bearer under each arm; but we understand that Dr. Johnston's examination quite substantiates Mr. Cooper's statement. The man had certainly been hit by about eighteen shot, but so slightly that the greater part had either fallen or been picked out. The only one remaining was imbedded skin deep in the neck, and was at once extracted.

We have to acknowledge the thirteenth annual report of the Peking Hospital (for 1874). Dr. Dudgeon always imports into his reports a quantity of interesting information, and the present one is no exception to the rule. Of course there is a great deal of detailed medical practice, which is not attractive, but there is a good deal of curious information intermixed, that will well repay perusal. The total number of patients prescribed for during the year was 20,000, of whom 9,000 were new. When we are told that the hospital has been supported by voluntary contributions, and find from the balance sheet that the cost has been only Tls. 365, we have additional reason to congratulate Dr. Dudgeon on the amount of relief afforded. Dr. Dudgeon has just gone home for a well-earned holiday, after eleven years' successful superintendence of the hospital, and Dr. Bushell takes charge during his absence.

The Engineer-in-Chief notifies that the wreck of the *Kiang-loong*, off Hen Point, is now entirely under water, and that a red fixed light will be exhibited from a boat placed to mark the wreck. Vessels are, however, cautioned not to depend upon this light, as, owing to the strong current, the boat may not be able to retain its position in rough weather.

News has been received from Hong Kong, that the steamer *Poyang* had been lost in a typhoon. Only the chief and second engineers and a few passengers were saved. It is reported the China Traders Company had a $50,000 risk on her; we do not hear that any other local company was interested in the hull.

H.M.S. *Vigilant*, with Admiral Ryder and Mr. Wade, left on the 31st May for Ningpo. The intention is, we believe, to proceed afterwards to Foochow and Amoy, and return to Shanghai in about ten days.

Our Newchwang correspondent notes the arrival of the regiment of foreign-drilled Chinese troops, of whose intended departure our Tientsin correspondent gave us information some days ago.

We understand that the Polytechnic Institution has at last succeeded in purchasing a suitable piece of ground at the top of Canton-road.

We take the subjoined items of intelligence from the *Celestial Empire*:—

There have been but few events of public interest during the

Digitized by Google

past week, and the most varied phenomena have been meteorological. The first few days were signalising by pouring and incessant rain, the thermometer marking twenty-one degrees lower than two or three days previously; but latterly the weather has changed again, and is now sultry enough.

A question of damages arising out of a collision that happened lately has been referred to arbitration; and was heard on the 29th May at the British Consulate. The accident occurred by the steamer *Europe* having come into contact with a Chinese junk on the river, somewhere between Collyer's Dock and the Harbour-master's station. The arbitrators chosen were Mr. S. A. Viguier, Harbour-master, and Captain Roskell, of the P. and O. Co.'s steamer *Hindustan*. The case was conducted in private; and we are informed that it has been decided that the junk was to blame for attempting to cross the steamer's bow; and the *Europe*, because she was going at a rate considered by the arbitrators to be too fast. The damages on both sides are therefore to be assessed, and each party is to pay half.

Two men are in the lock-up of the Mixed Court on a charge of attempting to defraud the Hong Kong and Shanghai Bank, in a manner so childish that really one can hardly view the crime with the necessary seriousness. Some one had thrown aside an old cheque-book, in which one blank cheque remained. This has been filled up with figures of about Tls. 300, signed, seemingly by a Chinese, with some undecipherable name, and presented to the bank for payment, apparently with the idea that it would be paid like a bank-note. The perpetrator of this very feeble and foolish fraud being arrested, said he had received the cheque from another man, who has been also taken into custody, and states that he picked up the cheque near the Mitsu Bishi Company's offices. Inquiries are in course of being made on the matter.

The late Che-hsien, Yeh, certainly did many curious things which will be long remembered by all who ever had any cause of controversy with him; and the present incumbent, Sung, appears to be a gentleman of equal eccentricity. It seems that an unfortunate individual, in a fit of temporary insanity, committed suicide last week by cutting his throat and performing that artistic but somewhat painful operation euphemistically spoken of as the "happy despatch", and Sung was naturally compelled to hold an inquest upon the corpse. But instead of doing so in a civilised and decent manner, Mr. Sung selected as the scene of his judicial inquiries the middle of the Che-kiang-road, where the gashed and bleeding body was exposed, uncovered, in broad daylight, to the view of a gaping crowd of several hundred men, while the mandarin pursued his investigations surrounded by his clerks and underlings taking notes in their official books. Traffic was entirely interrupted, and—as far as we can discover—no attempt was made by the police to interfere with the revolting scene. Surely so flagrant an outrage upon public decorum is within the scope of municipal supervision.

A ceremony very interesting to our Catholic readers took place last Sunday, at Sikawei, viz., the procession of Corpus Christi. The mildness of the weather and the cool breeze attracted many spectators, and the roads through which it passed were gaily decorated with banners and candelabra. Shortly after four o'clock the procession left the church, wending its way round the village of the Observatory to the bridges of the Convent and of Sikawei, and back to the church, where some canticles appropriate to the occasion were sung. The ceremony concluded with the Benediction of the Blessed Sacrament at half-past five.

Another meeting has been held at the Temperance-hall, and was very well attended, notwithstanding that the doors of the Lyceum were open at the same hour, which led some of the friends of the society to fear that the hall would be deserted for the evening. One very pleasing feature was the presence of many sailors, there being probably from sixty to seventy blue-jackets among the audience.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald*:—

Admiral Ryder is expected at any moment, in the *Vigilant*. The Chamber of Commerce would, we think, do well in availing of the opportunity to point out to his Excellency the expediency of affording the British community of this port a more ample naval protection throughout the year. Amoy, a place of far less consequence, so far as British interests are concerned, is the rendezvous of one or more gunboats all the year round, while we are deprived of naval protection for nearly half that period. Recent events at the Pagoda Anchorage have sufficiently demonstrated the folly of indulging in any kind of belief in the power or willingness of the Native authorities to afford adequate protection to the persons and property of foreigners. H.B.M.'s gunboats *Growler* and *Midge* are now in port, awaiting an inspection by Admiral Ryder.

The coolies employed in the matting of tea packages were on strike a few days ago. Their demand for an increase (nearly cent. per cent.) of wages was, we understand, promptly acceded to by certain foreign hongs. Strikes are not unknown out of China, but a sweeping demand for double wages—in a country where all the necessaries of life are uncommonly cheap—is a serious matter even in these golden days. How will a similar demand be dealt with on the next occasion—say June 1876? The problem is an interesting one.

Advices from Taiwanfoo refer to a recent heavy engagement between the Imperialists and the aborigines, resulting in the abandonment of an entrenched position by the former. With characteristic veracity the Chinese claim a victory.

The review of Bow and Arrow troops in garrison commenced on the 29th May at the South Camp, and was continued on the following day. As a semi-theatrical display it was somewhat imposing; as a military effort supremely ridiculous.

From Tamsui we learn that the tea crop is very inferior, owing to the heavy rain experienced during the recent picking.

Our readers will regret to learn that Mr. James Hart (the popular Commissioner of Customs at this port) is about to be transferred to Shanghai.

HONG KONG.

Our advices by the present mail extend to the 12th June; no later mail from London than April 23 had been received since 4th of June. The following items of intelligence are from the *Hong Kong Daily Press*:—

It is very difficult to decide from the facts at present known how far the King of Burmah is really implicated in the atrocious outrage by which Mr. Margary lost his life and the Yunnan Expedition was broken up. The testimony is very conflicting, and there is some reason to fear that the real truth will not be elicited. A great difference of opinion prevails among British officials, some believing his Majesty to be entirely innocent of any sinister or unfriendly designs against the British Indian Government, while others are deeply impressed with the conviction that he is not to be trusted further than he can be seen, and is capable of the worst treachery, when it can be safely adventured upon. Thus Colonel Wyndham states that the Golden Footed Monarch is most anxious to settle matters amicably, and denies all complicity in the failure of Colonel Horace Browne's Expedition. Further, that his denial is confirmed by careful private inquiry, and that the rumoured ill-treatment of foreigners by the King is quite unfounded. Captain Cooke, the officiating Political Agent at Bhamo, on the other hand, is reported to be of opinion that the King's protestations of friendliness are not worth a moment's credence, and that strong measures will have yet to be taken to bring him to his senses.

At the police-court Kwok Acheong and seventeen other Chinese were charged with gambling on Messrs. MacEwen, Frickel and Co.'s premises. It appeared from the evidence of Police-Inspector Gray that he went to Messrs. MacEwen, Frickel and Co.'s premises at 9.15 P.M. On entering the servants' room at the basement of the house the prisoners rushed out of the room, but he seized them and handed them to the police. He went in and found a round table with a mat fastened to it. On it was a lamp, a large quantity of cash, and a number of lighted candles, giving a good light in the room. There was a cup for covering the gambling cash, a counting stick, counters, three dollars and ninety cents in silver, three dollar notes, and in a bag on the table were other $3, seven cents in copper and 200 cash. The prisoners made the usual lame excuses. The first was fined $200, in default six months; the second and fifth $50 each, or three months; the seventh and tenth $15 each, or one month; and the rest $25 each, or six weeks' hard labour.

Another case tried at the Police Court has been that in which the masters of the Himli (No. 43) and Kwon Fong Tai (No. 86) shops in the Hollywood-road, were charged with affixing fraudulent trade marks on boxes of cigars. The defendants were charged with exposing for sale in their shops certain boxes containing what purported to be Manila cigars, and having a certain label on them representing that the said cigars were manufactured at Manila, whereas there were made at Hong Kong. It was proved that the cigars were not only offered for sale, but they were actually sold, and it was in evidence that papers were found on the premises in large quantities of the same kind as the labels found on the boxes. The boxes too were done up with these papers in a manner to deceive any one who did not examine the cigars themselves, as well as papers bearing the words, "Real fabrica de tobacos de Manila." There were also found in the shops blocks for printing the borders or edging. The defendants were fined $50 each, and all boxes, labels, and blocks were confiscated.

The decision arrived at in this case cannot fail to give satisfaction. There is no kind of doubt the defendants were perfectly well aware that though they themselves did not sell the cigars as genuine Manilas they would be retailed as such. Vast quantities of these spurious and inferior weeds have been palmed off upon the unsuspecting sailors who visit the port, and a good profit is doubtless made out of them by some one. Even supposing for a moment, however, that they are not sold much above their value, a fraud is still perpetrated. The venders of pure Manila cigars are injured both by being cheated out of their trade and getting a bad reputation for their wares. The consumer is also defrauded, for he is persuaded that he has bought the genuine

Digitized by Google

article when it is really a wretched imitation. It is true the price should always be a guide, and it doubtless is to many; but there are others ignorant of it, or think they have dropped upon a bargain. We have little sympathy with the haggler who is always on the look out for a bargain, and who is unwilling to give a fair price for his purchases; such people deserve now and then to be bitten; but the public ought to be protected from imposition as far as the law can do so. Especially is it necessary that a vigilant supervision should be kept over all articles of consumption. We trust the police will continue the crusade they have commenced against the vendors of spurious and adulterated goods.

On the 8th June an extraordinary meeting of the shareholders of the Victoria Fire Insurance Company of Hong Kong was held at the office. There were present—Messrs. André (chairman), F. D. Sassoon, Hayllar, Q.C., Sands, J. Greig, Karberg, C. P. Chater, McCulloch, A. H. Chinoy, Middleton, Anton, Landstein, J. T. Chater, Sandeman, Joost, Handcock, Ellwell, and Head. The Chairman said the business before the meeting was the confirmation of the minutes of the meeting held on the 25th May, when it was agreed to wind up the company. Mr. Head (secretary) read the minutes of the last meeting. The Chairman then moved that they be confirmed. Mr. Middleton seconded, and it was carried. The Chairman then said, on behalf of the liquidators, that an arrangement had been come to whereby the Hong Kong and the China Fire Insurance Companies had agreed to take over the business of the Victoria on very favourable terms. As soon as the accounts were ready they would be laid before the shareholders at a meeting which would be called for that purpose. Mr. Middleton asked if the register would be kept open for transfers. The Chairman said the liquidators had the power to keep it open, and it would be kept open till they closed it. The proceedings then terminated.

On the arrival of the Canton steamer *Powan*, in the general rush made by market people a coolie belonging to a vegetable lan coming on shore with another coolie, with a load between them on a bamboo, suddenly slipped and fell overboard, taking with him his load. He could not swim, and was near drowning, when Mr. E. L. Stuart, one of the wharfingers, leaped over, dived after him, and brought him to the surface. Mr. Stuart has been the means of saving the lives of many at the Canton wharf in a similar manner.

In consequence of a belief amongst the Chinese that we are to have another typhoon this week, very few of them have taken passage in the Hong Kong, Canton, and Macao Company's steamboats, especially in the boat running to Macao.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 19th June; the P. and O. mail from London May 14 was received on the 13th June. The following summary of news is from the *Straits Times*:—

Considerable consternation has been caused here by the news of the seizure of the British steamer *Carrisbrooke* off the coast of Hainan, by a Chinese cruiser. Two or three steamers usually leave this port about this season for Hainan, taking passengers and such cargo as is found saleable there. Messrs. Bun Hin and Co., the agents here of the *Carrisbrooke*, received a telegram from Messrs. Russell and Co., the Hong Kong agents, to the effect that the vessel had been seized three-and-a-half miles from the shore of Hainan, when proceeding to Hong Kong, thirty miles distant, and that application would be made to have the vessel released on bail. Application was at once made to the Governor, to invoke the assistance of the Hong Kong Government in procuring the release of the steamer, and a telegram was accordingly despatched to the Administrator of Hong Kong, to which the following reply has been received:—

"To Governor, Singapore.—Hong Kong, 16th June.—*Carrisbrooke* seized for breach of article forty-seven of Tientsin Treaty. Hainan not yet open for trade. Vessel taken to Canton for investigation by Mixed Court. Consul notified regarding inquiry. *Carrisbrooke* disabled by cruiser.—ADMINISTRATOR."

We think there is some mistake in the above telegram, as the port of Kiung Chow, in Hainan, is distinctly mentioned in the Treaty as open to foreign trade, and is also set down in the China Sea Directory as a Treaty port. It is rumoured, however, that the *Carrisbrooke* did not go to Kiung Chow, but to another port named Pan Kay, in the north-eastern part of the island. It is said, also, that she was fired into in consequence of having disregarded a warning shot fired across her bow. This would explain her seizure under Article XLVII. of the Tientsin Treaty. We understand that in consequence of the statement in the Hong Kong Administrator's telegram, "Hainan not yet open for trade," measures have been taken by the owner here to intercept the steamer *Penang*, which left some days ago for that island.

On the 15th June nine men suffered the extreme penalty of the law for the murder of Captain Digby H. Dent, superintendent of prisons, on the 13th February last, in the criminal prison. A company of soldiers and a strong force of police were present to preserve order; but there was no attempt at a demonstration of any sort on the part of the Chinese, only a few of whom assembled, apparently out of mere curiosity, to witness the execution. There was a considerable gathering of Europeans and Eurasians, but few natives. The men were executed three at a time. The first three submitted to their fate in silence, but some of those who followed indulged in the most disgusting obscenity, and one defiantly assured Captain Hodgson, the present acting superintendent of prisons, that he might expect a fate similar to that of Mr. Dent; and, with curses and imprecations issuing from his lips, was ushered into eternity. The Governor, after giving the subject his most anxious consideration, determined that nine out of the eighteen prisoners who were sentenced to death for conspiracy in the gaol outbreak should have their sentences commuted into penal servitude for life. As the presence in the gaol of these prisoners would be objectionable and prejudicial to its discipline, his Excellency has asked the Indian Government to permit their being sent to the Andaman Islands. The Governor, as a mark of appreciation of their conduct, has directed the release of the European and Eurasian prisoners who rendered such notable aid on the occasion of the outbreak.

On Sunday, the 13th June, Mr. N. de Miklouho Maclay left Johore to commence his long intended excursion to Pahang. We are informed that Mr. Maclay will take the overland route up to the Indau river, following the same till the Indau mountains, which he wishes to ascend. From there he intends first to search for the savage Oran-Tekam (so called after a small tributary of the Pahang river), located in that portion of the country. Mr. Maclay is still uncertain what further course he will take, as his health, which has already delayed his departure for several months, is still so unsettled as to prevent him from positively determining his route throughout the whole trip, which must, to a great extent, depend upon circumstances.

A concert in aid of the fund for distressed foreigners at this port, arranged by some gentlemen amateurs, was given at the Town-hall on the 18th June, at which Signora Palmeira, Signorita Persiani, and Signor Palmeiri kindly volunteered to give some of their favourite pieces; several ladies and gentlemen amateurs also assisted in the entertainment, the whole musical arrangements being placed in the hands of Mr. Salzmann. The concert proved a great success, both as to the numbers present and the variety and excellence of the programme. Sir W. F. D. Jervois, though unable through a prior engagement to attend in person, gave his patronage, and a donation of $25 to the fund. The proceeds of the concert and any subscriptions will be handed over to the Colonial Secretary.

The s.s. *Glenfinlas*, Captain Wilcox, for London, with the first cargo of Foochow teas, passed through this port on the 13th June. She left the Pagoda anchorage at 12.30 P.M. on the 6th June, passed Sharp Peak at 2.30 P.M. same day, experienced fine weather throughout passage, and arrived in Singapore Roads at 3.30 P.M. on the 13th. After coaling, she proceeded on her voyage at eleven o'clock the same night. The steamers *Braemar Castle* and *Gordon Castle* arrived on the 17th, and the *State of Virginia* on the 18th, all from Foochow, tea laden. The *Braemar Castle* and *Gordon Castle* coaled and were despatched at four o'clock on the morning of the 18th, and the *State of Virginia* left the same night. As the *Braemar Castle* was being brought alongside Tanjong Pagar wharf, through some misunderstanding of the pilot's orders, she went crushing end on into and half way through the wharf, doing damage to the extent of upwards of $1,000. We understand there was no question on the part of the ship as to who was to blame: it is said the accident arose through the engines being turned ahead instead of astern.

From Bangkok we learn that Dr. H. Stanius, Consul for the German Empire at Bangkok, presented his credentials to H.M. the King on the 1st June, and received his Majesty's exequatur. On the 5th the same ceremony was observed by Mr. W. H. Senn van Basel, the new Consul for the Netherlands, who was received in State and duly accredited by his Majesty's exequatur. The new Royal residence erected for his Majesty the King was formally dedicated on the 28th and 29th May, immediately after which his Majesty entered into possession.

The *Samarang Courant* of the 25th May contains the following intelligence:—"To-day there was effected the seizure of the British ship *Waterlily*, which is shortly to be sold for the benefit of the creditors of the said vessel." An advertisement appeared afterwards in the same journal to the effect that she is to be sold by public auction at Samarang on the 12th July. It may be remembered that not long ago mention was made in the *Straits Times* of the *Waterlily* having been condemned as unseaworthy by two successive commissions of experts at Samarang, shortly after a commission of experts at Batavia had previously pronounced her to be seaworthy. This naturally gave rise to some discussion in the Java papers as to confidence in experts.

In the *Java Bode* of the 23rd May appears an extract from private letter from Delhi, dated the 1st May, in which the following particulars are given of a Chinese coolie outbreak there:—

Yesterday forenoon, at about eleven o'clock, Mr. H., the owner of a tobacco plantation on the Perchoot river (about four hours from th

Digitized by Google

chief town), was at the close of the morning's work sitting in the verandah of his dwelling-house, with his two European employés, when from seventy to one hundred of his coolies, all of them armed with knives, sticks, and sharpened nibongs, came rushing on with dreadful shouts, attacked the house, and so beat the three Europeans, and also several Klings and Malays, that some of the latter were left lying for dead. Several of the coolies endeavoured to steal the money-chest from the office, and one of them carried off two muskets. Fortunately, one of the employés was enabled to lay hold of a musket, and to shoot down therewith, on the spot, the coolie who was murderously attacking him. Had it not been for his presence of mind, the three Europeans, who are now merely severely injured inwardly and outwardly, would have been murdered beyond a doubt, while the mutineers might have, without the least trouble, persuaded the Chinese coolies on the other estates to effect a general rising. The insurgents, on seeing one of their comrades fall, took the standing of injured innocence, lifted up the corpse and marched to the chief town; for there the authorities will kindly hear the poor coolies and protect them from their barbarous masters. The mutineers arrived at the chief town with all that they possessed, and some of them have expressed themselves to the effect that they will not return to the estate they belonged to until after the hanging of the European who had, in self defence, shot dead one of their comrades. From this you may infer what a high opinion the Chinese coolies here have of themselves.

After the preliminary inquiry at the chief town, eleven of the coolies had to be taken to prison. When the policemen endeavoured to effect the arrests, the rest of the coolies essayed raising a riot, and thrashed effectually two policemen who were trying to preserve order with drawn swords. The soldiers in garrison were immediately called out, and by the effective measures of the officer in command order was soon restored. That planters here at Deli are not without danger to their lives you will have inferred from the foregoing, but there is more. They are also exposed to dangers of a pecuniary nature which their fellow planters in Java do not experience. The same 200 Chinese coolies of the aforesaid estate where the outbreak took place had each received advances of from 100 to 200 guilders, and they left the estate just when the young seedlings had to be planted out. It is still uncertain when these coolies will return, but, in any case, they could not be regularly at work again until after the little tobacco plants have been damaged or become unfit for transplanting.

The *Government Gazette* notifies the appointment by the Governor of Mr. J. C. Buyers as a shipwright surveyor in Singapore.

The average note circulation of the Penang Branch of the Chartered Bank of India, Australia, and China during May was $44,850.

The next Criminal Assizes will open at the Court-house on July 6. We understand there are but few cases, so far, for trial.

The steamer *Chow Phya* has been sold at auction, and realised $19,000.

Commercial Report.

(For dates see first page.)

IMPORTS.

CHINKIANG.—Messrs. Spencer and Wolff write from this port:—We are at last in a position to report more favourably on our market for Grey goods, which is now fairly brisk for medium to good makes of Shirtings and T-Cloths. Stocks are light, but in the absence of all activity in the Shanghai market it is impossible to establish higher rates here.

SHANGHAI.—The *North China Herald* Report says:—The disposition on the part of the natives to remain idle has been very strong. Rainy weather and settling day have been the sedatives. But the auctions have been powerfully instrumental in compelling the traders to do business, and everything offered—Long Ells and Spanish Stripes, C.P.H. Scarlet, excepted—brought previous prices, but Long Ells realised a handsome decline, and Spanish Stripes are reported to have dropped 2 to 3 cands. per yard, from the value current in the native market on last mail day. From this general maintenance of former quotations, private sellers are gleaning encouragement and hope. In their opinion it proves a bare market, and the expectation of a better business when the causes of the prevailing quiet shall have been removed—and, indeed, there are signs of improvement already apparent. At the close there is more inquiry for common 8¼ lb. Grey Shirtings; for Drills, of which recent sales and resales amount to 8,000 pieces, and some of them at better prices, for 7 and 6 lb. ordinary Mexican T-Cloths, for English Sheetings, for Chintzes, and Turkey Reds of the lightest weight, for Velveteens, Crapes, and for 9¾ to 10 lb. Grey Shirtings, and in each article progress has been made.

MANILA.—During the interval a fair amount of business had been transacted in the market for Plain Staples, but the prices obtained have in most cases been of an unremunerative character. Coloured goods, with the exception of Prints, are extremely quiet, and difficult of sale at covering prices.

SAIGON.—There had been but little alteration with regard to Manufactured goods, quotations being as follows:—Grey Shirtings, 8¼ lbs. $2.25 per piece, 7 lbs. $1.90 per piece; T-Cloth, 6 lbs. $1.55 per piece, 5 lbs. $1.25 per piece, 4 lbs. $0.95 per piece; White Irishes, nominal, $1.45 per piece.

EXPORTS.

TEA.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s Report says:—Our last circular was dated on the 26th May, and since that time an active business has been done in Tea, rates have been irregular, but generally we do not make them any lower, as any drop in the tael price is compensated for by an equal inferiority in quality. The business of the week includes sales of Ningchows at Tls. 27 to 60 per picul, Second Pack Oonfars at Tls. 25.50 to 28.50, Cheong-sow-kyes at Tls. 25 to 26, Toong-shangs at Tls. 28 to 33, Soon-yongs at Tls. 25 to 31, Lye-lings at Tls. 20.00 to 23.50 per picul. Settlements for the week, 22,834 chests, 67,711 ½-chests, 8,103 boxes, against corresponding week 1874, 38,089 chests, 74,652 ½-chests, 4,996 boxes. Although arrivals and settlements to date are so much in advance of last year, it is stated by teamen that the ultimate excess in the first crop will be trifling. Teamen are now commencing to ship to Shanghai, all the direct steamers from Hankow being full. It is said that the picking of the second crop will commence in about four days, and musters may be expected about the end of this month. The Lotus, Glenfalloch, and Hankow, have sailed for London.

SHANGHAI.—Business on this market had not yet fairly commenced, but two small parcels of Ningchow had been purchased at about 33 Taels, and it was said that offers up to Tls. 22 for Shontam kinds had been declined. Teas were coming down very slowly, the stock on offer being only about 8,000 chests, and composed chiefly of common low grades of Oonam and undesirable parcels of Ningchow, which had been neglected in Hankow.

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says:—Purchases of Tea from the Fock Oan and Ching Wo districts commenced early in the week, and 35,300 half-chests of these kinds have now been taken. Settlements of Paklings reached 110,660 boxes. The first operations in country Teas were commenced on our market on June 3, since which date purchases aggregating 16,062 chests have been made. Buying has been neither heavy nor general so far, Teas from a few of the districts only having attracted attention. Suey Kuts have been taken at the same price as last year, and Saryunes at an advance of Tl. 1, the quality of the former of these district Teas being inferior. A large business has been done in the Fock Oan kinds, and purchases of Teas of this description show by far the best value; prices opened some Tls. 3 over last season's rates, but latest purchases show a considerable decline. Scarcely any business has been transacted in common kinds, owing to the exorbitant demands of the Teamen. Souchong: Only a few chops have been shown. Oolongs are decidedly poor; a fair quantity has been settled at last year's rates. Flowery Pekoe: The colour and make of the Teas on show are poor, and the quality is scarcely up to the standard. Scented Teas: The few chops on show are, as usual with the first arrivals, well made, but wanting in scent, and prices asked for them are extreme. Quotations are:—Congou: 6,140 chests finest to choice, 2s. 0½d. to 2s. 2½d.; 31,940 chests fine to finest, 1s. 9¾d. to 2s. 0½d.; 20,380 chests good medium to fine, 1s. 6¾d. to 1s. 9½d.; 2,220 chests flavoury to medium, 1s. 3¾d. to 1s. 6½d.; 310 chests common to flavoury, 1s. 0¾d. to 1s. 3½d.; 387 chests leafy to common, 10¾d. to 1s. 0½d.; Oolong: 2,046 half-chests, 1s. 5½d. to 1s. 7¾d. The above quantities show the total amount of Tea settled to date, including Paklings and Ching Wos.

From PENANG.—For London, July 21, Tartar (str.).

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—July 21, at Falmouth, from Rangoon, Abeona; 18, at Amsterdam, from Banjoewangie, Bali; 21, at Liverpool, from Rangoon, Pendragon, Mathilde; 22, off Dover, from Hankow, for Bremem, Strasburg (str.); 21 at Havre, from Manila, Batavia, 22, at Amsterdam, from Batavia, Groningen (str.); 14, at Odessa, from Hong Kong, Russia (str.); off Deal, from Foochow, for London, State of Virginia (str.).; 23, at London, from China, State of Virginia (str.).

DEPARTURES.—July 21, from Sunderland, for Singapore, Lanercost; 19, from Nantes, for Reunion, Fanny; from Hamburg, for Hong Kong, Gustav Adolph; 21, from Greenock, for Batavia, Sourabaya; from Shields, for Galle, Passover; 20, from Hamburg, for China, Feronia (str.); from Amsterdam, for Sourabaya, Louise; 23, from London, for Shanghai, Glenartney (str.).

SPOKEN.—Graafstroom, from Banjoewangie, to Amsterdam, June 7, 3 S., 19 W.; Leicester, from Batavia, to Amsterdam, May 10, 23.10 S., 58 E.; Duesbury, from Singapore, to Liverpool, May 31, 24.30 S., 54.30 E.; Catharina, Amsterdam to Samarang, June 13, 44 S., 25.28 W.; Hammonia, from Hamburg to Macassar, June 8, 5.51 N., 24.1 W.

CASUALTIES.—Hong Kong, July 22.—The Glenlyon (str.), from Foochow, for London, with tea, has arrived, but cannot proceed on account of defective shaft; have telegraphed to owners for a new shaft; the new crank shaft has been sent out in the Glenartney; the cargo will be transhipped to the Glengyle or Glenroy. Batavia, June 16.—Advices from Sourabaya, dated June 10, state that the James Condie would be hauled further on the bank in order that the divers might be able to examine the leak more accurately, and see if it could be stopped. In the meantime the surveyors have advised that no more cargo be discharged, but that it be sold as it lies, as the tins in which the petroleum is stored have corroded and become full of holes, most of them being empty or leaking. The rigging was stolen and the cabin damaged by the natives.

MISCELLANEOUS.—Passed Gibraltar, July 19, Voorwaarts (str.), from Nieuwe Diep, for Batavia. Port Said, July 22: Arrived, Torrington, from Rotterdam, for Batavia; Diomed, from Liverpool, for Shanghai. Greenock, July 22: The floating dock Sourabaya, destined for Java, proceeded to the Gareloch to adjust compasses previous to starting for Java. This vessel has been singularly unfortunate since she was launched at Paisley a considerable time back. After starting the first time she put back with defective steering gear, and when lying at the Tail of the Bank on the eve of starting the second time she encountered the terrible gale of the 21st October, 1874, and was driven ashore at Ardmore, where she lay for some time. After being taken to the Garvel Park Graving Dock and thoroughly overhauled and remasted she is again about to essay the voyage.

LAUNCH.—On the 20th inst. an iron sailing ship was launched from the building-yard of Messrs. Richardson, Duck, and Co., South Stockton, of the following dimensions, viz.:—Length over all, 220 feet; length between perpendiculars, 200 feet; breadth, extreme, 35 feet; depth in hold, 21 feet 9 inches; 1,121 tons. She is classed 100 A at Lloyd's, has been built under special survey to the order of Messrs. Capper and Alexander, Cardiff, for the India and China trade and is a sister vessel to the Abercarne, which was launched in June last. As the vessel left the ways she was named Aberaman.

THE SINGAPORE ROUTE TO AUSTRALIA.

WE do not lay claim to the gift of prophecy, but are glad to see that the opinions we expressed a year ago, as to the importance of this new line of communication, are being borne out. Our view of its probable success was based not so much on the advantage it offered as a postal and passage line between this country and Australia as upon its being "the missing link" between the colonies and the Far East. It seemed to us obvious that where producing and consuming countries were thus brought into regular and immediate connection the result must be profit not merely to commerce, but to those who afforded it new but long wanted facilities. We believe from news that reaches us from Queensland that the Government are so satisfied with the past year's working of the service performed by the European and Australian Steam Company's line that they asked for an increase of speed to ten knots, in consideration of an increase of the postal subsidy.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CRANE—On the 11th June, at Tanjong Katong, Singapore, the wife of C. H. Crane, of a daughter.

GODDARD—On the 17th July, at Morland-road, Addiscombe, the wife of John Goddard, jun., of a daughter.

HUTCHINSON—On the 19th July, at Samarang, Island of Java, the wife of Richard Hutchinson, of a son.

MOSS—On the 20th July, at 4, Windsor-terrace, Eastbourne, the wife of M. H. Moss, late of Ceylon, of a son.

SCHETELIG—On the 11th July, at the Palmaille, Altona-Hamburg, the wife of Arnold Schetelig, M.D., of a daughter.

SHAW—On the 3rd June, at Singapore, the wife of Captain E. J Shaw, of the American ship *Julia H.*, of a son.

SYMONS—On the 18th July, at Nyanza House, Southampton, the wife of Alfred Symons, Commander P. and O. Company's service, prematurely, of a daughter.

MARRIAGES.

D'AQUINO—GOULARTE.—On the 24th May, at the Cathedral Church, Macao, by the Rev. V. d'Almeida, and before Messrs. C. V. da Rocha and J. E. Scarnichia, Sponsors, Eusebio H. d'Aquino, third son of the late Jose Thomaz d'Aquino, of Macao, to Helena Maria, daughter of the late Jose B. Goularte, of Lisbon.

MIDDLETON—MAXTON.—On the 22nd July, at St. Peter's Church, Belsize-park, by the Rev. F. W. Tremlett, D.C.L., William Henry Middleton, M.D., of Mullingar, Westmeath, to Maria Louisa, daughter of Peter Maxton, 37, Belsize-park, Hampstead.

DEATHS.

ANNESLEY—On the 20th July, at Hawkhurst, Surrey, of apoplexy, the Hon. W. O. B. Annesley, youngest son of the third Earl Annesley, aged 36.

BULLEN—At Box-hill, Penny Cross, near Plymouth, William Henry Bullen, second surviving son of the late Robert Bullen, of Mauritius, in his 41st year. Indian and Mauritius papers, please copy.

DUNCAN—On the 23rd May, at Hong Kong, the infant son of R. Duncan.

GIBBS—On the 20th May, at Peking, James Hopson Gibbs, Assistant Audit Secretary and Deputy Commissioner in the Chinese Maritime Customs Service, aged 39 years.

HOSUNGJEE—On the 23rd May, at Hong Kong, Nowrojee Hosungjee, Parsee merchant, aged 50 years.

THOMSON—On the 16th July, one week after his return from Hong Kong, John, eldest son of D. Thomson, 21, Myddelton-square, in his 28th year.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JULY 23.

It creates much surprise and some amount of indignation that at the recent elections there was no question raised with reference to our Colonies. "Clerical" or "Anti-clerical" was the only war-cry by which all parties were appealed to. It seems as if Holland had no colonial possessions at all. Must we think that the Colonial question is solved? I am quite convinced that this is by no means the case. Forced labour (*heerendiensten*) is not yet abolished, although actual slavery has been put an end to; the means of communication have been improved only on paper; for the education of the natives, something, but not much, is done, and the money destined for improvement of the colonies is spent with somewhat more care than in former times. The Dutch nation is herewith quite content. The objects of the Society for the Welfare of the Javanese are thought to be simply a display of sickly philanthropy. The natives are believed to be too idle to work, too stupid to enjoy liberty. To be subjected to our rule is a sort of privilege, and we have only to be moderate, and no complaints will be heard from them. This was the cry in 1854, and it is still believed in. To illustrate this it is only necessary to recall to mind the debate in the Second Chamber about the Coffee *enquête*. The strongest opponents of forced labour were convinced that this culture could not be abolished without great pecuniary sacrifices, and this was the conclusion, that it was better to make injustice permanent than to surrender a certain revenue. The majority, and amongst them were some Liberals, rejected a motion which would have put an end at once to the existing state of things. When the result was made known the Liberal papers were indignant, but the nation remained as calm as ever. The people were quite content.

The papers contain a description of the Dutch Hôtel, which has been built for Prince Henry at Port Said on the Boulevard du Port, *vis-à-vis* the *Bassein des Atelicrs*. It has a frontage of 6,000 metres, including the garden, and for the land a sum of f.400,000 was paid, whilst the cost of the building amounted to one million. The Consulate of Holland, a hotel, and a large warehouse will be established in this building. Of course the investment of the capital in the enterprise will prove in the first years to be anything but profitable, but in the future a better return may be expected. This, however, is not the chief object. The Prince's idea was to promote the interests of Dutch trade and industry. In one of the numerous saloons a permanent exposition of Dutch produce will be held. Another undertaking, in which one of our princes has invested a good deal of capital, is the new steam-line between Flushing and London. On Monday next the inauguration will take place, and thereafter the steamers will ply daily, Sundays excepted, between Flushing and Sheerness. The steamers will have accommodation for 150 passengers in the saloon and for fifty passengers second-class. The entire voyage will occupy only eight hours, of which only five and a half hours will be at sea. The steamers are first-class, and this communication between England and the Continent will be—it is asserted—the cheapest and most comfortable in existence. The management of this company has been placed in the hands of the Royal Steam Navigation Company.

It is very unfortunate that even our leading papers have no special correspondents in Java. They only reproduce a part of the news from the Batavia papers, and, as this is always compiled in a hurry, people do not read even the spirit of the press. Now and then, however, an occasional correspondent troubles himself to forward a letter to one or the other paper. Thus, for instance, writes an officer belonging to the East Army to the *Dayblad*:—"The service at Batavia is very hard; I have to do the duty of four officers, because one half of the army is confined to the hospitals. I cannot tell you much good about our small force. It is exhausted; deceased soldiers are brought by hundreds to the burying-grounds, or are walking crippled along the roads. There is nothing but misery here; and if no change is made I fear much for the consequences, which must be very serious. In Atchin things go on very slowly. Nothing can be done before July, when the rainy season is over." This letter is probably unexaggerated. That there is a great want of officers is proved by the fact that the Indian Government have asked for one hundred more second lieutenants, and, in consequence, an extra examination will take place in November, to which subaltern officers will be admitted.

Some time ago I told you that there had been an influx of German Jesuits into the province of Limburg. I now find in the German clerical papers advertisements asking communication relative to any residences which are at disposal in Holland to be bought for this purpose. Up to this moment the Clericals have not meddled much with politics, but now they have become more daring. The Bishop of Roermond has published a manifesto by which he prescribes what must be done by the clergymen regarding the communal elections. I need scarcely add that this has caused much indignation, especially on the Liberal side.

During the last weeks a great number of soldiers, chiefly Belgians and French, have been enrolled at Harderwyk for our East-India-army, but at the same time desertions are so numerous that henceforth no leave of absence will be accorded to foreigners who enlist. The great want is still for medical officers, notwithstanding that a bounty of 3,000 guilders is given.

The ex-minister of the War Department, Earl Van Limburg Stirum, has published a pamphlet in support of the principle of obligatory military service, and on the 25th inst. he will begin to publish in the *Vaderland* the names of those compatriots who are in favour of his proposals. I fear that these lists will not be very long. The Dutch are not a military people.

The pensioned Lieutenant-Colonel de Rochemont, ex-adjutant of the late Governor-General of Java, Mr. Loudon, has arrived at the Hague. It has not yet transpired whether he adheres to his intention to hold a meeting in the Crystal Palace at Amsterdam to explain the history of the Atchin war.

The Second Chamber will meet on the 10th August in order to deal with a Bill to re-model the election districts, whilst in the same time a Bill will be laid before the members to complete our railway-net by constructing a few small provincial lines.

Endeavours are being made in Belgium to establish uniform custom-duties for Holland and that country.

The markets for Colonial Produce afford nothing calling for special report; there is a complete lull in trade.

Naval and Military.

Two Chinese officers who have been despatched by their Government to make a tour of the ports of Europe and gather all possible information on naval affairs have asked permission to go through a course on board the Excellent, gunnery-ship, at Portsmouth. The Lords of the Admiralty have intimated, in reply, that they must content themselves with a visit of inspection.

The Queen has approved the appointment of Captain C. J. Matthews, of the 57th Regiment, as acting aide-de-camp to Major-General J. A. Street, C.B., commanding the troops in Ceylon.

Commander John E. Stokes is appointed to the command of the Woodlark, gunboat, on the West Indian Station. Commander Stokes has seen considerable service in China. In 1857 he proceeded to China in the Inflexible, and commanded paddle-box-boat at several attacks against the Chinese Fleet. He landed with the naval brigade at Canton, and was specially promoted for the taking of that place in 1858. He proceeded again to China in 1864, and was first lieutenant in the Rattler for one year, and commanded three gunboats, viz., Janus, Forester, and Oppossum, for four years. He received the thanks of the American Government for service rendered to their Consul on the Coast of Borneo, and also received the approval of the Admiralty for attacks on piratical junks when in command of the Forester. He proceeded in the Opossum 350 miles above Hankow, on the Yangtsze, the first vessel that ever proceeded so high up this river. Was promoted to commander 1869, and in 1872 was appointed commander of the Steam Reserve at Devonport, which he held three years and five months. He has four medals and three clasps for war services.

Brevet Lieutenant-Colonel W. H. Orme, half pay, late 85th Light Infantry, has been appointed Fort Major at Guernsey, vice Brevet Lieutenant-Colonel Welman, whose five years has expired. Colonel Orme served with the 3rd Light Dragoons during the Sutlej campaign of 1848-49, and was present at the battle of Mookee and Ferozeshah, at which last he was severely wounded in the arm. He was Deputy-Assistant Quartermaster-General at the Cape between 1858-62, having previously served there as Aide-de-Camp to Sir James Jackson, and was lately in Mauritius with Major-General Selby Smyth as Aide-de-Camp.

We regret to hear that all attempts to prevent an exposure of the differences which arose in Japan between Colonel Richards and Lieutenant-Colonel Burton, of the Royal Marines, have failed, and, consequently, a court-martial will assemble at Devonport on the 31st inst., under the presidency of Colonel Boyle, R.M.L.I., C.B., to try Lieutenant-Colonel Burton for having failed in his duty in not having reported the conduct he found fault with in Colonel Richards to his superior officer at the time of its occurrence.

The camp in immediate connection with the forthcoming field artillery experiments on Dartmoor will be pitched in Okehampton Park on or before the 1st of August, the troops to be provided for therein being the E Battery E Brigade Royal Horse Artillery; C Battery 25th Brigade Royal Artillery; and half a battery of the 10th Brigade Royal Artillery. Lieut.-Colonel Tod-Brown, C.B., R.H.A., will be in command.

Digitized by Google

The farewell banquet which the electors of Chatham had arranged to give to their late representative, Admiral Elliot, will not take place. The Admiralty has furbished up an old rule, which has been very indifferently observed of late years, and prohibited Admiral Elliot from attending the banquet, on the ground that officers on full pay ought not to take part in any political demonstration.

A detachment of the 2nd Dragoon Guards (Queen's Bays), consisting of contingents from Leeds, Preston, and Bury, has been embarked upon the steamer Windsor, at Liverpool, bound for Dublin. The detachment numbered 7 officers, 170 non-commissioned officers and men, 29 women, 51 children, and 136 horses. Other bodies of troops will sail for Dublin next week.

A distinguished service reward of £100 per annum has been conferred on the Venerable Archdeacon Henry Press Wright, M.B., the Senior Chaplain to the Forces. Mr. Wright was promoted for meritorious service as Provincial Chaplain to the Army in the Crimea, and has received the Crimean medal with clasp, Sebastopol, and the Turkish medal.

Brevet-Major W. C. O'Shaughnessy, the senior captain of the 12th Foot, who has for the last few months been attached to the staff of Major-General the Hon. Francis Colborne, C.B., commanding in China, and Acting Military Secretary, has been called upon to rejoin his battalion at Kinsale, and Captain S. G. Huskisson, 80th Foot, has been appointed to the vacancy.

The United States' screw frigate Tennessee, Captain Low, bearing the flag of Rear-Admiral W. Reynolds, arrived at Gibraltar on the 13th inst. from New York on her way to China, *viâ* the Suez Canal, and was to proceed in about eight or ten days for her destination.

Rear-Admiral W. H. Stewart, C.B., Controller of the Navy, and Mr. N. Barnaby, Director of Naval Construction, have inspected the Adventure, troopship, which was found to be in bad condition, and the expectation is that the ship will be paid off and laid by.

Legal.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

THE "INDUS" AND THE "ABBOTSFORD."

This was an appeal from a decree of the Judge of the High Court of Admiralty of the 25th of January last. The suit arose out of a collision between the steamships *Abbotsford* and *Indus* in the English Channel, off Dover, on the morning of the 24th of November last. The *Indus*, which belonged to the P. and O. Company, is a vessel of 2,234 tons, manned by a crew of 150 hands, and at the time was on a voyage from London to Bombay with a cargo of merchandise. She was in charge of a licensed Trinity pilot. The *Abbotsford*, a ship of 1,697 tons, with a crew of 88 on board, was on her way from Antwerp to New York, with a large number of passengers and a general cargo. The case on the part of the *Abbotsford* was that she had stopped off Dover in order to take a pilot on board, and that, while in waiting, she observed the *Indus* on her port quarter at a distance of a quarter of a mile. The *Indus* made no change in her course in spite of the loud warnings of those on board the *Abbotsford*, and the result was a collision in which both vessels were more or less damaged; on the other hand it was contended that the collision was caused by a sudden change in the steering of the *Abbotsford*, attributable to negligent and reckless navigation. The Judge of the Court below considered the *Abbotsford* alone to blame; hence the present appeal.

Their Lordships, after hearing the arguments at considerable length, allowed the appeal, and reversed the judgment of the Admiralty Court, with costs.

BANKRUPTCY COURT.

IN RE JOHN RANKING AND CO.

The debtors, Messrs. Harvey Ranking and Augustus Ranking, merchants, trading at 11, St. Helen's place, as John Ranking and Co., have filed a petition for liquidation by arrangement. Their liabilities are estimated at £110,000, after deducting the value of the securities held by creditors, with assets, consisting of merchandise, book-debts, and securities, and also of real estate in England and in Egypt, and elsewhere, valued at £70,000. Mr. Baker (Lawrance and Co.) now asked that Mr. Robert Fletcher, accountant, should be appointed receiver and manager. It appeared that a preliminary meeting had been held, at which the creditors expressed a strong opinion that the assets should be forthwith placed under control.

The Registrar granted the application.

IN RE J. C. FOWLIE.

This was another heavy failure. The debtor, described as a merchant, of Leadenhall-street, has filed a petition for liquidation, with liabilities £140,000, and assets, consisting of furniture, £1,100; cash-book debts and claims, £50,000 and upwards; and property in Ceylon estimated at £10,000. Mr. Registrar Hazlitt refused an application for an interim injunction staying further proceedings under a debtor's summons issued at the suit of one of the creditors, it being contrary to the practice of the Court to interfere with any steps which creditors may take under section 7 of the Act.

CHARGE OF FRAUD AGAINST MESSRS. COLLIE.

On the 21st inst., Alexander Collie, of Kensington Palace-gardens, and William Collie, of Aytoun-street, Manchester, until recently carrying on business as merchants in London and Manchester, were brought up at Guildhall, on a charge of obtaining large sums of money from the London and Westminster Bank by means of false pretences. In the information the amount was stated to be £200,000 and upwards, but it was rumoured that the actual amount involved was about £1,500,000.

Mr. Poland, who prosecuted, said that in this case he appeared for the London and Westminster Bank, who considered it their duty to prosecute the prisoners for conspiring together to defraud them of various large sums of money. The prisoners were of the firm of Alexander Collie and Co., of Leadenhall-street, and Manchester, and it appeared that Alexander Collie attended to the business in London, and William Collie attended to it in Manchester, and it was alleged on the part of the prosecution that they conspired together to draw bills which were nothing but accommodation bills, and they represented that they were trade bills given for goods sold, and bearing on the face of them certain marks and numbers purporting to refer to the bales of goods and the accounts in the ledger. He produced one of the bills, which purported to be for value received, and it had on its face "for value received," and certain marks which purported to refer to the description of goods that the bill was given for. A large number of those bills had been negotiated, and although a great number of the bills had not the words "for goods" on them, they had certain marks on them which were equivalent, for they had those marks which purported to refer to accounts of goods delivered. The defendants sent bills accepted by various persons to bill brokers, and by that means put them into circulation. It was well known that the bill brokers could not discount those bills with their own money, and several of them went to the London and Westminster Bank. In May or June last they failed, and their liabilities were about £3,000,000, but of that sum there were from £1,500,000 to £1,750,000 worth of those bills in circulation. The London and Westminster Bank had about £500,000 worth of those bills, and after giving credit for all they could get from the estate they would be at a loss of between £200,000 and £300,000. It was obvious that the bank would not have discounted bills to that large amount if they had not believed that those bills were given for goods that had been supplied, and that the marks and numbers on the face of those bills referred to those goods. On the examination of the defendants' books, which were placed in the hands of Mr. John Young, of the firm of Turquand, Youngs, and Co., accountants, it was found that those bills were not genuine trade bills drawn for goods sold, but accommodation bills, and that there were no such goods sold, and no such accounts in the ledger as those indicated by the marks on the face of the bills, and also that the persons accepting the bills had no goods accounts with the defendants. The London and Westminster Bank believed they had a responsible drawer and acceptor, and upon that assumption they would have discounted to a reasonable amount, but they never would have discounted to such an amount if they had not believed, from the marks on the face of the bills, that they were *bonâ fide* bills of commercial transactions. By examining the books they found that there were goods to the amount of £63,000, or from that to £100,000, which were all that represented the million and a half or million and three-quarters for which bills were in the hands of the bank and other persons. He would just lay evidence sufficient before the Court to justify a remand, and then ask that the case should be adjourned.

Mr. Serjeant Ballantine said he appeared for the defendants, and quite agreed with Mr. Poland that there must be a remand, and was willing that it should take place without going into the evidence until they were able to go into it fully. Sir Thomas White concurred, and said he felt bound to ask for large bail. He had therefore come to the conclusion that he must have two bail in £2,000 for each prisoner, or four in £1,000 each, and themselves each in £4,000. He would not take upon himself the responsibility of accepting bail which had not been inquired into by the prosecutors, and he therefore would not accept bail until it was approved. With regard to an application that the prisoners should be allowed to be taken to Newgate in a cab, he could not accede to that request. He could not see that there was any difference at present between them and poor people who were charged with a similar offence, only for a smaller amount. The two prisoners must, therefore, go in the van with the others. Shortly afterwards the prisoners went away in the van. They were released on bail on the 23rd inst.

Miscellaneous.

The Eastern Extension and China Telegraph Company (Limited) announce an issue of 3,200 Six per Cent. Debentures for £320,000. The price of issue is £100, payable by instalments extending to 1st February, 1876. The paid-up capital of the company amounts to £1,997,500, and the net annual income of last year amounted to £162,677 1s. 7d.

THE GEOGRAPHICAL CONGRESS.—The Geographical Congress in Paris has commenced its sittings. The British Section occupies the fourth and fifth rooms in the wing of the Tuileries next the Seine, and is under the charge of Colonel Montgomerie, R.E., F.R.S., &c., Her Britannic Majesty's Commissioner for the Congrès International des Sciences Géographiques. The Catalogue commences with a long list of the various maps, &c., contributed by British India. This portion of the British Empire is well represented by the engraved sheets of the Great Indian Atlas. The chief piece is a compilation map, showing the vast extent of the Himalayan system of mountains which separates the plains of India from the plains of Eastern Turkestan, Yarkund, &c. The other maps comprise characteristic specimens of most of the Provinces of British India from surveys executed at various dates under the orders of the Government of India, more especially showing the later development of the trigonometrical and topographical work in the Himalaya mountains in the more hilly, and generally the least known, portions of India.

TRIAL TRIP.—The Poonah, belonging to the P. and O. Company, left the South Dock, Sunderland, on her trial trip, on the 20th inst. This vessel was taken to Sunderland upwards of 18 months ago, to have 84 feet added to her length. She was built as a passenger boat for the Company in 1862 and is now 435 feet in length. Her engines (by R. and W. Hawthorne, of Newcastle) are 600-horse power. The cylinders are 56 inches and 97 inches respectively in diameter, and the stroke is 4 feet 6 inches. She is fitted with six boilers, with three fur-

Digitized by Google

naces for each boiler, which will consume from 30 tons to 35 tons coal daily. She was towed out to sea by steamtugs, and a run was made for a distance of eight miles straight ahead, during which time the vessel behaved admirably, and the engines gave every satisfaction.

MR. DISRAELI presided on the 16th inst. at a meeting held in Willis's Rooms to promote the movement for erecting a memorial to Lord Byron. The right honourable gentleman opened the proceedings with an eloquent speech, in which he expressed his desire "to see in some public place the semblance of this great man, so that the English people, when they pass, shall recognise one of the greatest masters of the English language." On the motion of Lord Stanhope, seconded by Lord Rosslyn, it was resolved to make an appeal to the public for funds to erect a statue of the poet in the metropolis, and a vote of thanks to Mr. Disraeli for presiding was proposed by the Earl of Lovelace, son-in-law of Lord Byron.

THE place in the elephant-house at the Zoological Gardens, vacant by the death of the Indian elephant last week, has been filled by a Sumatran rhinoceros *(Rhinoceros Sumatrensis)* from Johore, "deposited" by Mr. Jamrach, the well-known dealer. The Society's collection already contained examples of four different species of these animals, but this makes a fifth, and renders the series of rhinoceroses by far more complete than any that has yet been brought together.

WHAT bids fair to be a most successful annual gathering of the members of the Royal Archæological Institute of Great Britain and Ireland has been opened at Canterbury. Three sections—Antiquities, Architecture, and History—will hold meetings, the Presidents being Mr. G. T. Clark, Mr. Beresford Hope, M.P., and Dean Stanley respectively. The programme proposed to be got through is a heavy one, but agreeably diversified.

THE CHINA CUP which is annually presented by the Volunteers in China for competition at Wimbledon has this year been won by Gloucester, who scored 365 points. The cup is competed for by teams of ten efficient Volunteers from each county, and the conditions are ten shots at 500 yards with the Snider. Last year the cup was won by Middlesex with 404 points out of a possible 500.

TIN-TUN-LING, the well-known Chinese resident in Paris, has published a very singular novel in Chinese, the wording beginning, as in all Chinese works, on the right-hand side of the page. The work in question has been translated into French by Mr. Charles Aubert. It is a bibliographical rarity.

THE Eastern and Australian Company's steamer *Singapore* arrived at Townsville, from Singapore, on 16th inst., with London mails of 28th May. The Company's steamer *Normandy* left Brisbane for Singapore on the 17th inst., with Australian mails, for London.

THE statement recently made that the Turkish Government intends to send a special embassy to Peking in order to defend the interests of Mussulman subjects of the Chinese Empire is repeated from Constantinople.

THE Chinese language is to be for the future included in the list of normal school studies at Boston, U.S.

HOUSE OF LORDS.

THE COOLIE TRAFFIC.

(July 19th.) Lord STANLEY of ALDERLEY called the attention of the House to the Coolie traffic, and asked the Secretary of State for the Colonies to state the result of his inquiries into the death of two Coolies from flogging in Province Wellesley, and what progress had been made in framing a law for the protection of Coolies in the Straits Settlements; and moved for the law for the protection of Indian immigrants to be laid on the table. The noble lord remarked that on the 11th of May a deputation of the Anti-Slavery Society waited on the Secretary of State for the Colonies to make representations as to Coolie labour in all the Colonies and the necessity of supervision of the transport of Coolies, of the contracts entered into by them, and of their treatment when their engagements expired. Owing to misreporting, the deputation were represented to the world as having requested the Secretary of State to put down Coolie labour, and an evening paper said that the supervision of Coolie contracts was as little necessary as that of Irish or English emigrants' contracts, though those emigrants went out to join people of their own language, religion, and laws. What really happened was that Mr. Sturge, speaking for himself only, stated to the Secretary of State what a short time before he had written to the leading journal—that the emigration of Coolies was only the slave trade under another name. Now, he would mention in defence of Mr. Sturge that a French Deputy, M. Victor Schœlcher, came over to London a short time before the deputation went to the Colonial-office, to represent the state of the Indian Coolies in the French Antilles to the Aborigines' Protection Society, and he there made a similar statement to that of Mr. Sturge, of his conviction that Coolie immigration could not be distinguished from the slave trade, and in support of this view he had brought with him a French Colonial newspaper called the *Journal d'Outremer*, containing a report of the excessive mortality of Indian Coolies on different plantations. While excepting the islands of Mauritius and Bourbon and the Straits Settlements, he entirely concurred with Mr. Sturge and M. Schœlcher as to the more distant West India Islands, and believed that it was almost impossible to prevent the transport of Coolies to those islands differing from the slave trade. He might remind their lordships that all the horrors of the African slave trade owed their origin to a want of thoroughness on the part of the philanthropists in the beginning of 1500, and to the adoption at that time of the principles, nay, of the very words used by the noble earl to the deputation:—

"Considering the commercial depression that exists in many of the West India Islands, a system of Coolie importations, if it can be administered under due safeguards, should be favoured by Government."

These were the considerations which brought Negro slaves to America for the relief of the Mexicans and Caribs, who were fast dying out under the labour imposed upon them, and whose sufferings stirred up the good Bishop Las Casas to write of the destruction of the Indies. The burdens that were destroying the aborigines of America and the Antilles were transferred to the shoulders of the Africans till Wilberforce raised his voice in behalf of those oppressed men, and with such effect that the Africans were now almost everywhere emancipated; but if the Secretary of State for the Colonies did not take care the error of transporting Africans across the ocean to relieve Americans would be repeated under his auspices, and Hindoos and Chinese would have to relieve the negroes by suffering all the horrors formerly imposed upon the Africans. When his noble friend the Secretary of State for the Colonies answered the deputation of the 11th of May he did not think he could have read the Blue-book on the Macao Coolie traffic; not a word in that Blue-book contradicted the assertion of Mr. Sturge, and there was much in the reports of Sir Brooke Robertson and in the despatches of the Secretary of State for Foreign Affairs which confirmed it. So long as the Colonial-office could not efficiently provide for the well-being and protection of Indian Coolies at Mauritius, Reunion, and the Straits Settlements, it would be still more doubtful if it would be able to secure these objects and safeguards in the more distant West India Islands. The Chinese Coolies in the West Indies were in still greater need of protection than the Indian Coolies, who, being our subjects, found zealous supporters among the Calcutta, Madras, and India-office officials. Most of the Chinese who had been transported to Peru, Cuba, and other parts of America had been taken there against their will, or in ignorance of where they were going. They did not require to go to America for the purpose of emigrating, for there were ample fields for Chinese emigration nearer China, places to which they could go and find their countrymen and associations ready to assist them on their arrival. And how could the Secretary of State for Foreign Affairs consistently urge the Portuguese Government not to allow emigration from Macao under any form, and even after proposing regulations for the protection of the emigrants, if the Secretary of State for the Colonies were to encourage a similar emigration, and so appear to justify the criticism of the Portuguese Minister, that "the British functionaries had markedly hostile dispositions to any emigration which might seek other shores than those of British colonies?" It might be readily understood that the Secretary of State for the Colonies should have been rather too much influenced by the colonists and by colonial representations, and by the natural desire to hear of flourishing colonial budgets, and should have lost sight of the public opinion of this country, which would not allow of the substitution of Chinese for African slavery; he (Lord Stanley of Alderley) might also say the public opinion of Germany, for in the Blue-book on the Macao Coolie traffic there was a note from the German Ambassador strongly repudiating, on behalf of one of his subjects, the imputation of being concerned in this iniquitous trade. The public opinion in Spain and Portugal was also very much changed of late years, for in the modern novels of the Peninsula the villain of the plot was always a slave trader, and the name of *negrero*, or negro trader was now a most opprobrious epithet. He desired also to call the noble earl's attention to a matter of which he had been informed by an Australian magistrate—namely, the kidnapping of women in Polynesia, which was said to have become so general that nearly every master of a vessel and many of the mates carried Polynesian women on board their vessels, entered on the ship's articles as wives of the men they had nothing to do with. The law of Western Australia, that no women be permitted to be shipped there, should be copied. He did not intend to go into the case of the Coolies in Mauritius—the subject and the Blue-book relating to it were too large; but when the noble earl talked of safeguards for the protection of the immigrants he (Lord Stanley of Alderley) would ask what measures he was taking, and why he had not already taken measures, to remedy the state of things under which the families of Coolies who died in Mauritius were robbed of their property under forms of legal administration. Among the cases of property left by Indian Coolies and absorbed by the curator reported by the Commissioners appointed to inquire into the abuses concerning Indian immigrants into Mauritius might be quoted that of Millapore Monisamy, who died and left effects which were sold for $630 82c., or about £130. The legal expenses amounted to $630 51c., leaving a balance of 31c., or 1½d. There were, however, other legal expenses which were defrayed by the sale of Monisamy's jewels, which sold for $877 52c., or about £183, and when all legal expenses were paid there remained a balance of $11 53c., or £2 8s. There was also the case of Jaunkee, who went temporarily mad, had £44 of property sold for £8 12s. 4½d., and 8s. 8½d. of it was left for his children. He would also ask the Secretary of State whether he intended to take any steps to relieve the immigrants who had completed their five years' contract service of the heavy charges imposed on them for photographs (2s.) and pass-tickets (20s.). From the report of the Commissioners it appeared that for a number of 116,333 photographs the sum of £23,311 12s. had been charged to Mauritius during five years. The photographer holding the contract informed the Commissioners that his profits were £6,000, leaving £17,311 for the cost of photography; but the Royal Engineers' highest estimate came to £5,201, leaving £12,110 to be accounted for. Two Coolies were flogged by two planters on the Malakoff estate, in Province Wellesley, in the Straits Settlements; they died of it, and the two planters were sentenced to three and four months' imprisonment. These sentences appeared to be very lenient, but it happened that the brother of one of the planters died, and applications were made to the Governor, Sir Andrew Clarke, for his release, in order that he might look after the plantation. The Governor accordingly remitted half of his sentence and set him free, and, as the other planter was in the same case, he remitted half of his sentence also, apparently to avoid invidious distinctions. If the Governor had made his remission of the sentence conditional on the payment of some compensation to the families of the Coolies whose deaths they had caused, he would have shown more regard for justice and for those safeguards which the noble earl the Secretary of State for the Colonies desired to establish

Digitized by Google

for the protection of Coolie immigrants. He (Lord Stanley of Alderley) did not in this matter impute any fault to Sir A. Clarke other than that of excessive good nature and, perhaps an inability to say no; but, for the sake of the future, he would ask his noble friend to join with him in an expression of regret that Sir Andrew Clarke should have allowed himself to be induced by the planters' representations to remit half of sentences which were already too lenient. To show that contracts and engagements of Coolies required supervision and revision by an officer of the Indian Government, he might mention a case which recently happened in the Straits Settlements. Some seventy Coolies had engaged to labour for planters (Messrs. Brown and Co.) for two years, and had had their passage-money from India advanced, which advance had been repaid. These Coolies left off work six days before the complete expiration of their two years, and a portion of them were brought before a magistrate, under the Indian Act XIII. of 1859. The magistrate dismissed the summons, and his decision was reversed by Mr. Justice Ford, who held that these Coolies' contracts were binding on them, which obliged them to be jointly and severally responsible for one another's labour, so that one man out of 100 might have to make good the work of ninety-nine absconders. The appellant, the agent for the planters, did not ask for this, so Mr. Justice Ford only required the magistrate to order the Coolie (1) to work up the six days, and (2) to work up the loss of labour occasioned to the planters by their default. Now this decision of Mr. Justice Ford, if it were upheld, would establish a system of slavery. It would probably be met and prevented by the Indian Immigrants' Protection Act, now under the consideration of the Colonial-office. This draft Act omitted, however, to limit the period for which Coolies might be engaged. In the Straits the practice had usually been for two years, but in Mauritius five years was the usual term. A person whose opinion had great weight with him (Lord Stanley of Alderley), and, he believed, would have no less with the Secretary of State for the Colonies, observed to him that before the Straits Settlements passed under the Colonial-office the immigration of Coolies from India was free, and as beneficial to the immigrants as it was to the Settlements. He believed that the cause of the change and of the necessity on the part of the Indian Government of imposing restrictions on Coolie emigration to the Straits had been the diminution of protection given to Coolies in the Straits, owing to the falling off in the quality and independence both of judges and magistrates, since the transfer of the Straits from the India-office to the Colonial-office. This falling off of judicial and magisterial quality seemed on the increase, and this downward tendency had been much advanced by the fact that summary jurisdiction, formerly confined to the Government police magistrates, had recently lapsed into the hands of merchant and planter magistrates, who were not so well qualified.

The Earl of CARNARVON said that if the noble lord had read his despatch in reference to the report of the commission which inquired into the subject of the Coolie traffic in the Mauritius he would have found much of the information for which he asked. He had stated in that despatch what he believed to be the great and crying abuse of the traffic; he had recommended various alterations, and he had pointed out that there were also other things open to consideration. It was very often stated that the Coolie traffic was modified slavery, but those who said so mixed up the question of the importation of Chinese Coolies in foreign ships and from foreign ports with the importation of Coolies from India and China in English ships, under the English flag and under English law. He was quite willing to concede that the importation of Coolies from Macao under the Portuguese flag had been attended with cruelties and horrors. Whatever might have been the intention of the Portuguese Government, great cruelties in connection with the traffic had been practised under its flag, but he indignantly denied that any cruelty had been committed under the English flag. If abuses had taken place they had been exceptional. Sir Bartle Frere, in drawing a distinction between the condition of the Coolie in India and his condition in an English colony, put the case thus: In India the Coolie could not as a rule earn more than 1½d. or 2d. a day, and was nearly always on the verge of starvation. In the British colonies, on the other hand, he worked only five days in the week, and earned 1s. a day; if he took task work, he received for each task 1s.; he was well lodged, he was provided with medical attendance, he was protected by special legislation, and in almost every colony he was guaranteed a return passage to his own country. Those persons, therefore, who spoke of them as undergoing modified slavery threw about their words with a recklessness and imprudence which was mischievous, if not something worse. The condition of the Coolie in the English colonies might be inferred from some figures which he was in a position to give their lordships. In British Guiana, in eight years ending in June, 1874, 2,100 Coolies returned to their country, taking with them no less than £64,000 of savings, and in 1872 950 returned, taking with them £24,700. In Trinidad 400 Coolies returned to their homes with £11,500 savings, and in 1874 330 returned with £10,000 savings. Besides that, £40,000 was standing to the credit of Coolies in the bank, and 60 of them had placed £6,000 in the Colonial Bank at interest. Their position in the colonies could not under such circumstances be said to contrast disadvantageously with their position in their own country. He would take one more instance. In the Mauritius, in seven years, ending in 1872, no less than £24,000 was remitted by Indian Coolies to India; in 1873, 619 returned with £8,500; and between 1860 and 1871 the enormous sum of £93,400 was actually invested by Indian Coolies in land in the Mauritius. These figures were so remarkable that they called for no comment from him. As he had already stated, every Coolie was entitled to a passage back to his own country, but in British Guiana they constantly refused it, and preferred to remain in the colony. Reports reached this country last year in reference to some atrocities which took place upon two estates or plantations, and he regretted extremely what was done in regard to them, and took some blame to himself that he had not made use of stronger language in reference to them. In future the Government would take every precaution by legislation to prevent a miscarriage of justice in cases of the same nature, and with that view he had pressed upon the local Government for a new ordinance which should deal with such questions, and which would prevent injustice being done to the Coolies; but it was a matter which required extreme care and consideration, as would be seen when he placed the papers in reference to it on the table of the House. He believed that he had fairly answered all the noble lord's questions, and though they were questions which did not excite much interest in this country, yet they affected to a most important extent the condition of the Coolies. He felt, however, that do what the Government would in regard to legislation, there would always be some possibility of abuses springing up, but he hoped that by improved regulations those abuses would be reduced to a minimum.

The Earl of KIMBERLEY had heard the fair and able defence which had been made by his noble friend in reference to the Coolie traffic. There were, no doubt, two sides to this question, the bright side and the dark one, which had been presented to their lordships in respect of this particular instance in the Straits Settlements, but it would be unfair, unjust, and impolitic, and, indeed, most disadvantageous to the planters and to the Coolies if they should rush to the conclusion that because abuses had occurred that there was no hope of a better state of things. As regarded the Mauritius, he was not one of the six persons referred to who had mastered the report. It was exceedingly bulky, and required much study, and that was his excuse for not being better acquainted with the contents of that Blue-book; but he would suggest that the power which existed in the West Indies of depriving plantations of Coolie labour in case the Government should not be satisfied with the treatment of the Coolies should be resorted to in other colonies, and he contended that Coolie emigration to the Mauritius should be entirely stopped if the Government there did not do what Her Majesty's Government required to be done. He was glad to find that new regulations had been made for the Straits Settlements, for it was not safe that Coolies should be employed in large numbers on any estate without special regulations being made for their well-being.

Lord STANLEY of ALDERLEY then withdrew his motion.

HOUSE OF COMMONS.

(July 22nd.) Mr. RICHARD asked the Under-Secretary of State for India when the correspondence relating to the differences between the King of Burmah and the Indian Government, promised by him on the 22nd of June, would be produced; and whether it would be still detrimental to the public interests to furnish Parliament with some authentic official information as to the character and issue of the recent negotiations with the King of Burmah.—Lord G. HAMILTON said: I stated on the 22nd of June that papers should be laid before Parliament relating to the differences between the Government of India and the King of Burmah when their publication would not be detrimental to the public interests. As the negotiations are not yet concluded it would not be advisable to lay upon the table of the House papers containing incomplete, and consequently misleading, information. Upon the 22nd of June I also stated that the differences between the two Governments had been satisfactorily settled, with the exception of one which I hoped would be amicably disposed of. I have nothing to add to that answer, except that the hope which I then expressed was, and continues to be, well-founded.

THE DIFFICULTY WITH BURMAH.

(THE TIMES.)

Whatever else may come of our disagreement with the King of Burmah, it can scarcely fail to open up a Trade Route with Western China. It is easy to see the commercial and even the political importance of such a highway, even if we dismiss the overcharged expectations raised some years ago. There was then a belief that the trade of the Chinese Empire might be reached through Rangoon instead of the Treaty Ports, and that our ships might be spared the long, dangerous, and costly navigation of the China seas. A railway or a tramway, it was thought, could be made from Rangoon, to one of the frontier towns on the south-east of China, and thus we could "tap" the commerce now poured out through Canton. Another road would be formed from Mandalay or from Bhamô to some town near the Yang-tse-Kiang, and that great river, the chief highway of China, would enable us to divert to the Irrawaddy, and thence to Rangoon, the immense mass of merchandise now shipped at Shanghai. Thus the voyage might be greatly shortened, and one of our own ports would become the chief shipping station east of India. Telegraph wires would also run along the new trade routes, and would link Calcutta and London with Canton, Shanghai, and even perhaps with Peking. So brilliant a prospect might make Russia despise her own tardy advances through Central Asian steppes, and prompt her to push on faster than ever towards the Western frontiers of China. Some day the scheme may become a reality, but in the meanwhile it is a little too like cloudland to be of much account in commercial calculations. A less Conservative nation than the Chinese would take a long time so to unlearn its habits as to divert the stream of trade to new routes, and thus ruin old ports. Their jealousy of strangers would stand in the way of their manifest interests; and, even under the rule of a friendly Power, it would need many years to develop the appliances of a great trade along a new road of more than 2,000 miles. But we should take a short-sighted view of our duty in the East if we were not to prepare the way for such a diversion of the Chinese trade. China is clearly on the eve of some great change, in spite of the conservatism which she has raised to the dignity of a religious duty, and there cannot be a doubt that it will throw her immense spaces more open to the West. Her rulers may fight against destiny with the spasmodic vigour which the representatives of ancient institutions often display when confronted with new conditions; but resistance will only increase the change by shattering the already weakened network of authority. Russia does not forget that such must be the future of the Chinese Empire. She is pushing her troops towards its eastern boundaries for political as well as trading objects. The Chinese, if they should be the victors in the approaching struggle with the Ruler of Kashgar, and should win back

Digitized by Google

the territory out of which he drove them, would bring their outposts close to those of Russia, and thus increase the danger of a collision. The rapid approach of Russia towards the outlying provinces of China, her power of diverting its trade, and her facilities for profiting by any political change in the Empire are all so many reasons why we also should prepare a way by which a great stream of commerce should in the future flow into our own territory. Some years ago the Indian Government was unwilling to meddle with the matter, lest new communications with China should stir up embarrassing difficulties, and all the peremptory vigour of Lord Salisbury was needed to overcome the resistance of Calcutta. But the advance of Russia is adding political to the commercial inducements which urge us forward, and the Indian Government is showing greater readiness to face the inevitable difficulties of its changing relations with China. There are also more prosaic reasons for opening up new trade routes. Even if we cannot draw to Rangoon the main stream of the commerce which flows into the Treaty Ports, we can reach a peculiarly rich field of commercial enterprise in the Western Provinces of China. Yunnan, which lies nearest to Burmah, is the richest district in the Empire. It is said to have ten millions of people, and more than twenty considerable cities. At one time it carried on a large trade with Burmah, but commercial intercourse was almost stopped by the Panthay rebellion and the growing dangers of the way. The contest between the Mohammedan population and the Chinese authorities ruined several of the cities, and laid waste large tracts of fertile country. Lee-see-tahi, the robber general who was recently honoured at the Court of Mandalay, is answerable for much of the havoc. But now that the power of "Sultan Suleiman" has been destroyed, and that the province is at peace, the marvellous industry of the people is again drawing forth the full riches of the soil, and the trade with Burmah is regaining its old proportions. It might be immensely developed in a few years if our hardware, our cotton stuffs, and woollen goods were sent by a short and cheap route to the bazaars of the chief towns. The people would eagerly trade with us if the authorities would allow them. Major Sladen's party found no jealousy of strangers among the population of the frontier town which they reached in their exploring expedition, but the inhabitants never see any Europeans, and they receive only the most wretched specimens of our manufactures. Once a commencement made, time alone would be needed to open up other markets besides Yunnan by means of the great water way which runs from west to east of China.

The physical obstacles are considerable, but they could be overcome. Even if a railway or a tramway from Rangoon to the Chinese frontier be deemed impracticable there remains the route by way of Bhamo. At all seasons of the year the Irrawaddy is navigable to that town by steamers drawing no more than three feet of water. The way is not stopped even when the channel is swollen by the spring rains. From Bhamo the path is clear and easy for about twenty miles, but then the real difficulties begin. The way must wind among the Kakhyen Hills, and some engineering skill would be needed to make it suitable. The tribes of the district systematically exact black mail from the passing traders, and pillage the people of the plains. We fear they would be inclined to pay scanty respect to the telegraph wires which would span their ravines if they happened to be in want of metal. Nevertheless, it is believed that a little management and the payment of a fixed toll might induce them to respect the goods of Europeans. A more formidable difficulty arises from the jealousy of the Chinese authorities and traders. The mandarins would keep us out of Yunnan for the same reasons as they tried to prevent us from settling on the seaboard of the Empire. They are aided by the native merchants who have hitherto conducted the trade with Burmah. The spirit of commercial exclusiveness flourishes all the world over, and Yung-chan is the headquarters of a great native company which clamours for "protection to native industry" in a fashion that reproduces the less meritorious part of our own corn law debates. Lee-see-tahi has striven to give effect both to the official and the commercial spirit of isolation by means of his marauding bands, and they still lie in wait for any practical missionaries of free trade. But the chief difficulty is the jealousy of the King of Burmah himself. He is hostile to the opening of a great English trade between his country and Western China because he is the chief trader in his dominions, and he desires to keep the stream of riches in his own hand. English counsel has not yet been able to teach him that he might gain far more indirectly from a great and free foreign trade than he now obtains directly from his monopolies. His opposition is also political as well as commercial. Although the vainest of beings, he does not lack shrewdness; and he suspects that wherever the British trader puts a foot in the East the British soldier will soon follow. He fears that a great commercial route from Bhamo would give the Indian Government the same hold of the Upper reaches of the Irrawaddy that it has already gained of the Lower. Hence he has set his face against the exploring parties with a persistency which even his duplicity has not been able to hide. His present refusal to let English troops go with our exploring parties or our traders confirms the suspicions of his good faith. To insist that they shall go without a British escort into the country of the Kakhyens and the regions under the command of Lee-see-tahi is simply to insist that they shall go to their death. On this point it is the duty of the Indian Government to be resolute alike for the sake of our commerce and of our political influence.

(SATURDAY REVIEW.)

The consequences of a conflict with Burmah must be kept in view. The Germans have read other nations a valuable lesson in regard to the importance of obtaining information beforehand as to the nature of a country that is likely to be traversed by their troops. A little of the spirit of Von Moltke would not be amiss even where the object is merely to ascertain how many days of rough travel it will require for a pony or a bullock to convey its load to a given point. And though this precaution may seem trivial to enthusiasts who wish to tap, by telegraph or railway, the province of Szechuen, or to indignant writers who urge that the policy of non-extension must now and then be put aside, it ought not to be ignored. Now all that we know of the territory beyond Bhamo at present is that it swells into mountain ranges of considerable altitude, and that it is held by tribes subject to "all the disturbing influences of the Chinese and Burmese Powers." There are Burmese Shans, and there are Chinese Shans; there are Kakhyens divided into Lakone, Cowrie, and Hansa; there are high ridges and rushing torrents, and, in fact, the long line of a difficult and dangerous frontier, infested by bodies of men of whom the most trustworthy authority, writing from the spot, has said that, having been despoiled themselves during a period of anarchy, they are compelled to seek their livelihood in the reckless spoliation of others. A Chinaman of some influence asked one of the pioneers of our exploring party in the year 1868 how he expected to succeed where kings had tried and failed. The truth is that these expeditions into an unknown country which has not even the settled government of an ordinary Oriental despotism are likely to lead to complications which we can neither unravel with profit nor abandon with honour. Until we know the precise nature of the request made by us and refused by the King of Burmah, it would be premature to attempt to pronounce decisively on the point. But it is hardly in accordance with the principles of international law that we should go to war with the ruler of a foreign country because he refuses to allow the place of his ordinary policemen to be taken by a Jemadar of Mohammedans or Sikhs. As regards the impolicy of war or further annexation there seem scarcely to be two opinions. We should be no nearer to the back of the north wind, or to the region of peaceful barter and exchange, if our frontier towns were Hotha and Bhamo instead of Prome or Thayetmyoo. Then, at a time when it may be desirable to mass troops on the North-Western frontier of India, or to impress native rulers by the show of highly-disciplined and well-equipped forces, it would be extremely inconvenient to have calls made on our military strength in another and remote corner of our vast dependency, in order to curtail the possessions or to punish the audacity f a sovereign between whom and the prominent castes of India there exists neither social nor political tie. A campaign in Burmah would not produce half as much effect on discontented Mohammedans in India as the repression of an *emeute* in one of its great cities, or a summary retribution inflicted on troublesome frontier tribes in the Punjab. From the latest telegrams we indulge a hope that Lord Northbrook may yet devise some means of asserting our dignity or restoring our credit without resorting to extreme measures. But the present dilemma should be a lesson against henceforth giving rash official recognition to explorations in wild countries at the suggestion of credulous Chambers of Commerce. We may select the most capable and judicious of leaders. We may cut down an exploring party to the narrowest limits compatible with efficiency. We may provide all the safeguards which sagacity and experience can suggest. But it ought to be remembered that a Government which lends itself to such inoffensive little expeditions may any day, and in spite of every precaution, be committed to a vast expenditure, if not to a great war.

(MORNING POST.)

If we are not going to annex Burmah for its own sake, and if we can at any moment force our way to Mandalay or further, what is the purport, what can be the purport, of this haggling about formal treaty rights of passage for our troops? To protect scientific or other expeditions to China, is, perhaps, suggested as a reply. But this reply seems curiously inadequate as an answer to the question. Has the consent of the Chinese Government been previously obtained for British troops to escort any future expeditions through Western China? Has this consent been even asked? By no means. There has not been a word upon the subject broached at Peking, and it is perfectly notorious that if the demand were made it would be refused as peremptorily as if it was Germany that was asked to permit the peregrinations of French regiments through Alsace and Lorraine. It is only the other day that the Chinese Government stamped out a formidable insurrection in Western China; and even if no insurrection had ever existed at Yunnan, is there a scintilla of ground for imagining that the Chinese Government would ever permit military escorts of English or Russians to traverse the dominions of the Chinese Empire? We are, it seems, in this position, accordingly, that even were the King of Burmah to grant the strange permission demanded from him we should not be an inch nearer to our assumed object—the protection of our trading or scientific expeditions. It is not on Burmese territory that we have to fear attacks such as the one which cost the brave Margary his life, and no agreements with the Court of Mandalay can have a featherweight of influence on the Chinese side of the border. It is the Peking Government alone which can guarantee the safety of British travellers or caravans in China; and until we know the result of the Commission of Inquiry which the Chinese Government has despatched to Yunnan we are entitled to hope that Mr. Margary's murderers will be chastised with the strong arm of the law. At the worst, and supposing that we may have to declare hostilities against China, what is the use of this diplomatic contest about rights of passage through Burmah? Whenever we have to set seriously about invading Western China we must do it in such force that the notion of any resistance being offered by Burmah is simply absurd. If, when we notify the Burmese Sovereign that we are under the necessity of directing thirty or forty thousand men across his territory, he chooses to side with China, so much the worse for him. But in the meantime what on earth can be the purport of huckstering and bargaining about concessions which can only be useful to us in a certain emergency, and which, in that emergency, we can make sure of when we like? If the King of Burmah were to grant a permission which could only be availed of against China, he would be placing himself in a very unpleasant position as regards his powerful Chinese neighbours, who have a thousand means of making Burmah very miserable. After all, we may never go to war with China, and we should scarcely go to war merely to protect Burmah from the troubles which the Chinese Viceroys in Yunnan would be pretty certain to excite, and which they may have already begun to excite. Let us be prepared to deal a strong and decisive blow when the need arises, but let us avoid superfluous complications which, however they may exercise the self-importance of subordinate officials, bring neither glory nor profit to the Empire.

LONDON: MONDAY, JULY 26, 1875.

"FESTINA LENTE."

IN our school-days we remember to have been called upon to write themes on such subjects as "Festina lente" and other analogous maxims, and we were, therefore, early impressed with the impropriety of undue haste and all "leaps in the dark" in general, but, in those halcyon days of our youth, we never remember to have had brought under our notice such a very literal interpretation of the old Latin adage above quoted as that presented to the House of Lords on July 16 by the Secretary of State for Foreign Affairs in his reply to Lord STRATHEDEN and CAMPBELL'S question. Poor Mr. MARGARY was foully murdered on February 21, and the British officers appointed to be present at the inquiry into the circumstances attending that scandalous outrage are to set out (presumably from Shanghai) at the end of August. This dilatoriness seems almost incredible. It is all very well to talk *now* about the hot season—for that matter we should fancy that it is not exactly cold even at the end of August in South-Western China—but surely, if only a reasonable amount of energy and promptitude had been displayed in dealing with this very serious question, the Commission might have left for the place of inquiry at the end of March or the beginning of April. Her MAJESTY'S Government appear to be supplied with such scanty information from China that it may be well to draw their attention to the fact that the Chinese have quite recently changed all the officials who might in any way have been held responsible for Mr. MARGARY'S murder, and this method of proceeding they, no doubt, look upon as check-mate to the demands we are languidly making upon them for proper satisfaction; it certainly will tend to complicate matters, already sufficiently complicated. The noteworthy intelligence we refer to has just reached this country in a letter addressed by its Tientsin correspondent to the *North China Daily News*. The *Peking Gazettes* of the middle of May, it seems, contain a memorial from CHIN-YUH-YING, the Acting Governor-General of Yunnan and Kweichow, which must have been written more than a month after the murder took place, as it mentions the arrival of the Burmese Embassy at the capital city of Yunnan on March 22. In this memorial the names of the civil and military officers at Momein, &c., incidentally appear, and the names do not tally with those in the Red-book. "This action on the part of the Chinese Government," observes the writer alluded to before, "strikes me very forcibly as being worthy of the consideration of Her MAJESTY'S Minister." It is most certainly deserving of consideration, and an official explanation of the matter ought at once to be demanded. "I am particular in remarking upon all these matters," continues the writer, "as it is of great import-
"ance that the British officers (Messrs. GROSVENOR and
"BABER) should know beforehand who were the Chinese
"officials who actually held office. . . . when Mr. MAR
"GARY was assassinated. The British officers should, as
"early as possible, have an accurate memorandum of all
"the officials . . . in order to call upon the judge of the
"Court to examine every one of them."

LORD STANLEY ON COOLIE EMIGRATION.

LORD STANLEY'S motion on the Coolie traffic, and on the treatment of Coolies in the English Settlements, extended over so wide a range of topics, and mixed up so many questions essentially distinct, as to render him liable to the serious charge of misleading public opinion, and conveying mischievous, because erroneous, notions of the effects of the emigration movements from India and from China. We quite admit that the regulation of the Coolie traffic and the treatment of Coolies are subjects well worthy the attention of the Legislature; and much credit is due to Lord STANLEY for the pains he thus bestows in vindicating the rights and interests of the labourers; but that does not justify him in overstating his case, and in representing Coolie emigration to be negro slavery in disguise. Lord STANLEY'S method of attack was in this wise:—He referred to the treatment of natives of India in the Mauritius, to the state of the Chinese in the West Indies, to the kidnapping sometimes practised by merchant vessels in Polynesia, to the immigration of Chinese into Singapore, to the condition of the Klings in Province Wellesley; and tying up all these different cases—so to speak—into one bundle, he condemned the entire system, as though our colonies were collectively responsible for the special evils which have arisen in connection with the labour supply in each particular settlement.

As to the emigration of Coolies from China, there is no kind of reason why such legislative restrictions and supervision as long experience has shown to be most advantageous should not be persistently and rigidly put in operation by our local authorities; and if Lord STANLEY can point out any defects in the existing system they can be easily amended, and he will have done good service; but it is no good talking about prohibiting the "traffic." Can we prevent the redundant poor in China from finding an outlet in foreign countries? Chinese emigration is a great fact; we may do something to protect it from abuses, we cannot check it. The Chinese Government are far more to blame in this matter that anybody else. We may do our very best, and the results will still be unsatisfactory as regards Chinese Coolies. The Coolie wants to emigrate, the negro-slave wanted to stay at home; and that makes all the difference between the two cases. Yet the Coolie, before he has acquired experience, is as stupid as the nigger, and has really far less independence. When grown men are too helpless to take care of themselves no legislative interference can really work satisfactorily; it must needs be in the nature of a make-shift. Afterwards, when the Coolies have been working together on a foreigner's estate, they get a trick of banding together, and discover that they may perhaps gain something by crying out that they have been ill-used, deceived, and so forth. Philanthropists in England are sometimes apt to overlook certain peculiar and difficult traits in the Chinese character. We are far from denying the need for strict supervision of Coolie traffic and Coolie labour; much injustice, much cruelty, has occurred, and we hope when the new Ordinance to deal with the whole question in the Straits has been made public it will prove a satisfactory measure.

The case of the emigrant natives from India, whether in the Mauritius, the West Indies, or the Straits, stands on a wholly different footing. These Indians, as Lord STANLEY himself admitted, are our own subjects; they find zealous protectors and supporters among our local officials; they understand the rights which British law gives them; they have been born in the healthy atmosphere of personal freedom, and they are, in short, pretty well able—in any British colony at least—to take care care of themselves. There is not the slightest ground for saying that emigration from British-Indian ports resembles the African slave-trade. Earl CARNARVON made a complete reply to Lord STANLEY'S criticisms on this head of his subject when he pointed to the actual wages earned by Coolies in Bengal, and to the sums remitted home by the same class of people from the colonies to which they had emigrated. In Bengal a labourer is paid from 1½d. to 2d. a day, in English colonies the same man receives from 10s. to 12s. a week, besides house, medical attendance, and a free passage home. From 1864 to 1872 2,100 Coolies returned from British Guiana to India, taking with them in savings £64,000; while in Mauritius £93,400 was saved

Digitized by Google

by the Coolies from 1860 to 1871. These facts speak for themselves. The truth is that in the interest of the Coolies —whether Indian or Chinese—and in the interests of our colonies, the right policy to be pursued is to enact wise and strict laws and regulations adapted to the circumstances of each particular settlement, and when enacted to see that they are rigidly carried out. It is most mischievous to cry out for the suppression of the Coolie traffic, and not only mischievous but useless, for we cannot prevent men from emigrating, and shall only spend our money to no purpose. Of course we are not going to defend particular instances of abuse; the flogging case in Province Wellesley seems a very bad one, and the offenders may congratulate themselves on the leniency with which they were treated. Still we do not think Lord STANLEY justified in imputing general unfitness to the judges and magistrates in the Straits. The charge is vague, and therefore impossible to disprove.

IN another column will be found a telegram stating that it is rumoured at Peking that a special Embassy is to be appointed to England with reference to the murder of the late lamented Mr. MARGARY. It is sincerely to be hoped that this does not indicate that we are to look for a repetition of the CHUNG HOW Embassy, and we take the earliest opportunity of warning the Government here of the impolicy of changing the *venu* of the discussion from Peking to Downing-street. The Chinese have obviously every interest in so doing, while we have as obviously everything to lose and nothing to gain by consenting to such a plan. There can be no ground for the Chinese sending a special Embassy to London except the hope that they may obtain, from the necessary ignorance upon many points connected with the question on the part of those at home, what they apprehend they will fail to obtain from the full information which will naturally be in the possession of a Minister resident in Peking, speaking the language and able to watch the development of every phase of the matter to be decided. It is sincerely to be hoped that Mr. WADE has not suggested or given his countenance to such an Embassy.

FRANCE IN THE FAR EAST.

The Treaty of Commerce of 31st Aug., 1874, between France and Annam has been approved, without discussion, by the French National Assembly. The engagements taken by the French Government in connection with the said treaty will be fulfilled before the present year is out.

Orders have been given at Toulon for fitting out the *Mayenne*, one of the five steamers the French Government promised to hand over to the King of Annam within a year from the ratification of the treaty. The *Mayenne* will be armed with two smooth-bore howitzers, of 12 cent. calibre, with ammunition at the rate of 200 rounds for each piece over and above the ammunition that may be required for the journey. The *Mayenne* will carry, besides, six other pieces of artillery, and 1,000 breech-loading rifles of the *tabatière* kind, with 200,000 cartridges.

The two transport ships leaving Toulon on the 20th of July and 20th of Sept. next will each take for Hué 500 *tabatière* rifles.

By a decree of the President of the French Republic, dated 5th July, MM. A. Garrido and L. Palasne de Champeaux, administrators of first class in the service of native affairs in Cochin China, have been appointed inspectors in the same service, vice MM. Reinart and Turc, who are placed on the unattached list.

The *Moniteur de la Flotte* gives the following information as regards the latest movements of the French naval divisions of the China and Japan seas, and of Indo-China:—

Talisman, commanded by Frigate-captain Darcq-St. Hilaire, arrived at Aden, from Suez, on the 26th May.

The ironclad corvette *Montcalm*, with Rear-Admiral Krantz, commander of the French division in China and Japan, arrived at Yokohama on the 22nd May, with the corvette *Volta*, commanded by M. Floucaud de Fourcroy, and having on board, as an officer, the Duke of Penthièvre, one of the Orleans princes.

The *D'Assas*, under Ship-captain Brossart de Corbigny, left Saigon on the 10th of May, for Batavia and La Reunion.

The *Duchaffaut*, under Frigate-captain Le Helloco, sailed on the 14th of May from Saigon for Hainan.

The transport ship *La Sarthe*, after leaving Saigon on the 20th of May last, struck on a coral bank, and was obliged to go back to Saigon for repairs. The damage, however, was trifling, and the ship was able to sail again a few days later.

Correspondence.

THE OPIUM TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—It is with great diffidence that I address you on a subject that I thought had been pretty well disposed of by the Anti-Opium League, and I should not now be doing so but for the fact of having read Mr. Turner's letter to you and an extract of a letter to *The Times* by Nang Choy, published in your issue of the 12th inst., on the same matter. I will therefore be very brief in what I have to say. Your correspondent says, "As British citizens it is our duty to relieve China from the injustice she has suffered at our hands." What injustice has she suffered from us? I have never been able to discover any, and if he means Opium, I must tell him that Opium was produced and eaten and smoked in China and India before we had anything to do with either country. My experience of China and the Chinese is derived from a life of over thirty-two years in the country and among its people, and I have yet to learn how the Opium trade has impeded missionary work; I have not seen it, and I do not believe in it. There are many Chinese who would, no doubt, be better off if they did not smoke Opium, but one does not see the amount of misery from Opium smoking that is to be seen in European countries from spirit drinking. I have seen and have read of more misery and crime in England arising from the over use of gin, &c., in the space of three years than I ever did in China, and I firmly believe there is more evil and wrong done, or concocted, of a Saturday night in one of our large gin-palaces than there is done in all the Opium-smoking places in the city of Ningpo in a week. I have often visited the native smoking places and tea-houses in the cities of Ty-wan or Tou-wan, Formosa, Amoy, Foochow, Ningpo, Soochow, and other large places in the north of China, and have never seen anything like what is to be seen outside any ordinary gin-shop in London. I know that many missionaries in China make the plea that their non-success in getting converts to Christianity is due to the Opium trade; I do *not* agree with them on this point. What I maintain is, that China is not suffering, nor has she suffered injustice at our hands, nor has the Opium trade prevented missionaries from getting converts to their views. As an Englishman I would rather sign a petition to Parliament to put a restriction on gin-palaces and gin-shops than to sign one to interfere with our Indian revenue or the Opium trade in China. The missionaries can make their minds easy so far as we as a nation are concerned, for when I left China two and a half years ago the province of Shansi alone was growing enough Opium as to be seriously interfering with the sale of Malwa Opium, and it was expected that this province would, in the course of a few years, produce a sufficient supply so as to exclude our Indian drug from the North of China, and this too was generally supposed to be under the direct encouragement of the Peking authorities. I will, if you will allow me, through your columns, give "Nang Choy" a little of my opinion in my next.—In the meantime I beg to subscribe myself, Sir, yours truly,

July 19, 1875. OLD CHINA.

THE NEW SEASON'S TEA.

(To the Editor of the *London and China Telegraph.*)

SIR,—I am very glad to notice that you call prominent attention to the recklessness with which the present tea season has been opened at Hankow, and I only wish that there were some better chance than there is of your well deserved strictures inducing something like reasonable caution on the part of the buyers in China. If it is true that the China trade can be conducted only in the reckless manner in which it is now carried on, there is but one conclusion to which all sensible men must come in regard to it, and that is that the sooner they retire from it the better. I do not deny that there are difficulties to be contended against, and the competition in the present days is sharp, and that the Chinese holders of tea, often backed by loans from foreign banks, are able to combine to the detriment of the foreign buyer; but all this is grievously and unnecessarily enhanced in severity by the over-eagerness displayed at the opening of the seasons. It would be thought that instead of there being on an average about a year's consumption of tea in stock at home, we actually did not know where to put our hands upon a pound of tea, and it was necessary for the China merchants to come to our relief, like that of a besieged and starving city.

Before the teas are fairly on the market Chaszees are busy making offers to the teamen upon samples sent in advance, and it is hardly surprising that these astute traders should see their advantage in holding back and increasing the prices against such eager buyers. But, Sir, as you pointedly suggest, there has been no reason whatever for hurrying home new season's teas since the opening of the Suez Canal, and, as a matter of fact, arrivals of new teas have not realised prices upon the London market in any way proportioned to the enhanced rates paid for them at the opening of the seasons in China.

The buying for the "New Season" seems to me to be kept up in China as a species of excitement recurring once a year, like bet-

Digitized by Google

ting at the races; to have about as much *raison d'être*, and to be conducted in very much the same manner and upon not unsimilar principles. Once let this artificial hurry to crowd the larger proportion of the tea operations into about a fortnight be given up, and it will soon be no longer profitable for the Chinese dealers to hold their teas against reasonable offers, if they be not at once snapped up at unreasonable ones, and it will again be possible to conduct business upon something like a sound basis; but so long as purchasers are found, who, backed up with unlimited credits, are willing to go in neck or nothing, on a kind of "heads I win and tails you lose" principle, we can look for nothing but those disastrous results which have of late years caused so many men of capital and responsibility to withdraw from a trade which, properly handled, ought to be one of the steadiest and most profitable in any part of the world. In conclusion, I would call attention to the detriment which is worked to the trade by merchants having any interest in the steamers which take the teas, and being consequently, as has notoriously happened, liable to purchase teas not on account of their showing a probability of a profitable out-turn, but more to avoid delay in loading the vessels.—Your obedient servant,

London, July 21, 1875. AN EX-CHASZER.

(To the Editor of the *London and China Telegraph.*)

SIR,—The able leader in your last issue touching upon the state of the China trade, as regards the import of tea, attaches, in my opinion, too much blame to the banks. On looking over purchases made at Hankow at the opening of the eason, amongst buyers who have largely competed with the Russian and German houses, are firms enjoying unlimited credit, by reason of their reputed wealth and standing, and who, instead of conducting business on the principles of supply and demand, have by rash operations fostered and encouraged the spirit of speculation rampant since 1870, who also appear to have quite ignored the great changes caused by telegraphy and the Suez Canal.

The day has gone by for China as a sealed book, when the entire trade was carried on by a few firms. Now the number of traders has vastly increased, but the produce to be bought and sold has not increased in the like proportion, and firms must be content to do a smaller and safer business, and thus help to bring about a more healthy condition. The remedy is in the hands of those conducting the trade, to alter the present system of speculative trading, which has led to results that all must deplore, and which it would appear is not realised by those operating at the shipping ports in China. The export of tea from all China to 17th July is given at 72,000,000 lbs., the bulk of which will result in disastrous losses.—I am, &c.,

July 20. MINCING LANE.

CARGOES AFLOAT.

—o—

SINGAPORE AND PENANG.

Professor Van der Boon Mesch: 303 tons gambier, 220 tons sago flour, 150 tons pearl sago, 150 tons black pepper, 60 tons white pepper, 340 cwts. rattans, 295 cwts. hides, 6 tons horns, 20 m. Malacca canes, 8 cwts. mother-o'-pearls, 10 tons tapioca. Coldinghame: 25 tons tin, 793 tons black pepper, 180 cwts. rattans, 1,161 cwts. hides, 420 tons sugar, 18 tons horns. Vanguard: 70 tons gambier, 76 tons tin, 294 tons sago flour, 48 tons pearl sago, 312 tons black pepper, 73 tons white pepper, 16 tons coffee, 460 cwts. rattans, 195 tons sugar, 32 tons india-rubber, 55 tons tapioca. Constantia: 395 tons gambier, 150 tons pearl sago, 140 tons black pepper, 160 cwts. rattans, 223 cwts. hides. Glenavon: 150 tons gambier, 10 tons tin, 455 tons sago flour, 85 tons pearl sago, 265 tons black pepper, 80 tons white pepper, 11 tons gutta, 500 cwts. rattans, 980 cwts. hides, 17 tons india-rubber, 4 tons horns, 63 m. Malacca canes, 80 tons tapioca. Caldew: 130 tons gambier, 115 tons sago flour, 10 tons pearl sago, 120 tons black pepper, 140 tons white pepper, 5 tons gutta, 60 cwts. rattans, 222 cwts. hides, 6 tons india-rubber, 10 tons horns, 21 m. Malacca canes, 27 tons tapioca. Ben Nevis: 30 tons tin, 207 tons black pepper, 6 tons white pepper, 160 cwts. rattans, 113 tons sugar, 2 tons horns. Proserpina: 100 tons gambier, 160 tons sago flour, 150 tons pearl sago, 303 tons black pepper, 240 cwts. rattans, 747 cwts. hides. Dewsberry: 100 tons gambier, 345 tons sago flour, 17 tons pearl sago, 3 tons white pepper, 180 cwts. rattans, 363 cwts. hides, 22 tons tapioca. Windermere: 185 tons gambier, 50 tons sago flour, 275 tons pearl sago, 95 tons black pepper, 2 tons white pepper, 6 tons gutta, 240 cwts. rattans, 120 cwts. hides, 23 tons india-rubber, 70 cwts. damar, 17 tons tapioca. Pauline: 20 tons tin, 245 tons black pepper, 10 tons white pepper, 57 cwts. nutmegs and mace, 380 cwts. rattans, 263 cwts. hides, 295 tons sugar, 55 tons tapioca. Eastern Province: 316 tons gambier, 55 tons black pepper, 60 tons white pepper, 36 tons gutta, 200 cwts. rattans, 357 cwts. hides, 5 tons horns, 2 m. Malacca canes, 36 tons tapicca. Brisbane: 255 tons black pepper, 280 cwts. rattans, 417 cwts. hides, 315 tons sugar. Cotherstone: 182 tons black pepper, 260 cwts. rattans, 508 cwts. hides, 346 tons sugar. Bolden: 475 tons gambier, 47 tons sago flour, 146 tons pearl sago, 135 tons black pepper, 15 tons coffee, 280 cwts. rattans, 675 cwts. hides, 10 tons india-rubber, 14 tons horns, 25 m. Malacca canes, 105 cwts. mother-o'-pearls, 10 tons tapioca. Tecumseh: 855 tons gambier, 925 tons sago flour, 45 tons pearl sago, 20 tons white pepper, 1 ton gutta, 480 cwts. rattans, 640 cwts. hides, 7 tons tapioca.

MANILA.

Monte Rosa: 1,000 tons sugar, 825 tons hemp, 25 tons sapanwood. Envoy: 750 tons sugar, 43 tons hemp, 12 tons sapanwood. Lyra: 406 tons sugar, 140 tons hemp, 6 tons sapanwood, 10 cwts. mother-o'-pearls. Estrella: 570 tons sugar, 280 tons hemp, 12 tons sapanwood. Invincible: 500 tons sugar, 306 tons hemp, 12 tons sapanwood, 250 mil. cigars. Araby Maid: 1,190 tons sugar. Angostura: 547 tons coffee. Penrith: 800 tons sugar. Belted Will: 1,000 tons sugar, 152 tons hemp, 15 tons sapanwood, 120 cwts. mastic. St. Kilda: 500 tons sugar, 632 tons hemp, 5 tons sapanwood. John Nicholson: 600 tons sugar, 354 tons hemp, 5 tons sapanwood.

Monetary and Commercial.

Tenders for £600,000 in bills on India were received at the Bank of England on the 21st inst., when the amounts allotted were to Calcutta £348,000, to Bombay £228,000, and to Madras £24,000. Tenders on all the Presidencies at 1s. 9⅜d. will receive about 24 per cent. There is apparently a better demand for remittances to the East.

The report of the Alliance Bank (Limited) has been issued. Including £10,528 brought forward, the available total is £47,426, from which the directors recommend a dividend at the rate of 6 per cent. per annum, free of income-tax. It is also proposed to cover in full the whole of the losses from recent failures by carrying the balance forward, and to add to it £10,000 taken from the reserve fund, and £1,422 realised during the six months from the outstanding account of the old bank. A considerable amount, it is expected, will be ultimately recovered, but meanwhile the directors believe it to be the interest of the company that the worst possible results should be recognised.

The directors of the London and Provincial Bank have issued their half-yearly report. The available balance is £18,140, out of which a dividend is recommended at the rate of 10 per cent. per annum, and £4,707 is carried forward. The directors remark that it will be satisfactory to the shareholders to learn that the bank has been unaffected by the commercial failures that have recently taken place.

The report of the Imperial Bank (Limited) for the half-year ending 30th June states that the net balance of profit remaining for appropriation is £34,032 1s. 2d., and a dividend at the rate of 8 per cent. per annum is recommended, £7,132 1s. 2d. being carried forward.

The directors of the National Discount Company have issued their report for the past half-year. The net profit amounted to £68,140, and a dividend is recommended at the rate of 10 per cent. per annum. The balance of £28,140, together with £100,000 which the board regret it is necessary to take from the reserve fund, is to be set aside to meet the losses arising from the failures of the past half-year.

The report of the Imperial Credit Company for the half-year ending the 30th June last states that the net available balance amounts to £15,349, out of which the usual dividend is recommended at the rate of 6 per cent. per annum, or 4s. 6d. per share.

The Report of the Globe Marine Insurance Company state that the accounts of 1873-4 were closed on the 30th ult., with a balance which, when carried into the general account, leaves the net profit for that year £13,778. The company's articles of association provide that whenever the net profits in any year shall have sufficed to pay a dividend of 10 per cent. on the paid-up capital, 25 per cent. of the surplus is to be distributed *pro rata* amongst such of the insurers as shall have paid during the year £500 and upwards in premiums. Such distribution will therefore be made.

At a meeting of the directors of the Thames and Mersey Marine Insurance Company in Liverpool, it was resolved to recommend a payment of 4s. per share, being 2s. per share dividend, and 2s. bonus, making, with the dividend on account paid in January last, 6s. per share, or 15 per cent. per annum for the year ended the 30th June last.

The shareholders of the City Bank at their meeting on the 20th inst. adopted the report of the directors. The dividend declared was 8 per cent., as already announced. The chairman adverted in severe terms to the loss which the bank had sustained by recent failures, and seemed to point to the possibility of the bank instituting criminal proceedings against the drawers and acceptors of some of the bills upon which a loss had arisen. The statement of accounts will be found in our advertising columns.

The half-yearly general meeting of the Telegraph Construc-

Digitized by Google

tion and Maintenance Company (Limited) was held on the 20th inst.; Sir Daniel Gooch, M.P., the chairman, presided :—

The chairman said there was no resolution to propose; the half-yearly meetings were held in order that the shareholders might have an opportunity of asking questions. The work they had had in hand during the present year had been very small. In the course of a few days, however, he hoped the company would conclude a contract for a cable, 1,380 miles long, from Sydney, New South Wales, to New Zealand, and he trusted that for the rest of the year they would be well employed. They knew of no other work like the one he had mentioned coming forward, but they were quite prepared to take work should it present itself. He did not think it was unfortunate even for them that there should be a cessation for some time in the construction of these long cables. He thought this work had gone on now for some time, and with a little rest he hoped the existing cables would remunerate their shareholders better than they had in the past. He would be happy to answer any questions. Mr. Abbott thought the vacancies on the Board caused by the deaths of Mr. Wanklin and Admiral Sherard Osborn should be filled up, and by gentlemen of high social position and strict integrity. The chairman, in reply to questions, said he knew of no director of the company who was "dealing" in their shares, and he knew of no other company which held the company's shares except the Globe Company. Mr. Abbott explained that the company alluded to was the Share Investment Trust. The chairman, in reply, said they, of course, were not responsible for the action of the Board of the Share Investment Trust, who were at liberty to act as they pleased in the interests of the Trust. There was only one vacancy on the Board, not two, and this was owing to the death of Admiral Osborn. It was rather difficult to fill up this vacancy with a gentleman of Admiral Osborn's abilities, but when they did so they would appoint one who would be a credit to the company, and who would bring them business. The proceedings then terminated.

At a general meeting of the Newcastle and Gateshead Chamber of Commerce Mr. Hugh Taylor, the president, in the chair, the secretary said there were now special measurement certificates printed by the Board of Trade in connection with the Suez Canal. A question arose about the *Dilston Castle*, which passed the Canal in ballast. The Canal Company had re-measured her according to the new rules, and they made her 250 tons larger than she was. He wrote to the Foreign Secretary (Lord Derby), asking him if he did not consider the new measurement was a surtax; and he had a reply from the Foreign-office to the effect that they believed the measurement was correct, and that they had considered the matter in conjunction with the Board of Trade; and it was evident that in the measurement the Canal Company had not deducted the Crew space, and that to avoid such difficulty in future it was desirable to apply to the Board of Trade for a special certificate, which would be recognised by the Suez Canal Company. He, therefore, wrote to the Board of Trade and asked how these certificates could be obtained; and the reply was that "application should be made by the owners of the vessel on the enclosed form, Surveys 6, to the Superintendent of Mercantile Marine at the port where the vessel is lying. No fee will be charged; but a sum of £1 must be paid to the Superintendent on account of expenses." The *Dilston Castle* went through in ballast, and the tonnage register British measurement only related to ships with cargo, and they were entitled to measure ships in ballast according to the Danubian rules.—The President said that as it was a small fee, it was desirable to have these certificates.

Messrs. Morton, Rose, and Co. invite subscriptions for £287,500 Sterling Five per Cent. Coupon Bonds of £100 each of the City of Providence, State of Rhode Island, issued under authority of Acts of the Legislature of the State of Rhode Island and Providence Plantations, for the purpose of erecting a City hall and the construction of a system of sewerage. The bonds are offered for subscription at £90 per £100, thus giving a return of 5½ per cent., and will be repaid at par in London in 1895, by means of a sinking fund.

Under the provisions of the Act which has just received the Royal Assent, the Lord Chancellor has appointed Mr. Francis Savage Reilly, barrister-at-law, as the new arbitrator in the affairs of the European Society. The appeal from his decisions—as well as from those of Lord Westbury and Lord Romilly, which are at variance with each other—will lie to the Court of Appeal in Chancery.

The subjoined circular has been issued by the accountants with reference to the affairs of Messrs. Edmund Jones and Co. :—

We have submitted the result of our investigation in this matter to the largest creditors, representing over £85,000, and as the principal asset is a debt due by Messrs. E. Jones and Co., of Rangoon, the value of which cannot be ascertained until the balance sheet of that house reaches England (which will probably be in a few weeks), it was thought better to postpone convening the general meeting of creditors until advices from Rangoon are received.

At an adjourned meeting of the creditors of Messrs. Hay, Ingram, and Co. it was resolved to liquidate by arrangement, Mr. Waddell being appointed trustee with a committee of creditors. The liabilities are £107,979, with assets, mainly in the hands ofcreditors, of £21,190.

The failure is reported of Messrs. Paton, Cook, and Co., manufacturers, Glasgow and Glengarrock, Ayrshire, with liabilities estimated at £60,000. Messrs. Heald, Mathwin, and Co., shipbrokers, of Billiter-street and Constantinople, are also stated to have suspended payment.

The first meeting of the creditors of Messrs. Collie and Co. will be held on the 28th inst.

A limited amount of Silver by the West India steamer has been sold at 55⅝d. per oz. standard. The market is now however firmer, and the quotation is 55 11-16d. per oz. standard. Mexican Dollars have been disposed of at 54½d. per oz., being the quotation current of late.

THE ITALIAN SILK CROP.

The present year, as far as the quality and produce per ounce goes, is one of the best on record since the disease of 1848 swept away this most important branch of Italian industry. Previous to that year Italy realised f.250,000,000 by the sale of raw silk, and supplied foreign manufacturers with 8,000,000 lb., whereas China, Bengal, Spain, Greece, France, Turkey, and Persia together could furnish but 1,070,000 lb. Came "the disease," not gradually or partially, but suddenly and everywhere, and Italy—who once feared no rival, who since Roger I. brought silk winders and weavers from Greece to teach their "art" to the Sicilians, could boast that from the hatching of eggs to the manufacture of the finest silk stuffs, silk velvets, silk gauzes, she was independent of all the world—was compelled to purchase her raw material from abroad or close her factories.

Now, thanks to that practical common sense which so distinguishes the Italians after fifteen years of steady fight with the insidious foe (her industrial as well as political triumphs dating from '59-'60), she has at last got the upper hand. I cannot say that he is totally defeated, dead and buried, but, by dint of unwearying vigilance, by the use of every imaginable weapon, he is so far worsted that Italy each year rejoices in a plentiful crop of cocoons, and this year not merely of the wee, light-weighted, pale Japanese offspring, but of her own original treasures, the large oval, solid, golden cocoons which were once her pride and glory. For many years after the setting in of the silkworm malady Italy was entirely dependent on Japan for silkworm spawn, and although the original cartoons, when they had not suffered by the sea-voyage, generally succeeded the first year, the eggs laid by the worms must have taken the disease from the atmosphere or from the mulberry leaves, for in the following year most of them went to the bad, and for many successive years silk-worm breeders trusted to nothing but original Japanese cartoons, the peasants themselves bargaining with their masters that they should not have "native" or "reproduced" spawn. This rage for Japanese seed led a set of rogues to buy up all the old cartoons, cover them with the most worthless spawn, and sell them as genuine Japanese; others purchased in Japan the refuse of the market, especially the *bivaltini*, a species which lays and spins twice in the year, whose cocoons are light and worthless.

ARTICLES OF IMPORT.

Scarcely any alteration has occurred in the position of the Produce Markets, the only decided activity being still restricted to Coffee, which has advanced to a higher point than for about three months past. Most of the other leading articles have remained in a prostrate condition, and prices have descended to a still lower point. The heavy arrivals of new season's teas have depressed the market, and prices have again given way. Owing to the prolonged unfavourable weather, and rapid advance in the value of Corn, there has been a large demand for floating cargoes of Rice, and prices have advanced 3d. to 9d. from the lowest point. Extreme dulness has prevailed in the Cotton Market, and prices have again receded. Cutch and Gambier are rather dearer. Metals continue in a depressed state, and a further reduction has occurred in the value of Tin.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Our market is in a very unsettled state, and arrivals continue on a large scale, and the trade seeing the evident anxiety of importers to force sales, and in the absence of orders for export to any extent, buy with the greatest caution, and the sales made in almost every instance have been at lower prices. The Glenfinlas arrived on the 21st instant with the first cargo of new Kaisow. Only a few sales have been made in medium kinds The quality, so far ascertained, is hardly equal to that of the previous season. In the public sales 11,718 packages have been brought forward, the whole of which have been sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	2,099,817	2,047,269
Coastwise	616,298	562,297
Exports	391,010	494,549
	3,017,125	3,104,115

Congous.—Red-leaf kinds: Old season's show no change. In new, Kaisow kinds have sold from 1s. 7d. to 1s. 8d. for medium kinds, 1s. 9d. to 1s. 11d. for fine. Pak Lin kinds: The large arrivals by Glenfinlas and mail steamers have been on offer to-day, but buyers seem disinclined to pay previous prices. New-make kinds: Common have sold from 10½d. to 10½d. per lb., fair 11d. to 1s., good 1s. to 1s. 3d., being about last week's rates. Oolongs and Souchongs show no alteration. *Scented Teas.*—Canton Capers: Further arrivals of new season have come to a very dull market, and sales have been difficult to make for fair to good medium kinds, except for parcels with better scent than the average. Canto Orange Pekoes remain without change. Foochow kinds of old season's show no change. A parcel of new season's is reported sold at 1s. 9½d. per lb. *Green Teas.*—There is no change to report. Some 2,500 packages have been sold without reserve, 1,313 being new season's, from Swatow, which sold from 11d. to 2s. per lb. for common to fine kinds.

Messrs. W. J. and H. Thompson's Circular says:—The late heavy arrivals have had a depressing effect upon the market, more particularly as the dealers have received little encouragement from their country buyers. The steamer Glenfinlas, from Foochow, arrived on the 21st inst., with the 1st cargo from that port, but up to the present ime very few sales are reported, and great indifference is shown. Foochow Congous, ex Glenfinlas, a few sales only have been made of medium at 1s. 6½d. to 1s. 7d. per lb.; good to fine, 1s. 8d. to 2s. 1d. per lb. In old imports hardly any transactions are reported, except a few common to fair sold at auction at 9¾d. to 11d. per lb. Black-leaf Congous: Fair to medium, of new season, have been sold at 1s. 2d. to 1s. 5d. per lb.; good to fine, 1s. 7d. to 1s. 10d., showing in many cases a decline of ½d. to 1d. per lb.; finest to extra fine are better supported, and sales have been made chiefly for export at 2s. 2d. to 2s. 8d. per lb. In old import good common to fair have been sold at 10½d. to 1s. 1½d. at public auction. Tayshan Congous: Good common to fair, 11½d. to 1s. 1d. per lb. Scented Teas: Capers, common to fair, 9½d. to 1s. 0½d., of new import; medium, 1s. 3d. to 1s. 4d. Orange Pekoes, good common, 10½d.; fair, 1s. to 1s. 1d. Green Teas: Sales without reserve have been held, and prices do not show any change. The China sales, which have been held daily, amount to 15,296 packages.

Messrs. Sillar and Co.'s Circular says:—Public sales of the newly arrived congous, by the steamer Glenartney, commenced on the day following the publication of our last Circular. These auctions or "knock-outs" were continued without intermission during the week, and the teas offered were divided among the "jobbers," or buying brokers, as they style themselves, at about 4d. to 6d. per lb. below their value. Eventually a firm of selling brokers withdrew the remainder of the teas advertised in their catalogue as without reserve, upon the plea of the "condition not being satisfactory," and the sales for the time being were suspended. About 20,000 packages of China Teas and 1,000 of Indian have been offered. Further sales of the New Season's Congous commenced yesterday, and will be continued to-day and to-morrow, when a chop ex Bengal, alluded to above as having been withdrawn on account of its condition, will again be offered, the catalogue stating that the brokers' marks upon the tea are to be taken as final. Congou: The quotations of the new season's black-leaf Congous are about 6d. per lb. lower than at the date of our last report; they now range from 1s. 1d. to 2s. per lb. Latterly holders of fine Teas have been firmer, and the market for these kinds has rallied a little. Sales of extra fine descriptions are reported as high as 2s. 10d. per lb., but these must be looked upon as quite exceptional. The choicest Teas will not be offered in this market at all, having been purchased in China for the Russian market at prices far beyond what any dealer in this country cares to pay. The Glenfinlas, the first steamer from Foochow, arrived yesterday. We have heard of no sales so far; her samples are being hawked round the market, and meet with little approval from the trade. The Teas have a fresh burnt flavour about them, but we have seen none comparing with the Hankow Teas in quality at the prices asked.

SILK.

There is no improvement to notice in the position of the market. Prices are irregular, and with few exceptions show a further slight decline. China Silk has been taken in small quantities, both for export and the home trade, but generally at a reduction of about 3d. per lb. on rates previous ruling. In Cantons transactions have been on a small scale, Japans have been difficult of scale, and the tendency of prices is downwards. Deliveries, 1st to 21st inclusive:—China, 2,398 bales; Canton, 341; Japan, 418; total, 3,157 bales.

COFFEE.

The auctions, which have presented only moderate supplies of Plantation Ceylon, have gone off with active competition, and prices have risen almost daily, until a total advance of 4s. to 4s. 6d. per cwt. has been established. Yesterday, however, when a larger quantity was offered, this advance was not quite supported, but prices remain 3s. 6d. to 4s. higher than a fortnight ago. Middling Plantation has sold at 107s. to 107s. 6d., being the highest quotation since April last. Native has also advanced 2s. per cwt., good ordinary selling at 92s., and bold at 100s. Manila is also higher. Closing quotations are:—Plantation, triage and ordinary 82s. to 98s., common to good small 100s. to 104s., low middling grey 104s. to 105s. 6d., middling 106s. to 108s., good middling to fine middling 108s. 6d. to 110s. 6d., good to fine bold 111s. to 118s., pea berry 124s. to 127s. 6d. Native, greenish Galle kinds 89s. 6d., good ordinary 92s., fine bold 98s. 6d. to 100s., pea-berry 101s. 6d. The sales of other East India have included 689 bags Indan and Zamboanza Manila at 86s. 6d., to 88s., and 60 bags brown Penang at 79s. 6d. to 80s. per cwt.

SUGAR.

With fewer refiners at work than for some time past the demand for the raw article has continued on a small scale, especially for this period of the year, and the market has remained in a depressed state throughout the fortnight, prolonging the downward course of prices, and at the close a further reduction of 3d. to 6d. is established. The only sale of East Indian kinds has been 4,000 bags unclayed Manila at 16s. per cwt.

CUTCH is quiet, but prices are firm; a moderate business having been effected in fine Pegue at 24s. 6d. to 25s. per cwt.

CHINA STRAW PLAIT.—At auction 96 bales were offered, of which about 56 bales sold, white at £7 to £7 16s., mottled at £8 5s., the remainder bought in, broad Bedford £15 to £30 per bale.

CAMPHOR.—About 400 cases China have changed hands privately and at auction, good old re-weights at 68s. 9d. to 69s. for small lots, damaged and very wet 63s. to 65s., the market closing steady.

COCOA-NUT OIL.—The market has been quiet, and prices are quoted slightly lower, only a small business being done in Ceylon at £36 10s. to £37, and in Cochin at £41 to £43 per ton.

COLOMBO ROOT has continued very quiet; of 130 bags offered a few only were sold at 18s. per cwt. for ordinary quality, the finer sorts being scarce and in request.

DRAGON'S-BLOOD.—Quiet, but steady; 7 cases sold, reed, mouldy at £9 15s., lump, good at £7 10s. to £7 12s. 6d. per cwt.

ESSENTIAL OILS.—*Anniseed* firmly held, but quiet, with small sales at 10s. to 10s. 3d. *Cassia* dull; small sales at previous value. *Lemon Grass* quiet; 44 cases retired. *Nutmeg* quiet; of 6 cases 1 only sold at 7d. per oz. for good white. *Cinnamon* steady; and of 4 cases offered 3 sold, fair sweet at 4s. 7d., leaf 2¼d. to 2¾d. *Citronelle* steady at the recent decline; of 42 cases one-third sold at 1½d.

EBONY.—At auction 28 tons (143 logs) Ceylon bought in at £13.

GAMBIER has been in rather better demand, and prices have recovered, closing about 1s. 1d. per cwt. dearer on the spot. On the spot the sales reach 1,000 bales at 27s. to 28s. for whole bales; and 50 tons arrived at 26s. 9d. ex quay. Pressed cubes have been sold at 35s.; for arrival 500 tons have been sold, including April sailing, at 26s. 6d. to 26s. 9d., June sailing at 25s. 9d. to 26s. ex-ship; at auction 634 bags cubes were bought in at 35s. for blocky to 41s. for fine free, except 250 bags damaged and heated, which sold at 27s. 6d. to 39s. 6d.; 497 bales pressed ditto were bought in at 35s.

GALLS.—China have been in fair demand at steady rates, and further sales have been made on the spot, including 300 cases at 52s. 6d. to 53s. At auction 61 cases middling rather mixed and broken, of fresh import, at 52s. 6d. to 53s., one lot sifted at 54s. per cwt.

GUMS.—*Benjamin* steady; 10 cases Siam retired; and of 171 cases Sumatra a few only sold, fair seconds at £8 15s. to £9. *Copal* quiet, and sellers rather than buyers; of 482 cases and bags auction a few of the former sold at 27s. for fair hard. *Damar:* Rather more inquired for; small sales of fair Batavia at 58s. *Gamboge* quiet; of 8 cases offered only 1 case sold at £10 for fair pickings.

GUTTA-PERCHA.—No business has been done.

GALANGAL ROOT.—There have been no transactions, the stock being held above the current value.

HEMP.—The market for Manila has remained quiet, and prices are rather cheaper.

HIDES.—There was an improved demand for East India at the public sales, and more than half the quantity offered was sold. The moderate quantity of Singapore and Penang Ox and Cow offered was fairly competed for, and about late rates were paid for the portion sold. Buffalo: Very few Batavia offered, which were withdrawn; but Singapore, Penang, &c., were mostly sold at fully late rates.

INDIA-RUBBER.—No business doing.

ISINGLASS.—The demand at the periodical auctions was slow, especially for Bombay, which declined 3d. to 4d. per lb. for tongue. Penang sold irregularly, but on the whole steadily. Of 77 cases Penang about 60 cases sold, good to fine clean tongue at 4s. 2d. to 4s. 6d., ordinary to medium at 3s. 3d. to 3s. 9d., good to fine pale leaf at 4s. 8d. to 5s., medium at 4s. 2d., good pale cake at 1s. 4d. to 1s. 5d., medium at 9d. to 10d., 33 cases Manila sort from New York withdrawn; of 11 bales 6 cases Saigon a small part sold, very fine leaf at 4s. 10d., tongue at 1s. 9d.

JAPAN WAX has been very dull, and sales have been extremely limited in extent at the previous value.

KITOOL FIBRE.—6 tons Ceylon chiefly sold at 7d. to 9½d., inferior 4¾d. to 5½d. per lb.

MUSK.—The auctions have embraced only 28 caddies Tonquin, of which over half sold at 13s. to 14s. for rough and bally false packed; 2 caddies Cabarding and 8 tins grain retired. A few caddies good Tonquin sold privately at 45s. per oz.

PEPPER.—*Black* continued quiet for some time subsequent to our last, but at the close there was more demand, and a fair trade doing at full rates, viz., Singapore at 5⅜d. to 5½d.; Penang, 4⅜d. to 4½d. Auctions have embraced 4,641 bags, of which about one-third sold on similar terms. Afloat a large business has transpired in Singapore at 5½d. to 5¼d. for May-June, and 5½d. (to cover bear sales) April-May sailing. *White* is in better demand also, and has improved ¼d. per lb.; of 670 bags offered the bulk sold at 6⅝d. to 7d. for fair; 500 bags sold privately at same rates, and 25 tons afloat at 7d. per lb.

PLUMBAGO.—The large quantity of 1,450 barrels Ceylon, consisting chiefly of late arrivals, has been offered by auction, a good part being fine lump, prices of which show a decline of 1s. per cwt. Other kinds realised about late rates, about 600 barrels finding buyers, ordinary lump at 9s. 6d., low middling to good small and medium ditto 12s. 6d. to 16s., fine to fine bold selected 17s. to 18s., common chips 9s. 3d., middling to fine ditto 9s. 6d. to 11s., low to fine dust 7s. 6d. to 10s. per cwt.

RICE.—After a long period of depression the market for floating cargoes has improved, the unfavourable weather and rise in corn having led to a speculative demand, which, with a better demand for the Continent, has resulted in extensive sales at a recovery of 3d. to 4½d. for cargoes off coast, and about 6d. for distant from the previous lowest point, Rangoon selling at 8s. 1½d. to 8s. 3d. for arrived cargoes, and 8s. 4½d. to 8s. 6d. for distant, and in one instance 8s. 9d. is reported. On the spot there has been only a moderate inquiry, and business is unusually small; the sales comprise Bengal middling to good at 10s. 7½d. to 11s. 9d.; Rangoon at 8s. 6d., Bassein at 8s. to 8s. 3d., and Necransie at 7s. 9d. to 8s. 3d. per cwt.

RATTANS of good quality have been firm; auctions have embraced 16,000 bundles, the bulk of which was disposed of at £15 5s. to £23 10s. per ton for ordinary to good.

STICKLAC is quiet and lower in price; at auction of 422 cases and boxes Siam offered 10 cases fair free but rather dusty and woody sold at 90s., the remainder bought in at 85s. for rather blocky to 105s. for fine free.

STAR ANNISEEDS have been in somewhat more demand; 31 cases fair quality but rather broken have been sold in auction at £5 12s. 6d. per cwt.

SOY has been more inquired for, but no transactions are reported.

SPICES.—*Cassia Lignea:* 200 boxes unworked bought in at 56s. CASUALTIES.

PORTSMOUTH, JULY 17.—Put in, Teviot (str.), from London, for China, with main feed broken, and sailed again on the 18th.

NEW YORK, JULY 8.—The Albert, arrived here yesterday from Padang, reports:—March 7, experienced a severe hurricane from N.E., lasting seven days, then dying out for about two hours, which afterwards veered to N.W. and blew with much greater violence for nine hours, causing a very heavy sea from every direction, breaking over the vessel fore and aft, filling the cabin and forward house with water, damaging all the medicine and a large amount of stores. The pumps were kept going constantly. Afterwards had light Trades and variable winds; was becalmed seventeen days between lat. 1 and 3 N.; most of the time had torrents of rain. June 27, in lat. 29.30, long. 73, boarded schooner Harbeson, which supplied us with provisions and medicine.

MISCELLANEOUS.

GIBRALTAR, JULY 17.—Passed, Strasburg (str.), from Hankow, for Odessa; 18, State of Virginia (str.), from Foochow, for London.

MALTA, JULY 14.—Arrived, from Foochow, State of Virginia (str.), and proceeded for London; 18, passed, from London, for China and Japan, Paraguay (str.).

ADEN.—Arrived, July 4, Holland (str.), from Nieuwe Diep, and left, 5, for Batavia. Passed, July 3, Borneo (st..), from Nieuwe Diep, for Atchin; 19, Statesman (str.), from Foochow, for London.

PORT SAID.—Arrived, July 12, from Foochow, Braemar Castle, and left for London.

A QUICK PASSAGE.—The Hankow (str.), Captain Symington, owned by Messrs. Watts, Milburn, and Co., London, which left Woosung on the 4th of June, arrived in London on the 16th inst., having accomplished the passage in 43 days 4 hours. She is a sister ship to the St. Osyth, belonging to the same firm, which recently made the passage from London to Australia in 44½ days. Both steamers were built on the Tyne by Messrs. C. Mitchell and Co., and were engined by Messrs. R. and W. Hawthorn.

FUNG SHUI.—This steamer, now building at Messrs. Denny Brothers, Dumbarton, for the China Merchants' Steam Shipping Company, is a sister ship to the Pau Tah, and will be launched next month.

LIGHTHOUSE FOR BASSES STRAITS.—Messrs. Shearer, Smith, and Co., of Craignair, near Dalbeattie, are constructing a lighthouse, which is to be erected on the Little Basses Rocks, the design of Mr. J. N. Douglas, engineer to the Trinity Board. The tower is wholly formed of Dalbeattie granite, and is of the following dimensions—height, 101 feet 8 inches; diameter, 33 feet 3 inches at base, and 22 feet at top; it is circular throughout, and contains sixty-four courses of masonry.

THE PACIFIC MAIL COMPANY.—Commodore Maury, lately in command of the company's steamer City of Tokio, has been appointed commander of the company's fleet on the Pacific.

TELEGRAMS FROM THE FAR EAST.

THE MURDER OF MR. MARGARY.

SHANGHAI, JULY 19.—It is stated at Peking that the Chinese Government proposes to send an Embassy to England in reference to the murder of the late Mr. Margary.

GERMANY AND CHINA.

PARIS, JULY 22.—It has been rumoured here to-day, in circles which are usually well informed, that the German Government has made overtures to China for the cession of the island of Formosa. The reception of the proposal by China is, it is said, of a nature to render the arrangement very possible. It must be remembered, however, that previous reports of the attempted acquisition of foreign stations by Germany have invariably proved unfounded.

CHINA MARKET REPORT.

HONG KONG, JULY 22.—Grey shirtings, 8¼lb., $2.50; 16-24 water-twist, $105; cotton, fair medium Bengal, $13½. Tea—Canton quiet, but steady; Foochow firm and active demand. Total exports from China and Japan to the United Kingdom from the 1st of June to date, 65,625,000lb. Exchange on London—Six months' bank bills, 4s. 1½d.

Digitized by Google

HONG KONG AND SHANGHAI BANKING CORPORATION.

JOSEPH GILLOTT'S STEEL PENS.

Sold by all Dealers throughout the World.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

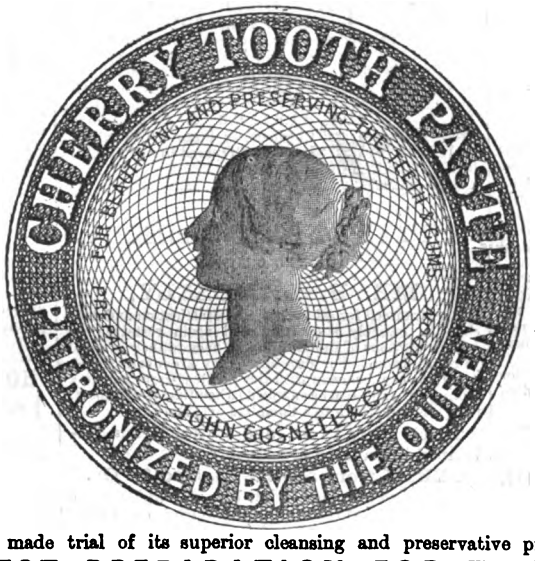
SOLD BY ALL PERFUMERS



AND CHEMISTS THROUGHOUT THE WORLD.

PEARL-LIKE WHITENESS OF THE TEETH AND

Acknowledged by all who have made trial of its superior cleansing and preservative properties to be, beyond comparison,

THE BEST PREPARATION FOR THE TEETH.

☞ The Public are particularly requested to take every precaution to protect themselves against unprincipled dealers who offer worthless imitations; and the Proprietors give notice that they will take proceedings against any person found manufacturing or dealing in imitations of their goods, and that they will reward any one who will give such information as shall lead to the conviction of offenders.

NOTICE.—TO RESIDENTS IN INDIA, &c.

E. J. BRAND & CO.'S CROWN WINES,

PERFECTLY PURE, of GREAT AGE, BOUQUET, and DELICACY (*free from Brandy, sweetness, or acidity*), have now been shipped nearly Twenty Years IN DISTINCTION to the usual stronger and heavier qualities. These fine Wines demand the attention of Connoisseurs and all those who value health, pure Wine being so very essential in hot climates.

CROWN SHERRY—Yellow Seal—Fine old quality.
Do. —White Seal—Fine old dry ,,
CROWN PORT—Yellow Seal—Specially recommended where a pure Wine is required as a restorative.

CAPSULED—Extra quality, very old.
Do. —Montilla, Amoroso, Amontillado, &c.
HOLLANDS GIN.—Sole Proprietors of the Registered Prize Medal, Crown Brand.

CAUTION.—Whereas many inferior and spurious Wines are sent to India "Crown" marked, purchasers should be particular to ask for "**E. J. BRAND & Co.'s CROWN WINES.**" and to observe that the casks, cases, and corks are branded with their name in full, without which none are guaranteed to be their genuine Crown Wines, selected expressly for tropical consumption.

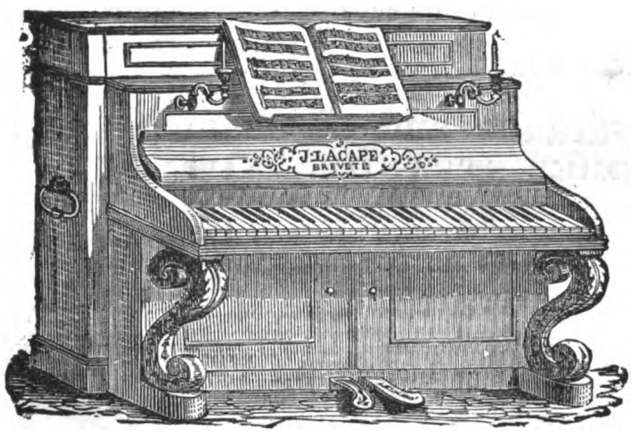
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—By GEORGE ASHDOWN AUDSLEY, Architect; and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says :—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

COURVOISIER'S BRANDY

THIS celebrated Brandy is highly esteemed for its purity, delicacy of bouquet, and softness of flavour. It is used in preference to any other in many of the leading Paris and London Clubs.

It was the only one supplied to his late Majesty Napoleon III.

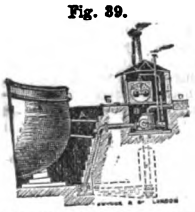
It has also met with the highest approval wherever it has been shipped, and the Proprietors are able to refer with pleasure to the recognitions of its superiority which reach them from every part of the world.

CAN BE OBTAINED THROUGH ANY MERCHANT.

GWYNNE and Co., Hydraulic and Mechanical Engineers,

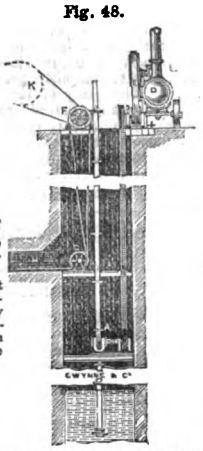
ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.



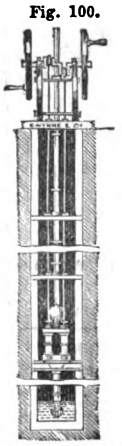
GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.

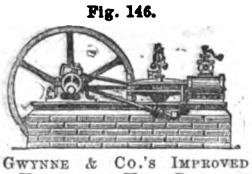


GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.

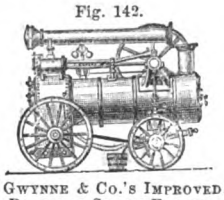


GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

Fig. 154.

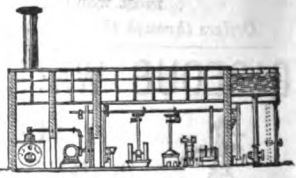
GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler

Fig. 142.



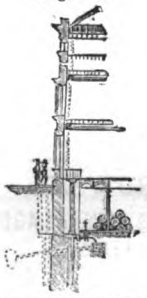
GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.



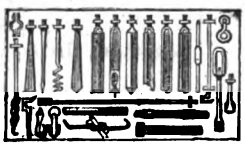
GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES FAT, &c., &c.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motive power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.



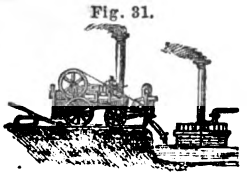
GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 121.



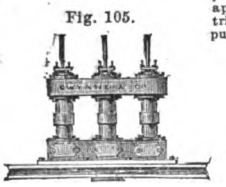
GWYNNE & CO.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

List of Passengers.

PASSENGERS INWARD.

By present P. and O. mail.—List not to hand.

PASSENGERS OUTWARD.

Per French steamer *Anadyr*, from Marseilles, August 1.—To Yokohama: Mr. De Fischer, Mr. and Mrs. Charles, Mr. Taksaburo, Mr. Lustemberger, Mr. and Mrs. Antoni. To Shanghai: Mr. Bradfield. To Saigon: Mr. Serravalle. To Batavia: Mr. Van B. Vaanders, Mr. Van Blomesku, Mr. Swaal. To Singapore: Mr. and Mrs. Van der Frb, Mr. Pastello, Mr. Perillo, Mr. Pintes, Mr. Eerricabras, Mr. Plana, Mr. Feruga, Mr. Eleonar, Mr. Eapallo, Mr. Morera, Mr. Eorros, Mr. Costa. To Galle: Mr. Rondel.

Per French steamer *Djemnah*, from Marseilles, Aug. 15.—To Galle: Mr. Thackwell, Mr. A. Gray.

Per French steamer *Tigre*, from Marseilles, Aug. 29.—To Shanghai: Mr. and Mrs. Billequin and child. To Galle: Capt. Fairlie, Mr. Elphinstone, Mr. and Mrs. Cameron.

Per French steamer *Ava*, from Marseilles, Sept. 13.—To Shanghai: Mr. J. C. Farnham. To Saigon: Mr. A. Spooner.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Shanghai: Mr. and Mrs. Vardel.

Per French steamer *Iraouaddy*, from Marseilles, Oct. 10.—To Singapore: Mr. and Mrs. Goldie, Mrs. Spooner, Mrs. K. B. Spooner.

Per P. and O. steamer *Bokhara*, from Southampton, July 29.—To Yokohama: Mr. and Mrs. Jackson and two children, Mr. C. Reeks, Mr. H. Collins, Mr. T. Bingham. To Shanghai: Mr. F. J. Marshall, Miss M. Smith, Mr. T. Weeks. To Hong Kong: Navigating Lieut. J. Dixon, Lieut. H. H. Harward. To Singapore: Major E. W. Davies. To Ceylon: Mr. J. P. Gadesden.

Per P. and O. steamer *Baroda*, from Venice, Aug. 6.—To Hong Kong: Mr. and Mrs. Skene. To Ceylon: Mr. J. A. Kendrew.

Per P. and O. steamer *Baroda*, from Brindisi, Aug. 9.—To Singapore, Mr. Robertson.

Per P. and O. steamer *Lombardy*, from Southampton, Aug. 13.—To Hong Kong: Mrs. E. Moore. To Ceylon: Mr. Cowley.

Per P. and O. steamer *Malta*, from Venice, Aug. 20.—To Yokohama: Rev. and Mrs. S. G. McLaren.

Per P. and O. steamer *Australia*, from Southampton, Aug. 24.—To Ceylon: Mr. W. Bissett.

Per steamer *Fleurs Castle*, from London, Aug. 3.—To Singapore: Mr. J. Allen, Mr. W. Allen, Mr. J. Adams. To Shanghai: Messrs. James Cameron, George Nicoll, G. W. Clarke (missionaries).

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Advices have been received this day, *via* San Francisco, to 24th June, but the mail is only partially delivered.

The following summary is from the *Japan Herald* of 23rd June:—

The principal item of intelligence is the opening of the Assembly of the various Prefects of the Empire, on the 20th inst., by the Mikado in person.

It is rumoured that great efforts are being made to induce the Mikado to visit Yesso and the new settlements in the island, but as yet nothing is decided. Another *on dit* of the day is that the Government is becoming anxious as to the effects of the liberty granted to the press, and have under consideration the idea of putting some restrictions on it.

The Japanese, with their usual short-sighted illiberality, are seeking to make the terms on which passports are granted to foreigners, to enable them to travel in the interior, still more stringent. A meeting of the foreign Ministers has been held to discuss the same, but the result has not yet transpired. It is believed, however, that the more obnoxious regulations will be modified.

A criminal trial, before the English Vice-Consul at Tokio, reported in our columns, has created considerable discussion here. The man Adds has been tried and convicted of complicity in the late robbery at the Comptoir d'Escompte, but has got off with the very light punishment of two years' imprisonment.

H.B.M.S. *Challenger* left here on the 16th inst., to continue her explorations in the Pacific Ocean. Previous to her departure, Professor Wyville Thompson, F.R.S., the head of the scientific *corps* on board, delivered a lecture on the results of the voyage before the branch of the Asiatic Society at this place.

The pioneer ship of the O. and O.S.S. Company, after an unprecedented voyage of four days twenty-three hours from Hong Kong to this port, left here for San Francisco with a very large cargo of tea on the 13th inst.

The series of daily robberies still continues, and the Japanese police seem impotent to prevent them.

H.B.M.S. *Audacious* arrived on the 12th instant, but Admiral Ryder still remains in China. The U.S.S. *Kearsage* arrived on the 15th instant.

Our import market still remains very dull, but a large business has been transacted in tea, prices remaining firm. But few transactions have taken place, but samples of the new crop are shortly expected.

The *Nichi Nichi Shimbun* gives the following text of H.M. the Mikado's address to the nation on the occasion of the approaching opening of the meeting of the provincial authorities:—

In accordance with the oaths We took upon ascending Our Imperial Throne, We now summon to their deliberations the representatives of Our subjects.

Digitized by Google

It is Our wish that they should amply discuss and determine upon such new measures as may be thought necessary for the welfare of the people, and thus facilitate the administration of Our domestic concerns, and further, that Government and Governed may be of one mind, and that the voice of the latter may thus find access to Ourselves.

It is hoped that all men may feel a due sense of the duties they owe to the State, and that the chief magistrates of cities and provinces will maturely consider and weigh well such projects as may be submitted to them for promoting the welfare and advancement of Our Empire. The deliberations of the Assembly shall be guided by the rules made for its constitution, and such bye-laws as are now made known.

CHINA.

—o—

SHANGHAI.

The following summary is from the *North China Herald*:—

Several matters of interest were discussed at the meeting of Treaty Consuls on the 3rd inst. An endeavour will be made to have the foreign settlements of Shanghai constituted a separate judicial district. The Dutch Engineers engaged to survey the Woosung Bar are unable to come for the present. The Taoutai is issuing further proclamations in regard to the protection of telegraph cables. The desired alterations in the land regulations regarding proxy voting and the change in time of holding the annual meeting of ratepayers were approved. The Consuls will assist in obtaining land for the new roads from the cemetery to Au Chalet, and from Markham's-road into the Jessfield-road.

The French Municipal Council purpose erecting rails on th Sikaway-road where the narrowness of the road renders this desirable, and widening the 4th bridge. Mr. Kingsmill is engaged in surveying the foreshore; as soon as the work is finished, the Consuls will be urged to have the new bund line authoritatively recognised. The contract with the Gas Company is to be submitted to the Consul-General, to ask whether he considers there is ground for an appeal to arbitration on the question of the Council's demand for a reduction in price. An explanation of negotiations which preceded the Yang-king-pang Arbitration, will hardly interest people now the matter has ended. What they cared about, was whether the encroachment opposite Honan-road was to remain or be removed. It is to remain, and there the matter ends; we don't want to recur to preliminary details.

Ratepayers will be gratified to learn that the Municipal Cash Statement has again been laid on the Council table for inspection, and that the summons calling the meeting (to inspect it) was taken as read. Mr. Camajee has agreed to sell the land required for Seward-road; the terms are not mentioned.—It is thought that a jetty would be useful at the end of Honan-road.—The Hongkew Wharf seems to have been encroaching on the road; it is requested to rectify the error.—Messrs. Oliver and Henry are appointed on behalf of the two Councils to consider the question of a future bund line for the Yang-king-pang, and a mean height for the bridges. The latter vary at present from 5ft. 3in. to 9ft. 1½in., the lower level neutralising the height of the more elevated.

The new iron bridge to be placed opposite Honan-road has been placed on board a pontoon at the old dock, and will be towed to its destination shortly. The pontoon itself, the hull of the *Horatio*, is also intended to be moored in the place of one condemned, at Messrs. Butterfield and Swire's wharves.

A meeting of the Asiatic Society was held on Monday evening. Dr. Macgowan presented a work, describing the various kinds of wood found in Japan and giving illustrations of various industries—which had been handed to him for the Society by the Japanese Commissioner of Agriculture.—An interesting paper by the Rev. C. Holcombe, describing the provinces of Shense and Shanse, through which he has been lately travelling, was read.—Dr. Macgowan then read a short paper on the characteristics of Shanghai water, drawing a conclusion in favour of Yangtsze water (and therefore the Yangtsze-poo site for water-works), as against Lunghwa.

H.M.S. *Vigilant*, with Admiral Ryder and Mr. Wade on board, visited Keelung on the 3rd inst. They inspected the coal mines at Coal Harbour and Keelung. The *Vigilant* left on the 4th, bound for Foochow, but in all probability would call at Tamsui on her way.

Yesterday, in H.B.M.'s Consular Court, before W. H. Medhurst, Esq., Consul, and Sung, the Taoutai of Shanghai, A. Davenport, Esq., Vice-Consul, and Chen, the Mixed Court Magistrate, being also on the Bench,—a suit was commenced against Captain Brown, the master of the British steamer *Ocean*, on behalf of the relatives of sixty-three persons drowned in the collision of the *Fusing* with that vessel on the 4th April. The damages were laid at Tls. 63,000. The Court stands adjourned till Friday next.

The case of the steamship *Fusing v.* the steamship *Ocean*. was again before Sir Edmund Hornby at the Supreme Court on Thursday, for the purpose of hearing arguments on an application on the part of the plaintiffs to amend the petition by altering the opening paragraph as follows:—"The petition of Tong King-sing, of Shanghai, merchant, on behalf of himself and others, owners of the Chinese steamship or vessel called the *Fusing*, and of the cargo on board thereof, and of the master and crew thereof, and of the passengers thereon, for their money' clothes, and private effects." Messrs. Wainewright and Hannen for the *Ocean* opposed the application, but after an hour's argument consented to accept the amended petition on condition that the answer should also be amended, as subjoined:—In clause 5, by the addition of the words, "The *Ocean* herself sustained extensive injury by the said collision," and in clause 9, "The owners of the said steamship (*Fusing*) are Chinese, and are not within the jurisdiction of the Honourable Court." The pleadings being thus amended, the next question to be argued was whether the words, "and of the master and crew thereof, and the passengers thereon (the *Fusing*) for their money, clothes, and private effects," should be inserted in the decree of the Court, on the further application of Messrs. Drummond and Eames on behalf of the plaintiffs. Mr. Hannen, *contra*, contended that no case whatever had been cited on the other side, showing that the officers, crew, and passengers were entitled to any remedy in a case where both ships were held to blame. He had taken care to look into the cases bearing on the point, but there was not a single case in any of the books which made the concession in favour of the officers and crew, where both ships were to blame, and with regard to the passengers they must be dealt with by common law, and not by Admiralty rule. In support of this contention, he referred the Court to a number of cases. Mr. Drummond, in reply, said the real point of the case seemed to be that there were four parties concerned—the owners of the *Fusing*, the owners of cargo, the passengers, and the officers and crew. The application now made was that the owners, the passengers, and crew should have their damages added together and entered in the decree to go before the Registrar and Merchants. If the owners of the cargo were entitled to recover by Admiralty rule, he contended that the passengers, who stood in similar relation to the ship, were equally entitled, and that these claims must be settled by Admiralty rule, and not by common law. With respect to the crew, they were in the same position as the owners of the ship. The gist of the whole question was as to the contributory negligence of the plaintiffs; for contributory negligence, although a bar at common law, was not so in Admiralty. He submitted that the decree should be settled in the way he had now presented it to the Court, when any question arose upon it it could come on at a future stage—on appeal, perhaps, from the Registrar and merchants. At the close of a lengthy, but strictly legal argument, the Court took time to consider the points raised.

FOOCHOW.

The following is from the *Foochow Herald*:—

H.B.M.'s gunboats *Growler* and *Midge* are now in port, awaiting an inspection by Admiral Ryder. From Tamsui we learn that the tea-crop is very inferior, owing to the heavy rain experienced during the recent picking.

Advices from Tai Wan-foo refer to a recent heavy engagement between the Imperialists and the Aborigines, resulting in the abandonment of an entrenched position by the former. With characteristic veracity, the Chinese claim a victory. The fleet of tea steamers assembled at the Anchorage are attracting considerable attention. For steam power, the preference appears to be given to the *State of Virginia*, but we are inclined to back the *Glenfinlas* and *Braemar Castle*.

The review of Bow and Arrow troops, in garrison, commenced on the 29th at the South Camp, and was continued on the following day. As a semi theatrical display it was somewhat imposing. As a military effort, supremely ridiculous.

A letter from Amoy says:—There is a great dearth of general news in Amoy. Everything appears to be at a standstill, and under the influence of the great heat. The *Esmeralda* is delayed on account of the coolies declining to leave till after the Dragon festival. The British Consulate and Custom-house are to be pulled down shortly and rebuilt. The master and chief officer of a Spanish steamer here have got themselves into trouble for most inhumanly coal-tarring a poor wretch of a coolie who was straying on board. I may mention that the effect of such treatment is almost equivalent to flaying a man alive, as the tar acts as a powerful caustic. The unfortunate victim of this brutal assault presented himself at the Chinese Hospital in a most pitiable state, and was well looked after by the doctors.

HONG KONG.

The following summary is from the *China Mail*:—

The steamers *Leonor* and *Albay* were undocked yesterday afternoon (11th), and were both found to be tight and seaworthy. The former will shortly be ready for sea, but the latter has a good portion of her port quarter to plate yet; she will also have to dock again to receive her propeller. The speed with which the work on these two steamers has been done, more especially the plating and its quality, which could not be surpassed, reflects great credit on Mr. Jacob Stevens, the iron shipbuilder of Kooloon Docks, who, in the face of the many difficulties he has had with his workmen in the shape of strikes, &c., has fulfilled his portion of the work in very little more time than it could have been done in Europe. This, again, shows the public what

Digitized by Google

the Dock Company are capable of doing, and we may soon see them building steamers of 300 or 400 tons burden at their Kowloon Establishment. The cabins and deck-houses, &c., of the above-named steamers are being fitted up in a superior style, under the able direction of Mr. J. G. Liddell, the superintendent of this establishment, and we hope soon to see both vessels on their old route again.

A very large snake, measuring some ten and a-half inches in circumference at the thickest part, and ten or twelve feet long, was caught this morning at the entrance of a drain in Caine-road, opposite the Diocesan School. It is non-poisonous of course, but looks a most unpleasant sort of python. It has been presented to the City Hall Museum, and will be stuffed, not immersed in spirits.

We are glad to note that the Surveyor-General is adopting a very sensible plan as regards metalling the roads, where at parts forming the brow of a hill, and consequently exposed to additional wear and tear from water during the rains. Chunam, with the ordinary gravel road on the top, is spread over these portions, which will not in future wear away quite so rapidly as heretofore.

The following account, duly certified, of the average amount of Bank Notes in circulation in Hong Kong, during the month ending 31st May, is published in Saturday's *Gazette* :—

Banks.	Average Amount.	Specie in Reserve.
Oriental Bank Corporation ...	$539,847	$250,000
Chartered Mercantile Bank of India, London, and China ...	674,189	225,000
Chartered Bank of India, Australia, and China	370,004	150,000
Hong Kong and Shanghai Banking Corporation	1,907,654	700,000
Total...	$3,491,694	$1,325,000

The Ordnance Department have lately disposed of some forty to fifty large heavy guns of the old smooth-bore pattern to the Chinese authorities, which have been taken to Ningpo, to be mounted at the entrance of the river there.

An extraordinary meeting of the shareholders of the Victoria Company took place on the 8th inst. There were present: Messrs. Andre (in the chair), Sassoon, Karberg, McCulloch, C. P. Chater, Middleton, Head, Chinoy, Anton, Hayllar, Sands, Greig, Landstein, J. T. Chater, Sandeman, Joost, Hancock, Elwell and others.

The Chairman, having read the notice convening the meeting, said the only business was to confirm the resolutions passed at the previous meeting. Mr. Head, the Secretary, then read the minutes of the last meeting. Mr. Andre proposed their confirmation, and Mr. Middleton having seconded the proposition, it was unanimously carried. The Chairman then observed that, on behalf of the other directors he would mention that after considerable trouble arrangements had been made with the Hong Kong Fire Insurance and the China Fire Insurance Companies to take over the re-insurance of the Company on very favourable terms. A meeting would be held when the accounts were ready, and they would be laid before the shareholders. Mr. Middleton asked if the transfer books would be open for the transfer of shares in the meantime. Mr. Andre said under legal advice he would say that the shares could be transferred. The meeting then separated.

Captain Denier, of the French barque *Duguay Trouin*, kindly favours us with the following particulars of a shoal sighted by him on the 28th May last, but not laid down either in the French Admiralty chart corrected to 1870 or on the English chart corrected to 1867. The position of the shoal is 19.5 N.L. and 122.23 long. east of Paris, which was confirmed the following day, when the captain sighted Babuyan Clara Island (the volcano on which was then in irruption), and Dedicas Rocks. This shoal is in the way of vessels coming from the Pacific Ocean and going into the China Sea. It extends from S.W. to N.E., describing a curve towards the N.W.; its length is about half a cable. When seen the shoal was just at the edge of the water, the sea being quite unbroken except slightly over the shoal. When the shoal was sighted the ship was two miles off, running six knots.

The *Gazette* contains a notification of the appointment by H. E. the Administrator of a Commission, consisting of the Hon. John Bramston (Attorney-General), the Hon. C. May, the Hon. P. Ryrie, the Hon. Henry Lowcock, and Mr. Jno. McNeile Price (the Surveyor-General), to inquire into and investigate complaints on the part of holders of Crown lands in the less populous parts of the Colony, alleging that the rents are out of proportion to the real value of the lands. The Commission are also to investigate the complaints in question and the scale of rents, and report, after hearing evidence, to the Administrator. Any three or more of those names will constitute a quorum.

THE FIRING INTO THE BRITISH STEAMER "CARISBROOKE."

Some excitement was caused in the Colony on the 14th by the receipt of intelligence to the effect that the s.s. *Carisbrooke* (Capt. Scott) had been seized, as was alleged, in the act of smuggling off Hainan, by the Chinese gunboat *Peng-chao-hai*, and taken by her to Canton. The facts, so far as we have yet been able to ascertain, are as follows :—

The *Carisbrooke* is owned by the members of the Man Hing firm at Singapore, who are British subjects, in conjunction with the Rajah of Tunga. She left that place on the 3rd inst. with a general cargo, which included a good deal of opium, and about 400 passengers, intending to call at Hainan on her way up. It appears, however, that an agent of the Chinese Customs at Singapore telegraphed her intended movements to the Canton Commissioner, and the *Peng-chao-hai*, having Mr. T. M. Brown, Deputy Commissioner, on board, was despatched to, if possible, catch her in the act of landing cargo at a port not open by treaty. On the 9th inst. the *Carisbrooke* was sighted in the Banka river, Hainan, having landed or being about to land passengers and cargo. She was immediately arrested (so far as a nominal arrest went), and ordered to follow the *Peng-chao-hai* to Canton. For some time she did so; but upon nearing the river Captain Scott appears to have endeavoured to run for Hong Kong. Upon this the *Peng-chao-hai* fired into her, carrying away the rudder and part of the stern-post, and (as some accounts have it) nearly sinking the vessel. (Another account states that she was fired into previously when off Hainan.) However this may be, the vessel was then taken in tow and brought to Whampoa. Owing to the fact that all the Chinese on board were arrested, no advices reached the native agents here till last evening, when a letter from Messrs. Russell and Co. from their Canton agent told the story, which was immediately communicated to the vessel's consignees. Telegrams have been sent to Singapore asking for instructions from the owners. The steamer is valued as worth $130,000, and she is said to have a valuable cargo on board, worth some $200,000.

One version of the story is that the *Carisbrooke* was fired into just as she was reaching the boundary line of Hong Kong waters, but until fuller details than those yet to hand are known we are unable to say whether or not this is correct. There must, of course, have been strong justification for firing into a vessel with 450 people on board, and that may be made apparent at the inquiry, which will be held before the Consul.

The *Carisbrooke* was, we understand, advertised at Singapore to sail for Hainan and Hong Kong, so that no secrecy was observed as to her destination. The only additional information we have been able to obtain since writing the foregoing is to the effect that the captain avers the distance from the shore at which the vessel was seized to have been from 3¼ to 3½ miles. The rate of freight for the opium from Hainan to Singapore was, it is stated, Tls. 50 per chest, so that the trade must have been a profitable one.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA JUNE 23.—The Import Market shows no change for the better, and with exception of 9 lbs. Shirtings, Prints, Lawns, and Mousselines, there has been virtually nothing doing. Metals have been very quiet, and stocks are increasing, In Sugar the transactions have been unimportant; holders of Brown Sugar are firm for higher rates, asking 15 to 20 cents in advance of the nominal quotations.

HIOGO, JUNE 23.—Deliveries, in the aggregate, are somewhat larger than last month, but quotations generally are not improved. Cottons.—Grey Shirtings: Business has been almost exclusively confined to sales by Chinese of low quality goods, and these descriptions are weaker; the better chops maintaining their value. Turkey Reds: A fair business has been done, but there appears to be rather less demand at closing. A few deliveries of Black Velvets are reported at the low rates quoted. Victoria Lawns have continued in fair inquiry, and a slight advance has been established. Worsteds and Woollens: Black Lastings are again weaker. Black Orleans: Sales are principally of 30 yards, imported from China. Mousselines de Laine have been in good request, but at closing the demand has slackened. Iron: No sales of any importance have taken place, and the market is declining. Sugar has been dealt in to a larger extent, at improved prices for white. Kerosine Oil: The arrival of the Armenia has brought a large addition to the stock, and prices are entirely nominal.

SHANGHAI.—Piece Goods: At the auction held on the 8th inst. Scarlet Long Ells showed a rise of over 2m. 5c. per piece, while Scarlet, Gentian, and Dark Blue Camlets were sold at 8 to 5 mace per piece improvement, and Spanish Stripes at 2c. per yard or so; and 8¼-lbs. Peacock Grey Shirtings realised Tls. 1.61 to 1.61½ per piece; and so with the other goods exposed for sale, Mahommedan Cloths, White Shirtings, and Jeans being the only fabrics which did not bring full prices. Longs Ells, assorted, have been asked for, but stocks are held by a few, who refuse to sell on the basis of the improved quotations noted below. Camlets: For these also some inquiry has prevailed, but good chops are likewise held for nearer cost. Spanish Stripes and Medium Cloths: Higher offers for the commoner qualities of both articles have been declined, for the latter principally, because long clearance was an accompaniment. Figured Orleans: Sales of inferior, to extent of 3,000 pieces, at Tls. 2.80 to 3.0, reported. Market weak. Lastings Steady demand for good to best black, Tls. 11.55 to 11.60 per piece tendered, against Tls. 11.72—the holders' price. Grey Shirtings, 9¾ to 10 lbs.: Prices have been fairly upheld. But the fact is, the natives, by reason of their heavy engagements "to arrive," cannot afford to let the market fall, and until their contracts are completed, rates are not likely to go much below what they now are. Dewhurst's Eagle has been resold at Tls. 2.60, while sales of more ordinary cloths have been effected on former terms. 6lbs. good common—free from damage or mildew—have been wanted at Tls. 1.25 to 1.27 per piece—business small. 7lbs. of commoner makes have like-

Digitized by Google

wise been asked for occasionally, but the offers have not been liberal enough to produce much effect on sellers. 8¼lbs.: In the absence of country orders, the auction sales of sound and damaged goods have almost sufficed to meet all requirements. Beyond these, demand for special chops only has been experienced, and Mendel's Pillar, being one of the favoured, has realised Tls. 1.77½ per piece. White Shirtings: For finest reeds there is still a market at about previous rates, but 56 to 64 Reeds meet with no attention. T-Cloths: Ordinary Mexican, as well as the lower counts of 6 and 7 lbs., have been in steady request, and the settlements booked give the following values—viz., 6 lbs.: Common, Tls. 1.15 to 1.18; Mexican, Tls. 1.28 to 1.30 per piece; and 7lbs.: Common Dewhurst's T., Tls. 1.31; other chops, Tls. 1.25 to 1.30; and Mexican, Tls. 1.39 to 1.43 per piece. At auction, damages of all weights have sold comparatively well. Estimated business, 35,000 to 40,000 pieces. Drills: The remarks in my last report are applicable to-day. Both 14 and 15 lbs. have been, and still are wanted, and would command better prices; but they are difficult to be met with. Damaged American Drills at auction have again realised full values. Sheetings: English: Small sales of Godown cargo at a slight improvement; and business projected in goods to arrive per Glaucus. The booking of it remains with the importer. Fair offers are in his hands. Jeans: No change. Fancy Cottons: Light Turkey Reds wanted, 2½ to 3 lbs. being almost unsaleable. In the other kinds of fancies there is little or no movement to chronicle.

EXPORTS.

—o—

TEA.

YOKOHAMA, JUNE 23.—Business continues brisk, the settlements, since date of last report, rather exceeding 10,000 piculs, and supplies coming in freely; prices remain much as last quoted. The demand at present runs principally on good medium to fine grades; common grades have been, so far, in light supply. Since issue of last circular, the shipments of tea from this port have amounted to 1,448,019 lbs., as follows; per P. and O. S. Malacca, on the 9th inst., 46,364 lbs. for New York, via Suez Canal; per P.M.S. China, on the 11th, 185,937 lbs. for New York; 113,191 lbs. for San Francisco, 70,191 lbs. for Boston, and 58,577 lbs. for Chicago; per O. and O.S. Oceanic, on the 13th, 487,771 lbs. for New York, 220,707 lbs. for San Francisco, 19,771 lbs. for Boston, 239,910 lbs. for Chicago, and 5,600 lbs. for Milwaukee. Quotations:—Good common, $27 to 30; medium, $31 to 33; good medium, $34 to 36; fine, $37 to 39; finest, $40 to 42 per picul; choice, very scarce, nominal.

SHANGHAI.—Black has arrived to this market in moderate quantities during the past week, and chiefly from the Hohow and Ningchow districts; very few Hankow Teas have as yet been sent down. The business done here so far has been extremely small, and an attempt by the teamen to enforce an oppressive change in the mode of payment has had some effect in holding buyers aloof. For such small purchases as have been effected, we consider prices are rather lower than those paid at up river. A few Shongtam Teas are held for very high rates. Prices for Hohows range from Tls. 22 to 23, and for Ningchows Tls. 31 to 40, but the market is weak. Settlements and shipments, 4,500 chests. Stock (against 11,100 chests last year), 22,000 chests. The following prices have been paid—Exchange, 5s. 9⅛d.; Freight, £4 per steamer against 1874. Oonams and Oonfaas, Tls. 24; Hohows and Ningchows, Tls. 23 to 40½. Green: There is but little to add to last report; the season generally will be later than that of last year, but musters of Fychows and Ningpo packed Pingsueys are expected in about a week, and Teekais towards the middle of July.

FOOCHOW.—In the early part of the fortnight a considerable business was transacted in Panyong Teas at prices ranging from Tls. 24 to 36, showing an advance of fully three Tls. on last year's opening rates. Buyers were unwilling to support these rates, and operated slowly. The market for Saryune Congou was opened on the 3rd June by the purchase of 3,000 to 4,000 half-chests at Tls. 25½ to 28½. Latterly, Teamen having submitted to a slight decline for some kinds, a very large business has been transacted, but taking quality into consideration, opening rates have been fully maintained. The laying down cost of this season compares favourably with last on account of the low rate of sterling exchange. Congou: Settlements of this description amount to 175,460 chests at Tls. 8 to 40. The business has been principally in finer kinds, the Teamen asking extreme rates for the lower grades. Current quotations are—Siftings to broken leaf, Tls. 10.8 to 15.8; flavoury to medium, Tls. 22.8 to 25.8; good medium to fine Tls. 26.8 to 30.8; fine to finest, Tls. 30.8 to 42.8. Souchongs: Two chops are reported settled, but prices have not transpired. Oolong: Settlements 3,122 half-chests at Tls. 17 to 26½. Scented Teas: Settlements 9,260 boxes at Tls. 27 to 35½, showing rather full value. Flowery Pekoe: Settlements 744 chests at Tls. 40 to 65.

SILK.

YOKOHAMA, JUNE 23.—Owing to the small stocks and very mixed quality of the Silk on offer business has been restricted since last report. Prices show some decline, but are very irregular. Only little has been done in Oshius, at about last quotations. Notwithstanding some conflicting reports prospects for the new crop are, on the whole, favourable.

SHANGHAI.—London telegrams of the 8th June report the silk market "quiet, little inquiry. Red Peacock, 14s. 6d.; Blue Elephant, 15s. to 15s. 3d.; middling, 4½, 13s. 9d.; fair, 5, 13s.; common No. 5 Tsatlee, 12s. 6d.; and 9/12 moss Taysaams 12s." The French mail which left on the 6th June had 1,398 bales on board (50 bales for Milan, 289 bales for Marseilles, 443 bales for Lyons, 616 bales for London), which were purchased on a basis of Tls. 330 and 310 per picul for Gold Lyon Nos. 3 and 4; Tls. 330 per picul for Donkey chop No. 4; Tls. 327½ and Tls. 307½ per picul for inferior Blue and Yellow Elephants; Tls. 315 per picul for "May Foong" "Elephant and Flower Pot;" Tls. 295 per picul for "Black Lion" No. 4; and common Tsatlees from Tls. 250 to 290 per picul for No. 5. During the past week fully 2,500 bales have been settled at higher rates (chiefly by Continental houses), giving total settlements for season 4,000 bales.

From FOOCHOW.—For London, July 25, Egeria.

From HONG KONG and CANTON.—For London, June 6, Antenor (str.); for Southampton, 5, Hindostan; for New York, 7, Pyrmont.

From SINGAPORE.—For London, June 25, Craigforth.

From BATAVIA.—For Nieuwe Diep, July 29, Celebes (str.).

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, per steamer, £4 15s. per ton; to New York, £3 to £3 10s. per ton of 40ft.

At SHANGHAI.—To London £4 per steamer, and £3 10s. per sailing vessel.

At FOOCHOW.—To London, per steamer, £4; sailing vessel, £3 10s. per ton.

At HONG KONG AND CANTON.—For London, £3 to £3 5s. and £3 15s. to £4 5s. per steamer.

VESSELS LOADING.

At YOKOHAMA.—For New York, Stillman B. Allen, Mora; Annie Braginton, Walton.

At SHANGHAI and HANKOW.—For London, Achilles (str.), Altona (str.), Tartar (str.), Black Adder, Norman Court, Cutty Sark.

At FOOCHOW.—For London, Montgomeryshire (str.), Statesman, City of Baltimore (str.), Viking, Nyassa, Thermopylæ, Forward Ho, Venice (str.), Craigforth, Cawdor Castle, Glenlion (str.).

At HONG KONG AND CANTON.—For London, Denbighshire, St. Andrew's Castle, Osaka.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—July 28, off St. Albans Head, from Bassein, for Amsterdam, Arcadia; 29, off Deal, from Rangoon, Aberfeldy, (str.); at Queenstown, from Akyab, Ragna; from Rangoon, Est, Condore, Guldringa; 30, at London, from Bassein, Borrowdale (str.); at Queenstown, from Rangoon, Caspar; from Maulmain, Hollinside; 31, at Falmouth, from Akyab, Virginia; Aug. 1, from Singapore, for Hamburg, Constantia; at Queenstown, from Maulmain, P. C. Petersen.

DEPARTURES.—July 29, from London, for Samarang, Robert Porter.

SPOKEN.—Jose Hazeltine, from Batavia, to Montreal, July 4, 26 N., 45 W.

MISCELLANEOUS.—Passed Gibraltar, July 29, Glenartney (str.), from London, for Shanghai; at Port Said, July 28, Montgomeryshire, from Foochow; Achilles, from Shanghai, both for London.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BISSET—On the 11th June, at Shanghai, Mrs. J. P. Bisset, of a son.

CARGILL—On the 27th July, at 66, Inverness-terrace, Bayswater, Mrs. John Cargill, of Dunedin, New Zealand, of a son.

CASWELL—On the 2nd Aug., at 25, Inverness-road, Bayswater, the wife of J. G. Caswell, formerly of Saigon, of a daughter.

DUDGEON—On the 29rd July, at 53, Montagu-square, W., the wife of Dr. Dudgeon, of a daughter.

IM THURN—On the 28th July, at Ellerslie, Upper Tulse-hill, the wife of J. C. im Thurn, jun., of a son.

LATHAM—On the 26th July, at Leinster-road, Rathmines, Dublin, Mrs. Oliver Latham of a daughter.

LITTLE—On the 23rd July, at Clifton Lodge, St. John's-road, Blackheath, the wife of Matthew Little, prematurely, of twin daughters.

MACKENZIE—On the 26th July, at Mountgerald, Ross-shire, the wife of Capt. James D. Mackenzie, of Findon, of a daughter.

TOOTAL—On the 3rd July, at Rio de Janeiro, the wife of Albert Tootal, of a daughter.

MARRIAGES.

DES VOEUX—PENDER.—On the 24th July, at St. James's Church, Piccadilly, by the Rev. G. H. Wilkinson, Vicar of St. Peter's, Eaton-square, George William Des Voeux, Administrator of the Government of St. Lucia, to Marion Denison, the younger daughter of John Pender, M.P.

KING—NICHOLL.—On the 21st July, at St. John's, Paddington, Walter Edward King, H.M.'s Vice-Consul at Kiukiang, son of the late Rev. W. M. King, Rector of Long Critchill, Dorset, to Isabella, daughter of the late H. I. Nicholl, D.C.L.

LUCAS—ERICHSEN.—On the 28th July, at Holy Trinity Church, Upper Tooting, by the Rev. Francis H. Tatham and the Rev. E. D. Cree, Edgar, second son of Joseph Lucas, to Alice, eldest daughter of Hermann G Erichsen.

PALMER—HALL.—On the 24th July, at St. Pancras Church, by the Rev. A. R. Upcher, John Palmer, commanding H.M.S. *Figard* (late of the *Rattler* and *Barossa*, on the China station), to Emily Louisa, daughter of H. P. Hall, of Preston, Cirencester.

DEATHS.

CHESHIRE—On the 18th June, at the Yokohama General Hospital, William Cheshire, aged 44 years.

COHEN—On the 11th June, at Yokohama, Angelo Cohen, born in München, aged 36 years.

DALY—On the 10th July, on board the *Hindostan*, in the Red Sea, Marcus Daly.

FOSTER—On the 5th June, at Manila, Frederick Love Foster, only child of Frederick Emery and Martha Love Foster, aged fifteen months and twenty-three days.

GIBBS—On the 20th May, at Peking, James Hopson Gibbs, Assistant Audit Secretary and Deputy Commissioner in the Chinese Maritime Customs Service, aged 39 years.

LUSK—On the 22nd July, at Rosebank, Greenock, Robert Lusk, merchant, aged 52.

STEVENS—At Yamato Yashiki, Tokio, at the residence of Henry B. Joyner, of consumption, Mary R. Stevens, the beloved wife of Capt. George R. Stevens, s.s. *Ly-ee-Moon*.

HOUSE OF COMMONS.

THE MURDER OF MR. MARGARY.

(July 26th.) Sir G. CAMPBELL asked the Under Secretary of State for Foreign Affairs whether at the very time when the Indian Government had been pressing on one side for access to the scene of the murder of the late Mr. Margary, under circumstances which had occasioned great complications on the other side, where we had already direct relations with the Chinese Government, an inquiry by British officers into the circumstances of the murder, to which that Government had consented, was now delayed for no other reason than the heat of the weather; and, if so, whether Her Majesty's Government would consider the necessity of insisting on greater expedition; and whether it was true, as stated in some of the public prints, that a pecuniary indemnity for Mr. Margary's death had been sought at the hands of the Chinese Government; if so, who had suffered pecuniary loss by that sad occurrence, and for whose benefit an indemnity was sought.

Mr. BOURKE said that no doubt the heat of the weather in China had been the reason for deferring the inquiry referred to, because it was the first duty of Mr. Wade to consider the health of the persons under him. The mission would probably start before long; but there were other causes besides the hot weather which prevented it from starting—causes, namely, which related to the state of the country both on the side of Burmah and of China, as well as other considerations. With regard to the indemnity, until all the negotiations were completed the Government did not think it would be desirable to make any public announcement upon the subject. (Hear, hear.)

THE SILK TRADE AT NEW YORK.—Messrs. B. Richardson and Son's Circular states:—The business of the last month has only been moderate, owing partly to the season and partly to lack of best grades of stock. Throwsters are fully employed. Manufacturers of Twist and Sewings are not pushed. The feeling for the Fall trade is good. Imports for June, 1,156 bales. A portion of these were not delivered until early in July. Prices remain without quotable change. The failures of London houses engaged in the China trade have disturbed the market there, but there is very little silk there available for this market. Raw Silk, price current, July 22nd, Tsatlee, 1 and 2, $6 to 5.75; ditto, 3, $5.75 to 5.25; Taysaam, 1 and 2, $5.12½ to 4.75; R. R. Haining, $6.25 to 5; R. R. Tsatlee, $5.62½ to 5; R. R. Canton, Cotengon, $5 to 4.75; R. R. Canton, Chumchuck and Lucklow, $4.50 to 4.37½; R. R. Canton, Lucklow, ex. fine, $4.62½ to 4.50.

THE *Turkestan Gazette* relates a diplomatic difficulty which is at present engaging the Governments of Russia and China. In 1872 a Russian caravan was surprised and robbed near Shicho by a Chinese force commanded by an influential Chinese officer. The goods appropriated by the robbers represented a value of 90,000 roubles. Moreover, several merchants belonging to the caravan were killed. Since that time the Russian Government has incessantly demanded compensation, which has been as regularly promised, but never given. The *Gazette* says that the Chinese Government is evidently powerless to obtain restitution in the distant frontier district. It has, however, quite recently once more promised to attend to the matter, and it is hoped that it may do so.

THE Paris correspondent of the *Echo* writes:—"Another distinguished foreigner is in our midst, Prince Raden-Salch of Java. This, however, is not his first visit. He came to Paris in 1848, and stopped three years, during which he studied painting under Horace Vernet, and exhibited some very fair canvases. He is said to be quite a Parisian in his manners and tastes. The object of his present visit to '*le peuple le plus spirituel de la terre*' is divulged by the irrepressible *Figaro*. It appears our Javan Prince got married a few months ago to a young lady who, although possessing all that personal attractions can supply, nevertheless requires a little polishing up; so he has brought her to Paris to teach her '*les manières du grand monde.*'"

THE following curious statement is made by the Paris correspondent of the *Pall Mall Gazette*:—"A missionary, the Rev. Father Rémy, has just arrived here from Thibet, where he seems to have made a number of conversions under rather peculiar circumstances. He was condemned to be quartered, and his legs and arms were duly attached to four horses of the country. The Abbé is said to be a very powerful man, and either his limbs must be uncommonly strong or the horses employed to quarter him have been uncommonly weak, for he resisted all their efforts. His persecutors, we are told, struck with admiration, embraced the martyr and Christianity. This is certainly a great triumph for that species of religion called muscular."

WHEN the P. and O. steamer *Gwalior* broke down 150 miles from Hong Kong, was unable to sail, and drifted down to Hainan, where she anchored, a boat sent in charge of the second officer (Mr. F. H. Seymour) to Macao for assistance was overhauled and robbed by pirates on the way, but through his courageous conduct was allowed to proceed, and eventually reached its destination. The directors of the Company have presented a gold watch to Mr. Seymour in recognition of his services on the occasion.

THE Japanese Minister at Washington has informed the Secretary of State that two of the persons recently appointed by Japan as Commissioners to represent the interests of that country at the Centennial Exhibition have arrived in Washington, and he requests that they may be put in communication with the proper officials of the Exhibition.

AT the Royal College of Surgeons, on the 23rd July, James Kingston Barton, son of Dr. Barton, Shanghai, was duly passed.

THE PARIS GEOGRAPHICAL CONGRESS.

(THE ACADEMY.)

Of the several Exhibitions by the different countries, if we except that of France, which has of course been made as complete as possible, those of Russia and Austria-Hungary are the most noteworthy, overflowing, not only into annexes in the upper storeys, but into temporary buildings on the terrace, and representing very fully the state of geographical science in those countries. Germany has sent a fine collection, especially from the well-known private geographical establishments which have done so much to diffuse a knowledge of geography; Sweden and Norway, Denmark, Holland, Belgium, Italy and Switzerland have also well arranged collections of great merit; and Spain, Turkey, Chili, the Argentine Republic, the Sandwich Islands, and far distant Japan have sent contributions. The international juries appointed to select those exhibitors who are to receive honours and distinctions not having yet made their awards, it would be invidious to make any comparison between the objects of the same class exhibited by different countries—this must be reserved for a future occasion; but we cannot help noticing here with satisfaction that the collections exhibited by

Digitized by Google

our own Ordnance Survey and Admiralty Department, incomplete as they are, show that our official maps and charts are still unrivalled. We can, perhaps, best convey to the reader a general impression of the scope and nature of the exhibition by passing each country under review, and noticing that which is most worthy of remark in each of the several groups.

Russia has been specially happy in the selection of her commissioner, M. de Khanikof, the veteran geographer, who was at Bokhara when Conolly and Stoddart met their untimely end, and to his loving care much of the success of the section must be ascribed. The most remarkable as well as the most interesting feature of the Russian section is the collection of maps, sketches, and photographs from Central Asia, which conveys a vivid impression of the geography, the people, and the scenery of a part of the world that a few years ago was almost a sealed book. We find here maps of the Trans-Caspian district of the ancient bed of the Oxus (Amu Darya), of the province of Turkestan, and of the Zerefshan, Naryn, and Kulja districts; plans of Tashkend, Samarcand, Kulja, Khiva, and other towns; the results of the surveys made under great difficulty during the Khivan campaign, including itineraries of the routes followed by the several columns, and Colonel Skobelef's daring reconnaissance in the Turkman Steppe; and the recent surveys of portions of the Ust Urt and the delta of the Oxus made under the auspices of the Imperial Geographical Society. Among the photographs is the great album of Turkestan in four volumes, prepared by order of General Kaufmann, to illustrate the archæology, ethnology, industries, and history of the province over which he rules; the Geographical Society also contributes a valuable series of photographs, and those who wish may study at ease the various types of Central Asia—Khivan and Bokharidt Jews, the gipsies of Khiva, Jajiks, Uzbegs, Kirghiz, &c., as well as their manners and customs, or admire the scenery of the dreary steppes, the fertile valleys, and the lofty ranges of Turkestan. We may also notice some spirited sketches made during Petrovski's ill-fated expedition against Khiva in 1837, which present a vivid picture of the hardships attendant upon a winter campaign in the steppe. There are also four cases of Khivan loot, taken from the palace of the Khan, consisting of roughly finished gold ornaments, enriched with pearls, emeralds, turquoise, coral, and tiger teeth.

In Group I. there are some good portable astronomical and surveying instruments; two large maps showing the trigonometrical operations connected with the measurement of the great arc of 69°, which extends from Valentia on the west coast of Ireland to Orsk in Russia; specimens of the maps on several scales prepared by the War Department, including the great topographical map of the empire; and the published works of Lutke, Schubert, and Struve. Under Hydrography appear two interesting charts—one of Lake Ladoga, with sections and lines of equal depth; and a similiar one of the Caspian, showing in addition the discrepancies in outline between the several surveys executed from the end of the eighteenth century to the present day; how far these discrepancies are due to errors in survey, and how far to changes in the form of the sea would form an interesting subject for examination. In Group V. there is a good collection of the statistical maps issued by the public departments in Russia, conveying to the eye at once impressions that could not be obtained by days of weary poring over dry figures; and a map prepared by the Topographical Section of Orenburg, which shows in different colours the routes followed by the several Kirghiz tribes in their winter and summer migrations. The last group includes the results of the travels of Fedchenko, Prjevalsky, Semenof and Severtsof; noble records of personal daring and successful exploration which made us long for the time when England would be sending out knights errant of the same type, and have cast away the system of using cat's paws in the shape of Havildars and Mirzas to pluck the Central Asian chestnuts out of the fire for her. As far as regards her maps Russia still seems to favour the system of dull heavy colouring which obscures the detail without giving proportionate relief, but the actual work of the survey reflects the greatest credit on the officers of the Russian Staff. Before leaving Russia we would draw attention to the excellent contributions of Iliine of St. Petersburg to the geological, statistical, and educational groups, and to some characteristic statuettes of Russian and Central Asian types exhibited by Schindhelm.

Sweden and Norway, whose interests are watched over by no less than six commissioners, contribute diagrams of the great triangulation of the country, and specimens of the maps on various scales prepared by the officers of the general staff, with examples of some of the processes used in the production of maps. In Group II. are the Government charts, patent logs, deep sea sounding apparatus, and special charts of the fishing banks off the coast of Norway. In Group III. there is a useful map, showing the distribution of the meteorological stations in Norway, and indicating by colour the instruments in use at each station; as well as one of painful interest on which can be traced the havoc which has been wrought among the Norwegian churches by thunderstorms. The same country contributes what is perhaps the principal feature of the joint exhibition—a very clear and well-executed series of statistical maps on which are shown details connected with the population, such as marriages, illegitimate births, deaths, emigration, immigration, &c.; forests, fisheries, mines, &c., and the operations of the mercantile marine. Maps of this class can rarely be produced except by a Government department having the necessary machinery, and we fear it will be long before England, which leaves so much to private enterprise, will be provided with a similar series of maps to illustrate the heavy volumes of statistics which are annually increasing in number. Under Group VII. are classed—a cast of the great meteorite, found by Nordenskiold in Greenland; a collection of objects brought by the Gulf Stream to the shores of Spitzbergen; and the results of the Swedish expeditions to Spitzbergen and Jan Mayen, accompanied by a number of good photographs.

In Denmark the General Staff head the catalogue with specimens of the topographical map of Denmark, which yields to none in careful execution; and Tegner, of Copenhagen, adds some sheets of the Cadastral Survey, which is now more than half completed. Hydrography and Meteorology are well represented by the publications of the several departments, but Group IV. is most attractive, including as it does many relics, on a small wooden cross, of the Scandinavian colonies in Greenland, crania from the Greenland tombs, documents relating to the discovery of America by the Scandinavians, a collection of old works relating to Greenland, and a number of objects illustrating the present life, habits, dress, &c., of the Greenlanders. We must not forget to mention that Iceland has forwarded several maps for Group VI., and that the walls of the Danish room are enlivened by some good sketches of the coasts of Greenland and Denmark.

Great Britain.—Our own maps and charts are so well known that it is needless to particularise them here, and it will suffice to say that the Ordnance Survey, the War-office, the Admiralty, the India-office, the School of Military Engineering at Chatham, and the Meteorological-office have each sent examples of their work. Unfortunately, the difficulty about the Commissioner appears to have left little time for special preparation, and the arrangement of the specimens on the walls shows traces of the haste with which everything has been carried out. Still our great national survey attracts the attention it deserves, and the engraving of the one-inch and six-inch maps is much admired by connoisseurs.

The Ordnance Survey models, maps, and photographs of Jerusalem and Sinai, as well as a series of frames, exhibited by the Palestine Exploration Fund, which contain MS. maps and drawings by Wilson, Anderson, Warren, Conder and Ganneau, are exhibited under Group VII., and have excited much interest, especially since the recent attack on Lieutenant Conder and his party in Galilee. The Geographical Society have contributed a complete set of their publications, some of the large wall maps so well known in London, instruments for travellers by Captain George, R.N. and a case of precious documents, the MS. maps of Beke, Livingstone, Burton, Speke, Grant, Petherick, Kirk, Baker, and Hayward. Among the objects to which geographers will turn with most interest are some excellent and truthful sketches of the Pamir and Eastern Turkestan by Colonel Gordon, an interesting series of sketches and photographs by Captain Chapman, lately the Secretary to the Kashgar Mission, and views taken in the Delta of the Oxus, by Major Wood, who accompanied the recent Russian Expedition. Let us add that Mr. Dammann has sent his Album of Ethnology and Anthropology, which has already received several prizes; and that Mr. Markman has forwarded a series of the maps published in the *Geographical Magazine*.

In the British section there are no instruments except those by Captain George, R.N., sent by the Geographical Society; and two useful little instruments by Captain Bailey, R.N.; and the only representative of our great private geographical establishments is Keith Johnston, who sends one map, "Case's Map of the United States." We cannot help regretting that the private enterprise of Great Britain and her colonies should be unrepresented on such an occasion, and can only hope that matters will be managed better when the next Exhibition takes place.

Holland under Group I. exhibits a diagram of the triangulation of Java, and an ingenious instrument by Holsboer for measuring the strength of currents by galvanism. Among the charts in Group II. is one showing the course which a ship should take in each month of the year on a voyage from the Cape of Good Hope to the English Channel. There is a good collection of meteorological and other works relating to the Dutch East Indian possessions, and in Group IV. choice and in some cases unique editions of the geographical works published at Amsterdam in the sixteenth and seventeenth centuries; there is also a copy of an atlas containing the oldest maps relating to the water-works in Holland; good fac-similes of ancient maps; and some fine old globes of the commencement of the seventeenth century. In the same section are several good specimens of the curious Javanese marionnettes, representing persons celebrated in Hindu mythology and the ancient history of Java. The very excellent maps of Holland and of the Dutch East Indian possessions are classed under Group VI., and those of Japara, Semarang, and Soerakarta in Java, which, printed in colour not sufficiently heavy to obscure all the features of the ground, are charming specimens of cartography.

COOLIES IN BRAZIL.

(From the *Berlin International Gazette.*)

The Brazilian Consul General in Hamburg finds himself in a rather serious collision just now with the as yet local republican jurisdiction of that town, which, by the way, will be superseded next year by the general criminal and civil law for the German Empire. A public prosecution had been opened against a Hamburg skipper (Lobedanz), who about three years ago carried away from Hamburg and Antwerp some 1,300 deluded emigrants to the tropical wilds and swamps of the province of Bahia, belonging to the planter and slave-owning family of Moniz, whose chief is the said Consul, now Baron de Paraguassú, for wilful and conscious seduction of those unhappy people, of whom about one-fourth part succumbed to want and misery of every kind, no sort of provision having been made for their reception; while about 500 of them were brought back to Germany in rags and tatters, most of them lastingly injured in their health, and bereft of every means of subsistence, having consumed all the property they had realised in leaving their native homes. Meanwhile the contractor for the importation of these colonists into Brazil, a nephew of said Consul, Senor Moniz of Bahia, together with said skipper pocketed a premium of 170 milreis per head awarded between the general Government of Brazil and the Provincial Government of Bahia, as in similar other cases. The proceedings in Court proved the falsehood throughout of the statements made by those who engaged those emigrants for Lobedanz and Moniz, and of the promises made to them by printed prospectus as well as by contracts. Nevertheless Lobedanz was acquitted (two years' imprisonment having been asked by the public accuser), on the ground that he had been unconscious of the terrible consequences of his actions. This finding of the local criminal court, not by a jury—at all times suspected in Germany to be subject to local influences and considerations—has been received with general blame all over Germany, the more so as during the pleadings it came out that the Consul himself had backed the flattering information furnished to those emigrants, and in consequence that the General (Reich's) Government had entertained a correspondence with the Hamburg authorities as to the propriety of withdrawing his exequatur. This assertion made by the public Prosecutor gave cause to Baron de Paraguassú to address a note to the Senate of Hamburg requiring a reprimand of that officer, which was politely declined owing to the official irresponsibility of that person, referring the Baron to civil proceedings against him. These, however, he abstained as yet from, having however withdrawn another complaint he also had made in behalf of the Brazilian Government. The Consul did a wise thing in withdrawing this complaint; for a discussion on it would have brought to fresh remembrance many evildoings of Brazilian consuls, but too often screened by the Senate of Hamburg in the supposed interest of the port, or rather of an influential part of its Brazil merchants, who actually had made themselves a plan of increasing, or at least maintaining, the great coffee production of Brazil by German labourers, bound to the planters by downright shameful contracts—such as in the years 1840 to 1860 were carried out by the then Consuls of Brazil in Hamburg, M. A. Araujo, now Viscount de Itajuba and Correa, to the utter ruin of the poor people; yet, it would appear, to the satisfaction of the Hamburg authorities, to which they gave utterance by well known public documents and deputations, one of which even culminated in the handing of a medal struck purposely for the jubilee of the chief culprit in these doings. It is but right to say that this happened before the years 1866—which brought forth the North German Alliance, the forerunner of this great empire.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JULY 28.

The Second Chamber will meet on the 10th of August for the despatch of business, more especially to deal with two Bills, one to partialy re-arrange our election districts, by adding three to them, the other proposing to construct six new railway lines for account of the State. These will have a total length of 308 kilometres, and are estimated to cost thirty-six millions of florins. As soon as these Bills are carried—and there is, I think, little chance of their being rejected—the session will be closed. The Liberals are protesting against this summer meeting; and are of opinion that the Minister makes unnecessary haste, and that it had been better if these Bills were laid before the new Chamber, which will meet in September. I cannot see the justice of these complaints; too few material Bills have been carried this session.

Some agitation exists in Roermond, province of Limburg. Some time ago the bishop, Mgr. Paredis, was foolish enough to issue, just before the communal elections, a pastoral letter, in which he recommended certain of the candidates for election. Of course this has been openly and strongly condemned by the Liberals. The Ultramontanes thereupon became indignant, and in turn attacked their political adversaries. I hope that things will stop here, and that no further manifestations will take place. That the Liberals have the majority in the country is decidedly proved by the result of the communal elections, which have assumed a political character because the communal councils have to apply the lower class instruction law. In many towns and villages the struggle was very hot. The same may be said of the contest in Zutfen, where a member of Parliament had to be elected to fill the seat left vacant by the late Mr. Dam. The anti-revolutionary candidate, Baron Mackay, was beaten by the Liberal candidate, Mr. J. Tak Van Poortvliet, who obtained 1,519 of the 2,823 votes. The anti-revolutionists had done all they could to win the victory, but the Liberal majority was too strong.

The King will, before returning from his trip abroad, stay for some days in Paris. His visit, however, will be strictly private. The Queen spends the summer at her seat *het Huis ten Bosch*, and will sometimes visit our beautiful watering-place Scheveningen, which, however, is not crowded this year, because measles are prevailing there.

I derive from *Onze tolk* the item that in a short time a German translation will be published of Multatuli's "Max Havelaar." It seems that our East India colonies are just now occupying the attention of Germany. Thus I read in the *Vossische Zeitung* an itinerary, written by Mr. N. Vogel, who relates all sorts of sad stories about our East India colonies in general and about Atchin in particular. He assures his readers that he has heard uttered several times the wish that Germany would annex Sumatra, the Dutch Government being anxious to sell this island for a couple of millions. It is some consolation for us that we are just now in the dead season. The one thing most improbable in the statement is that Germany will pay for the annexed island. This is quite contrary to German policy as recently displayed.

The King has been pleased to confer the knighthood of the Order of the Netherlands Lion upon the panembahan Tjokro Ali Ningrat, of Bankallan, and upon the panembahan Noto Koesoemo, of Sumanap.

The annual meeting of the Dutch Missionary Society has been held at Rotterdam. It was shown by the report that this society employs sixteen missionaries and more than 130 schoolmasters. The expenses have reached the sum of f.100,758.20, and the revenues f.94,311.74.

The Minister of the Colonial Department has proposed to the East India functionaries, who are waiting to be put at the disposal of the Governor-General, that they shall enter the East India army as administrative officers.

Under the title of "Loudon and Atjeh," Mr. J. I. de Rochemont publishes in the *Vaderland* an article, which is a protest against the protest of General Verspyck about the sensational book which was published by Mr. de Rochemont to justify Mr. Loudon. This polemic is anything but interesting.

During the last fortnight a sum of about f.400,000 has been paid at Harderwyk as bounties for enlistment in the East India Army. Most of the candidates are foreigners.

AMSTERDAM, JULY 29.

It seems to be blowing an ill wind in our political atmosphere, and some papers report that Mr. Heemskerk has the plan to dissolve the Second Chamber, because he has not a sufficient majority to govern with. This is, however, I think, a mere supposition. A fact it is that our Premier is most angry that Mr. Tak (Liberal) has beaten the Clerical candidate at Zutfen. In consequence of this he issued a circular forbidding official persons to meddle with elections, even in their quality as private persons. In Gouda it is forbidden to the soldiers to read the *Nieuwe Rotterdamsche Courant* in the barracks, and it is not permitted to the States functionaries to read the *Nieuwe Van den Dag* in the ministerial bureaux. These are significant signs that some *coup* is near on hand.

Yesterday the new ten guilder pieces (gold) were put in circulation. They are as ugly as possible.

The old Catholic priest, Mr. Diependaal, from Helder, is appointed Bishop of Deventer.

PRODUCE MARKETS.

The trade in Colonial Produce has been more animated, and some important business has been done. Prices in general are very firm. The Money Market has remained unaltered.

COFFEE has met with a good demand, in consequence of unfavourable news about the crops in the Brazils and the decreasing stock. Good ord. Java has realised 57½c. to 57¾c., greenish 58½c. to 60c.

TEA.—Without business in first hands; prices are declining, in waiting for the large imports of the new crop.

RAW SUGAR.—The transactions have been of more importance than has been the case during the last few weeks. The refiners have bought extensively, and there has also been a good demand for the Baltic. Prices are very firm.

RICE.—Uncleaned has met with some demand. The cargoes arrived from Bassein and Rangoon are destined for the mills. A steady trade has been done in cleaned sorts. The high prices for corn are, of course, favourable to activity in this article.

SPICES are without transactions, and prices are nominal.

JAVA TOBACCO.—The market looks quiet for the moment, in waiting for the important lots which will be offered for sale early next month.

COTTON.—Prices are declining rapidly. There is no speculative demand at all.

DRUGS.—There are no transactions to report. Some demand has prevailed for Gum Damar, second-hands being very ill provided.

For RATTANS high prices are paid for superior quality.

JAVA INDIGO is very quiet. Prices remain unaltered. The stock amounts to 1,740 chests.

BANCA TIN on the spot is quoted f.50, and at this price some lots have been quitted. Billiton is offered at f.47½, but this price cannot be obtained.

HIDES.—By private tender a lot was sold, but no particulars transpired.

SHIPPING.

ARRIVALS.—July 22, at Texel, from Rangoon, Albert Wilhelm; 24, at Brouwershaven, from Banjoewangie, County of Sterling; at Zierikzee, from Bassein, Eagle; at Brouwershaven, from Bassein, Johann Hansen; 25, at Texel, from Rangoon, Edward Barrow.

DEPARTURES.—July 24, from Texel, for Batavia, Madura (str.); 27, from Texel, for Sourabaya, Louise.

TELEGRAMS FROM THE FAR EAST.

GERMANY AND CHINA.

BERLIN, JULY 28.—No foundation exists for the statement that negotiations are proceeding between Germany and China for the cession of the island of Formosa to the former. Germany has not changed her policy with respect to the acquisition of colonies in distant parts.

LONDON: TUESDAY, AUGUST 3, 1875.

THE SHANGHAI GENERAL HOSPITAL.

WE observed, with much pleasure, that a subject which has caused considerable bickering at Shanghai, as such subjects always do in small communities, was finally set at rest at the ratepayers' meeting, held at that port on May 18, and by what was practically an unanimous vote, it was resolved to authorise the Municipal Council to assist the trustees in establishing the General Hospital by advancing them a sum not exceeding Tls. 35,000, under certain very reasonable conditions and restrictions. Mr. KESWICK, the Chairman of the Trustees, brought the motion before the meeting, and spoke ably in support of it, remarking that the Hospital was an institution which "had done great "service, and, unhappily, it was more than likely that its "services would be required in the future, especially if "they did not get that supply of pure water that was so "much talked about." Mr. KESWICK'S proposition did not apparently excite much discussion, for it would seem that, besides the seconder (Mr. IVESON), nobody addressed the meeting in regard to it, except Sir EDMUND HORNBY, and he spoke very heartily in its favour. He also made a very fair and sensible suggestion, viz., that, as now the community will practically advance all the money requisite for the establishment of the Hospital, it should have a greater and more important share in its government. "It was a private institution," he remarked, in conclusion, "and it is now to become a public one; let, therefore, the "ratepayers choose the governing body, or at any rate, a "large share of it." This suggestion of the Chief Judge's will, probably, we should imagine, be acceded to without demur on any one's part. The proposed site for the new building, at the end of the wharves on the Whangpoo bank, has been objected to for one or two reasons. It is certainly a somewhat distant place, but it is a place which, in the opinion of Mr. KESWICK, who takes a far more hopeful view of the future of Shanghai than the Inspector-General of Customs, "will in the course of a few years be considered "a much more convenient site than it is at the present "time, for the extension of Shanghai, judging from what "is now taking place, will be in that direction." Besides, the Hospital is always liable to be called upon to take in cases of infectious or contagious disease, and in view of that contingency the proposed site is unexceptionable. Many people at Shanghai were in favour of the Howard's Wharf site, at first proposed, and, doubtless, it is more convenient for many reasons; but other matters have to be considered in regard to the position of a hospital besides mere convenience. Perhaps that portion of the Shanghai community to which we refer will be more reconciled to their disappointment when we tell them that an eminent sanitary authority, Dr. LETHEBY, who was a witness on July 16 before the Select Committee of the House of Commons appointed to inquire into the much debated Hampstead Hospital question, expressed his belief that it was of the highest importance that a hospital for contagious and infectious diseases should not be in a "residential" district, or in a place where many persons were continually passing, for there was no doubt that infection would be spread in this way. If the new Shanghai General Hospital be placed on the site of Endicott's Garden, the community need be under no apprehension on this score, and they will, no doubt, gradually come to look upon its distance from the centre of the Settlement as a blessing rather than a calamity.

LAISSEZ-ALLER IN CEYLON.

IT has been a gratifying duty on our part on more than one occasion to notice the commendable efforts made by the present Governor of Ceylon to place that promising colony in advance of other Eastern dependencies. The contents of the last files of Ceylon papers (*Ceylon Times*) have somewhat modified our previous opinion of Mr. GREGORY'S energy and statesmanship. Two incidents are recorded in those papers which reflect seriously on the capacity of the local Government, viz., disastrous floods, causing a stoppage of railway traffic and a good deal of destruction to property, and another outbreak of murrain amongst the native herds. The Government of Ceylon cannot, of course, be held responsible for the occurrence of floods or the outbreak of cattle disease, but it may fairly be charged with a neglect of precautions recommended to be taken in both emergencies by special committees appointed to inquire into and report upon previous similar visitations. In the autumn of 1872 severe floods swept over the low country on the western side of the island, causing serious damage to railway embankments and bridges, destroying a considerable extent of private property, and causing loss of life and ultimately a good deal of sickness. A commission of three Government officials was appointed to report on the best means of averting or mitigating similar disasters in future, and the result made its appearance in the shape of a Blue-book, in which, amongst other recommendations, was one which must have occurred to the most casual observer,—it was to the effect that the railway embankment being the main cause of the floods by damming back the waste water from the hills, more water-way should be afforded throughout the first thirty miles of the railway from Colombo. This advice has never been thoroughly acted upon; a few openings were made at distant intervals, but not by any means adequate to the requirements of the case, as was pointed out by the local journals of the time; the consequences are now too plainly visible in a fresh disaster, not certainly quite so terrible as that of the previous occasion, but sufficiently destructive and distressing. The full extent of the loss to private parties could not be ascertained when the last mail left Ceylon, but it was evident that much privation would be entailed on the rural population in the vicinity of the disaster.

Every year for a long period the herds of Ceylon have suffered from attacks of a disease closely allied to, if not identical with, the Rinderpest of Europe. So serious had the losses from this murrain become that a Commission of Inquiry was appointed by a late Governor of Ceylon, Sir HERCULES ROBINSON, which in 1869 submitted an elaborate report on the subject, in which were a number of recommendations calculated to meet future outbreaks of the pest. Sir HERCULES seems to have considered the publication of the report a sufficient return for the cost of the commission; no single step was taken by him to carry out any of the commission's recommendations. The *Ceylon Times*, in dealing with this subject, says:—

> No one, so far as we are aware, has ever quarrelled with the suggestions laid down by the Commissioners, or said that they were not admirably adapted to arrest and remedy the spread of epizootic diseases. The reason why they have never been put into operation is not far to seek. It is a way we have in Ceylon, to organise Commissions and institute elaborate inquiries, when any panic prevails; and if the source of danger happens to be removed before the report is presented, it is remorselessly pigeon-holed; and the next recurrence of the epidemic finds us just as ill-prepared for it as we were on the previous occasion, and the only use the report serves is to show how much we might have done and did not do. This was the case with the Cattle Commissioners' Report and the epidemic of last season, and it will be the case should disease again break out, as seems only too probable.

When we find the Government of Ceylon energetic and profuse in matters relating to archæology, museums, restoration of Buddhist temples, oriental libraries, &c., at the same time indifferent to the losses sustained almost yearly by native cultivators from floods and cattle murrain, we cannot refrain from expressing our conviction that a grievous mistake is being made, which Governor GREGORY will do well to rectify with as little delay as possible.

IN our Parliamentary intelligence it will be seen that the Under-Secretary for Foreign Affairs has declined to say whether any negotiations have been entered into with the Chinese Government for an indemnity for the murder of

Digitized by Google

Mr. MARGARY. From the nature of the answer we are disposed to think that such negotiations have been entered on, the consequences of which may be very disastrous.

A TREASURY minute appears in the *Gazette*, declaring Hong Kong an unhealthy port, in addition to the other ports in China named in the Consular Superannuation and Pension Act, which has already been noticed in our journal. We are at a loss to know what Hong Kong has to do with the Act, which applies only to Consular ports.

TELEGRAMS report difficulties between Japan and Korea, but according to a message received to-day, it appears that matters have been arranged.

THE CONSULAR RETURNS OF TRADE WITH CHINA. 1874.

The Consular Returns of the Foreign Trade at the Treaty Ports of China (with the exception, as usual, of Shanghai and Chinkiang) during the year 1874 have just been issued, and we note with surprise that they consist entirely of statistics in a summary form. We hope that the Consuls' Reports have not been discontinued from economical or other motives, and that we may be allowed to have our statistics in the same detail as heretofore. The following is a concise *résumé* of the meagre tables with which we are furnished:—

TIENTSIN.—Mr. Consul Mongan states the total value of the trade (exclusive of treasure) at £6,211,547, of which £387,054 only were exports. The treasure return stands thus:—Imports, £409,165; exports, £1,197,395. The direct trade with foreign countries was valued at £326,329, of which the imports, amounting to £304,315, came from Great Britain, Hong Kong, Japan, Siam, and the Amoor provinces. The foreign and native trade with other treaty ports in foreign vessels amounted to £2,943,536 and £2,941,681 respectively, but it must be noted that £476,305 of the imports represent the value of tea entered at Tientsin for Kiachta. During the year 203 British vessels of 95,928 tons, and 372 vessels of 194,888 tons under other foreign flags, including 78 Chinese steamers of 46,598 tons, entered and cleared at the port.

NEWCHWANG.—Mr. Consul Adkins values the trade, excluding treasure and all re-exports, at £1,395,559, made up of £811,045 imports, and £584,514 exports. No reliable information could be obtained with regard to the import and export of treasure. The direct trade with foreign countries, including Hong Kong, was valued at £258,862. The difference in these totals shows the value of the foreign and native trade in foreign vessels with other treaty ports, viz., £444,283 and £686,787 respectively. During the year 126 British vessels of 49,934 tons, and 386 other foreign vessels of 131,150 tons entered and cleared at the port.

CHEFOO.—Mr. Consul Lay reports that the total trade in foreign vessels (excluding treasure) was £2,680,061, made up of £1,974,250 imports, and £785,811 exports. The import and export of treasure amounted to £969,644. The direct trade with foreign countries, including Hong Kong, was valued at £279,239, of which only £37,344 are exports. The totals of foreign and native trade with other treaty ports in foreign vessels were respectively £1,241,391 and £1,161,429. During the year 405 British vessels of 186,641 tons, and 753 vessels of 342,092 tons under other foreign flags, together with 92 Chinese steamers of 35,420 tons, entered and cleared at the port.

HANKOW.—Mr. Consul Hughes values the trade in foreign vessels at £11,223,816 (including re-exports £724,031, but excluding treasure), made up of £5,112,144 imports and £6,111,672 exports. The treasure return is £909,358 imports, including £86,351 in copper cash, and £380,370 exports. The value of the direct trade (exports) with foreign countries was £1,685,901, including the trade with Hong Kong, and tea, value £437,377 imported from Kiukiang and re-exported. The difference between the two grand totals is the value of the foreign and native trade in foreign vessels with other treaty ports, divided thus:—£5,957,571 and £3,580,344. The value of the exports, destined for Great Britain, India, or the Colonies, but carried first to other Treaty Ports, was £4,235,888, including tea and silk re-exported, value £663,379. During the year 389 British vessels of 334,144 tons, and 524 other foreign vessels of 347,861 tons entered and cleared at the port.

KIUKIANG.—Mr. Vice-Consul King values the trade, excluding treasure and re-exports, at £4,156,400, made up of £1,179,896 imports, and £2,979,504 exports. The treasure return stands thus:—Imports £565,658, exports £167,222. The direct trade with foreign countries, including Hong Kong, was only valued at £21,893, all exports. The respective amounts of foreign and native trade in foreign vessels with other Treaty Ports were £3,758,855 and £375,652. During the year 46 British vessels of 17,118 tons entered and cleared at the Vice-Consulate. According to the *Customs' Register*, 770 vessels of 587,922 tons, under all foreign flags, and 144 Chinese steamers of 56,668 tons entered and cleared during the year on their voyages to and from Hankow; in this number the 46 British vessels above mentioned are also included.

NINGPO.—Mr. Acting Consul Forrest values the trade in foreign vessels at £4,352,722 (excluding treasure but including re-exports), made up of £2,198,845 imports and £2,153,877 exports. The treasure return is £310,023 imports and £555,921 exports. The direct trade with foreign countries, including Hong Kong, amounted to £636,628, of which only £2,052 are exports. The difference between the two grand totals is the value of the foreign and native trade in foreign vessels with other Treaty Ports, divided thus—£1,175,016 and £2,541,077. During the year 84 British vessels of 35,384 tons and 506 other foreign vessels of 350,421 tons entered and cleared at the port.

FOOCHOW.—For some reason the returns from this port are drawn up in a totally different way from the preceding. The total general imports and exports were valued at £4,966,743, but this refers only to the direct trade with foreign ports, including Hong Kong. The British exports alone amounted to £3,644,812. Of the indirect, *i.e.*, coast or river, trade the total value was £762,966, £675,523 being in British vessels. The treasure return is incomplete. During the year 400 British vessels of 283,649 tons, and 104 other foreign vessels of 41,771 tons were entered and cleared at the port.

TAMSUY.—Mr. Acting Vice-Consul H. J. Allen states the value of the trade at £507,671, besides treasure, of which the imports and exports amounted to £182,976. The trade with Hong Kong is valued at £243,393. The respective amounts of foreign and native trade in foreign vessels with other Treaty Ports were £103,222 and £155,747. During the year 86 British vessels of 25,768 tons and 51 other foreign vessels of 15,730 tons entered and cleared at the port.

TAIWAN.—Mr. Consul Gregory values the trade in foreign vessels at £767,100 (excluding treasure), nearly equally divided between imports and exports. The amount of treasure imported and exported was £266,958. The direct trade with foreign countries, including Hong Kong, amounted to £404,487. The difference between the two grand totals is the value of the foreign and native trade in foreign vessels with the other Treaty Ports, divided thus—£169,329 and £193,284. Sugar to the value of £324 was sent to London, *viâ* Amoy. During the year 137 British vessels of 40,638 tons, and 176 other foreign vessels of 44,462 tons entered and cleared at the port.

AMOY.—Mr. Acting Consul Phillips values the trade, excluding treasure but including re-exports, at £4,063,458, made up of imports £2,279,812 and exports £1,783,646. The amount of treasure imported and exported was £321,781. The direct foreign trade is valued at £2,443,660, the imports slightly exceeding the exports; in this amount is included the trade with Hong Kong. The respective amounts of foreign and native trade in foreign vessels with other Treaty Ports were £974,774 and £651,965. During the year 623 British vessels of 373,135 tons and 459 other foreign vessels of 152,324 tons entered and cleared at the port.

SWATOW.—Mr. Acting-Consul Frater values the trade, including re-exports but excluding treasure, at £4,630,040, made up of £3,318,508 imports and £1,311,532 exports. The treasure return stands thus:—Imports £175,467, exports £702,769. The direct trade with foreign countries (nearly all with Hong Kong) amounted to £2,234,567. With the exception of £1,375, partly re-exports, the trade with other treaty ports in foreign vessels was entirely in native hands. During the year 680 British vessels of 396,773 tons and 306 other foreign vessels of 139,672 tons entered and cleared at the port.

CANTON.—The total trade of the port in foreign vessels was valued at £6,657,828 (including all re-exports, but excluding treasure), made up of £1,985,701 imports and £4,672,127 exports. The direct trade with foreign countries, in which category Hong Kong is included, amounted to £4,610,470, exclusive of treasure; of this total 60-64 went to England and colonies, 3-64 to North America, and 1-64 to South America. The difference between the two grand totals given is, with the exception of £8,395, the value of the native trade in foreign vessels with other treaty ports. The value of Canton's direct trade with the British isles was £422,178. The treasure return is £723,998 imports, and £330,919 exports, or a total of £1,054,917 (all Hong Kong). During the year 1,384 British vessels of 587,831 tons, and 200 other foreign vessels of 104,671 tons entered and cleared at the port. These returns are not signed by Sir D. B. Robertson, and we, therefore, conclude that they are simply Customs statistics re-arranged.

In conclusion, we would call attention to two serious defects in the returns contained in this Blue-book, the one being the want of uniformity in the way in which the Consuls deal with re-exports, and the other the utter absence of comparative tables, without which, of course, it is impossible to see whether the trade of the ports is increasing or diminishing. The Foreign-office would render a service to the mercantile community by instructing Her Majesty's Consuls to remedy these defects in the future, and by further directing them all to make up their returns in one and the same way.

THE PEKING HOSPITAL.

We have received the Thirteenth Annual Report of the Peking Hospital, by John Dudgeon, M.D., C.M. Medical missions in China are more useful institutions and do more good than many people give them credit for, and if exception can be made in favour of any one of them, we are inclined to think that the Peking Hospital, in connection with the London Missionary Society, is the most useful, for its influence extends to higher grades in the Chinese social scale than are commonly to be met with where most medical missionaries are established. Our readers will probably remember that this Hospital was founded by Mr. Lockhart in the latter part of 1861; its thirteenth annual report by his successor, Dr. Dudgeon, is now before us, and will be found very interesting reading. The total number of patients prescribed for during 1874 was 18,894, classed thus:—new out-patients, males 7,287, females 1,670, and old out-patients, males 8,310, females 1,627; in addition to these there were sixty in-patients. No less than 1,916 of the patients were treated for ague, a fact which testifies to the great prevalence of that affection at Peking, where a few years back it was almost unknown. Dr. Dudgeon furnishes "short notes of the more important medical and surgical cases" which came under his hands during the year, and as—to quote his own words,—"these reports are destined chiefly for the unprofessional reader," we would, if we may be permitted to make the suggestion, counsel a little more reticence in this respect in future years. The paragraph on small-pox is noticeable, as it furnishes some information concerning the late Emperor's fatal illness. Passing over the remainder of the medical notes, we come to the most interesting part of the report, viz., that part which shows how Dr. Dudgeon's varied labours at Peking are appreciated by the Chinese. He maintains that there is no foundation for the common notion that the Chinese are destitute of gratitude, or even fail to express their thankfulness for benefits conferred upon them. The gratitude of his patients has taken a variety of forms; "there is," he says, "the 'thank you,' the bow, the salaam, the courtesy, the *kotow*, the determination to spread abroad your fame, the presentation of silk and paper scrolls and tablets, of handsome wooden tablets. . . These tablets are very expensive in many cases, . . . they are lacquered or handsomely painted, or gilt or varnished, and they are brought in great state through the principal thoroughfares, with bands of music playing and banners floating in the air, to the hospital, where they are erected under the eaves of the wards, amidst the patients and friends and admiring crowds." Further on he says, "The eaves of the various buildings, and, in fact, almost every available space in the hospital, is already taken up with tablets. With the exception of the Goddess of Mercy, the hospital can boast of the largest number of tablets in Peking. Those erected by well-known ministers of State, governors or viceroys of provinces, princes, &c., are especially handsome; these carry great weight in the minds of the people, and have tended much to the fame and stability of the hospital." Some personages, again, of the highest rank have willingly given autograph prefaces for one or two works which Dr. Dudgeon has published. All this is very satisfactory, and not less so is the appreciation which the Chinese have shown for a book-shop and a reading-room which were started in connection with the hospital. In regard to the latter, we are told that the President of the Board of Civil Office, a high and well-known dignitary of the empire, most kindly gave the sanction of his name and pen to a tablet for the room, while "it is not an uncommon thing to find the shop filled with savants, or to see official carts almost daily in front of the door." We would gladly enlarge upon this theme, but the space at our disposal will not admit of it. Suffice it to say that there can be no doubt that the medical mission at Peking is doing really good work in the cause both of Christianity and of civilisation; and it will be all the more enduring from its being done silently and unobtrusively. The remainder of Dr. Dudgeon's report is occupied with "Notes on Mongol Practice," by the Rev. J. Gilmour; an Abstract of Thermometrical Observations at Peking during the year; and the Statement of the Income and Expenditure of the Hospital in 1874. The establishment is evidently conducted with a strict regard to economy, showing large results for small means, and we hope that it will meet with that encouragement and support from the benevolent which it so richly deserves.

FRANCE AND THE FAR EAST.

We find in a French parliamentary report on the estimates of the department of Foreign Affairs for 1875-76 some figures with reference to the development of the trade between France and the Far East. In 1857 the total of French exports and imports to and from the Far East did not reach ten millions of francs. At the end of the subsequent period of ten years, viz., in 1866, it reached thirty millions, but the yearly average of the whole of that period did not exceed fifteen millions. But in 1867 it rose to fifty-six millions, and to 107 millions in 1869. It remained at the last figures, on an average, during the five following years. The said totals represent only the direct trade between France and the Far East, and not the business carried, to at least as great an extent, through the medium of foreign, and specially English commerce. It is to be remarked, besides, that the figures apply only to what is called, in French official language, "special trade," that is, the exchange of the produce of French soil and manufactures against commodities imported for French consumption.

M. Reinart, formerly inspector of native affairs in Cochin-China, will be appointed French resident near the Annamese Court, at Hué, under the new treaty.

A German *savant*, Dr. Edmund Neumann, from Meissen, has been appointed professor of geology and paleontology at the Imperial Japanese University. Dr. Neumann made his studies at the University of Munich, and is known in scientific circles as the author of a treatise on the prehistoric *fauna* of the lake of Starnberg, in Upper Bavaria. He is already on his way to Japan.

Correspondence.

DOCKING NAVY SHIPS.

(To the Editor of the *London and China Telegraph.*)

SIR,—Amongst the naval items of news from China I observe that the *Audacious*, flag-ship of Admiral Ryder, was to be docked at Yokoska, the dock belonging to the Japanese Imperial Government. I cannot help thinking that, considering there is a large dry dock in Hong Kong, belonging to and worked by English enterprise, the Government might, in the matter of docking their ships, give the Hong Kong and Whampoa Dock Company what benefits might arise from such patronage; of course, in small matters of repair the naval yard at Hong Kong is sufficient for all requirements, but in heavy matters, such as docking an ironclad, private British interests, locally situated in China, might be considered above those of the Government of Japan. The dock at Hong Kong is large enough, and the artisans connected with the works are of sufficient skill, as was proved by the successful docking, repairing, and undocking of the *Iron Duke*, the former flag-ship on the station, and sister ship to the *Audacious*. Trade is depressed enough in China at the moment, and it is hardly fair that our own Government should desert the enterprises of their colony and give preference to that of Japan.—Yours &c.,

HONG KONG.

July 27, 1875.

THE OPIUM TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—Anybody, not conversant with China and the Chinese, reading "Nangchoy's" statement to *The Times* of the evil his country is suffering from the importation of Opium from British India, vide extract in your paper of the 12th inst., would be inclined to think that the Chinese Government have always objected to the importation of this article on these supposed evils, or on moral grounds; but I, Sir, from long experience, have formed a different opinion on the subject, and my opinion is, that the Imperial Government have never looked into the matter with a moral view at all, and no inducement from us will ever get them to issue a law prohibiting the use of Opium by the Chinese people. I am also of opinion that the evils which "Nangchoy" and the Anti-Opium trade people write about exist more in their imagination than they do in reality. The importation of Opium into China was virtually legalised long before the Treaty of Tientsin was signed and a tax collected on it at the different treaty ports by the Taoutais at those ports—and I am of opinion that it was here where the shoe pinched the Imperial Government or Treasury; they wanted a fair share of the (plunder I was going to write) tax which their officials were collecting, and the introduction of the article into the treaty simplified matters for them only.

To conclude, these, Sir, are my opinions, and all the sophistical letters "Nangchoy" or any other Chinaman can write will not change them on this matter.—Your's truly,

July 31, 1875.

OLD CHINA.

Legal.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

THE "INDUS" AND THE "ABBOTSFORD."

This was an appeal from a decree of the Judge of the High Court of Admiralty of the 25th of January last. The suit arose out of a collision between the steamships *Abbotsford* and *Indus* in the English Channel, off Dover, on the morning of the 24th of November last. The *Indus*, which belonged to the P. and O. Company, is a vessel of 2,234 tons, manned by a crew of 150 hands, and at the time was on a voyage from London to Bombay with a cargo of merchandise. She was in charge of a licensed Trinity pilot. The *Abbotsford*, a ship of 1,697 tons, with a crew of 88 on board, was on her way from Antwerp to New York, with a large number of passengers and a general cargo. The case on the part of the *Abbotsford* was that she had stopped off Dover in order to take a pilot on board, and that, while in waiting, she observed the *Indus* on her port quarter at a distance of a quarter of a mile. The *Indus* made no change in her course in spite of the loud warnings of those on board the *Abbotsford* and the result was a colli-

Digitized by Google

sion in which both vessels were more or less damaged; on the other hand it was contended that the collision was caused by a sudden change in the steering of the *Abbotsford*, attributable to negligent and reckless navigation. The Judge of the Court below considered the *Abbotsford* alone to blame; hence the present appeal.

Their Lordships, after hearing the arguments at considerable length, allowed the appeal, and reversed the judgment of the Admiralty Court, with costs.

YEAP CHEAP NEO AND OTHERS V. ONG CHENG NEO AND OTHERS.

This was an appeal from a decree of the Supreme Court of the Straits Settlements, dated July 24, 1872, and which decided a question as to the meaning of a will made by a Chinese widow. The suit was originally brought by the present chief respondent, who was the sister of the testator, Oh Yeo Neo, a Chinese woman, who died at Penang in July, 1870, and who had previously appointed the present appellants her executors. The defendants disputed the validity of the will as applying to the appellants on the grounds that the disposal of certain funds and property were void as creating a perpetuity, and were also void for uncertainty, both as to the persons intended to be benefited and as to the period for which the trust was intended to endure. Among the purposes referred to for which the funds were to be used were the reservation of certain plantations for a family burial-place and the maintenance of a house called "Sow Chang." That building was a permanent erection of wood, in the shape of an elmira or cupboard in which was enshrined the ancestral tablet with the ashes of the joss sticks burnt before it from time to time. The tablet consisted of a wooden board about twelve inches in height and four inches broad, having an inscription in front announcing the name of the deceased, the date of death, and the names of the deceased's children and grandchildren, and at the back the date of the deceased's birth. It was first taken to the burial ground, where joss sticks were burnt before it, and then brought home and placed in the shrine with the ashes of the joss sticks. There it was worshipped by the deceased's family every morning, and especially on the anniversary of the death, when joss sticks were again burnt before it. Great respect was said to be paid by the Chinese to the ceremony. The appellants, in answer, contended that the trusts were valid, and that the chief respondent was only an illegitimate child of the testator's mother. The case in the Court below was decided in favour of the plaintiffs, the judge finding that several aged Chinese testified to being present at the marriage ceremony sixty years previously, and that the father and mother referred to were always received in society as husband and wife, and that the trusts were specially void as to perpetuity from the fact that the burial-place, Low Chong Sing Chew, and other purposes for which the gifts were made, were not of a charitable nature. An appeal was accordingly made to the Judicial Committee. Mr. Hemmings, Q.C., and Mr. North appeared for the appellants, and Mr. Stephens, Q.C., and Mr. C. Russell represented the respondents. Their Lordships found in favour of the respondents on all points, and decided, therefore to advise Her Majesty to dismiss the appeal with costs.

THE CHARGE AGAINST MESSRS. COLLIE.

At the Guildhall Police-court, on the 28th ult., Mr. Alexander Collie and Mr. William Collie surrendered to their bail before Sir Thomas White, to answer the charge of obtaining large sums of money from the London and Westminster Bank by means of false pretences. Sir Henry James, Q.C., prosecuted, and Mr. Serjeant Ballantine and Mr. Pollard appeared for the defendants.

Mr. Percy Sanderson said he was partner in the firm of Sanderson and Co., 63, Lombard-street. His partners were Richard Manners Sanderson, Henry Gurney, and William Brown. They were bill brokers, but were not carrying on business now. While they were in business it was very large. Their general course of dealing was that, if the bills were approved, they discounted them,—in some instances they gave a cheque for the amount, less discount, and, in others, they passed the amount, less discount, to the credit of the firm. Their transactions in the course of the year would represent millions. Those discounts were not all done with their own money. Their practice was to discount certain of the bills with bankers or others, or to place them as security against loans. That was the practice of bill brokers. He had known the firm of Alexander Collie and Co., and done business with them for upwards of five years. They had an office in Leadenhall-street and in Manchester. In the course of business he saw Mr. Alexander Collie. He did not remember seeing Mr. William Collie on business matters. The practice was that a clerk brought the bills in an envelope, and the amount of those approved, less discount, was put to the credit of the firm, and they drew against it. Mr. Alexander Collie took an active part in the business. During the five years that they did business with Messrs. Collie it was a very large one, amounting to £8,000,000 a year. Those bills he passed to the London and Westminster Bank. Sir H. James then proposed to read one of the bills as a sample of the rest. The bill was for £2,000, at six months, for value received, and purported to come from Manchester. On the face of it there was Account, A.C. and F. W. underneath, and S. Goods. It was accepted by Alexander and Sons, but some of their bills varied in the initials, and were for "account," and not for goods. Sir H. James proposed to ask the witness what would those marks and figures convey to the mind of a commercial man. Mr. Serjeant Ballantine objected, and suggested that if he were overruled he wished a note should be made of his objection. Sir Thomas White said it was a most important question, and one that should be answered. Mr. Sanderson continued—Those letters and words would convey to his mind that there would be goods to the amount of the bill applicable to the payment of the bill. He connected the letters on that bill with certain goods. Cross-examined: He had never taken a bill with those marks upon it without believing that it referred to goods. He looked upon the words "for value received," without anything else, as conveying to his mind no more value than the words "your obedient servant" at the bottom of a letter. He attached no importance to the words "for value received" without the letters. If he had known that those bills did not represent goods, he would not have discounted to so large an extent.

At this stage of the proceedings the defendants were remanded until the 4th prox. on the same bail as before, and left the court with their friends.

Miscellaneous.

THE SUEZ CANAL.

The following is an analysis of the report which Vicomte de Lesseps will present to the general meeting of the Suez Canal Bondholders. It will be remembered that M. Aimé de Lesseps's recent negotiations at Constantinople respecting the Canal dues were suddenly broken off, and various statements as to the cause have lately appeared in the English and foreign press. These assertions are more or less incorrect, but the fact that certain representatives of foreign countries have been openly accused of interfering with M. de Lesseps's negotiations with the Porte renders the present report peculiarly interesting. The document is divided into four parts. The first, or financial statement, is to the effect that in 1874 the real expenditure was f.17,500,000, and the receipts f.26,300,000. Interest will therefore be assured to the shareholders, and the undertaking has commenced to pay. The second part treats of the way in which the Canal and the ports are maintained. The Canal is kept in a good navigable state, but no improvement or novelties will be introduced into the system. All works of this nature which had begun were at once suspended on April 29, 1874, "the day on which 10,000 armed men came to force on M. de Lesseps the new arbitrary tariff prepared at Constantinople by the representative of the British Government—a tariff, moreover, which violates the contract of concession." The company, however, keeps the entrance to Port Said clear by means of the continual use of a powerful dredge, and the workshops provide everything which may from time to time be necessary.

The part of the report referring to the working of the Canal shows the increasing development of traffic. The ships which pass from the Mediterranean to the Red Sea and *vice versa* are every day of larger size. The official tonnage at present in use is incorrect, and the consequence is, says M. de Lesseps, that no control is possible, and most ships are freighted to "double their registered tonnage." This system of false tonnage was, remarks M. de Lesseps, imposed upon the company by force. He says:—"The overloading of ships has become scandalous, and is not only a great source of loss to the shareholders of the Suez Canal Company, but, what is worse, is the inevitable cause of numerous shipwrecks. Official tonnage must one day necessarily express the real capacity of the ship. On that day shipowners may easily be prevented from freighting their vessels with cargoes superior to their registered tonnage, and many human lives will be saved."

THE MISSION FIELD IN CHINA.—On the 29th ult. three new missionaries were to sail for China, and in connection with their departure a special prayer-meeting was held by the China Inland Mission, when a blessing was invoked on the labours of the new aspirants for carrying the gospel into the heart of China. The *Christian* thus describes the three new labourers in the China mission field:—"Mr. Cameron, from Mr. Guinness's East-end Training Institution, followed. He is a tall, strong, vigorous Scotchman, and speaks with great feeling, evidencing not a little spirited perception and cultivated intelligence. His remarks upon the words of the Master, "Follow me," were very impressive, and gave the key-note to his own life of proposed devotedness to that Master's service in China. Mr. Nicoll, also from the Institute, at once won the sympathies of those present. With a heart that has learned not a little of the ways of God in a peculiar school of experience, he has laid himself and his motherless child upon his Lord's service in that distant land. The words he spoke on Friday night were few, but deeply solemn and touching. Mr. Clarke, the third missionary, has been for some eight or nine years a fellow-labourer with Miss McPherson, working in Spitalfields, and visiting even Canada, as the needs of her work demanded. His experience in dealing with souls has been considerable, and his address on the present occasion, given with a view to reach the unsaved who might be present, was marked with singular power, and all the signs of a true evangelistic gift. We are quite sure our brother, by God's grace, will ably do the work of an evangelist."

THE Adventure, 2, iron screw troopship, 2,510 tons, 1,227-horse power, condemned as unfit for further service, is now being dismantled at Chatham Dockyard, and her stores are being returned to the Dockyard, and to the Gunwharf. As soon as the task of dismantling her has been effected the ship will be put out of commission and her crew paid off. It may be well to mention that the bay of Yedo, in which Yokohama lies, is noted for its propensities for fouling ships' bottoms, and we do not think our men-of-war, which, for the most part are idle, take advantage of lying-up in the fresh water rivers of China. This plan, as is well known, tends in a great measure to kill off the barnacles and salt water weeds which cling to ships' copper. The P. and O. Service are most careful in this respect, their steamers being sent to Whampoa, to lie in the Canton river, whenever a spare week free from work offers itself.

Monetary and Commercial.

The directors of the London and County Bank have decided to pay an interim dividend for the half-year ended 30th June last at the rate of 16 per cent. per annum, and to carry forward a balance of £82,762, which, with £75,000 taken from the reserve fund, will be retained to meet any exceptional loss arising from the recent failure of Alexander Collie and Co., whose drafts upon various firms, amounting to £213,398, held by the bank

Digitized by Google

have not been, or will not be, paid at maturity or in full. The reserve fund on the 30th June, after the above deduction of £75,000, stood at £636,895. The distribution at the corresponding period of last year was at the rate of 20 per cent. per annum, and £29,279 was carried forward.

Messrs. Schulze and Mohr, a firm in the East Indian trade, have suspended payment, with liabilities estimated at £300,000, most of which will fall on Continental houses, but most of the creditors are said to be secured. The firm was established in 1863, and has been looked upon as of good standing. It is stated that the immediate cause of failure has been speculations in corn.

At a meeting of the creditors of Messrs. Alexander Collie and Co. the liabilities were stated by Mr. John Young, of the firm of Turquand, Youngs, and Co., at £1,889,785, against estimated available assets amounting to only £250,542, or about 2s. 6d. in the pound. Other assets, representing £551,850, are considered of a very doubtful character. The books have been very regularly kept, but the accounts have not been properly adjusted, and there has apparently been no profit and loss account as regards the London firm for the past ten or twelve years. At Manchester a profit and loss account had been made up regularly every six months, from which it appeared that there had been a profit during the past ten years of something like £312,000, but a large outstanding account in Manchester and London, known as the "cotton suspense account," had not been taken into consideration. When that was done the whole of the profits vanished, and a large deficiency was apparent. Mr. A. Collie had drawn from the business £123,103, a portion of which was expended in the purchase of houses, furniture, pictures, &c., Mr. Collie stating that he had only taken at the rate of £6,000 a year for the past ten years for personal expenses. Mr. W. Collie joined the firm in 1870, and had drawn at the rate of £10,000 per annum, or £4,900 beyond the amount authorised. The bad debts, amounting to £223,198, were expected to realise only £10,000. In 1870, when Mr. Yule retired from the firm, the capital at Manchester was £90,000. Pending the sale by auction of Mr. A. Collie's house and furniture in Kensington-palace-gardens, it was resolved to adjourn the meeting till the 3rd proximo, when it is proposed to place the estate in bankruptcy.

At a meeting of the creditors of Messrs. J. P. Westhead and Co. the liabilities were stated at £317,900, and the assets at £301,727. It was decided to pay the creditors in full in four quarterly instalments, with interest at the rate of 4 per cent.; and that the business of the firm should be transferred to a public company.

With reference to the estate of Mr. C. G. McClelland, trading in London and Glasgow as McClelland Bros. and Co., and at Singapore as William Spottiswoode and Co., which is being liquidated under the inspection of the Bankruptcy Court, it is notified that a meeting of creditors will be held on the 23rd inst.

The following circular has been issued by Messrs. Temple Willcox and Co.

In order to retain the valuable business and connection of Mr. W. A. Malcolm and Mr. E. L. Hyde, members of the late firm of Malcolm, Hudson, and Co., of London, and of Hudson, Malcolm, and Co., of Japan, we have concluded arrangements with those gentlemen that will secure their co-operation with, and future services to our firm of Temple Willcox and Co., of the above address, and of Yokohama, as merchants and commission agents.

The deliveries of tea from the bonded warehouses in London during the week ended the 24th ult. were 3,467,443 lb., of which 2,062,570 lb. was for home consumption, 721,676 lb. was exported, 590,556 lb. was removed coastwise, 88,149 lb. was sent coastwise for export, and 4,492 lb. was for ships' stores. The duty received amounted to £51,564, or about 1 per cent. less than in the preceding week.

Mr. E. W. Wingrove, Deputy-Chairman of the National Bank of India, has joined the Board of the Merchants' Marine Insurance Company.

Bar Silver has been sold at 55¾d. per oz., but the market is now firmer, and higher rates can be obtained. Mexican Dollars have been sold at 54½d. per oz. chiefly for China.

The amount of bullion per P. and O. steamer *Bokhara*, from Southampton on the 29th ult., was—In silver, to Singapore, £40,280; to Hong Kong, £71,979; to Shanghai, £4,210; total, £116,469.

ARTICLES OF IMPORT.

No change of importance has occurred in the Produce Markets during the past week. The Tea Market continues depressed by the heavy supply. Silk is without alteration. Coffee has continued active, and shows a further advance. Rice is again quiet; Pepper firm; Spices steady; Sago and Tin lower.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Our market is on the whole quiet in tone, the arrivals continue on a large scale, and the samples on show from day to day are more than buyers can value properly. Prices for Kaisow kinds have given way about 1d. per lb., whilst sales of black-leaf kinds of fair to good medium quality also show ½d. to 1d. per lb. reduction. Scented Teas have sold lower at public auction, other kinds showing but little change. Exporters have been buyers of fine to finest black-leak kinds on a larger scale than for some time past. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	2,104,006	1,948,480
Coastwise	622,594	521,673
Exports	824,426	555,063
	3,551,026	3,026,216

Congous.—Red-leaf kinds: New siftings have sold at extreme rates. Old common to fair kinds have sold at auction from 9½d. to 10½d. per lb., being easy rates. In new fair to good medium have sold from 1s. 4d. to 1s. 6d., fine 1s. 7d. to 1s. 10d., finest 1s. 11d. to 2s. 3d., showing about 1d. per lb. decline. Pak Lin kinds have been difficult of sale, owing to heavy supplies offering. Fair have been sold from 1s. 6d. to 1s. 8d., good from 1s. 9d. to 1s. 10d., and fine from 1s. 11d. to 2s., being in all cases lower rates. Black-leaf kinds: Old season's common to fair have sold at auction from 10½d. to 1s. per lb., showing no change. Sales of new fair have sold from 1s. 1d. to 1s. 3d., good medium 1s. 4d. to 1s. 6d. per lb., fine 1s. 7d. to 1s. 10d., finest 1s. 11d. to 2s. 8d. per lb., the latter chiefly for Export—prices for all grades but finest being rather easier. New-make kinds: Common have sold from 10d. to 10½d. per lb., fair 11d. to 1s. per lb., good 1s. 1d. to 1s. 4d., the lower grades showing a slight decline. Oolongs: The few sales made have been at about last week's prices. Souchongs: A few fine have been on offer, but buyers do not seem inclined to pay the high prices asked by importers. *Scented Teas.*—Canton Capers have again been sold at public auction at easier rates; old season's at 7½d. to 8½d. per lb., new fair to good at 10d. to 1s. 0½d. per lb., the latter being really good tea. Orange Pekoes show no material change, being in moderate demand. Foochow Orange Pekoes: Fair quality sold at auction at 1s. 5½d. to 1s. 6d. per lb., fine have sold from 1s. 10d. to 2s. per lb. In Foochow Capers but little has been done. *Green Teas.*—There have only been a few invoices offered at public auction this week, and prices show no material alteration.

Messrs. Goddard and Co.'s Circular says:—The Glenfinlas, from Foochow, which arrived on the 21st, the date of our last Circular, has been followed, from the same port, by the State of Virginia and Braemar Castle, and although showing freely, only a small business has been done. Sales have been made up to 2s. 2d. (2s. 3d. has been refused for a parcel), and down to 1s. 4½d. The quality is generally thought to be indifferent. The dealers are looking at the large quantity offering, and buy only very tardily. Monings are going off slowly in buyers' favour. A sale is reported at 2s. 10d. The quantity arrived during the month has been 30,000,000, with 36,000,000 lbs. on the water, besides Indian Tea, a quantity taking some little time to work off. Old black and red-leaf Congous are cheaper at auction; new Scented Capers have been sold at 10½d., Oolongs are very dull of sale. Green Teas show no reaction. Public sales of China sorts have been held daily, presenting a total of 23,728 packages, 23,252 without reserve. Old season's red-leaf Congou sold at 9½d. to 10½d., and black-leaf 10d. to 1s. Several parcels of new season's black leaf obtained prices between 1s. 0½d. and 1s. 6½d. Scented and Green Teas remain at previous quotations. Imports, deliveries, and stocks in London, from Jan. 1 to June 30:—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
44,551,359	60,469,554	80,274,576	88,058,693	53,573,346	50,821,304

COFFEE.—There has been a good demand for Plantation Ceylon at the public sales, and the moderate supplies offered have been cleared off with a sharp competition at rather dearer rates for all good qualities, the general result evidencing a strong market. The current quotations are 100s. to 103s. for small, 104s. to 107s. 6d. for low middling to middling, 109s. 6d. to 115s. for good middling to bold, and 126s. to 126s. 6d. for peas. The transactions in Native Ceylon have been small, and have established no change from last week's prices; 314 bags sold Thursday, good ordinary yellowish and pale at 94s. to 94s. 6d., bold at 101s. 6d. per cwt.

COTTON.—The market continues inanimate, and the business done has been limited; the quotations are:—On the spot—Tinnivelly, 5 5-16d. to 5⅜d.; Western Madras, 4⅝d. to 5¼d.; Scinde, 4¾d. For arrival—Western Madras, 4⅝d., Aug.-Sept., for good fair.

COCOANUT OIL.—New Ceylon rules at £37; old, £36 10s.; fine Cochin nominal, at £42; medium £40 per ton.

CANES.—13,046 bundles Singapore rattans partly sold at £12 12s. 6d. to £14 10s. per ton; the bulk being bought in at £15 10s. to £24.

DRUGS.—At the fortnightly auctions yesterday 11 cases red dragon's-blood partly sold at £10 10s., 60 cases rhubarb partly sold at 2s. to 2s. 2d. for fair pinkey, 50 caddies 22 tins Tonquin musk sold, fair at 45s. 6d. to 48s., middling 43s. to 43s. 6d., inferior 15s. to 24s. 6d.; 30 casks China soy were bought in at 2s. 2d.

HIDES.—East India Hides or Kips: The demand has been again limited, and less than one-half the quantity offered was sold. Good descriptions brought about late rates, but the common sorts were difficult of sale, and in many cases slightly lower prices were accepted. Dry Singapore and Rangoon, &c., ox and cow hides were in very limited request, and nearly all bought in. Buffalo hides were in fair demand without change in value. 145,633 East India kips in the hair offered, 65,721 sold; 1,257 Batavia ox and cow hides offered and sold; 30,350 Rangoon and Singapore, &c., ox and cow hides offered, 2,227 sold; 1,766 Batavia buffalo hides offered, 303 sold; 5,466 Singapore buffalo hides offered, 3,613 sold; 7,828 East India buffalo hides offered, 6,356 sold.

SHELLS.—The periodical sales held on the 27th inst. have pased off very flatly. Tortoiseshell was largely bought in, and what sold went at lower rates. The principal piles of Mother-o'-Pearl shells also failed to elicit bids up to limits, and were chiefly retired, the small irregular lots

Digitized by Google

that sold going at wide and lower prices. East India shell, ordinary to middling, sold at 7s. 6d. to 16s. 6d., fair to good hoof at 32s. to 37s., Manila shell at 14s. 6d. to 20s., and Sydney hoof at 32s. per lb. Mother-o'-Pearl: 68 cases Manila partly sold at £11 to £11 17s. 6d. for rather mixed to good large, and £8 12s. 6d. to £10 2s. 6d. for medium to bold medium. Of 901 cases Japan ear, 85 cases sold at 40s. per cwt. Part of 131 baskets Green Snail at 9¾d. to 10d. each for bold and 4¾d. to 5d. for small. 2,000 Helmet bought in at 9d., and 3,400 pink Conch at 5s. each.

PEPPER.—*Black* is firm in price, but with only moderate transactions. Of 1,142 bags Penang in auction 615 bags sold at 4⅝d. for common dusty, and about 300 bags damaged, at 4½d. to 4⅝d. for first-class. Of 1,444 bags Singapore offered 330 bags sold, good at 5¼d. and grey at 5⅛d. to 5½d. *White* Pepper is also firm. Of 499 bags Singapore, 146 bags sold, at 7¼d. to 7⅝d. for good bright; 76 bags Penang, common at 6⅝d. per lb.

SUGAR.—The market shows a slight improvement, but the demand has run almost exclusively upon West Indian sorts, the only sale of East India being 1,150 bags washed clayed Manila at 17s. to 17s. 6d.; 360 baskets low brown date Penang were bought in at 16s. to 16s. 6d. per cwt.

SPICES.—*Cinnamon:* 66 bales Ceylon were bought in, first at 2s. 10d., seconds at 2s. 8d.; of 207 bags chips, a lot or two sold at 4d. to 5½d. for middling to fair strips. *Cloves:* The market is quiet, with only light supplies on offer; 10 cases good bright Penang in auction brought 1s. 8¾d. to 1s. 9d. per lb. *Mace* is without change in value; 9 cases middling reddish Penang by auction sold at 2s. 2d., and 3 cases bold palish Penang at 3s. per lb. *Nutmeg:* 76 cases in auction met a steady demand, and mostly sold; Penang, brown bold, average 67 nuts to the lb., at 4s. 1d., medium to bold medium 80's to 74's at 3s. 7d. to 3s. 9d., small 105's to 112's at 2s 11d. to 3s. 1d., very small 132's bought in at 2s. 6d., and very small shrivelled lime 160's to 166's at 1s. 3d. to 1s. 4d. per lb.

SAGO is rather easier; of 609 bags fair large, 250 bags sold at 16s. 6d. to 17s. per cwt.

TAPIOCA has met a fair demand at the auctions, and nearly the whole of 2,728 bags Eastern sold at 2d. to 2¼d. for middling. Some bold was bought in at 2¾d.; 60 cases good Flour sold at 3⅜d. per lb.; of 1,358 bags Pearls a fair proportion sold, fine small at 22s., bullets at 21s.; rest bought in, large at 19s. 6d. to 20s. per cwt.

TIN.—On the 28th inst. 22,590 slabs Banca in Holland were sold at an average fl. 48.35, equal to about £83 per ton, laid down here. The market continues quiet. The current quotations being:—Straits on the spot £77, afloat £76 to £77, Banca £83 to £84, Billiton £79 to £80 per ton, showing a further decline from last week's prices.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 30s. To Singapore: 19s. To Batavia and Sourabaya: 23s. To Galle: 21s.

CASUALTIES.

The Antenor (str.), from Canton for London, has been towed into Vigo by the Chambeze (str.) with a broken shaft. A new crank shaft for this steamer left Liverpool on the 27th inst., per Hector (str.).

The Robert Boak, from Falmouth for Hong Kong, was spoken, July 7, in lat. 4.17 N., lon. 24.15 W., with mizzenmast sprung.

MISCELLANEOUS.

GIBRALTAR, JULY 19.—Passed, Voorwaarts (str.), from Nieuwe Diep, for Batavia; Diomed (str.); from Liverpool, for Shanghai; 24, Gordon Castle (str.), from Hankow, for London.

MALTA, JULY 16.—Passed, Antenor (str.), from Shanghai; 19, Agamemnon (str.), from Shanghai, both for London; 20, Sumatra (str.), from Batavia, for Amsterdam; 28, Teviot (str.), from London, for Shanghai.

PORT SAID.—Arrived, July 22, Torrington, from Rotterdam, for Batavia; Diomed, from Liverpool, for China; 24, Paraguay, from London, for China and Japan; 26, Voorwaarts, from Nieuwe Diep, for Batavia; 25, City of Baltimore; 27, Statesman, both from Foochow, and left for London.

SUEZ, JULY 24.—Arrived, Viking, from Foochow; Venice, from Shanghai, both for London.

ADEN.—Arrived, July 24, Hampton (str.), from Batavia, and left for Amsterdam.

SOURABAYA.—The James Condie will be hauled further on the bank in order that the divers may be able to examine the leak more accurately, and see if it can be stopped. The surveyors have advised that no more cargo be discharged, but that it be sold as it lies, as the tins in which the petroleum is stored have corroded and become full of holes, most of them being empty or leaking. The rigging has been stolen and the cabin damaged by natives. Petronella, from Rotterdam for Samarang, which stranded in Bali Straits, has been condemned at Banjoewangie.

GLENLYON (STR.).—A new crank shaft for this vessel, now at Hong Kong, has been sent out by the Glenartney (str.), which left London on the 23rd inst.

TRIAL TRIP.—On the 31st ult. the steamer Rajah Brooke, built by Messrs. H. Murray and Co., of Port Glasgow, took her trial trip on the Clyde and attained a speed of 12½ knots. She is intended for local service between Sarawak and the Straits. Her engines are by Messrs. Kincaid, Donald, and Co., of Greenock.

GREENOCK, JULY 22.—The floating dock Sourabaya, destined for Java,

Digitized by Google

proceeded to the Gareloch to adjust compasses previous to starting for Java. This vessel has been singularly unfortunate since she was launched at Paisley a considerable time back. After starting the first time she put back with defective steering gear, and when lying at the Tail of the Bank on the eve of starting the second time she encountered the terrible gale of the 21st October, 1874, and was driven ashore at Ardmore, where she lay for some time. After being taken to the Garvel Park Graving Dock and thoroughly overhauled and remasted she is again about to essay the voyage.

SUNDRIES, PER "HOPE," FROM NEW YORK, FOR YOKOHAMA, JUNE 28.

21000 cs. oil	215,000 gls.	25 cs. wine	
40 brls. glassware		5 pkgs. personal effects	
7 cs. hardware		99 cs. slates	1,188 doz.

12000 cs. oil	120,000 gls.	100 do. milk	400 doz.
400 tons coal		1 do. show cards	
18 cs. mnfd. tobacco	3,436½ lbs.	10 bls. cotton duck	8,000 yds.
2 pkgs books		100 kegs nails	10,000 lbs.
2 do. stoves and fixtures		34 pcs. plank	3,053 ft.
1 brl. vinegar	40 gls.	3 pkgs. pumps	9 doz.
1 cs. views		1 do. hose	60 ft.
3 do. hardware		250 cs. ammunition	25,750 lbs.
10 bdls. scoops	10 doz.		

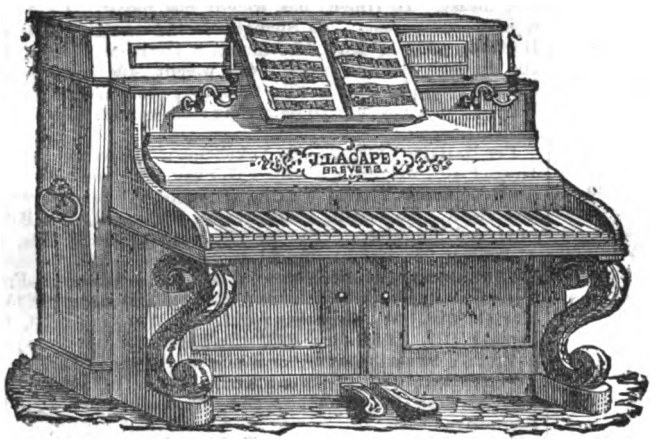
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. Orders should be accompanied either by a remittance, or a reference for payment in London. All communications to be addressed, and remittances made payable, to

Part First now ready.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—By GEORGE ASHDOWN AUDSLEY, Archit and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says:—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

For particulars apply to the Secretary, at the Publishing Office, 13, Hackin's Hey, Liverpool; or to

H. SOTHERAN and Co., London.

GUERLAIN,

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all description of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 3rd inst., and published in our last issue.

CHINA.

PEKING AND TIENTSIN.

It is currently reported at Shanghai that a memorial from Tsen, the Governor of Yünnan, with reference to the murder of Mr. Margary, has at length been received by the Peking Government. As might have been expected, the provincial authorities profess entire ignorance of the matter, the first intimation of which they represent as having reached them from Peking. The step they are said to have taken is to appoint General Yang, commanding at Tali Fu, and a Taoutai named Chen, to institute an inquiry into the facts of the case. We presume, however, that the Commission of Inquiry thus constituted will be regarded in no other light than that of a simple preliminary. The natural consequence of its report should be the removal of the officials whom it must inculpate, to stand their trial at Peking. Meanwhile, it appears from recent telegrams that the active agent in the crime, Li See, otherwise known as Li Chen-kwoh, has paid a visit to the capital of Burmah, as bearer of a despatch from the Chinese Government to the King. The purport of such a communication, at such a juncture, and by such a hand, it is not difficult to surmise.

The Mandarins are apparently beginning to find out that Lekin taxes are oppressive. The *Peking Gazette* recently contained a document recognising that it was desirable to reduce them in Szechuen. The *Gazette* of the 23rd May contains a report in the same sense from the Governor of Kiangsu. The theory, however, is being very hardly carried into practice. Taxes are only taken off one or two minor articles of food in this province. Those on commerce generally remain untouched.

The Peking correspondent of the *North China Herald* writes on the 4th June :—No rain here yet. Thermometer for last five days ranging from 68 to 101 maximum. Prince Kung and his brothers are praying for rain, but none comes. From Paouting Foo, where an American Missionary is located, we hear that a foolish report has sprung up in the town, that the Missionary has a dwarf from Kansuh, which he keeps in a box. Quite a number of people, apparently of good standing and intelligence, have called to ask about the truth of the report, which they are evidently not inclined to disbelieve. Meantime no harm has come of the rumour.

Digitized by Google

On the 4th June the Chinese gunboat *Chin Hae* returned to Tientsin from Manchuria, and brought down six rebels, or insurgents, or robbers. On the 5th June the late acting Customs Taoutai, Sun Szeta, made his farewell calls on the Consuls of the port. On the 6th H.E. Li Hung-chang came to the foreign anchorage off the Settlement in his sedan, to the residence of the China Merchants' Steam Navigation Company, and inspected the company's new steamer *How Sang*. He was, as usual, accompanied by the Territorial and Customs functionaries, and the gunboat *Chin Hae* fired the usual salutes. On the same day the new Customs Taoutai, Lee Chaou-tang, took the seals of office, and made his official calls on the foreign Consuls. It is confidently expected that he will prove to be an improvement on his predecessor, as it is extremely improbable that he will turn out exactly the same, and he cannot possibly be worse.

Tientsin has been visited by thunderstorms with rain, and the weather was in consequence cool and pleasant for the season of the year. The peasantry around, however, were calling out for more rain.

CHINKIANG.

A serious riot has occurred at this port. Some braves insulted the American Consul and his wife, and two of them were arrested by the British Consular constable. Their comrades and an immense crowd of Chinese attacked the Consulate, and endeavoured to force the gates. Eventually the riot was quelled by the arrival of the military mandarins. A correspondent of the *North China Herald* supplies the subjoined account of the occurrence :—

Our usually quiet and peaceful little port was on the 14th June unpleasantly aroused by a disturbance that was likely to have terminated most disastrously. For some time past foreigners have been put to occasional annoyance through the rudeness of native soldiery, some thousands of whom are stationed in the neighbourhood ; but their general conduct being orderly, and every allowance made for the difficulty of keeping so large a force quiet, no particular notice was taken. To proceed with Monday's troubles : Mr. and Mrs. Colby, our American Consul and his wife, were returning from an afternoon walk, and had just reached the settlement when they were considerably inconvenienced by the rude behaviour of some soldiers, who, not content with satisfying their curiosity by looking at the foreign lady, roughly hustled her, at the same time using most disgusting language. A native Municipal policeman expostulated with the rowdies, and told them that they were insulting the American Consul and would get into trouble if they did not desist. Upon this they turned upon the constable and would have inflicted bodily harm had not Mr. Constable Nunn come to the rescue. Two of the soldiers were taken prisoners to the British Consulate jail, when their comrades immediately rushed to their place of confinement and endeavoured by force to get their release ; the gates, however, were quickly closed, and before they could attain their object the greater part of the foreign community had arrived at the Consulate. It was astonishing to see the rapidity with which a crowd of some thousands was collected ; the whole face of the hill behind the British Consulate was in a few minutes covered with an excited mob, and the shouts of "Ta, ta, Yang Kwei-tze" were anything but pleasant to the ears of the few for whom they were meant. Some soldiers soon left the gates, saying that it was their intention to proceed to the barracks and return with a body of men sufficient to force an entrance and kill all the foreigners. In the meantime, Mr. Baber, interpreter in charge, sent a courier into the city, and shortly some mandarins arrived and gave assurance that they had taken means to keep the mob down. At about 8.30 P.M. we were enabled to leave the Consulate, a native guard having been placed there for the night. I feel that I have already taken up an undue space in your columns ; and some of your readers may possibly think this is a much ado about nothing ; but as an old resident in China, somewhat familiar with similar outbreaks and not likely to be unnecessarily alarmed about trifles, I may be believed when I state that at one time the slightest thing would have caused a general outbreak, and the result must have been very disastrous. I cannot close without mentioning the admirable coolness and good judgment displayed by Mr. Baber.

Mr. Seward and Mr. Medhurst have left Shanghai for Chinkiang to insist on the punishment of the rioters. H.M.S. *Thalia* and the U.S. gunboat *Palos* have been despatched to enforce any demands which may have to be made upon the Chinese authorities.

SHANGHAI.

The present mail brings advices from this port to the 20th June ; the French mail from London May 7 was received on the 18th June. The following summary of news is from the *North China Herald* :—

At the Supreme Court, on the 16th June, the case of the *Fusing v. Ocean* was taken before the Registrar and Merchants, on reference, to assess the value of the first-named steamer, the cargo she had on board, and also the effects of the captain, officers, crew, and passengers, at the time of the collision. The Court was composed of R. A. Mowat, Esq., Registrar, and Messrs. J. Thorne and G. W. Coutts, Merchant Assessors. Mr. Drummond appeared for the *Fusing*, and Mr. Wainewright for the *Ocean*. The Court was numerously attended by Chinese interested in the investigation. The amount claimed for the ship alone was Tls. 101,000, and for the cargo Tls. 51,000 ; that for the private effects of the persons on board is not yet set down. The entire day was occupied in the examination of witnesses as to the value of the ship and cargo, which portion of the case was not concluded when the Court rose.

Two Ningpo men charged with attempting to utter a forged cheque for Tls. 300 on the Hong Kong and Shanghai Bank were taken before Chen and Dr. Yates, at the Mixed Court, on the 15th June. The prisoners had been remanded for a fortnight to permit inquiries to be made, the result being the discovery that the cheque-form was found to be one that had by accident become detached from the book in possession of a foreigner. It was found by his dog-coolie, and by him taken to the other man, who filled in the body in something like pidgin English, so that the attempted fraud was at once seen. Chen seemed at first disposed to send the prisoners before the city authorities, but he yielded to the representation that the case called for immediate punishment, and passed severe sentences on both prisoners—the dog-coolie to receive forty blows with the heavy bamboo, with three months' cangue ; and his accomplice two hundred blows with the light bamboo, with two months' cangue.

H. M. despatch vessel *Vigilant* returned to Shanghai on the 14th June, having on board H. E. T. F. Wade, C.B., Colonel Browne, Mr. Grosvenor, and Mr. W. F. Mayers. We learn that Admiral Ryder contemplates leaving this port for Yokohama in the *Vigilant*, about the 18th June, and that his Excellency will be accompanied by Colonel Horace Browne and Mr. Mayers, of Her Majesty's Legation. The immediate object of Admiral Ryder's visit to Japan is understood to be the completion of the arrangements entailed by the removal of the Marine Battalion from Yokohama ; but it seems unlikely that the head of the late exploring party in Yunnan and the Chinese Secretary of Her Majesty's Legation at Peking can have anything to do with these arrangements. If Colonel Browne and Mr. Mayers were going westwards, instead of eastwards their movements would appear less strange, under all the circumstances. The British Minister has once more taken up his abode in the Settlement, and with the Yunnan question "in the air," as it seems to be left, we can see no earthly reason why his Excellency should not, as our evening contemporary facetiously suggests, be devoting his energies to a new edition of the *Tzu Erh Chi*, instead of the unprofitable task of Peking diplomacy.

H.M. corvette *Modeste* left on the 14th June for Hong Kong. Her place will be filled by the *Thalia*, which came up the river on the 12th. The *Thalia*, in steaming up to her anchorage off the Settlement, was fouled off the Pacific Mail Wharf by a large junk, carrying away the foremost port quarter boat davit and damaging the boat. The junk's stern was also much damaged, and her mizen mast knocked over the side. The cause of the collision was that the junk captain, fearing he would not clear the *Thalia*, let go an anchor, which turned the junk round to the strong ebb that was running.

A meeting of shareholders in the Hongkew Wharf Company was held on the 15th June, to confirm the proposal of amalgamating with Hunt's and Heard's wharves, which had been agreed to at the meeting in April last. The necessary alterations in the deed of settlement were agreed to, and a revised draft of terms of agreement was passed.

The Municipal Council seems to have been chiefly occupied with the Yang-king-pang bridge question, on which a rather warm correspondence has been exchanged between the two Councils. The iron bridge over the Hongkew Creek has been lowered, and was opened on the 12th June. The alteration is a great improvement.

The French Council meeting of the 2nd June seems to have been occupied chiefly with public works. Negotiations are to be entered into to get the cession of a strip of land off the French Consular compound, required for widening the Rue du Consulat.—The French Foreign-office decline to lease the Bund in front of the Consulate for the location of a public pontoon.—The meeting of the 10th June settled the Yang-king-pang bridge question.—The tax on jinrickshas is to be raised from Tls. 0.20 to Tls. 0.25 per month.

Mr. Medhurst's lecture before the Temperance Society attracted nearly all the Chinese scholars of the Settlement, the subject being "Chinese Poetry." The lecturer succeeded in rendering his subject interesting alike to sinologues and to his auditors generally. Admiral Ryder occupied the chair. Mr. Wade made the motion of thanks, and after expressing his interest in the Society, made some off hand, but lucid, and even eloquent, remarks on the poetry of the Middle Kingdom.

Senor J. F. Elmore, LL.D., Minister for Peru, is passenger for this port per *Oregonian*, due in a few days. Dr. Elmore is *en route* for Peking to ratify the Treaty with China.

The adjourned hearing of the case against Captain Brown, for compensation to the families of the Chinese drowned in the *Fusing*, was again postponed, in consequence of Mr. Medhurst's departure for Chinkiang.

Digitized by Google

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald*:—

We understand that Mr. Betts is about to begin his instructions to a class of Chinese students in the construction and use of marine torpedoes, which will necessarily include some instruction in telegraphy and electricity. Twenty-five young men are selected from a large number of applicants, and will soon commence their studies. The hong formerly occupied by a Parsee firm, above the bridge, adjoining the premises late occupied by Messrs. Ivanoff and Co., has been rented by the Chinese authorities for the uses of the school, and the residence of Mr. Betts and family.

The U. S. Consul, Mr. M. M. De Lano, has, after much patient effort, succeeded in extinguishing the nuisance of the lime kiln situated on the edge of the paddy fields below the United States Consulate. A liberal subscription was made for the purpose of buying out the owner; and the matter has been amicably arranged. This is only one of the many matters in which the U.S. Consul has rendered important service to the whole community.

M. Christiansen—the steward of the Seamen's Hospital—died on the 11th June of paralysis. The deceased was highly commended by Dr. Somerville in his recent report for his attention and trustworthiness.

Mr. Charles Carroll, H.B.M.'s Vice-Consul at Pagoda Anchorage, has been obliged to vacate his post, for a time, owing to ill health. Mr. H. F. Holt will, we understand, fill the acting appointment.

The Footai, or Provincial Governor, left for Tai Wan-foo on the 14th June. The long bridge was lined by troops, including the foreign drilled battalion, by whom his Excellency was received with the usual honours.

Captain Tracey, R.N., arrived per last mail from Europe. He will, we understand, shortly resume his duties as Naval Instructor to the cadets at the Pagoda Anchorage Arsenal.

H.B.M.'s ship *Vigilant*, having on board their Excellencies Mr. Wade and Admiral Ryder, left for Shanghai on the 12th June.

Mr. Drew (the new Commissioner of Customs) arrived on the 13th June.

HONG KONG.

Our advices by the present mail extend to the 26th June; the P. and O. mail from London May 14 was received on the 19th of June. The following items of intelligence are from the *Hong Kong Daily Press*:—

At a meeting of the Shareholders of the China Traders' Insurance Company (Limited), held at Hong Kong, 21st June, it was unanimously agreed that a call of $500 per share be made, in order to increase the paid-up capital to $300,000. This, it is believed, will enable the directors to carry on the business with efficiency. The London agency is at Messrs. Crawshay and Co.'s, Fenchurch-street.

The decision of the Court of Inquiry into the circumstances attending the seizure of the *Carisbrooke* by the Chinese Customs cruiser *Peng-chao-hai* is to the effect that the whole affair is to be referred to the British Minister and the Chinese authorities at Peking. We are enabled to give an abstract of the statement of the case by Mr. Hayllar, Q.C., for the information of the Hong Kong Government. As will be seen, it contains the text of the finding of the Court at Canton.

In the case of the steamer *Carisbrooke*, seized by the authorities of the Imperial Maritime Customs at Canton, for breach of the 47th Article of the Treaty of Tientsin, her Majesty's Consul being unable to agree with his Excellency the Superintendent of Customs that the ship and cargo ought to be confiscated, the matter will be referred to the high authorities of both nations at Peking for decision, and pending this the *Carisbrooke* will be released on bond. In order to make the position of affairs clear, it must be explained that the investigation was held under the "Rules for joint investigation in cases of confiscation and fine by the Custom-house authorities," which were drawn up by Sir Rutherford Alcock (by way of amendment of those originally passed by Mr. Wade), and accepted by the Tsung-li-yamen, and by all the foreign embassies at Peking. By the eighth of these rules, it is provided that "if the Consul and the Custom-house authorities cannot agree as to whether confiscation of a ship or a cargo, or both of them together, being the property of a foreign merchant, shall take place, the case must be referred to Peking for the decision of the Foreign-office and the Minister of his nation." In the present case, it is generally pretty well understood that both the Consul and the Hoppo were willing to commute the confiscation of the ship and cargo by the imposition of a fine, or other payment, had such course been open to the Court. It is stated on what is believed to be good authority that the Court unanimously held that the ship was seized within the three-mile limit of the coast of Hainan, performing acts unauthorised by the Treaty, and so had violated the Treaty. Sir Brooke Robertson contended, however, for several mitigating circumstances, and held that the penalty of confiscation was altogether disproportionate to the offence. The Hoppo, on the other hand, held that if there was any violation of the Treaty, the only penalty the Court could inflict was that laid down by Article 47th of the Treaty, namely, confiscation of both ship and cargo; but suggested to Sir Brooke Robertson that in order to enable the Court to inflict some lesser penalty, that he (Sir Brooke) should withdraw his judgment so that the matter might be settled by way of compromise. Sir Brooke, however, pointed out that if he withdrew his judgment and agreed with the Hoppo that confiscation was the proper penalty, he was as Consul out of Court, and suggested that, on the other hand, the Hoppo should modify his finding. The Hoppo felt that he could not accede to this course without compromising his position.

It cannot be doubted that both sides were right in their reading of the rules, and it is therefore due to the peculiar framing of this document only that a Court, not only willing, but anxious, in the interests of all parties, to arrive at a speedy and equitable decision, is driven either to a finding which is on the face of it monstrously disproportionate to the offence, or practically to no finding at all. In another very important particular, too, these rules seem to depart from the dictates of common sense and common fairness. By Rule 5 they provide that "the case having been referred to superior authority the merchant interested shall be at liberty to give a bond binding himself to pay the *full value* of the ship or goods attached should the ultimate decision be against him." In the present instance it is confidently believed that the Customs authorities do not expect, nor desire, that more than a very moderate fine should be imposed on the vessel. Nevertheless, they are under this rule obliged to put the owners either to the very serious inconvenience of finding valid security to the large amount of $340,000, the estimated value of the ship and cargo, or to submit to the cargo being placed in bond. Both the commissioner and his deputy, Mr. McLeavy Brown, have been at much pains to modify the strict construction of this rule, so far as it lies in their power to do so; and those concerned for the ship are under very considerable obligations to their courtesy in this and other particulars. The defence is also greatly indebted to Sir Brooke Robertson for assistance and advice. The task he has had to perform is in many ways difficult and invidious, and in its discharge there is every reason to believe he displayed firmness and acumen. It is most unfortunate that the case could not have been locally settled on a really equitable basis, but it is to be hoped that the lame result arrived at will at least have the effect of leading to a revision of these rules, and even of the Treaty itself, on the points (among others) to which prominent attention has been thereby called.

We believe that the bond tendered by Messrs. Russell and Co. for $140,000, as security for the *Carisbrooke*, has been accepted, and the steamer is expected to be in Hong Kong harbour shortly. As already stated, the cargo is to be placed in godowns here under proper supervision. We *(Daily Press)* take the opportunity of making some remarks on the fact that the investigation was held with closed doors. This circumstance has very justly excited strong indignation throughout the colony, and is properly regarded as unusual and unjustifiable. There was nothing to be gained by keeping the proceedings of the Court private; it was merely an exercise of the peremptory and arbitrary will of the Hoppo.

The British steamship *Japan*, which arrived here on the 20th June from the colonies, with a cargo of coals, was towed down to Wanchi to discharge. When abreast of the Pier and Godown Company's wharf she was being taken gently in towards Burrows' wharf to anchor, so that cargo boats might go off to discharge. When about a hundred yards west of the two buoys marking a rock, and about to let go anchor in what was supposed to be good anchorage and a considerable distance from the rocks marked, she suddenly struck on a rock not marked down in charts or by buoys. The steam tug *Fame* set to work to tow her off, but as the tide fell she stuck firmer. The steam tugs *Pilot Fish* and *Fame* tried to get her off, but the tide had left her too far, and hopes were entertained of getting her off as the tide rose. About six o'clock, however, she slipped off that rock, and with a tremendous crash fell on to another, which went through her bottom. Subsequently the *Japan* was successfully floated off, the hole under the bilge having been filled with old canvas and bags, when she was pumped out by steam. She is now lying at the Pier and Godown Company's buoy, discharging the remainder of her cargo, and will be docked as soon as possible.

We regret to announce the sudden death of Mr. W. D. Harrison, of the firm of Messrs. Butterfield and Swire, which took place on the 23rd June. It appears that deceased had been suffering from fever and ague for some time, but nothing serious was anticipated until he was found in bed with life extinct. A *post-mortem* examination was held, when it was found that death had resulted from pulmonary apoplexy. The flags of most of the vessels in harbour were lowered to half-mast as a token of respect for deceased. He was only 32 years of age.

H.M.S *Egeria* reports that she was cruizing off the East Coast of Hainan, and experienced fine weather. Communicated with the village of Chun-lun, and heard that the village had, five weeks ago, been attacked by two junks and 80 men, 18 of whom landed, stormed the fort, and looted the village. The Mandarin was badly wounded, and died three days afterwards. The Chinese gunboat *Tsing Po* was in Chun-lun creek.

The British steamship *Achilles*, on leaving her moorings for sea, had a narrow escape of sinking the Police chop. To get clear of other vessels she ran into the port quarter of the chop, notwithstanding that she backed full speed astern. The whole of the davits on that quarter and part of the hood covering were carried away, and a hole made under the counter, evidently by an anchor over the steamer's bow.

A Marine Court of Inquiry into the loss of the *Poyang* has been opened at the Harbour-master's office. The evidence, at the

Digitized by Google

Court's request, will not be published until the conclusion of the investigation.

DESTRUCTIVE FIRE AT HONG KONG.

On the night of the 22nd June a large fire occurred at Peddar's Wharf, Hong Kong. The conflagration lasted nearly twelve hours, and resulted in great destruction of property. The *Daily Press* gives the subjoined account of the disaster :—

The fire broke out behind the premises of Messrs. Melchers and Co., Peddar's Wharf. It originated in the servants' quarters, and soon spread to the westward, over the stables. Once having secured a firm hold of the upper story, it spread with great rapidity eastward, and in a short time the rear of Messrs. Russell's premises was also enveloped in flames. The alarm bells were rung vigorously, and these, with the dense volumes of smoke and occasional flashes of flame, soon attracted assistance, together with a great crowd of spectators. The Hong Kong Fire Insurance Company's engine and ladders were first on the spot, and these were reinforced soon afterwards by the Government steam engines. These again were quickly followed by all the other engines in the colony. The Government Fire Brigade and the various volunteer brigades worked in concert. All the ships' bells were rung, and in a very short time the available marines and seamen were on the scene. The military were also called out, some of whom were told off to assist the fire brigades and others to keep back the crowd. By this time, and before any water could be got to play on the buildings, the fire had made considerable progress. Messrs. Melchers and Co.'s stables and outhouses, situated between the Hong Kong Hotel and the firm's premises, it was soon obvious could not be saved, and great fears were entertained that both the hotel and Messrs. Melcher's premises would catch fire. Consequently most strenuous efforts were made to save the adjoining buildings, which are some of the most valuable property in the colony. Inside the hotel a scene of the wildest confusion at this time prevailed. Most of the ladies and gentlemen resident there had, at almost the first alarm, set to work to pack up their effects, so as to be ready to leave at any moment. Others, assisted by coolies, marines, and soldiers, at once removed everything portable from their rooms to seek other lodgings. Very soon several lengths of hose were laid up the hotel stairs, and played upon the fire from different windows. Flames burst out from the stable roof, but they were principally confined to the corner next to Messrs. Melcher's premises, and although it was quickly apparent that no danger to the hotel was to be apprehended from that quarter, the former premises were for a long period in peril, as no efficient supply of water could for some time be directed upon the corner of the stable adjoining. Ultimately the roof of the stable fell in, and several jets of water were brought to bear upon it, and happily Messrs. Melchers' premises seemed to be at length secured. The houses from the stable extending backward nearly the whole length of the hotel were at about nine o'clock nearly burnt out, when the flames were seen to shoot forth from that part close to the east corner of the hotel. The hotel was at this time in the most imminent danger, but a better supply of water having been obtained and showered upon the fire from all sides more hope was felt that the conflagration would be nearly confined to the premises in which it originated. For some time, however, it continued to spread eastward along the outhouses attached to Messrs. Russell and Co.'s. Several additional hose were conveyed into their premises, and others were taken round to the back of Messrs. Landstein and Co.'s premises, and every effort used to stay its progress. In spite of this, however, it still continued to spread eastward, and reached as far as the rear of Messrs. Smith, Archer and Co.'s old premises, now occupied by Mr. MacG. Heaton. During the course of the conflagration the smoke, which arose in thick clouds, frequently prevented the firemen from doing effective service, and in a number of instances, notably for some time in that of the stables facing the street, the jets were entirely misdirected and a great deal of water lost. As portions of the different roofs fell in, one after another, the flames shot up clear and bright, and shed a brilliant glare upon the scene. They seized upon the windows with especial fury, licking the framework, which was consumed with incredible celerity, and sending constant showers of glass rattling upon the *debris* below. The heat was most intense.

Shortly after midnight, a number of the police and the soldiers and the marines, were ordered home, and the native brigades, thinking there was no more use for their services, had left with their engines, when the fire broke out afresh, and it was soon discovered that the main block of premises occupied by Messrs. Russell and Co., facing the Praya, had caught fire at the back. Owing to the position of the houses, it was with considerable difficulty that hose could be got to play upon the roof, but this was soon accomplished as far as possible, several lengths having been taken in through Messrs. Melchers' premises, others in Messrs. Russell's, while one or two were got into the block occupied by Mr. A. MacG. Heaton. The three steam engines continued hard at work, but in spite of every effort, the fire was soon discovered to have got a strong hold of Messrs. Russell's premises and run along the roof, although no flames broke out for some time. A number of the military were again got out, and several additional engines set to play. By two o'clock the fire had completely enveloped the upper story, and at intervals different parts of the roof fell down with a tremendous crash, while the flames shot upwards in awful grandeur. Shortly after two o'clock it was impossible to continue to play any hose on the main building, and the additional lengths were taken into Melchers and Co.'s and MacG. Heaton's, and the water played upon the mass from either side. By three o'clock the flames had burst right through into the front verandah at the Praya, and were devouring the wood-work with extraordinary rapidity. They seemed to keep more towards the east, and fears were for a long time entertained for the block on that side. These were augmented considerably by the fact that already one of the Government steam-engines had broken down, but some additional hose were got up to the front by ladders. The fire, however, continued to rage with terrible fury, presenting a scene from the harbour that has been unequalled in Hong Kong for many a day, and it was not till dawn had broken that the conflagration seemed to have been mastered. A little before five it had been considerably checked, and the adjoining property secure. The other Government engines, however, had broken down, and the fact that both of them were now disabled might have been very serious had the fire not been by this time reduced. A number of the engines continued to play upon the smoking ruins for several hours afterwards, for fear of another outbreak, as owing to the situation of the buildings the fire had already proved most treacherous. After all the engines had gone the fire again showed signs of breaking out, but it was speedily checked.

What the estimate of the damage done to Messrs. Russell and Co.'s premises is it is at present difficult to say, but it is certainly very extensive. The books and papers of the house were luckily removed early in the evening, and have been saved. The damage done to Messrs. Melchers and Co.'s premises is comparatively slight, and has been caused principally by water. It was a fortunate circumstance that the disaster occurred in pretty close proximity to the harbour, as of course the supply of water was unlimited. Great credit is due to Captain Superintendent Deane and Mr. May, as also to Mr. Creagh for the manner in which they superintended the efforts put forth by the different firemen. The members of the Volunteer Fire Brigade were as usual to the fore, and rendered most valuable aid. Thanks are also due to the naval and military authorities for the promptitude with which they despatched assistance to the spot. The various Chinese brigades also worked well.

The origin of the fire is at present unknown, but it is believed to have commenced in one of the cookhouses behind Messrs. Melchers', and the fact of its spreading so rapidly is by many attributed to the fact that there was some hay stored in the adjacent stables. The damage, we believe, is covered by insurance.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 3rd July; the P. and O. mail from London May 28 was received on the 26th June, and the following French mail of June 4 arrived out on the 3rd July. The following summary of news is from the *Straits Times* :—

On the 29th June the Governor returned to Singapore, after an absence of ten days. Finding that there were many questions relating to the affairs of Penang, Malacca, and the Native States, which required investigation on the spot, the Governor considered it desirable to visit Penang and Malacca and acquire as much information as possible. He accordingly embarked on board the colonial steamer *Pluto* on the 19th June. On the 20th Mr. Swettenham, the Assistant Resident of Salangore, joined him at the mouth of the Jugra River. *En route* for Penang a visit was paid to Klang, where Tunku Oodin, the Viceroy of Salangore, received the Governor and showed him over the fort in which he dwells, and over the offices which Mr. Davidson has established. Tunku Oodin made a very favourable impression on the Governor, who was also much pleased with the order in which the books and accounts were kept, and with the regularity which prevailed in the place.

The *Pluto* arrived at Penang on the 22nd June, when the Governor was received by a salute and guard of honour, and drove immediately to the residence of the Lieut.-Governor, with whom he stayed whilst in Penang. That and the following day were occupied by interviews with the heads of departments, the Resident and Assistant Resident of Perak, and merchants and planters of Penang and Province Wellesley. On the 24th, the Governor held a levée, which was very largely attended, and, on the 25th, after transacting the remainder of the business which had called him to Penang, he re-embarked on board the *Pluto*. Anxious to see for himself the river Bernam, of which little is known, the *Pluto* proceeded about forty miles up the river, which fully justifies the remarks which have been made thereon. The opportunity was also taken of surveying this portion of its course. He subsequently had an interview with Rajah Hitam, of Bernam, who had some requests to make to him. On the 27th the Governor paid a visit to the Sultan of Salangore, who received him with great cordiality. The *Pluto* then started for Malacca. After sundry business had been transacted the Governor made an inspection of the jails, the offices, the court, the barracks, and the school. A levée was held, after which he re-embarked on board the *Pluto* for Singapore.

A few days since a quarrel occurred between Duncan Ross, the cook, and a young man named Thomas Wilkinson, on board the steamer *Sarpedon*, during which Ross struck Wilkinson, who fell overboard. The tide was running strong ebb at the time, and the unfortunate man sank, and was seen no more. Ross has been committed for trial at the Assizes for culpable homicide not amounting to murder. The body of the unfortunate man was recovered in the vicinity of the Borneo Company's wharf, and a coroner's inquest held thereon. It transpired that the deceased's skull had been fractured, apparently through striking against the edge of the wharf, or one of the fenders, when he fell. The coroner's jury also returned a verdict of culpable homicide not amounting to murder, there being no evidence to show that the prisoner Ross intended to inflict more than a blow.

Digitized by Google

Lim Chee, a tailor carrying on business in High-street, has been murdered in the house of an acquaintance in Hong Kong-street, where he had gone to have a smoke of opium. It appears that some years ago a Chinaman had brought up two women in a steamer from Penang, and on reaching Singapore one of the women refused to accompany him ashore, claiming the captain's protection. Lim Chee having gone on board to obtain customers, was smitten with the woman, who went to live with him in preference to leading the life for which she was brought here. The disappointed broker cherished his vengeance for years, and meeting Lim Chee at the house, rushed upon him and stabbed him in the stomach with a dagger.

We learn that our Penang friends, smarting under a sense of their wrongs from the Government's favouritism to Singapore and neglect of the interests of Penang, have resolved to form a Defence, or rather Aggressive Association, to defend their privileges, obtain redress for their wrongs, and wring from Government all the rights due to them as a community, with "interests of a far more expanding and increasing character than those of Singapore." We hail this movement heartily and wish the Association every success.

The Maharajah of Johore's screw gun-boat *Pantie*, built by Messrs. Buyers and Robb, was taken out on 25th June, for a preliminary trial of her machinery. The *Pantie* is fitted with a pair of compound surface condensing engines of 90-horse power nominal, combining all the latest improvements for economy of fuel, and made by the firm of Messrs. Rait and Lindsay, of the Cranstonhill Foundry, Glasgow. During the trial the engines worked most perfectly, and gave great satisfaction to the authorities on board. The *Pantie* will be taken out again in the course of a few days for a full speed trial to test her consumption of fuel.

The new steamer *Cybele*, Captain Blair, *en route* from London to this port and China, with a valuable general cargo, ran aground on the night of the 22nd June, on the reef close to the Raffles Lighthouse. On the 29th the steamer floated off easily at high water, and steamed in to Tanjong Pagar Wharf apparently uninjured, having made no water whatever. She will, however, go into dock for examination, and will doubtless have to undergo some repair before proceeding on her voyage.

At an extraordinary general meeting of the shareholders in the Chindrass Mining Company, Mr. C. B. Buckley, the managing director, resigned the management, and a committee was appointed to inquire into and report upon the company's affairs, and recommend the course to be pursued under the circumstances. The meeting was then adjourned until the 6th July.

The Singapore Rifle Association held its ninth monthly competition on the 26th and 30th June, there being no less than ninety-three competitors. The conditions were, 5 shots at each range of 200 and 400 yards, standing position at the short range, any position at the long range. The military fired with the Henry-Martini, and members of the S.V.C. and civilians used the Snider Enfield. The highest score was made with the Snider, Sub-Lieutenant Drennan, S.V.C., having made 5 bulls' eyes at 200 yards, and run up a score of 37 out of a possible 40 points, this being the highest score, we believe, ever yet obtained at any match here. The total prizes distributed amounted to $30.

The United States corvette *Hartford*, from Hong Kong, anchored in the Roads on the 27th June, and saluted the British flag, the salute being returned from Fort Canning.

We hear that the appointment of Superintendent of Prisons, vacant by the death of Mr. Dent, has been conferred upon Captain Ash, formerly of the King's Dragoon Guards.

The average Note circulation of the local Banks during June was :—

Oriental Bank	$209,400
Chartered Bank	607,341
Mercantile Bank	501,230

Commercial Report.

(For dates see first page.)

IMPORTS.

CHINKIANG.—Messrs. Spencer and Wolff write :— There is a fairly active demand for Grey Cottons, but the continued wet weather still checks clearances and prevents dealers from operating so freely as they otherwise would. Woollen and Fancy Goods are almost entirely neglected.

SHANGHAI.—The *North China Herald* Report says :—Dealers have evinced some inclination to do business, but most of them have been kept at home by almost incessant heavy rains ; consequently transactions have been few, and of little moment beyond that they may be said to establish quotations. The expected orders have not yet come from the interior, but prospects at Hankow seem rather brighter, and the letters from Chinkiang, received by each successive steamer during the week, have reported a fair business in Plain Cottons, and are altogether more cheerful in tone than they have been for weeks past. On the other hand, the latest Tientsin advices are most discouraging ; scarcely any trade going on ; prices lower, and generally nominal ; and the Japanese requirements—in Piece Goods—are now about as trifling as they well can be. At the last auctions some articles gave way slightly in value, while others commanded full prices, and even showed a tendency to advance. Among the former, Long Ells and 6-lb T-Cloths take station ; and 8¼-lb Grey Shirtings, Lastings and Spanish Stripes appear amongst the latter ; and this is the more inexplicable as the experience of private sellers of these imports has been just the reverse. They have sold the first-named at better prices than were previously current, but have signally failed to make any progress with Shirtings or Lastings, excepting in isolated instances and where they were willing to submit to a decline.

MANILA.—The market had continued very quiet, and no material alteration in values had occurred.

BANGKOK.—There had been little change to advise for the better, except in Grey Yarns, which had risen in value Tic. 2 to 3 per bale, stocks being small. Turkey Red Yarns, on the contrary, had been over done, and rates had declined for some qualities Tic. 20 per bale. All Piece Goods were very quiet, Figured Shirtings alone showing some little improvement.

EXPORTS.

TEA.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s Report says :—Since our last, dated 8th June, there has been no lack of Tea here nor of buyers. Settlements for the week aggregate 35,567 chests 35,212 half-chests and 1,780 boxes. Prices have been well maintained throughout, there having been considerable competition for all the better parcels or anything with a little quality. This especially applies to Teas from the Toong-shan district and third and fourth pack Oonfars. The range of prices has been,—for Ningchows, of which only a few parcels have been shown here, Tls. 24 to 33½ ; Oonfars Tls. 22 to 31½ ; Cheong-sow-kai, Tls. 21 to 26½; Soong-yong Tls. 21 to 28 ; Toong-shan Tls. 25 to 31½ ; Ping-kong, Wun-kai and Low-yong Tls. 16½ to 24½ Young-low-toong and Nip-car-see Tls. 16 to 25 ; Leeling Tls. 16 to 21⅝ ; Shun-tam Tls. 15½ to 17½ per picul. The market is now almost cleared, stock being reduced to 6,000 chests, while there is little or nothing to come from the country to complete the first crop. The Second Crop Teas are expected in a few days, but their arrival must necessarily be delayed by the continued wet weather that has prevailed. Customs Export to date gives : Hankow Tea, 28,185,840 lbs.; Re-export Kiukiang Tea, 8,028,383 lbs.; total, 36,214,223 lbs. Taking a week's later dtae last year, to allow for the difference in the opening of the season, the export was 32,013,680 lbs.

SHANGHAI.—There had been more business doing during the week, though the market continued to be only sparingly supplied. Arrivals had consisted almost entirely of Teas from the Hohow and Ningchow districts, only a few chops of Shontam and Oonfar having been received from Hankow. One or two good parcels of the latter class had been sold at Tls. 31½ to 32½. Quotations on the whole were about the same as last given. The first crop was nearly finished, and the market closed quiet with only a small available stock. Prices paid had been : —Hohows and Ningchows Tls. 20½ to 40, Shontams and Oonfas Tls. 20 to 32½ ; Common Nipcasees Tls. 19½, Settlements, 15,092 chests ; shipments, 2,241 chests ; total 17,333 chests Stock, 23,500 chests.

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says : —A steady business has continued on this Tea market, operations being both for England and the Colonies. Late arrivals from the country have proved of the lowest description, and it is evident that all Teas of fair quality of the first crop have now reached this market. A large proportion of the stock consists of low and common kinds of the most undesirable character. Congou : Early in the week medium grades became cheaper ; late operations in these classes have, however, re-established any decline. Common grades, although still high, have been purchased at lower prices than they were last week. Souchong : Many desirable parcels have been shown during the week, and Teamen having determined to meet the views of buyers, a fair business has taken place. The usual irregularity has been displayed in purchasing, but settlements generally may be quoted Tls. 3 to 5 under last season's rates. Oolong : Settlements, with the exception of a few high cost Teas, show a further decline. Flowery Pekoe : Further transactions have taken place at about the same rates. Scented Teas are taken as they arrive, at full rates. Supplies of this kind still lack scent.

Shipping Intelligence.

ARRIVALS.

At SHANGHAI.—From Liverpool, Aug. 7, Menelaus (str.).

At HONG KONG.—From Cardiff, June 23, Faith, Liverpool; from Antwerp, 22, Norden (str.); from Hamburg, 21, Atalanta, (str.).

At BANGKOK.—None.

At MANILA.—From Glasgow, June 14, Antela; from Cardiff, 17, Villa Franca; from Boston, 9, Mindora.

At SINGAPORE.—From London, July 27, Lincoln; 30, Duke, Edeline; from Liverpool, June 29, Bertie; 30, Cyclone; from Glasgow, June 30, Viceroy; July 1, Terentia; from Newcastle, June 29, Tynedale; 30, William Yeo; from Sunderland, June 25, John George; 26, Ulva; from Cardiff, June 26, Bengal; from Swansea, June 27, Julia H.; from London, &c., Aug. 3, Quang Se (str.), Stentor (str.).

At PENANG.—None.

DEPARTURES.

From SHANGHAI.—For London, June 16, Achilles (str.).

From HONG KONG.—For London, June 22, Achilles (str.); for San Francisco, 23, Marmion.

From MANILA.—For London, June 13, Assyrian; 19, City of Halifax, for Channel, f.o., 11, Admiral Tegethoff; 16, Charity; for New York, 19, Frolic; for Boston, Comet.

From SINGAPORE.—For London, June 29, Achilles (str.); July 1, Viking (str.); Aug. 1, Cawdor Castle; for Liverpool, June 29, William Wilcox.

From PENANG.—For London, &c., Aug. 7, Sarpedon (str.).

From BANGKOK.—For London, May 25, Bristolian.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, AUGUST 6.—The Messageries Maritimes steamer Tigre, with the inward French mails from China and Japan, arrived here to-day at 6 A.M. She brings 89 passengers and a general cargo, including 1,518 bales of silk, 7,654 packages of tea, and 114 sundries; specie, £4,655 for London, which part of her cargo will be forwarded to its destination per Company's steamer Ganges due in London on or about the 16th inst.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, AUGUST 6.—The P. and O. Company's steamer Zambesi left here at 5 P.M. to-day for Southampton, where she may be expected on the 11th inst.

INWARD MAIL DUE AUGUST 23.—ADEN, AUGUST 5.—The Messageries Maritimes Company's steamer Ava, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, where she may be expected about the 10th August.

HEAVY PORTION OF LAST OUTWARD P. AND O. MAIL.—GIBRALTAR, AUGUST 3.—The P. and O. Company's steamer Bokhara, from Southampton 29th ult., arrived here at 4 A.M., and left at 9 A.M. for Port Said. All well.

OUTWARD MAIL OF JUNE 25.—SHANGHAI, AUGUST 5.—The P. and O. Company's steamer Malwa, with the London mails of June 25, has arrived here.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Aug. 4, at Falmouth, from Akyab, Drot; from Bassein, for Hamburg, Admiral; from Rangoon, Usko; July 31, at Amsterdam, from Banjoewangie, Java Packet; Aug. 5, off Isle of Wight, from Colombo, Dorset; 1, off the Lizard, from Penang, for London, Coldinghame; 3, at St. Nazaire, from Colombo, Rose; 4, at Amsterdam, from Batavia, Urania; 5, at Bordeaux, from Reunion, Insulaire; 7, at London, from Shanghai, Antenor (str.); from Foochow, City of Baltimore (st.); at Falmouth, from Bassein, Lirrah; from Rangoon, Ardito; at Liverpool, from Rangoon, Berlin, Astronomer; 9, at London, from Foochow, Viking (str.); from Manila, Envoy.

DEPARTURES.—Aug. 1, from Amsterdam, for Padang, Professor Simon Thomas; 4, from Liverpool, for Shanghai, Patroclus (str.); 5, from London, for Shanghai, Fleurs Castle (str.); 3, from Penarth, for Singapore, Amstel; 5, from Cardiff, for Singapore, Wodan; 4, from Penarth, for Galle, Rosenburg; 6, from Falmouth, for Singapore, Bastian Pot.

SPOKEN.—Bjarke, from Rangoon to Amsterdam, June 29, 11 S., 84 E.; Johan Cesar, from Hamburg to Java, June 23, 12 N., 24 W.

MISCELLANEOUS.—Malta, Aug. 2.—Passed, Glenartney (str.), from London, for Shanghai. At Suez, Aug. 5, Glaucus, Galatea, both from Shanghai, for London; 5, Teviot, from London, for China; 7, Tartar, from China, for London, Yrurac Bat, from Manila, for Liverpool; at Port Said, Aug. 6, from London; for Shanghai, Glenartney. Rotterdam, Aug. 5: The Cornelis Smit; for Batavia, which was towed back here after striking against the pier at the Hook of Holland, has been examined by a diver, who reports the metal at the bow badly damaged. Surveyors have ordered her to discharge, and go into dock for further examination. Singapore, Aug. 7: The Cybele (str.) has come out of dock, and is expected to sail next week for China and Japan.

CASUALTIES.—Amsterdam, Aug. 4.—The Sumatra, from Batavia, for Nieuwe Diep, is reported by telegraph as having put into Cadiz with damage to machinery.

LAUNCH.—An iron screw-steamer, built and engined by W. Simons and Co., was launched from the London Works at Renfrew on the 5th. She is fitted with compound engines and twin screws, and named the Industry. This steamer is the property of the Crown Agent for the Colonies; and has been constructed to the order of Sir John Coode, C.E., Westminster, for the Government works at Colombo.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BUCHHEISTER—On the 14th June, at Shanghai, Mrs. J. J. Buchheister, of a daughter.
BECKER—On the 25th June, at Singapore, the wife of Albert Becker, of a son.
CRANE—On the 11th inst, at Singapore, the wife of C. H. Crane, of a daughter.
CHALMERS—On the 3rd Aug., at 24, Royal-crescent, W., the wife of William Bryce Chalmers, of Shanghai, China, of a son.
FISHER—On the 25th July, at Malta, the wife of Col. Arthur a'Court Fisher, C.B., Royal Engineers, of a daughter.
FOWKE—On the 9th May, at Chapelton Estate, Dickoya, Ceylon, the wife of R. W. Fowke, Esq., of a son.
GILMOUR—On the 5th Aug., at 66, Belsize-paak, Hampstead, the wife of David Gilmour, of a daughter.
PUGH—On the 2nd Aug., at Clive-place, Welshpool, Mrs. William Pugh, of Hankow, of a daughter.
ROBINSON—On the 13th June, at Singapore, the wife of Wellesley G. W. Robinson, Control Department, of a son.
SOAMES—On the 29th July, at Ramshill, Petersfield, Hants, the wife of Joseph Soames, of a son.
SPICER—On the 2nd Aug., at Ardlin House, Upper Tulse Hill, the wife of Evan Spicer, of a son.
WALKER—On the 3rd Aug., the wife of Capt. Charles F. Walker, R.N., of a son.
WRIGHT—On the 22nd June, at Tokyo, Japan, the wife of the Rev. William Ball Wright, M.A., S.P.G. missionary, of a daughter.

MARRIAGES.

GORDON—STUART.—On the 2nd Aug., at St. Mary's Episcopal Church, Glasgow, by the Rev. R. S. Oldham, incumbent, Charles Shipley Gordon, third son of John Gordon, and the Lady Isabella Gordon, of Aikenhead House, to Erskine Mary Katherine, eldest daughter of James Stirling Stuart, of Castle Milk, Lanarkshire.
RYE—HASLAM.—On the 15th July, at Niagara, Ontario, by the Rev. W. McMurray, D.D, D.C.L., rector and rural dean, Francis Rye, of Barrie, Ontario, youngest son of Edward Rye, of Brompton (formerly of Chelsea), London, to Amy Louisa, fourth daughter of Joseph Haslam, of Brompton.

DEATHS.

DUDGEON—On the 14th April, lost at sea, by the capsizing of the *Stuart Hahnemann*, James H. Dudgeon, aged 15½ years, fourth son of John Dudgeon, of 10, London-street, Fenchurch-street, E.C., and Rosherville.
HARRISON—On the 23rd June, suddenly, at Kong Kong, William Drought Harrison, of the firm of Butterfield and Swire, aged 32.
RODYK—On the 22nd June, at Malacca, Frederick Charles Montgomery, the only son of W. A. Rodyk, aged 10 months.
SHAWCROSS—On the 23rd June, at Shameen, Canton, John J. Shawcross, of Manchester.
WALTER—On the 3rd Aug., at Chilwell Hall, Nottingham, Mary, widow of the late John Walter, of Bearwood, Berks, in her 82nd year.

Legal.

ADMIRALTY COURT.

THE CARGO EX "WOOSUNG."

These were causes of salvage, the hearing of which occupied the Court on the 25th of June and the 16th and 20th ult.

On the 20th Feb., 1874, the screw steamship *Woosung*,, laden with a general Indian cargo, of the value of about £500,000, struck on a coral reef off the Island of Kotama, in the Red Sea. The passengers and crew, between fifty and sixty in number, were conveyed to the island, which was uninhabited and without water, and the second officer was despatched in the lifeboat to cruise off Jubbul Lee, about thirty miles off, and on the 28th spoke the *Corinna*, bound for London, which received on board the passengers and crew, leaving some of the officers behind. The Governor of Lolicea and a Greek trader also came to the assistance of the ship, the latter of whom agreed to attempt to save the cargo upon being paid one-third of the net value realised on sale. A telegram was also sent to England, and thence a telegram was forwarded to the Political Resident at Aden, and the *Kwangtung*, despatch boat, went to the ship, where she arrived on the 6th of March, and during six days' service succeeded in saving cargo which realised £25,900. The master of the *Woosung*, before the services began, signed an agreement by which he agreed to give the master and crew of the *Kwangtung* half the net proceeds of sale, as a salvage reward. The latter sued upon the agreement, and the *Corinna* also, and her master and crew, sued for saving the passengers and crew, and for other salvage services. For the owners of the cargo it was contended that the agreement as against them was inequitable, and that in the circumstances the services of the *Corinna* did not amount to life salvage, and were in other respects insignificant.

Mr. Butt, Q.C., Mr. Herschell, Q.C., Mr. Clarkson and Mr. E. Jones appeared for the salvors; Sir Henry James, Q.C., Mr. Cohen, Q.C., and Mr. Phillimore for the owners of the cargo of the *Woosung*.

His lordship, in considering whether the agreement was inequitable, said it was deliberately made by the masters of the two ships, both of whom were aware of all the material circumstances of the case. The services were attended with much suffering, as the salvors were for six days exposed to the most noxious gases and putrid smells, and suffered seriously in health, and inasmuch as the chief engineer had been paid £3,000, the stewardess £1,900, and the Greek trader one-third of what he recovered, his lordship thought that the agreement was not exorbitant. He therefore pronounced for the agreement with costs, and expressed a hope that those who had to distribute the amount would specially recognise the eminent services of Lieutenant Edwards.

Miscellaneous.

THE FAILURE OF MESSRS. COLLIE AND CO.

The balance-sheet produced at the meeting of Messrs. Alexander Collie and Co.'s creditors on Wednesday is a most instructive document. The magnitude of the liabilities and the scantiness of the assets of a firm which enjoyed for years, and until the moment of suspension, almost the very best credit of a purely mercantile firm in the City, may well excite wonder as to how the leading banks and discount houses could have made the mistake they have done. The liabilities altogether are estimated at £1,889,786, not including about £600,000 of bills drawn against consignments, and of which only £50,000 is estimated as likely to rank on the estate, and against this the only directly available assets amount to £250,542. These assets, moreover, include £75,000 value of freehold premises in Manchester, and £75,000, the separate estates of the partners, deducting which sums we have only the following sums of visible and realisable assets engaged in the business, on which the fabric of the firm's credit must have stood:—Cash in hand, £1,149; bills receivable in hand, £7,500; good debtors, £12,776; stocks in warehouse, &c., £48,608; stocks, and shares, and sundry assets, £30,510—total, £100,548. If we add about £11,000 to this for cash in the hands of bankers, retained against bills discounted, we shall include apparently everything engaged in their business, upon the faith of which the firm were enabled to keep floating about £2,260,000 of drafts unsecured, besides the above sum of £600,000 drawn against consignments. There are, no doubt, other assets, including a claim against the American Government for cotton burnt during the War, estimated altogether at £552,000, but they are valued very dubiously, and for the purpose of immediate credit they could not have been reckoned at all. The way in which the firm's liabilities on the unsecured drafts, which we suppose is a phrase for accommodation bills, are stated, does not seem very clear. The liability is split up into two parts, the firm being first stated to be liable for £1,274,292 of "balances, subject to payment of their acceptances," and the unsecured drafts being then dealt with directly as follows:—"Unsecured, £2,260,347; less credit balances as above, £1,274,000—£986,055;" and of this last sum, £430,850 is estimated to rank against the estate, making a total liability altogether, in connection with these unsecured drafts, of £1,705,142. We suppose the explanation is that Messrs. Collie in drawing on others for £2,260,347 did so to the amount of £1,274,292 in excess of what these acceptors were owing, which is the explanation of the balances credited to the latter, and that of the remaining sum of £986,000, which the acceptors were to pay themselves, there will be £430,850 unpaid, and which will also rank against Messrs. Collie's estate. But perhaps the statement might have been a little clearer on this head, so as to show the real magnitude of the accommodation bills.

SUEZ CANAL.—The annual general meeting of the shareholders of this company has just taken place at Paris—M. de Lesseps in the chair. The general receipts for 1874 were 26,385,507 fcs., and the total of the expenditure 17,900,942 fcs., leaving a net revenue of 8,058,575 fcs., to which must be added the sum remaining over from the preceding year of 4,556,297 fcs., making a total of 12,614,872 fcs., which has been applied in payment of the coupons of the second half years of 1870 and 1874, or 10,000,000 fcs., the balance of 2,614,872 fcs. being carried forward to the account of 1875. The operation of consolidating the coupons in arrear is well advanced, as on the 28th of July 350,900 *bons* had been exchanged, being a proportion of seven-eights of the whole. The receipts from transit dues for the first six months of 1875 amounted to 15,377,342 fcs., and those from other sources to 633,518 fcs., making a total of 16,010,860 fcs.

AN inquiry ordered by the Board of Trade has been instituted before the Local Marine Board of the Port of London, into a charge of drunkenness preferred by two of the crew of the ship *Banda* against Mr. Gissing, master of that vessel, on a voyage from London to Sydney, thence to Bangkok and Marseilles. On the voyage out to Sydney the master's wife died, and it was stated that immediately afterwards he gave way to habits of intemperance. After a patient investigation the Court found the main charge proved, but, in consideratien of the peculiar circumstances of the case, only suspended the master's certificate for six months.

THE town mansion of Mr. A. Collie, at 12, Kensington Palace-gardens, was submitted on the 3rd inst. to public auction at the Mart, by Mr. R. W. Mann, and after some spirited competition knocked down at £38,500 to Mr. E. H. Moscrop, of No. 22, St. George's-square, S. W.

MR. BALFOUR, M.P., after a tour in the United States and Canada purposes visiting China, Japan, and the East Indies.

THE Nederland Steamship Company's steamer Voorwaarts, from Southampton on the 13th ult., arrived at Port Said on the 25th ult., 11½ days from Southampton, and left Suez for Batavia on the 27th ult.

THE Eastern and Australian Company's steamer Normanby arrived at Singapore from Brisbane on the 5th inst., with Queensland mails of the 17th ult.

MR. W. H. READ.—The portrait of this gentleman, painted by subscription for the town hall of Singapore, by Mr. Lant, R.A., is now at Mr. Nassau-street. It may be seen during the present week on presentation of visiting card.

ACCORDING to a special telegram to *The Times*, the *Audacious*, flagship of the China Squadron, arrived at Wladiwostock on the 7th inst., and was to proceed in a few days for Nagasaki.

Mr. W. C. Thompson, agent for the Union and Central Pacific Railways, 22, Moorgate-street, has issued a pamphlet showing the complete scheme of travel, *via* San Francisco, to China and Japan by the Pacific Mail Company and Occidental and Oriental Steam Companies. The boats of the former leave San Francisco on the 1st and the latter on the 15th of each month, thus securing a fortnightly service. The two companies are working in such harmony that it is pretty clear there is a "distinction without any difference."

The next meeting of the Hong Kong Bank will probably be held on the same day as last year, the 19th inst., and telegraphic advices may be expected in London the next day.

On the case of Messrs. Collie being called on at the Guildhall Police-court this morning Mr. Alexander Collie failed to surrender.

The Directors of the P. and O. Company have contracted for a steamer with Messrs. Stephens, on the Clyde.

THE SEIZURE OF THE BRITISH STEAMER "CARISBROOKE."

THE details which are brought by the English mail with reference to the seizure of the steamer *Carisbrooke* are sufficient to show that the matter is beyond question one of the most important which has ever arisen in connection with the action of the Customs authorities and the so-called revenue cruisers in China. It is possible when the whole of the facts come to be sifted that some show of right may be made on the side of the Chinese authorities. Although the port of Kiung Chow in Hainan is declared by treaty to be one of those which should be opened to foreign trade, it is not to be denied that it has not been formally opened, as this could only be said to be the case had a Consul been appointed by our Government and a notification that the port was open to trade been issued. But admitting that to this extent there may be a show of right on the part of the Chinese, we deny emphatically that they can be justified in seizing a British steamer in the irregular manner which has been resorted to. According to the accounts published in the papers, the capture was effected by firing into the vessel actually on the high seas. It is possible that the distance from shore may be overstated, and some important considerations will depend upon this point; but if the vessel was outside China waters the case is one of a very serious nature indeed, and the fullest apologies should be demanded. Even, however, if it be shown that the steamer was within Chinese waters, the whole proceedings still appear of the most high handed and irregular character—high-handed, because the circumstances do not show any necessity for resorting to so severe a measure as actually firing into the vessel, irregular because the act was committed not by a recognised man-of-war, but by a revenue cruiser, which there is good reason to believe is not acting under Imperial authority, but is merely in the employ of the Hoppo of Canton. It would be premature to speak definitely as to the actual merits of the case, as the accounts hitherto given are necessarily only one-sided; but the matter is of so much importance that Mr. HART ought not to hesitate to at once issue some definite instructions with reference to the seizure of foreign vessels, as if the limits of international right have not actually been passed, they have been so nearly exceeded that it is evident that unless some definite steps be speedily taken, the irregularities of the Customs' cruisers, so long complained of, will end in some serious breach of international obligations, if not in even worse consequences.

THE CHINA TRADE.

II.

IN a late number we adverted to the circumstances which have worked together to bring the China trade into the defective condition which has been so long deplored in China, and is beginning to be felt at home, and showed that from the earliest days of our intercourse with that country restrictions have been in existence against foreign trade such as have always been recognised as highly undesirable; and we purpose now to explain the degree to which the non-removal of these impediments has conduced to the present state of affairs.

The results which have attended the China trade at each stage of its progress have been such as to show that the extent of the field for the furtherance of commercial enterprise which was believed to exist when our commercial relations were placed upon their present footing was not over-estimated. Notwithstanding all the obstacles, the trade has become developed to an extraordinary degree, as will be seen at once by a comparison of both export and import statistics; but this has been accomplished in the face of a continuance of restricting causes in the interior; so that it has been a matter of necessity that the development of the trade in China itself has been very small, in comparison with its development externally through the opening of the Suez Canal, the action of free competition, and the constant introduction of fresh capital and fresh appliances for its conduct. The result of such a position it is easy to foresee, and it has in fact for years past been predicted by those conversant with the actual state of affairs. In short, under such conditions, the trade must of necessity be overdone. The number of foreigners engaged in it, the quantity of capital and credit available for its conduct, the means of transporting merchandise, and, in the case of manufactured goods, the production of the commodities themselves, have all been on the increase in a ratio proportioned to modern enterprise and progress; while the opening of additional markets, and the means of placing produce at the disposal of the foreign merchant, have gone on only at a rate proportioned to Chinese conservatism, exclusiveness, and protectiveness, so that at the present day the appliances for carrying on the trade are largely in excess of the opening in China for the conduct of sound business.

It has been especially in financial development that this element of unsoundness has become conspicuous. To quote from an article which appeared as far back as 1869 in a China paper,* "Facilities altogether disproportioned to the "trade that can be safely done are granted from home, "and an amount of capital far in excess of the require-"ments of the trade is at the present day available to it. "So far as its effects upon the markets here are concerned, "it is immaterial whether the capital is actually remitted "to China or is made available to the merchants here "by means of facilities for drawing on home. . . . "There is so much capital available for the China "trade, and—whatever may be the special mode in "which it is made use of—the healthiness of the trade "will ultimately depend upon the relation between "the supply of this capital at home and the demand for "it in the China trade, or, in other words, upon the na-"ture of the facilities for conducting business either with "or in China." The absence of the increased facilities which it was expected would accrue from the last treaty has thus been one of the most important circumstances conducing to the present state of affairs. No doubt the development of the means of trading with China has of late years been very rapid, and would tend to some extent to induce an irregular and dangerous state of trade; but there can be very little question that this would have been almost entirely counterbalanced by the advancement of foreign trade in China itself, but for the unfortunate restrictions above alluded to. It is in the natural course of things where trade is conducted upon a system of free competition that there should be a constant increase in the appliances for conducting any branch of commerce which is likely to prove of a profitable character; and hence it was to be expected, as was the fact, that banking and shipping facilities should become very largely developed in this direction. If this take place in regard to a country where there are easy means for carrying out local enterprises, the degree to which the provision of financial and other appliances for the conduct of business may be overdone is modified by the development of new sources of investment; but where, as has been the case in China for years past, the sources of new enterprise are so limited as to be practically of little effect, there is nothing to counterbalance the overdoing of trade which must of necessity result from competition. The state of the China trade up to the present time may thus be briefly described as having been one of foreign progress between home and the China ports,

and Chinese stagnation between the ports and the vast producing and consuming districts, whose active participation in the traffic has from the earliest days been recognised as an indispensable element in its sound development.

(To be continued.)

EVEN in these days of rapid communication with nearly every part of the world it happens every now and again that, without any warning, the telegraph suddenly flashes to us a strange item of intelligence from some quarter whence it was least expected; but the most startling piece of information which we have received for a long while is that just forwarded by the Berlin correspondent of *The Times*. While we have been calmly meditating how we can contrive to open a way for our commerce through Burmah into South-Western China, and, having met with a murderous rebuff, are still more calmly and leisurely meditating how we are to avenge the injuries and insults we have sustained, Russia—if the information can be relied upon—has made up her mind to action. Telegraphing from Berlin on August 2, *The Times* correspondent tells us that "it is believed that the Russian Govern- "ment contemplates forming a commercial road through "the Yunnan Provinces (*sic*) of the Chinese Empire, "which the Calcutta Government has been so long de- "sirous to reconnoitre. Co operation," he adds, "with "England, and, if necessary, coercion of China seem to "be advocated in influential quarters in St. Petersburg." This statement is rather vague, it is true, and by "the Yunnan Provinces" we must probably understand Western and South-Western China generally, for we hardly see how it is geographically possible for Russia to reach Yunnan directly; but the mere fact that such a project is set on foot in St. Petersburg shows that we must expect Russia to take some decided action before long, whether we join her or not. If Count SCHOUVALOFF, during his short residence in this country, has been able to persuade our Government to back up such a project as is here hinted at, he will have achieved one of the greatest diplomatic triumphs of the age, and one that will do more than any amount of protracted negotiation at Peking to develop the vast resources of China. The note of warning has been sounded, and China had better make up her mind to give in with a good grace, and she may rest assured that before many years have elapsed she will find herself immensely the gainer by the transaction, and that the day will come, sooner or later, when the most obstructive and bigoted mandarin of the anti-foreign party will be fain to acknowledge that, after all, the Government of Kuang Su acted wisely in yielding to overwhelming pressure from without.

WE direct attention to a well-considered letter which appears elsewhere upon the sentence passed upon A. F. CHAMBERS for obtaining moneys from the Hon. Mr. WHITTALL under false pretences. Our views on this subject have already been expressed, and the receipt of the full report of the proceedings does not afford any ground to modify them. The offence was beyond question of the most deliberate character, and had all those elements of that reliance upon unmerited generosity or indulgence on the part of the community which has brought about such pernicious results, and is of so dangerous a character. There is something in the point as to the extent to which a sentence tells upon the criminal, as suggested by our correspondent, though the principle is one which must be admitted warily, as it obviously has a dangerous tendency to suggest that there should be one law for the rich and another for the poor. So far as it is applicable, we should be glad to see the prisoner have the benefit of it, as the mere passing of a sentence of such severity as that of nine years' penal servitude will, it is to be hoped, be sufficient to prevent others from attempting similar frauds.

THE MESSAGERIES MARITIMES.

The French National Assembly has negatived M. Guichard's proposal for the cancelling of the contract with the Messageries Maritimes, and has passed the Government Bill with reference to the new convention with the company. M. Guichard, who opened the debate, complained that the company, being unable to complete their cargoes at Marseilles, engage freight in England, through their agents, at greatly reduced prices, so that English goods sent from London by ships to Marseilles, and thence to the Far East by the Messageries packets, are charged a much lower rate than similar goods sent direct from Marseilles to the same destination. A like practice prevails on the return voyages. He read a letter on the subject from a Marseilles shipowner, who urged the adoption of a clause binding the company to charge the same rates in Marseilles as in London, only deducting an allowance of 20 per cent. on account of the distance from London to Marseilles. The same complaint has been made by various Chambers of Commerce and by the Societies for the advancement of trade industry in Marseilles and Bordeaux. Moreover, M. Ozenne, the well known secretary of the Ministry of Commerce, has stated that since the subsidy granted by the State to the Company commenced means have been found and applied to save sixty or sixty-five per cent. in the consumption of fuel. Owing to such improvements, the subsidised packets compete unfairly as carrying ships with private merchant shipping. The law of 1861 has provided for such a change in circumstances by reserving the right of cancelling the contract at the end of twelve years. By making use of that proviso the Government will fulfil both the letter and the spirit of the law. It was intended at that time to put the French Company on a footing of equality with its competitor, the P. and O. Company. But to-day the advantage is greatly on the side of the Messageries. They are subsidised at the rate of f.38.30 per marine league, while the P. and O. receives only f.25. The difference is 56 per cent. in favour of the French Company. By the terms of the treaty, the Government, on withdrawing from the convention, would be bound to buy the stock and plant of the Company, but M. Guichard thinks that the price would not exceed £1,000,000, and then it might be re-sold to the new companies to which the services of the Messageries would be handed over.

M. Bouchet, reporter of the Commission, replied to M. Guichard by recalling the services rendered to French trade by the Messageries, under the existing treaty. They sent formerly from Bordeaux, for Brazil and the River Ptate, thirty packets in a year, now there are 120 departures annually. Through them Lyons receives now its supply of silk from Japan and China, by a French channel, six per cent. cheaper than it could be carried by English steamers. The Company only obtains freight from England when it cannot be got at Marseilles, and they take it at cheap rates, to hold in check the competition of English steamers. The dividends of the Messageries have not exceeded of late seven per cent. Should the existing treaty be cancelled, according to M. Guichard's motion, the Government would find no other substitute for the company of the Messageries, and would be obliged either to carry the services at the State's cost and risk, or to come back to the old company, who would then command their own terms. M. Fraissinet, member for Marseilles, opposed the prolongation of the Messageries contract in the Mediterranean and the Black Sea, and proposed a Bill for cancelling the existing treaty for the acquisition of all the fleet and the land establishments of the company, and for putting up to auction the various services, for twelve years, with a maximum subsidy of f.30 per marine league.

The Assembly refused to take that Bill into consideration, and after some remarks from M. Babiu Chevaye, in favour of the maintenance of the *statu quo*, the Finance Minister, M. Leon Say, urged the passing of the Government Bill, and pointed out that the convention it referred to effected a saving of f.1,000,000 in the amount of the subsidy, and a diminution of f.332,000 for the present budget. He declared that the time had not come for the Government to do away with subsidised postal lines, either in the Mediterranean or elsewhere. He quoted letters from commanders of the French naval divisions in the Levant, deprecating, on political and commercial grounds, the withdrawing of the privilege of the Messageries. He remarked also, that England spends much more than France in postal subvention, her subsidies to packet lines amounting to more than £1,000,000, beside the amounts contributed in the same way by her larger colonies. Admiral Jaures said that the Messageries were always considered a useful auxiliary to the French navy. The Assembly voted the Bill by a large majority, without recourse being had to a division.

The revision of contract settled by the French Government and the directors of the Messageries Maritimes contains the following with regard to the Indo-China services.

The regular steamers of the company are bound to accomplish yearly a total length of travel of 221,078 marine leagues, as follows:—154,960 leagues on the main line between Marseilles and Shanghai, with a departure at each end every fourteen days; 21,571 leagues on the branch line between Aden and the Mauritius, with a departure every twenty-eight days; 11,700 leagues on the branch line between Pointe-de-Galle and Calcutta, with a voyage every twenty-eight days; 4,767 leagues from Singapore to Batavia and back, with a voyage every twenty-eight days, and 20,080 leagues on the branch line from Hong Kong to Yokohama, with a voyage every fourteen days.

The concession of the Indo-China services of the company, and of all its other existing services, will come to an end on July 22, 1888. From July 22, 1876, till then, the company will receive from the French Treasury, as a subsidy for its Indo-

Digitized by Google

China lines, a fixed annuity of f.8,573,024, paid in monthly instalments. The Government is bound to give notice, three years before the expiry of the contract, of their intention to renounce the services of the company, or to go on with them after July 22, 1888.

FRANCE IN THE FAR EAST.

A decree of the President of the French Republic, dated July 30 last, effects the following changes in the Judicial Body at Saigon :—

M. Guillet-Desgrois, Procureur-General at the Court of Appeal at Saigon, is sent in the same capacity to the Court of Appeal of Pondicherry.

M. Poignand, President of the Court of Saigon, is appointed Procureur-General at the same Court, in the place of M. Guillet-Desgrois.

M. Augier, Judge-Lieutenant at the Tribunal of First Instance at Saigon, is appointed judge at the Tribunal of First Instance of St. Denis, in the French colony of La Réunion ; M. Le Jemble, substitute of the Procureur of the Republic, at Saigon, is appointed to the post vacated by M. Augier.

M. Vulliez, Deputy-Judge at the Tribunal of First Instance, takes the place of M. Le Jemble, as substitute of the Procureur of the Republic, and M. de Thiollaj, barrister, is appointed Deputy-Judge.

Literature.

With two somewhat noteworthy exceptions, the principal magazines for August contain nothing relating to the Far East. Breaking a silence of nearly a year, Sir Rutherford Alcock, in the *Fortnightly Review*, gives us his views on the Eastern question in a paper entitled "The Inheritance of the Great Mogul," to some parts of which we shall allude in our leading columns. Notwithstanding its title, Sir Rutherford's discursive essay concerns itself largely with the aims and objects of Russia, and wanders about the Continent of Asia in a manner which is sometimes very perplexing. When we further mention that it starts with the days of Genghis Khan and Kublai Khan, it will be seen that it covers a good deal of ground. The article which, though it exhibits many signs of haste in such details as uniformity in the spelling of proper names, &c., will be read with interest, if not always with approval, by all connected with the Far East. It is nominally based on three works published during the past season, viz., Colonel Yule's new edition of "The Book of Ser Marco Polo, the Venetian," Mr. Hutton's "Central Asia from the Aryan to the Cossack," and Sir H. Rawlinson's "England and Russia in the East." In several geographical matters Sir Rutherford acknowledges his indebtedness to Dr. S. Wells Williams's "Middle Kingdom." Under the title of "The Kingdom of Burmah in 1875," Captain Edmond Browne, of the 21st Royal North British Fusiliers, contributes to the columns of *Frazer's Magazine* a careful survey of Burmese affairs from an early age, in which he draws rather freely on Colonel Yule's "Ava," published some years ago. Adverting to the rebuke we have been obliged to address to the King of Burmah, Captain Browne expresses a doubt whether matters can be finally settled without a war, and he concludes by saying :—"It is certain that his kingdom is shamefully ruled—the resourses of the country are entirely undeveloped, and the people swindled and oppressed by the Government. His Majesty has hitherto thrown every obstacle in the way of our trade with Western China, and is likely to do so again, unless he receives some new proof of our power ;" in all of which opinions, strong though they be, we feel sure that our readers will readily concur.

The *Geographical Magazine* for August contains a variety of interesting matter. Amongst other articles are papers upon the Discovery of the Course of the Congo, the Russian Movements in Central Asia, and the Scientific Work of the Arctic Expedition.

Correspondence.

THE SENTENCE ON A. F. CHAMBERS.

(To the Editor of the *London and China Telegraph.*)

SIR,—Like many other friends of the unhappy man Chambers who has fallen from a high position to that of a convict, I looked with some anxiety for a report of the proceedings to account for what certainly seemed to me the very heavy sentence passed upon him.

I am one of the last to share any puling sympathy for gentlemanly swindlers, and fully endorse the excellent remarks made in a recent issue of your paper upon the subject, but I trust you will permit me, through the medium of your paper—which, being circulated both at home and in China, is likely to have influence in such a case—to put in one plea which may perhaps induce the Governor of the colony to exercise his powers of mitigating the sentence, as was mercifully suggested by Chief Justice Smale when he passed it.

It is of course clear that the fact that a man who commits a fraud or embezzles occupies a high position and has had a good education, is an aggravation of his offence ; and I would on this account go as far as anybody in the severity with which I would look upon derelictions of this kind ; but it is very important to bear in mind that the same circumstance which in such a case aggravates the offence also aggravates the punishment. I would have such a man not only as severely but more severely punished than the common criminal ; but the point to which I wish to call attention is that a person in such a position *is* much more severely punished—looking at the effect of the punishment—by a given sentence than a man who for years has been hardened to a rough life, and whose imprisonment does not entail any great forfeiture of friends or position. A very much less lengthy sentence upon a man like Chambers would be felt with infinitely greater severity than a long one upon a man who probably associated with low characters or criminals before he went to jail, and will again associate with the same class when he comes out. Upon this ground I trust the Hong Kong executive will see fit to modify the sentence ; while, at the same time, I cannot but express my humble admiration of the moral courage and sense of duty in Chief Justice Smale, who was determined to stamp with the ignominy which it deserved a crime which for coolness, deliberateness, and adroitness is probably unequalled in the criminal annals even of Hong Kong.—I am, Sir, your obedient servant,

AN OLD CHINA HAND.

Aug. 2, 1875.

THE OPIUM TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—I have been surprised at the tone of "Old China's" two letters, which appeared in the issues of the *London and China Telegraph* of the 26th ultimo and 3rd instant respectively, and the more so as he said he had spent "a life of over thirty-two years" in China. As he chose to comment on the letter of "Mr. Turner" and the extract of a letter by "Nang Choy," which gave occasion for his remarks, and as he seemed to be very ready in giving his opinion, allow me, Sir, in turn to say a word about his letters. According to his assertion, he would have it believed that the Opium trade is no obstacle at all to the missionary work in China, notwithstanding the unanimous testimony of all the missionaries and of those well qualified to judge on the subject to the effect that it is so ; that China is not suffering from the evils of Opium, and that the Chinese Imperial Government have *never* objected to its importation ; in fact, the pernicious effects of Opium that have been described by the Anti-Opium people exist more in their imagination than in reality.

As to the expediency of abandoning the Opium traffic, which is intimately connected with the Indian revenue, to the extent of several millions sterling, there naturally arises some difficulty, and I apprehend some difference of opinion; but for "Old China" to declare his opinion in the manner he has done, betrays has a deplorable ignorance of Chinese affairs. It strikes me that he been engaged in the Opium trade (I hope for the sake of his honour and conscience after 1858, when the article ceased to be contraband), and hence, perhaps, his blindness toits injurious effects.—I am, &c.,

London, August 5, 1875. A.B.C.

Naval and Military.

The following officers who last served in China have been appointed as under :—Captain G. H. Parkin (in the Victor Emanuel), to the Triumph, armour-plated ship, Channel Squadron ; Commander J. B. Barnett (in the Elk, from 1871 to 1874), to the Coastguard ; Commander John L. Way (in the Iron Duke, from 1873 to 1875), to the Defence, armour-plated ship, River Shannon ; Lieutenant E. G. Hulton (in the Victor Emanuel, from 1873 to 1875), to the Serapis, Indian troopship ; Lieutenant E. H. Lindesay (in the Midge, from 1872 to 1873), to the Vestal sloop, for the East Indies ; Lieutenant G. A. Primrose (in the Elk, in 1873), to the Black Prince, armour-plated ship, Channel Squadron ; Lieutenant S. B. Roupell (in the Thistle, from 1870 to 1873), to the Penelope, armour-plated ship, Harwich ; Lieutenant G. W. Russell (in the Iron Duke, from 1873 to 1875), to the Penelope ; Midshipman C. W. Beresford (in the Iron Duke, from 1873 to 1875), to the Hercules, armour-plated, Mediterranean ; Mr. J. T. Robinson, engineer (in the Avon, from 1874 to 1875), to the Dreadnought, armour-plated ship, Pembroke ; the Rev. W. W. Parry, M.A. (in the Iron Duke from 1873 to 1875), to the Excellent, gunnery-ship, Portsmouth ; Dr. A. Watson, staff surgeon (in the Iron Duke from 1874 to 1875), to the Serapis ; Mr. G. J. Irvine, surgeon (in the Iron Duke from 1871 to 1875), to the Naval Hospital ; Dr. W. Pearson, surgeon (in the Adventure from 1874 to 1875), to the Warrior, armour-plated ship, Portland ; Mr. W. B. Hutchison, secretary (in the Iron Duke from 1871 to 1875), to the Eagle, Naval Reserve ship, Liverpool ; Mr. T. H. Bate, assistant-paymaster (in the Iron Duke from 1871 to 1875), to the Penelope ; Mr. E. R. Brown, assistant-master (in the Curlew from 1871 to 1875), to the Duncan, flagship at Sheerness ; Mr. S. E. Lark, assistant-paymaster (in the Avon from 1872 to

Digitized by Google

1875), to the Cambridge, gunnery-ship, Devonport; Mr. A. B. Wall, assistant-paymaster (in the Iron Duke from 1874 to 1875), to the Valiant, coastguard ship, River Shannon; Mr. A. Woolward (in the Hornet from 1871 to 1875), to the Favourite, coastguard ship, North Britain; Mr. T. Tregidge, boatswain (in the Princess Charlotte from 1870 to 1873), to the Salamander, paddle-sloop, particular service.

A court of inquiry into certain charges made by Lieutenant-Colonel Burton, R.M.L.I., against Colonel Richards, of the same corps, having resulted in a general court-martial being ordered, the court has commenced its sittings at the Royal Marine Barracks, Plymouth, when Col. Burton was placed on his trial; the charges made by him against his superior officer having been informally and irregularly made, to the prejudice of discipline. The court is presided over by Colonel Robert Boyle, C.B., and is composed of three colonels and eight lieutenant-colonels of various branches of the service. Colonel M'Arthur prosecutes, and Colonel Burton is defended by the Hon. E. Stanhope, M.P., barrister-at-law. The charges are very voluminous, but consist practically of the statement that Colonel Burton had alleged concerning Colonel Richards that he was a great drunkard, that when in command of the battalion in Japan, from which he has just returned, he was known as the drunken colonel of Marines, and suffered from *delirium tremens*.

A distinguished service reward of £100 per annum has been well bestowed on the Rev. Robert Halpin, M.A., Chaplain to the Forces. Mr. Halpin served originally as an ensign in the 14th Regiment, and, joining the Chaplains' Department in 1849, after he had taken holy orders was appointed Garrison Chaplain at Dublin. He accompanied our forces to the Crimea in 1854, serving throughout the war, and ministered to our sick and wounded at the Alma, Balaklava, Inkerman, and before Sebastopol. In 1860 he accompanied the expedition to China under Sir James Hope Grant. He has been Chaplain to his Royal Highness the Duke of Cambridge since 1866, and is decorated with the Crimean medal with four clasps, the Turkish war medal, and the medal for China. The Chaplain's Department has been until recently overlooked in the distribution of these highly-prized rewards.

Captain Barbotin, who has been appointed commander of the French naval forces in Cochin China, left Marseilles on the 1st inst., by the Messageries steamer, for Saigon, where he is to take the command of the flag-ship Fleurus, in place of Captain Estard.

The Lily, 3, composite sloop, 620 tons, 570 (90) horse-power, has been commissioned at Devonport by Com. Basil E. Cochrane, with a complement of 100 officers and men, for service in China.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, AUGUST 4.

We are very anxiously waiting to see what will happen in our political world. Mr. Heemskerk, our Premier, is most certainly a very able but, at the same time, a most passionate man, and he is very angry at the result of the last periodical elections, which have placed him in a minority. The Liberal party now numbers forty-three, and the several ministerial fractions thirty-seven members. Under these circumstances it is, of course, impossible to introduce any political measures, and if he does not govern according to the opinion of the majority we shall again be involved in a ministerial crisis. Some papers foretell that it is Mr. Heemskerk's intention to decide upon a dissolution of the Second Chamber if things go wrong—that is, contrary to the wishes of the Cabinet. This may be; but I must say that I scarcely can believe that such an experiment can be undertaken with the least chance of success. It gives much trouble to our Premier that the majority of our State functionaries support the Liberals, and give their assistance to the anti-ministerial candidates at the elections. A circular was issued to forbid this, but the day after it was published some of the highest functionaries protested openly against it. The Liberal papers blame this circular in very severe terms, forgetting that even Mr. Thorbecke, when Minister, applied the same measure, which is, I think, quite right. It is, however, said that as soon as the Chamber meets (the 12th inst.) the Ministry will be interpellated about this question, and this will be the first sign that a struggle for life has begun for the Cabinet. In the meanwhile I hope that things will not take this turn, because these repeated crises are anything but improving to our material prosperity.

Beyond the speculations on the future there is nothing political stirring, a *calme plat* prevails, and the papers, being at a loss how to fill up their columns, entertain their readers with reports of all sorts of meetings, exhibitions *en miniature*, concerts, &c., which, of course, have but very little general interest.

At Harderwyk there is again a large influx of foreigners, who wish to serve in our East India army. Large sums are being paid for bounties. There is, however, a great want of officers, and it seems to be quite incomprehensible that those East India officers who are staying here on leave of absence are not ordered to return to Java. Some years ago this measure was applied most successfully.

The Minister of the Department of Justice has returned from his trip abroad.

At the election at Middelburg, which took place yesterday. Mr. G. A. Fokker was duly elected. He will, however, remain only one month in function, and will then be compelled to leave his seat vacant.

Our Government has concluded a treaty with that of Italy, stipulating the conditions on which Italian Consuls are to be admitted into our Transatlantic possessions.

PRODUCE MARKETS.

The transactions in the market for Colonial Produce have been limited to direct wants, whilst in most instances prices have remained unaltered. The trade, however, is very healthy; the Money Market is well provided, and the rate of discount very low.

COFFEE has met with a good demand, and an advance of ⅛c. to 1¼c. has been paid for pure Java. Holders, however, do not incline to operate at these small profits, and they are waiting for a further advance.

TEA.—Without first hand transactions; the buyers for consumption, however, pay very firm prices. A lot of new Kaisow Congou has found buyers.

RICE.—There are serious rumours going about that the potato crop is attacked by disease, so that it probably will partly be destroyed. In consequence, holders of rice are not willing to operate without an advance on current prices. There is a good demand for clean Java for export.

RAW SUGAR.—The transactions in Java have been very considerable this week, especially for refiners' purposes. Prices have ruled at an average of f.½ under July value. The sales have amounted to about 8,000 mats. It seems that the new treaty which was concluded between France, England, Belgium, and Holland will prove to be almost ruinous to our refiners. Several of them will address themselves to our Government, with a request not to confirm this convention.

SPICES are firm. Nutmegs, first quality, have met with a good demand. Mace is neglected; Cloves dull. The general quotations remain unaltered.

JAVA TOBACCO.—The market is quiet. In waiting for the large parcels which will be offered by public tender, only a couple of small parcels changed hands.

COTTON.—The trade offers little particulars. There is no speculative demand at all, notwithstanding the very low prices ruling.

DRUGS.—Camphor has met with a good demand at 45c. in bond. Gum Benzoe is quoted at 90c. to 100c. Gum Damar 32c. to 32½c. Gum Elasticum 80c. to 120c.

BANCA TIN.—The Trading Company offered for sale 22,590 slabs, which quantity was sold at f.48 to f.48¾. The average price was f.48.35. Biliton offered nothing worth reporting.

SHIPPING.

DEPARTURES.—July 27, from Texel for Sourabaya, Louise; 30, from Texel for Atchin, Kitty; 31, from Maassluis for Batavia, Cornelis Smit; Aug. 1, from Maasslius for Batavia, Noach IV.; from Texel for Samarang, Twee Gezusters; Aug. 2, from Texel for Padang, Professor Simon Thomas; for Sourabaya, Willemina and Clara.

ARRIVALS.—July 29, at Texel from Banjoewangie, Graafstroom; 30, at Texel from Banjoewangie, Louis August Constantin; 31, at Texel from Bassein, Mardol; Aug. 2, at Texel from Bassein, Acadian.

Monetary and Commercial.

The Comptoir d'Escompte has fixed its interim dividend at eighteen francs per share of 500 francs. The amount paid for he first six months of 1874 was seventeen francs.

Tenders for £650,000 in bills on India were received on the 4th inst. at the Bank of England. The amounts allotted were—to Calcutta, £459,100; to Bombay, £190,900. Tenders on Calcutta and Bombay at 1s. 9 9-16d. will receive about 54 per cent., and above in full. These results show an advance of about 1 per cent. on the rates current a fortnight since, and consequently an increased demand for means of remittance to the East.

The Manchester Market exhibits a steady feeling, and the activity and hardening prices in the Liverpool Cotton Market confirms the firm attitude of producers, who are generally asking higher prices. On the other hand, buyers continue to operate very cautiously, and as a rule decline to purchase at any advance on last week's rates, business is consequently restricted.

At the meeting of the London and County Banking Company the directors' report was adopted. It stated that after paying interest to customers and all charges, allowing for rebate, &c., the net profits amount to £165,920, which, added to £18,936 brought forward, gives a total of £184,856. An interim dividend for the half-year at the rate of 16 per cent. per annum has been declared; and after reserving £6,093 to meet interest accrued on new shares, there remains a balance of £82,762 to be carried forward. To meet the loss, amounting to £213,398, incurred through the failure of Messrs. A. Collie and Co., the directors have transferred from the reserve fund to a special account the sum of £75,000. The reserve fund after the above deduction stands at £636,896.

The directors of the Merchant Banking Company of London have declared an interim dividend, payable on the 1st proximo, of £1 per share, being at the rate of 8 per cent. per annum.

The creditors of Messrs. N. Alexander, Son, and Co. held a meeting on the 30th ult., at which a statement of the firm's affairs was presented. It is, if possible, worse than that of the Collies', the liabilities being £240,535, and the assets £34,254. Some singular revelations were made at the meeting, but the only one that concerns the public is the fact that Alexander Collie has been since 1867 a secret partner in this firm, and, to the extent that he was so, drew bills on himself. Up to 1874 it does not appear that Alexanders got a commission for accepting the Collie bills, but about that time Collie accommodated the firm by taking over bills afloat to the amount of £178,000, asking no questions as to value, and since then the commission bill accepting—probably the most disgraceful kind of mercantile imposition of modern days—came into use. Collie's share of the capital supposed to belong to the firm was £10,000, but there is no record to show that that sum was ever paid in by him. Like

Digitized by Google

all these mercantile collapses, in fact, the more deeply this affair is probed the more scandalous it appears.

A meeting of creditors of Messrs. Shand and Co., East India merchants, of Rood-lane, was held at the London Tavern on the 5th inst.—Mr. Lyne (Lyne and Holman, solicitors to the Union Bank of London) in the chair.

The Chairman stated that from the accounts prepared by Messrs. Turquand, Youngs, and Co., the accountants, it appeared that the creditors unsecured represented an amount of £98,534, the creditors fully secured £33,297, less estimated value of securities £34,480, showing a surplus to contra of £1,183. The creditors partly secured represented £20,080, and the estimated value of securities £171,009. The other liabilities (as per Article D) amounted to £207,218, creditors for rent, rates, taxes, and wages were £137, liabilities on bills discounted were expected to rank against the estate to the extent of £65,150, the liabilities at Madras were £44,020, and at Colombo £13,858, the total liabilities being £341,980. The assets were book debts about £4,445, estimated to produce that amount; cash at bankers, which would be retained against loans and bills, £287; bills of exchange and other similar securities estimated to produce £9,289; ditto claimed by a creditor, £2,000; furniture, fixtures, and fittings, at Rood-lane, estimated to produce £200; property, £21,250; a lien being, however, claimed on part of this property; surplus of securities in the hands of creditors fully secured, £1,180; balances due from Ceylon, £9,762; estimated surplus from private estates of C. Shand, £5,425; A. Shand, £2,714; and R. A. Robinson, £223; the total assets being £38,368. At the suggestion of a creditor Mr. Bishop (Turquand, Youngs, and Co.) proceeded to trace the connection of the firm with Messrs. Collie and Co., in the course of which he stated that it was not until September, 1874, that Messrs. Shand and Co. experienced considerable losses, and they applied to Messrs. Collie and Co., first for £11,000, then for £5,000, and as they were unable to meet their liabilities the bills were renewed. In December, 1874, they obtained a further advance of £10,000, and on the 15th of June, 1875, they suspended. They fully believed (he was assured by Messrs. Shand) in the solvency of Messrs. Collie and Co. The unfortunate part was that £270,000 of bills drawn by Messrs. Collie and Co. on Messrs. Shand and Co. were still in circulation, of which the far greater part were not covered by securities. Mr. Simpson, solicitor to Messrs. Shand and Co., said that the largest creditors had agreed to administer the estate in the Court of Bankruptcy, and as that was the case no resolution could be come to at that meeting, but Messrs. Shand and Co. would facilitate the proceedings for the placing of the estate in bankruptcy.

At the adjourned meeting of creditors of Messrs. Robert Benson and Co. it was decided to liquidate the estate by arrangement, and Mr. Edwin Waterhouse (Price, Waterhouse, and Co.) was appointed trustee with a committee of inspection. The balance-sheet showed the unsecured creditors at £17,744; creditors partly secured, £142,255; estimated value of securities, £118,589; deficiency, £23,666; irrespective of a liability to the new firm of Robert Benson and Co. of £20,217. On the other side, the assets were stated at book debts about £58,739, estimated to produce £8,319, office furniture and fittings at King's Arms-yard and Liverpool estimated to produce £550, and share and other property £7,449, together £16,518; whilst as regards the estate of the late Robert Benson particulars had not yet been furnished.

At an adjourned meeting of the creditors of Mr. Edward Corry, in the metal trade, whose acceptances for Messrs. Fothergill, Hankey and Co. amount to £154,709, a resolution was passed to the effect that if the debtor, who offered 4s. in the pound, can make arrangements by the 1st September to pay a composition of 5s. either wholly in cash or partly by approved instalments, ranging over a very limited period, with security, it should be accepted, but that otherwise the estate should be administered in bankruptcy.

The estate of Messrs. Hay, Ingram, and Co., who failed in March last for £107,979, the assets being comparatively small, will be liquidated by arrangement with a trustee and committee of inspection. The Bankruptcy Court has appointed a receiver to the estate of Messrs. Da Costa, Raalte, and Co., merchants, of Leadenhall-street and Manchester, whose liabilities are estimated at £600,000.

The Eastern Extension Australasia and China Telegraph Company (Limited) announce that their traffic receipts for the month of July, 1875, amounted to £20,225, and to £19,641 for the corresponding period of 1874. The Eastern Telegraph Company's traffic receipts for the month of July, 1875, amounted to £31,419, and to £27,247 in the corresponding period of 1874.

The traffic receipts of the Great Northern Telegraph Company for the month of July were 414,381f.; last year, 410,355f. Total traffic receipts, 1st January to 31st July:—This year, 2,409,858f.; last year, 2,486,726f.

The deliveries of tea from the bonded warehouses in London during the week ended the 31st ult. amounted to 3,797,226 lb., of which 2,099,387 lb. was for home consumption, 905,936 lb. was exported, 720,562 lb. was removed coastwise, 67,755 lb. was sent coastwise for export, and 3,586 lb. was for ships' stores. The duty received in the week was £52,485, being nearly 2 per cent. more than in the previous one.

The price of Bar Silver has improved to 56d. per oz., there having been during the past week a good demand for India and the Continent. Mexican Dollars are firmer; the late arrivals have been sold at 54½d. per oz., but those now on the market will go at a higher rate.

ARTICLES OF IMPORT.

Business in the Produce Markets has been partially interrupted by the Bank holiday, but during the last few days a steadier tone has been observable in several articles, accompanied by some recovery in value. On the other hand, several of the leading articles have remained in the same depressed and weak state reported for a long time past, and prices have again receded.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Our market has shown a rather steadier tone, prices being now on a comparatively safe range for all good and fine Teas of new import, whilst those ruling for old teas are low. A fair amount of business has been done both for export and home consumption, the large quantities of Congous offering affording a good selection, both in red and black-leaf kinds. The public sales have been very small, comprising only 4,059 packages, which have gone off steadily at previous rates. The stock in the United Kingdom on the 31st ult. was estimated at 71,290,000 lbs., against 61,664,000 lbs. last year. The quantity afloat (advices by letter) at 9,679,000 lbs., against 5,738,000 lbs. of China Tea, and 1,075,000 lbs., against 1,116,000 lbs., of India Tea.

Congous.—Red-leaf kinds: Old season's show no change, common selling at auction from 10d. to 10½d. per lb. New Kaisows: Fair to good medium from 1s. 4d. to 1s. 6d., fine from 1s. 7d. to 1s. 10d., finest from 1s. 11d. to 2s. 3d. per lb. show no material alteration. Pak Lin kinds have been sold to some extent at a decline of 1d. per lb. Black-leaf kinds: Old season's, common to fair, have sold at previous rates. Sales of new have been made to some extent from 1s. 1½d. to 1s. 3½d. for fair quality, 1s. 4d. to 1s. 6d. for good medium, fine 1s. 7d. to 1s. 10d. per lb., finest 1s. 11d. to 2s. 8d., prices showing but little alteration. New-make kinds: Common at 10d. to 10½d., fair 11d. to 1s. 0½d., good 1s. 1d. to 1s. 5d. per lb., remaining without change. Oolongs: Good quality new season's are in less demand, at rather under previous prices. In Souchongs a few sales have been made at full prices. *Scented Teas.*—Canton Capers of fair quality are selling very cheap, from 10d. to 11d. per lb., good 1s. to 1s. 2d., the fine well-scented kinds, with good leaf, are saleable at full prices. Orange Pekoes remain much as before. Foochow Orange Pekoes: Fair have been sold at 1s. 5d. to 1s. 6d., fine from 1s. 9d. to 2s. per lb., being former rates. Foochow Capers show no change. *Green Teas.*—There is no improvement to notice in the demand, and prices are ruling very low, the stocks being large.

Messrs. James Goddard, Jun., and Co. report:—The market has continued very quiet all through the week, and the Bank holiday has diminished the amount of business done. Public sales have been small, and privately there has been an absence of pressure to sell; unsold stocks have, however, accumulated, and prices are in buyers' favour. The exports telegraphed show a decrease in the excess as compared to those of the previous telegram; all old tea is cheaper at auction. New Season's Scented Capers have been sold at 10d. Green Teas are without change. In public sale only 6,000 packages have been offered during the week. 2,230 packages have been sold. Red leaf congou obtained 9½d. to 9¼d., and new makes sold from 10¾d. to 11¼d. A small chop of green tea, per Omba, sold at gunpowder 1s. 8½d., young hyson 1s. 3½d., hyson 1s. 5½d., and imperial 1s. 1½d.

SILK.

The Market is inactive, there being no disposition on the part of buyers to operate beyond the supply of present wants; prices however are fairly steady for Chinas and Japans, while those of Cantons are weaker. Deliveries 1st to 4th inst. inclusive; China, 369 bales; Canton, 59 bales; Japan, 35 bales; Total, 463 bales.

Messrs. Durant and Co.'s Circular says:—We have had a quiet month in Silk, although the deliveries are very good, equalling those of last month. This shows that there is no diminished employment of mills and looms, but the new China Silk has not yet come forward, and in the old stock there appears little of sufficient interest to induce business other than for immediate requirements, and these have been supplied from the stocks in the hands of banks and capitalists, who, although not pressing sellers, have been willing to meet buyers without exacting full prices. In Canton Silk about 400 bales of this season have come forward, but except in the better qualities little has been done. In Japan Silk little progress has been made except for some small parcels of the better classes, although the last few days there has been some little inquiry for the lower priced sorts.

Messrs. Waithman, Hogg and Co. report:—The Silk Market was without animation throughout July, but although there was only a small daily business, no noticeable change in prices took place. China Silk attracted the chief attention, and a moderate but steady business was done at former rates. Cantons were to a great extent neglected until the first arrivals of new Silk, which took place towards the end of the month, when sales were effected on the basis of 11s. for Market 4. The deliveries have been well maintained, being 5,120 bales against 5,084 in June. The Stock of all descriptions is 29,181 bales, against 36,384 bales at the same time last year.

Mr. John Kershaw's Circular reports:—Business in China Silk during the past fortnight has been generally restricted to old parcels which have been offered on the market below the current quotations; these not being, however, as a rule, desirable silks, have not found buyers very readily, consumers preferring to wait the arrival of the new silk, and supplying only their actual wants from parcels offered at a sufficiently tempting price. In Canton silk the first arrivals of the new season have been offered, and have been partly sold at 11s. to 11s. 6d. for poor to good No. 4 Tsatlee reel, the higher grades which are in small quantity having sold on same basis; the trade, however, do not seem inclined to continue. Japans are in small demand, at low prices. The most important feature to report is the good delivery of July, 3,653 bales China, 610 Canton, 609 Japan and 248 Bengal—total, 5,120 bales, which has reduced the total stock from 33,268 bales on 1st July to 29,181 on 1st August, and the stock of Chinas from 19,507

Digitized by Google

bales to 16,165. The total stock of Silk now stands nearly 7,000 bales less than it did at this date last year.

COFFEE.

Exports have continued upon an extended scale, and as imports have been lighter than for some time past, an important reduction of stock has taken place at this port, amounting to 3,000 tons in three weeks, creating a deficiency of fully 7,500 tons. There is no change to report in the tone of the market for Plantation Ceylon. The small quantities offered have been readily disposed of, and closing prices exhibit an advance for the past fortnight of about 2s. 6d. per cwt., middling selling at 109s. 6d. Native Ceylon has advanced fully 1s. per cwt., fine ordinary having sold by auction at 94s. to 94s. 6d., and bold at 101s. to 101s. 6d. Prices of Manila and Singapore have also ruled higher. The closing quotations for Ceylon are as follows :—Plantation triage 85s. to 100s. 6d., small 102s. to 106s., low middling 106s. 6d. to 108s., middling 109s. to 110s., good middling to fine middling 110s. 6d. to 112s. 6d., bold 113s. to 115s., peaberry 124s. to 127s. 6d. Native, fine ordinary even, 94s. to 94s. 6d., good bold 101s. to 101s. 6d., peaberry 105s. 6d. to 106s. The sales of other East India have included 654 bags Singapore, low blacks 34s., mixed Bally 82s. to 83s., good to fine picked ditto 86s. 6d. to 88s. 6d., yellow 93s. 6d., and 800 bags Manila, ordinary mixed Zamboanza 83s. 6d., good ordinary greenish Indan 90s., fine to superior yellow, 99s. 6d. to 101s. per cwt.

SUGAR.

The unusually low range of prices of useful refining kinds has attracted the attention of the trade, both in London and at the outports, and as holders have met the market freely a larger business has been done than for some time past, consisting chiefly of British West India, prices closing fully 3d. dearer. East India descriptions have been dull of sale, but as a decline of 3d. to 6d. per cwt. has been accepted a larger business has been transacted.

There has been more pressure to sell Manila, and prices of both clayed and unclayed have given way about 6d. per cwt., resulting in more business. The sales are as follow :—500 tons low unclayed Taal at 15s. 6d., 19,000 bags unclayed Ilo Ilo at 16s., 1,150 bags washed clayed at 17s. to 17s. 6d., 500 tons good clayed at 18s., 100 tons fine ditto at 18s. 4½d. In Penang and other East Indian kinds the business has been unimportant.

COCOANUT OIL has continued dull, and to effect sales holders have had to submit to some reduction in prices, more particularly of Cochin, which has changed hands at £41 to £41 10s., whilst Ceylon has not declined further than to £36 10s. for new, and to £36 for old oil.

CUTCH has met a better demand at firmer rates, find Pegue being now quoted 24s. 6d. to 25s. 6d. Statement of the landings, deliveries, and stocks for the first seven months of the three years :—

	1875.	1874.	1873.
Landed ... ... tons	1,857	138	2,759
Delivered	1,967	2,015	1,759
Stock, July 31	2,805	2,977	5,005

COTTON.—Although the low prices recently established appears to have induced the trade to operate more freely, leading to larger sales in Liverpool at a slight recovery, the market at this port has remained very quiet, the demand being limited and sales small. For arrival there has been an unwillingness to buy, and sales have been unusually light, Tinnevelly selling at 5¼d. to 5⅜d. for good fair. On the spot a fair demand has prevailed, and prices are about ⅛d. higher, good fair Tinnevelly closing at 5¼d.

CAMPHOR.—No business effected in China or Japan descriptions.

EBONY.—At auction of 44 tons (231) logs new Ceylon offered 25 tons sold, common large, &c., at £10 15s. per ton.

GAMBIER has been very firm, but only moderate transactions are recorded in block, at a further advance of 3d. per cwt. On the spot 800 bales have been sold at 28s. to 28s. 3d., closing at the latter price ; and for arrival 50 tons May sailing at 27s., and 50 tons early June sailing at 26s. 6d. ex ship all faults. At auction 30 bags dark free cubes sold at 38s. for second class. Statement of the Imports, &c., in the first seven months of the three years :—

	1875.	1874.	1873.
Landed ... ... tons	3,326	2,640	3,385
Delivered	3,136	3,484	3,227
Stock, July 31	500	390	697

GALLS.—China continue in demand, and at auction 144 cases unworked, of fresh import, were sold at a further advance at 56s. 6d. to 57s.

HEMP.—There has been little demand for Manila, and only small sales have been effected at again easier rates. At auction 44 bales Sunn sold at £15.

HIDES.—Messrs. Dyster Nalder and Co.'s Monthly Circular says :—Singapore, Penang, and Rangoon, &c., Ox and Cow Hides were in only moderate request at the public sales, but late prices were obtained for the portion sold. The sales comprise 4,293 Singapore and Penang : light seconds 11½d. to 11⅝d.; heavy second 7d. to 8½d.; extra heavy 5d. to 7d. per lb. 1,885 Rangoon : light third 7¼d.; extra heavy 5¼d. per lb. Singapore, Penang, &c., Buffalo hides have been in moderate demand without alteration in value. The sales are 5,324 Singapore : fair to good, 1st heavy, average 27¼ to 32⅜ lb. 5⅝d. to 5⅞d.; ordinary 1st heavy average 30⅞ to 40⅝ lb., 5d. to 5¼d.; seconds 4½d. to 4⅝d.; light average 12½ to 13½ lb., 5⅜d. per lb., 104 Rangoon : light, average 12¼ to 13⅛ lb. 5d. to 5½d. per lb. Java Hides : A parcel of good fresh closely shaved Ox and Cow brought extreme prices, but there is little demand for Buffalo hides. The sales are 1,257 Ox and Cow ; 1st light 15⅜d., 1st heavy 13d.; 2nd heavy and extra heavy 10½d.; small and calf 15d. per lb. 657 Buffalo : shaved, seconds 6d.; unshaved, first heavy 6⅞d. to 7d. per lb.

JAPAN WAX.—Of 198 cases offered, 136 boxes of old import sold, good bold saucer at 50s. 6d. to 51s. and 20 boxes mixed at 50s. per cwt.

MUSK.—Of 72 packages Tonquin offered 41 packages sold, first pile, rough, bally and skinny, with some fair shaped pods, at 43s. 6d. to 48s., fair shaped rather damp 43s. to 43s. 6d. ; 2nd pile, bally and rather skinny 29s., hard and skinny 24s. 6d. to 27s. ; 3rd pile, ordinary rough bally, &c., 14s. to 15s , wet pickings 21s. 6d., 1 bottle Grain bought in at 40s., 1 tin pods sold at 2s. 1d. per oz.

PEPPER.—*Black :* A good demand has prevailed, more especially for Penang, prices of which have advanced fully ⅛d. per lb., closing at 4⅜d. ; Singapore being firmer. In auction 4,295 bags were chiefly sold ; of 1,732 bags Penang 900 bags sold at 4⅜d. to 4⅝d., of 2,361 bags Singapore 1,500 bags sold, grey at 5⅜d., fair at 5½d. Privately about 3,000 bags have been sold, chiefly Penang, at 4⅝d. to 4⅞d., Singapore at 5 7-16d. to 5½d. For arrival about 100 tons Singapore have been sold at 5½d. for distant, and 5¼d. for near at hand, and 25 tons West Coast Penang near at hand at 4⅝d. *White :* An active inquiry has prevailed, giving a strong upward tendency to prices, and at the close purchases are made with difficulty at a further advance of ⅛d. per lb., closing at 7⅜d. to 7½d. By private contract about 1,000 bags Singapore have been sold, commencing at 6⅞d. and rising to 7 5-16d. for middling to 7½d. for good fair. In auction of 902 bags Singapore about 300 bags sold, good fair to good at 7½d. to 7⅜d., 76 bags Penang sold at 6⅞d.

PLUMBAGO.—At auction 293 barrels Ceylon sold steadily, fair to fine small and medium lump 14s. to 17s., ordinary ditto 12s., fine chips 10s. 6d., fair ditto 8s. 9d. to 9s., middling to good dust 8s. 9d. to 9s. 6d.

RICE.—The market has become dull, and as the speculative inquiry has subsided, prices of floating cargoes have given way about 3d. per cwt., and few sales have been made. On the spot business in hard grain sorts continues unusually limited, but prices are steady ; rather more business has been done in soft grain at easier rates, including new Rangoon at 8s. 6d., Bengal fine white at 12s. 4½d. to 12s. 9d., middling 11s., Askoolie at 9s. 6d. to 10s., Madras at 9s. 4½d., old Rangoon at 8s. to 8s. 3d., and Necransie at 8s. to 8s. 3d. per cwt.

RATTANS.—At auction 13,046 bundles (30 tons) were only partly sold, Singapore at £10 to £12 2s. 6d., Penang at £14 15s. to £15 7s. 6d. per ton.

SPICES.—The market except for Cloves has been inactive. *Cassia Lignea :* 200 cases unworked bought in at 56s. *Buds :* 80 boxes China bought in at £5. *Cinnamon :* Of 92 bales Ceylon 13 bales sold without reserve, first sort at 2s. 8d. to 3s., second at 2s. 6d. *Chips :* 207 bags Ceylon bought in, ordinary to fair at 4d. to 6d. *Cloves :* Zanzibar have been in strong request, chiefly on speculative account, and prices have advanced until at the close they are 1½d. to 2d. higher ; privately 10 cases good bold Penang of new import sold rather dearer, at 1s. 8⅞d. to 1s. 9d. *Nutmegs :* 48 cases 18 boxes Penang were all sold at a decline of 1d. per lb. for bold, and an advance of 1½d. per lb. for small ; average 67 nuts to the lb. at 4s. 1d., 77 to 72's at 3s. 8d. to 3s. 10d., 77's slight mouldy at 3s. 7d., 80's at 3s. 7d. to 3s. 7½d., 112 to 168's at 2s. 11½d. to 3s. 1d., limed 166 to 160's at 1s. 3d. to 1s. 4d. *Mace :* Of 24 cases Penang 10 cases sold at easy rates, middling red at 2s. 2d., ordinary 1s. 7d., pickings at 1s. 2d. ; 4 cases 2 casks Java bought in at 2s.

STICKLAC.—Privately 100 cases Siam have been sold at 90s. In auction of 221 cases Siam about 40 cases sold at 90s., being steady. Statement of the landings, &c., for the first seven months of the three years :—

	1875.	1874.	1873.
Landed ... ... boxes	2,572	5,813	2,965
Delivered	1,933	3,031	2,383
Stock, July 31	3,810	4,178	1,669

SAPANWOOD.—At auction of 47 tons Manila, of fresh import, 33 tons sold at £11 for slightly, and £9 5s. for badly stained, &c.

SAGO.—Small Pearl is in good demand, but no sales have occurred on the spot ; in auction, of 1,513 bags offered, 850 bags sold, fair to good large at 16s. 9d. to 17s., a few grey medium at 16s. For arrival, 300 bags small Pearl have been sold at 17s. 6d., ex ship. *Flour :* Privately moderate sales of Singapore have been made at 12s. 6d. to 12s. 9d.

TAPIOCA.—The large supply of 3,020 bags Singapore met a fair demand, and nearly 2,100 bags sold at steady rates to a slight decline, chiefly greyish to fair white at 2d. to 2⅛d., good at 2¼d. to 2⅜d., fine at 2⅛d. to 2⅜d., bold Malacca sort at 2d. to 2⅛d. *Flour :* 60 cases (containing 2 tins each) Singapore sold at 3⅞d. to 4d., and 7 bags first-class sea-damaged at 2d.

TIN.—The market shows a slight recovery, quotations having slightly advanced, the current rates being—Straits on the spot £80 ; afloat, £79 to £79 10s. ; Banca, £84 to £85 ; Billiton £80 per ton. The latest quotations from Holland are fl.48 for Banca and fl.46 for Billiton.

Stock of	Aug. 1, 1875. Tons.	Aug. 1, 1874. Tons.	Aug. 1, 1873. Tons.
Foreign in London, estimated at...	5,575	2,401	1,961
Banca in Holland, Warrants ...	896	910	890
Billiton in Holland	870	890	415
	7,341	4,201	3,266

VEGETABLE TALLOW.—37 hogsheads good Singapore sold at 40s., and 5 hogsheads brown at 39s.

Digitized by Google

ARTICLES OF EXPORT.

METALS.

IRON.—Welsh: Rails, £7; Bars, £8 to £8 5s.; Staffordshire Best: Bars, £9 to £10; Nail Rods, £9 to £9 10s.; Hoop, £10 5s. to £12; Sheets, £12 to £13; Scotch Pig, No. 1, £3 to £3 7s.; Swedes, Bars, Hammered, £16 10s. to £17 10s.; Swedes, Steel in kegs, ½ and ⅝ in., £19 10s.

YELLOW METAL.—Sheets, 4 by 4 ft., 7¾d.; Sheathing and Rods, 7¾d. per lb.

TIN.—English Refined, £85. Tin Plates: Charcoal IC, per box, 30s. to 34s. Coke, 22s. to 26s.

LEAD.—WB, £23; do., other brands, £22 5s. to £22 7s. 6d.; Spanish soft, ex ship, £21 10s. to £21 15s.; Sheet, £23 to £23 5s.; Shot (kegs extra), £26 10s.; White do., £29; Red do., £25.

SPELTER.—Silesian, £24.

QUICKSILVER.—In bottles of 75 lbs. each, £10.

Messrs. French and Smith's Circular says:—Business was dull all July, and values generally have rulde in favour of buyers.

IRON.—For Scotch Pig Iron their exists a steady demand, but in other descriptions the trade is dragging.

COPPER.—The news of large charters from the West Coast for the second half of June made the market very depressed, and some realisations followed which caused the selling value of Chili Bars to drop to £77 10s. and £78. The charters for July have been on a more moderate scale, and the market has assumed a rather firmer tone. During the month a large sale of Wallaroo was reported for delivery over an extended period of time, but the terms did not transpire. Some of the smelters are accepting lower prices for tough and best selected. We quote Chili Bars £79. Wallaroo £90. Tough £85 to £86. Best selected £86 to £87. Manufactured £90 to £92 per ton. Ores and Regulus 15s. 6d. to 16s. per unit.

TIN PLATES.—The prices continue to droop, the cost of production seems to preclude much lower prices. It is to be remarked, however, that the exports for the first six months of this year were considerably in excess of the corresponding months in the two preceding years.

LEAD.—The demand through the past month has been uniformly good, and as most of the makers are well supplied with orders, rather better prices are expected.

QUICKSILVER receded again £1 per bottle during the past month, the present quotation being £10 per bottle.

ANTIMONY is now quoted £59 per ton, with a steady demand.

SPELTER and ZINC without change.

CASUALTIES.

The Envoy, from Manila to London, 140 days out, was spoken on July 28, in 49 N., 12.30 W., with mizenmasthead, maintopgallantyard, &c., carried away, also mainmast sprung.

The Vanguard, from Penang, at St. Helena, July 2nd, reports that on the 3rd June, in lat. 36 S., long. 21 E., when off the South African Coast, fell in with and rescued the captain and crew, thirteen in all, of the Italian three-masted schooner San Fiorano, from Rangoon, for Falmouth, nearly a new vessel of about 600 tons, which encountered a violent gale, sprung a heavy leak, and went down in sight of the Vanguard, the crew barely escaping with their lives, saving nothing beyond what they stood in. They were landed and placed under charge of the Italian consul.

MISCELLANEOUS.

GIBRALTAR.—Passed, July 29, Glenartney (str.), from London, for Shanghai.

PORT SAID.—Arrived, July 28, Montgomeryshire, from Foochow, Achilles, from Shanghai, and both left for London. Sailed, Aug. 1, Hampton, from Batavia, for Rotterdam; July 25, Voorwaarts, from Nieuwe Diep, and left for Batavia; 30, Orestes, from Liverpool, for Shanghai.

Part First now ready.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—

By GEORGE ASHDOWN AUDSLEY, Architect and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says:—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

For particulars apply to the Secretary, at the Publishing Office, 13, Hackin's Hey, Liverpool; or to

H. SOTHERAN and Co., London.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 3rd inst., and published in our issue of that date. Advices bearing date Yokohama July 18 have been received at San Francisco and the subjoined summary of news has been telegraphed to New York:—

The new deliberative Assembly was opened by the Emperor on the 5th July. On the following day debates begun, and they lasted until the 17th July, when the session was closed. The subjects debated were the organisation of a national police force, the improvement of roads and bridges, and the establishment of a popular House of Representatives. The first two were satisfactorily adjusted, and the third left open for further consideration.

The negotiations with Korea have suddenly assumed a less friendly character than before, and many Japanese officials have been recalled from that country. A rumour of an impending war is prevalent, but thus far there has been no such decision by the Japanese Government.

The Department of the Interior buildings in Yedo were destroyed by fire on the 4th July. A great number of ancient historical documents, of which no copies are in existence, were burned, together with the entire collection of maps upon which the Surveying Bureau had been engaged the past four years.

Russian Commissioners are daily expected at Yedo to complete the arrangements for the transfer of Saghalien Island. Formal possession of the newly-acquired territory, which will be occupied as a penal settlement, will follow without delay.

The silk worm egg producers, who lost heavily by excessive supplies last year, have resolved to limit the number this year to 1,500,000.

The American Minister, Mr. Bingham, in Yedo, and Consul-General Van Buren, in Yokohama, offered suitable entertainments on July 5 in honour of Independence Day.

CHINA.

—o—

PEKING AND TIENTSIN.

The *Peking Gazette* of the 4th June contains one of the frequent utterances which find place there, condemning laxity and extortion, exhorting to energy and probity, and requiring the vigorous punishment of unworthy officials. These documents are so common and so notoriously inefficacious, that they are seldom worth notice otherwise than as literary curiosities. The present edict is perhaps worth more, because it is prompted by a man who has the reputation of being strictly upright. Perhaps the term Naval Inspector of the Yangtsze will convey an idea of Peng Yuh-ling's office. It is one which leaves opening enough for peculation, but his reputation is said to be spotless, and his name a terror to evil-doers. A memorial from him denouncing corruption would have undoubted weight; and to judge from the précis given in the edict, he appears to have submitted an able and exhaustive one. It can at least not be alleged in excuse for misgovernment that the capital is uninformed. The avarice of the officials, the excessive taxation, the peculation of underlings, and the distress of the people under all these inflictions, are forcibly stated; and the edict issued in consequence is all that could be desired in tone and theory. But we have so often seen edicts to the same effect, without the slightest good ensuing, that we cannot find much hope in the present one.

We recently gave a summary of a memorial said to have been addressed to Peking by the Governor of Yunnan, disclaiming all knowledge of the murder of Mr. Margary, or of the attack on Colonel Browne. That may have been a genuine document, designed to conceal official complicity, or it may have been written "for publication." We now hear it is reported in well-informed native quarters, that the Governor has also written a memorial to the Emperor, telling of his own prowess in beating back Colonel Browne's expedition, and offering to keep the frontier clear of all foreigners, no matter of what nation.

The *Peking Gazette* of the 29th May contains an edict directing that the Grand Canal be repaired, and fitted for the conveyance of tribute rice to the north. The conveyance of the rice by sea is spoken of as a temporary measure; and all the high officials of the districts bordering on the Canal are ordered to consult and devise measures for deepening the channel, and re-establishing through communication.

The *Gazette* of the 30th May contains a memorial from the Governor of Chekeang, reporting the collision between the *Ocean* and *Fusing*, and the loss of the latter with sixty-five lives. The C. M. S. N. Co. appear to have been held responsible for the rice lost, as it is reported that they have purchased sufficient to make it good. A mark of Imperial favour is solicited on behalf of the officer in charge, Shih Shi-hsien, who was drowned.

A Tientsin correspondent writes that the Chinese gunboat *Chinhae* has left for Newchwang with a fresh supply of munitions of war for the Imperial forces in Manchuria. There was a rumour amongst the Chinese in Tientsin that the troops lately sent there had been attacked by a body of rebels unexpectedly, and suffered considerable loss. The fact of further supplies of powder, shot, and shell being so quickly required does look as though affairs had not gone on well. Ting Jih-chang, formerly Taoutai of Shanghai, and since Governor of Kiangsu, has been appointed Assistant-Commissioner of Foreign Affairs in North China. Sun Szeta, the late Acting Customs Taoutai, had left for Shanghai. The deadlock he succeeded lately in causing does not appear to have injured him much in the eyes of foreigners, for several foreign officials appear to have come down to wish him good-bye.

The *Celestial Empire* says:—We hear on good authority that Dr. Bushell, physician to the British Legation at Peking, was assaulted by stones at one of the gateways of that city on the 21st June, and that on the same day a Russian gentleman was roughly handled by the populace. This is the extent of our information, which is meagre enough; still it leaves an unpleasant impression behind. It is not often we hear of foreigners connected with any of the Legations in Peking being treated with incivility, and in the present instance the attacks seem to have been of a determined nature. We await further news with interest.

SHANGHAI.

The present mail brings advices from this port to the 27th June; the P. and O. mail from London May 14 was received on the 23rd June. The following summary of news is from the *North China Herald*:—

Sir Edmund Hornby has delivered judgment on the question that was argued before him on the 10th June, as to whether the master, crew and passengers of the *Fusing* should recover for the loss of their effects on the same principle as the owners of the ship and cargo. In an elaborate and rather interesting decree, the Chief Judge decides in favour of the crew and passengers, but against the master. From the decision that both vessels were in fault, it follows that he was one of the two real delinquents, "and ought not to recover from his innocent owners or the equally innocent owners of the *Ocean* (their so-called guilt being only an inference at law) in respect of loss brought about in part by his own act."

An inquiry has been commenced at the Mixed Court into the assault on Mr. W. Cooper, near Quinsan, on the 29th April last. The Court was composed of Fan, district magistrate of Quinsan, and Chên, the Mixed Court magistrate, with Wong, interpreter to the Taoutai of Shanghai; Mr. A. Davenport, H.B.M.'s Vice-Consul, being present as British Assessor. The charge involved an attempt at murder, with the addition of that of robbery. The proceedings, so far as they went, were thoroughly unsatisfactory. No prisoners were at first produced, and it was not until after Mr. Davenport's repeated remonstrance that the two ringleaders captured and brought to Shanghai by Mr. Cooper and his friends were placed at the bar—if so distinctive a word can be used with reference to a Chinese Court. It then transpired that no efforts had been made by the Chinese authorities to capture any more of the offenders, though these were numbered by hundreds; and it is even yet a question whether any local inquiry was instituted into the circumstances of the attack. Mr. Davenport, after an hour and a half's time had been in a measure wasted, suggested a remand until some others of the score or more of ringleaders were apprehended; and this being acquiesced in by the Court, the proceedings terminated for the time.

The behaviour of the Mandarins in this case is on a par with their conduct generally. Their efforts are directed to encroachment and the evasion of lawful responsibility. A feeling of irritation more intense than finds expression in printed words prevails among foreigners at the present state of affairs in China. We have yielded and yielded, while the Chinese have encroached and encroached, till people are beginning to believe that nothing short of war will re-establish our prestige and replace our intercourse on a tolerable footing. In defiance of all previous experience, culminating in two wars, the British Government has elected to believe that the Chinese were a civilised people who could be treated with on an equality and trusted to do right For the third time now, a series of contrary evidence is accumulating that must eventually force upon it an opposite conviction, and which is, in the meantime, creating a sense of irritation among those who are on the spot and well-informed that is becoming well-nigh intolerable. Her Britannic Majesty's Repro sentative may have gathered some faint idea of this feeling during his stay in Shanghai, but he has not the opportunity of learning its full strength. We cannot but think that the circumstances which so strongly affect a community not altogether unintelligent must have an effect on the Foreign Ministers, and we have therefore some hope that the point of endurance has been nearly reached. The action which is being taken in the Chinkeang affair seems to be a foretaste of better things.

On the 25th June an alarm of fire was rung through the Settlement, between eight and nine P.M., and the various fire brigades and ladder companies turned out in force with commendable alacrity. The fire was said to be in the French Settlement, and thither the firemen, accompanied by large crowds of foreigners and Chinese, dragged their apparatus through mud and rain only to find the alarm was a false one. On inquiry we ascertained that nobody knew how the alarm was rung. At the French Police Station M. Barbe and his subordinates were confident it came to them from the Central Police Station, while Superintendent Penfold, Inspector Fowler, and Sergeant Mackie were equally sure it came from the French side—Hongkew, being disconnected, having nothing to do with the mystery. That the telegraph alarm bell rang in both the Central and French Police Stations there can be no doubt, but how, is a mystery. No one could explain it, and it is, therefore, left to electricians to decide.

The police have made a successful raid on a native gambling house in the Szechuen-road. The place had been discovered only a little while before, and was apparently newly set up. Inspector Fowler, with some native constables, went to the house, and found about thirty gamblers assembled. They immediately attempted to escape, and ran in all directions, some scaling walls, others climbing to the adjoining roofs, or dropping from windows, and making themselves scarce with the agility of cats. Nine were, however, captured, and will be taken to the Mixed Court. A magazine of gambling apparatus was also seized, showing that the proprietors were adepts at their art.

H. M. S. *Thalia* arrived at Chinkeang at 8 A.M. on the 19th June, and the *Palos* at 3 A.M. next day. The two men arrested at the beginning of the riot were tried in the presence of Mr. Seward and Mr. Medhurst, and sentenced to fifty blows each and a month's cangue. This accounts for the men concerned in the insult to the American Consul and his wife. But it remains to punish the attack on the British Consulate. And so far Mr. Medhurst has failed to obtain from the military authorities any satisfaction for this outrage. He has therefore gone on to Nanking to press the matter on the Viceroy. The civil mandarins appeared well-disposed, but said they could do no more with regard to any further measures than press the case on the military mandarins. There has been no further disturbance, nor does there seem to be any feeling of insecurity at Chinkeang. But such offences as those committed cannot be allowed to pass, and it is satisfactory that the opportunity is being taken to make a demonstration, and press the case on the

Digitized by Google

authorities, with a view to prevent further troubles. Mr. Seward has returned here.

From Hankow we learn that the recent heavy rains have caused the river to swell unusually. On the 19th inst. the high-water mark was 37ft. 7in., and the water rising about seven inches daily. The banks were covered, and the country was flooded in many places, especially in the neighbourhood of the Poyang Lake. Apprehensions are entertained of a flood again this year at Hankow. Nearly as heavy rain seems to have fallen up the river as in Shanghai.

Dr. Elmore, the Peruvian Charge d'Affaires, has arrived, on his way to Peking, to exchange the ratifications of the Peruvian treaty with China. Dr. Elmore sent in his card to the Taoutai on arrival, and the latter called on him at the Astor House, and stayed some time in conversation.

The list of bi-monthly values of shares as given in the share lists, from July, 1873, to the end of May this year, shows that the total depreciation of stocks has been over five millions of taels.

The *Celestial Empire* supplies the subjoined items of intelligence :—

About half way between Shanghai and Sung-kiang is a village named Chu-le-ding, blessed with a barrier customs house on the creek, but otherwise unimportant. To the Tepao of this ordinarily quiet spot came a scared countryman the other day, saying that a band of desperadoes, between fifty and 100 strong, had taken possession of a joss-house in the vicinity. The Tepao repaired to Sung-kiang in all haste, and obtained thence some soldiers ; but not thinking these sufficient, he also came and requested succour from Shanghai. About forty soldiers were therefore sent, and a native creek gunboat. To these the Che-hsien added about the same number of his police ; and after a long fight they succeeded in taking eight of the band prisoners. The rest, making about forty in all, managed to escape. The head messenger has been examining the captives himself, after the Chinese fashion—*i.e.*, by torture ; and has extorted confessions of several robberies. They will be brought before the Che-hsien for trial. It is stated that most of them are former soldiers of the force at Feng-hwang-shan.

Judgment has been given by Sir Edmund Hornby in the case of Norman Hill *v.* E. A. Reynolds, in which a claim was made for settlement of alleged partnership in the steamer *Iron Prince*. His Lordship gave judgment for the defendant, but without costs, as defendant ought, in his own interest, to have answered the petition, pleaded the statute of limitations. and thus in all probability saved the plaintiff from the expenses he had uselessly incurred.

We hear that a meeting of tea buyers and tea tasters was held on Tuesday evening at the club, to consider what steps should be adopted with regard to the new conditions of sale imposed on foreign buyers by the native dealers ; but that, following the usual course of such deliberations in Shanghai, no conclusion was arrived at, and the Chinese are to be allowed to have their own way.

The long-continued rain seems to be doing a deal of damage in the country. Rice has gone up three mace per picul here, and the water on the paddy-fields is now on a level with the creek. Traffic between Shanghai and the country is seriously interfered with, owing to the rains having swollen the creeks to such an extent that the majority of the boats are unable to pass underneath the bridges, and great alarm is felt in Hoochow respecting the fate of the rice-crop.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald* :—

A recent seizure by the Chinese authorities of two chests of opium on board the British steamer *Kwang Tung* has attracted much notice, and caused considerable excitement in native circles. The opium in question was imported by the compradore of a foreign hong—on his own account, and in his own name. The Lekin authorities had certain alleged reasons for suspecting this Chinaman of evading the local dues (which, as our readers are probably aware, are enormous) ; they consequently communicated with the Customs by whose order, we understand, the drug was seized on board the steamer. Whether the seizure was irregular, or not—legal or otherwise—are, we think, quite open questions but it is very certain that had the property belonged to a foreigner it could not have been dealt with by the Chinese authorities in such a summary manner. The owner of the property—being probably in dread of imprisonment and possible torture—consented, however, to its confiscation, in addition to the heavy fine of Tls. 4,200, and so the matter ended.

Colonel Horace Brown—the commander of the last unfortunate Yunan expedition—arrived here on the 9th June. The object of his visit was, we believe, to report to Mr. Wade the particulars of the attack upon the party under his command. Colonel Brown will, no doubt, be able to throw further light upon the circumstances attending the murder of Mr. Margary.

We understand that three of the men suspected of complicity in the murder of Mr. Blacklock, at the Pagoda Anchorage, have been arrested, and are at present in the city, awaiting trial. The late excitement at the Anchorage has apparently subsided.

From Tai-wan we hear of some slight skirmishes between the Imperialists and aborigines. The former are reported to be massing troops in the vicinity of the rebel strongholds.

The recent appeal on behalf of the Seamen's Hospital has met with a hearty response from the community, upwards of $1,000 having been subscribed to the charity.

The Viceroy called upon Mr. Wade at the British Consulate on the 11th June.

HONG KONG.

Our advices by the present mail extend to the 3rd July : the French mail from London May 21 was received on the 29th of June. The following items of intelligence are from the *China Mail* :—

A Marine Court of Inquiry has been held before the Hon. Charles May (first police magistrate), J. P. McEuen, Esq., R.N. (acting harbour master, &c.), Robert McMurdo, Esq. (unofficial justice of the peace), R. H. Cairns, Esq. (Government marine surveyor), Montague Brace, Esq. (master British steamer *Nankin*), to make inquiry into the circumstances of the P. and O. steamer *Zambesi*, master, George Frederick Cates, while within the waters of the colony on 17th June, coming into collision with a certain Chinese fishing junk, by reason of which casualty loss of life ensued. Mr. Brereton appeared on behalf of the P. and O. Company. After hearing the evidence adduced, the Court finds that the collision was unavoidable, and no blame attributable to the captain or officers of the *Zambesi*. The Court has therefore returned his certificate to Capt. Cates.

In the police-court Mr. Brereton has applied that some prepared opium found on board the P.M.S.S. *Great Republic* on the day of her departure be given up to the Opium Farmer. Mr. Russell examined several witnesses as to the seizure, and Mr. Baffey said he searched the steamer by order of Mr. Emory, and found two boxes containing 200 tins of prepared opium in the cabin of the second engineer. No officers of the company's steamers were allowed to carry opium, and on behalf of the company he would mention that the search and seizure was made without warrants, but on the order of Mr. Emory, when he was informed that opium was secreted on board. As there was no one appearing to claim the opium, Mr. Russell ordered it to be given to the Opium Farmer.

His Excellency the Administrator has appointed Mr. J. P. M'Euen, Assistant Harbour Master, to act as Harbour Master, Marine Magistrate, and Emigration Officer, during the absence on leave of Mr. Thomsett. Dr. C. J. Wharry is appointed to act as Colonial Surgeon and Surgeon of the Lock Hospital, during the temporary absence on leave of Dr. Ayres, who has left for Australia.

Amongst those who distinguished themselves at the recent fire on Peddar's Wharf we ought not to have omitted to mention the name of Mr. Evans, chief officer of the P. and O. steamer *Columbian*, who with a number of men-of-war volunteers did good service. The brigades from the *Princess Charlotte* and *Modeste* also deserve special mention.

The s.s. *Japan* has been successfully docked. The nature of the damage was found to be a large hole in the starboard after bilge ; the rudder and the rudder post were considerably bent, the damage to the latter part being the most serious.

The wreck of the *Poyang*, and such pieces of the machinery as have been recovered, were sold by public auction on the 25th June, by Mr. Armstrong, Government auctioneer. The price realised was $900. The Marine Court of Inquiry into the loss of the steamer has completed its labours, but the decision is not yet published.

The Italian frigate *Vettor Pisani* has rescued from one of the Wangi Wangi Islands fifteen of the crew and passengers of the American ship *James Condie*, bound from New York to Yokohama.

It is reported that if an opposition line be started against the H. K. C. and M. Steamboat Company, a third line will share the competition.

The Eastern and Australian Mail Company's screw-steamer *Bowen* arrived here on the 29th June. Her passage out showed a remarkably high average of speed.

The subjoined items of intelligence are taken from the *Overland Trade Report* :—

A few of the foreign residents at Canton were the other day taking exercise as usual on the Bund, when all at once they became sensible of a horrid smell. It was most overpowering, and they hastily beat a retreat. Attention was naturally drawn to the river, from which direction the stench came, and a snake boat, in which were a number of decapitated bodies in an advanced state of decomposition, was seen floating down leisurely with the tide. It appeared that this craft, manned by a number of pirates, had attacked a passage boat. The occupants of the latter, however, had proved too numerous for the desperadoes, and had seized them, cut off their heads, pitched the bodies into their own boat, and allowed it to float away. Some of the steamers at Canton endeavoured to fire into it and sink

Digitized by Google

it with its ghastly freight as it passed them, but they could not hit it. The attention of some of the petty mandarins was drawn to it, and measures were taken to have it removed from the river.

The British steamship *Carisbrooke*, so notorious of late through her seizure, has arrived from Canton. The rudder is terribly smashed up. The shot, after splintering up the rudder, appears to have ripped along the counter of the starboard side, as there is a large hole nine inches above water, which is filled in with bags to keep the water from being swept in by the working of the propeller. On her arrival a number of people went off to examine the damage. There have also arrived in her three Europeans, in the employ of the Chinese Customs House, to protect the cargo. On the 1st July Captain Cairns made an inspection of the vessel. He gave it as his opinion that the inquiry in her side, which Mr. Marsh Brown said was caused by a bolt from the rudder, was produced by a shot. The *Carisbrooke* is now discharging her cargo into Messrs. Russell and Co.'s godowns.

A meeting of the Legislative Council was held on the 29th June. An addition of £100 to the grant made to the family of the late Mr. Douglas, it was announced by the administrator, had been authorised by the Secretary of State. An ordinance providing for a supplementary estimate of $150,000 was read a first time; so, also, were ordinances to provide for public and Bank Holidays, for licensing small passenger steamers, for the more effective protection of Her Majesty's naval stores, and for the regulation of pawnbrokers' licences, to provide for the devolution of the site of St. Paul's College. The sum of $9,000 was voted for the repair of damages to public works caused by the late typhoon. It was also decided, after some discussion, to vote $3,400 for improvements at East Point.

An extraordinary meeting of the shareholders of the China Traders' Insurance Company was held in Hong Kong on the 21st June, when some amendments in the articles of association were discussed and ultimately agreed to. It was announced that a confirmatory meeting would be held on the 5th July. The secretary *pro tem.* submitted a statement showing the exact position of the company, from which it appeared that the balance of assets over liabilities amounted to $216,000. One of the shareholders, Mr. Stephens, disputed the correctness of the statement, and wished to have the company wound up. Most of the shareholders were averse to this, and it was resolved, in order to strengthen the position of the company, to agree to the proposal made by the directors, that a call of $500 per share should be made, payable in three instalments, $100 in July, $200 in September, and $200 in December.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 10th July; the P. and O. mail from London June 11 arrived out on the 10th July. The following summary of news is from the *Straits Times*:—

Judgment was given by the Chief Justice on the 5th July in the suit of Messrs. Boustead and Co. *v.* the late firm of Harrison, Smith and Co., to recover the balance due on certain promissory notes. The circumstances of this case are somewhat peculiar. Before the notes fell due, Messrs. Harrison, Smith, and Co. sustained losses, which necessitated the stoppage of their business, and at a meeting of their creditors it was deemed advisable that the firm should go into liquidation, the managing partner of the plaintiff's firm being one of the committee under whose supervision the estate was realised. Dividends were paid to the creditors amounting to about 75 per cent., and this action was brought to recover the balance of the debt due to the plaintiffs. On behalf of the defendants, it was pleaded that it was tacitly agreed the liquidation should operate as a release from all further claims in respect of the debts of the firm, but as they failed to prove any specific agreement to that effect either with the plaintiffs or at any meeting of creditors, judgment was given for the plaintiffs.

It is rumoured that Captain Ord, the present Assistant Treasurer at Malacca, is to come to Singapore as Acting Postmaster-General, in the room of Mr. Trotter, absent on leave. As the duties have been already very satisfactorily performed for the last three months by Mr. Harman, the Assistant Postmaster in charge, without any extra remuneration for his trouble, it is difficult to understand the necessity for any such appointment, and the feeling is very general here that the acting appointment, if necessary, should be given to the officer who now does the work so satisfactorily.

Murders and assaults with deadly weapons have become alarmingly frequent of late. Several cases of this nature have come before the Assizes now being held, and one or two more stabbing cases have occurred since the sessions began. Besides two or three wilful murders, the cases of cutting and wounding have been of the most aggravated description, the murderous intent being painfully apparent. In order to check these crimes, the Chief Justice has passed very severe sentences upon those who have been found guilty, two having been sentenced to ten years' penal servitude, and another, a European, to four years. There are several other cases of this nature on the calendar.

Duncan Ross, cook of the steamer *Sarpedon*, has been arraigned at the Assizes, charged with culpable homicide, not amounting to murder, in having caused the death of a seaman named Thomas Wilkinson. The jury, after hearing the evidence, returned a verdict of not guilty, and the prisoner was discharged.

The news from Atchin is unimportant. Colonel Pel, who has held the civil and military command since General Van Swieten left, has been relieved by Colonel Van Kirchem. Neither the Dutch nor the Atchinese seem to be making any movement of importance; the invading force appear to have adopted the policy of merely holding on to their positions, trusting by tiring out the patience of the enemy to effect their ultimate submission.

On the morning of the 11th June a slight shock of earthquake was felt at Manila. Earthquakes appear to be very frequent of late, to judge from a correspondent's letter in the *Comercio*, in which it is stated that, from the 19th May to the 3rd June (the date of the letter), earthquakes were felt daily there. On the 19th June a new tug steamer, named the *Mariposa*, was launched at Manila on account of the firm of Russell and Sturgis there.

A fire broke out on the 7th July among the spare sails on board the American ship *Bengal*, while lying at the Borneo Company's wharf, but was extinguished without doing any serious damage.

PENANG.

Our advices extend to the 12th July, the P. and O. mail from London June 11 arrived out on the 8th July. The following items of news are from the *Penang Gazette*:—

The intelligence we have received this week from Atchin is on the whole of a favourable nature for the Dutch, who have again repulsed an attack made on several of their posts, without sustaining any loss. The Atchinese had three killed and eighteen wounded. It is reported that Tuanku Daub, a boy of about eleven years of age, cousin of the late Sultan of Atchin, has been proclaimed Sultan, yet it remains to be seen in how far this appointment will be approved of by the majority of the principal headmen.

On the 1st and 2nd a violent storm visited Atchin Proper, several large trees having been blown down in Kottah Rajah and neighbourhood. A very large branch fell upon one of the hospital wards, causing the death of no less than seven men; and another case is reported of two men having been killed by the fall of a tree at Misigit Longbatta, one of the Dutch posts. The state of health is still stationary, but cholera has entirely ceased.

General Pel is spending three months in Java, at the end of which period he will resume his command at Atchin.

The Head-Inspector of Lights and Beacons passed through this place on Saturday last, *en route* for Atchin. He is to superintend the final arrangements of the light-apparatus at Pulo Bras, and the light was to be exhibited regularly from the 1st instant. The lighthouse is named "Willemstoren."

The Rev. Mr. Biggs, from Malacca, having been appointed to do duty as Colonial Chaplain of Penang, we understand, pending further arrangements, arrived here yesterday, and, consequently, there will be divine service in St. George's to-morrow.

We hear it rumoured, on good authority, that Captain Ord is to be removed from Malacca to Singapore, in which latter place he is to be fitted into the office of Acting Postmaster-general of the Straits Settlements.

Commercial Report.

(For dates see first page.)

IMPORTS.

TIENTSIN. — Some business had been done at about a par with Shanghai rates, but the market was not active. Drills showed a slight profit.

HANKOW.—Grey Shirtings: Small business at somewhat unsatisfactory rates. T-Cloths and Drills of better value. Long Ells and Camlets in good request.

CHINKIANG.—Messrs. Spencer, Wolff and Co. report:—Notwithstanding almost incessant rain, and the depressing nature of advices received from Shanghai, a lively business has been conducted in Plain Cottons; medium to fair 8¼ lbs. Grey Shirtings have commanded most of the attention of our dealers, T-Cloths being in only moderate request; but holders are not anxious to press sales of these goods, as they look for an advance on present rates.

SHANGHAI.—Cottons: There had been little change in the state of the market for Cottons, and business had been transacted at about last mail's rates. In some instances rather lower prices had been accepted, Drills alone being quoted slightly higher. In 7lbs. and 8¼lbs. Grey Shirtings only a small business had been done. Heavy Shirtings had been in some demand at a reduction. White Shirtings in small request. English and Dutch Drills firmer, with small stock. No demand for Jeans. English Sheetings saleable at a slight reduction. No transactions in American goods. T-Cloths: 7lbs. Mexicans of the value of Tls. 1.4.0 found ready purchasers; other T-Cloths easier, and not in good demand. Fancy Cottons.—Quotations for Chints, Velveteens and Muslins lower; other Fancy Cottons unchanged with

Digitized by Google

little business in any kind. Woollens.—Spanish Stripes and Camlets selling at the regular auctions at current prices. There was not much business doing privately. Long Ells in fair request, auction sales of Scarlet at lower prices, these being in ample stock. Assorted Long Ells unchanged, and the stock not heavy. Figured Orleans, market weaker.

FOOCHOW.—500 pieces 8¼lbs. Grey Shirtings sold at $2.725; small sales of Lead at $9.00 against Tea and $8.75 per picul cash.

HONG KONG.—The arrivals during the interval, besides the mail steamers, had been the s.s. Belgic, Galley of Lorne, and Bowen, bringing full supplies of manufactured goods for this market and the North The dulness previously reported had continued without any amelioration, and the few transactions which had been reported were at lower prices. There had been no improvement in the tenor of advices from the outports, and the disastrous accounts from home had made the dealers more reluctant than ever to add to their already heavy stocks. The advices from the North are still more unsatisfactory, and the want of confidence felt there was reacting upon this market.

CANTON.—Lead had again advanced, and about 800 pigs had found buyers at $8.35 to $8.40 for LB. "Hole" chop had been sold at $8.45 to $8.55 per picul. Quicksilver was quoted $127 per picul, but no sales reported.

BATAVIA.—There had been little change in the market. A general dulness still prevailed for Cotton Goods; buyers from the interior were still keeping out, in consequence of which Chinese dealers were but slowly working off their stocks, whilst the danger of increasing the credit of most of them rendered it difficult to effect sales of any importance.

SINGAPORE.—Messrs. Boustead's Circular says:—Piece Goods: The market has been very quiet during the past fortnight, and prices have ruled weak, under the influence of unfavourable advices from Manchester; 8¼ lbs. Grey Shirtings have been slow of sale at a decline of 2½ cents; 7 lbs. are in some request.; 7 lbs. T-Cloths are in moderate supply and fair request, 6 lbs. T-Cloths are wanted—and all arriving have been taken at previous prices. White Shirtings—fine makes only have been wanted; Grey Yarn, all numbers have been in poor request, and prices are slightly lower. Iron has been quite neglected during the fortnight, and prices are in consequence nominally unchanged; Copper Sheathing has met with a small inquiry. Yellow Metal has been sold at a reduction on last quotations; Zinc Sheathing is quiet; trifling sales of Roll Zinc; Brasswire is more inquired for, and prices have improved; Pig Lead moves in small quantities at former prices. Sheet Lead has been taken to a small extent.

PENANG.—The market had continued extremely quiet; the business effected had been of very small extent, and prices had remained without alteration.

EXPORTS.

TEA.

HANKOW.—Messrs. Evans, Pugh, and Co.'s Report says:—During the fortnight that has elapsed since the issue of our last report about 66,000 chests of tea have been sold at this port, which is about 10,000 chests in excess of the business done in the corresponding time last year. The shipments to Shanghai show a considerable falling off, being 16,000 chests, against 33,000 chests. The stock has at no time been allowed to accumulate, teamen having continued to be free sellers. Total arrivals show an excess of about 45,000 chests over those at the same time last season. It is probable that the first crop will be at least that quantity larger than it was in 1874. Prices of most descriptions have shown but little change, the commoner classes are however rather lower. But few Ningchows have been offered on this market, only about 4,000 half chests having found buyers at rates which show fair value. Second crop teas are expected to be offered during the present week. Reports as to the quality vary much. After the heavy rains that we have had of late we are prepared to find it inferior. Quotations are—For medium to fair Oopacks, Tls. 16 to 24, against Tls. 16.50 to 25 at same date last season; for medium to fair Oanfas, Tls. 20.30 to 31.50, against Tls. 18.25 to 28 do.; for medium Oonahms, Tls. 16.25 to 19.50, against Tls. 16 to 19 do.; for common Oonahms, Tls. 14.25 to 15, against Tls. 14.75 to 15 do.; for medium to fair Ningchow, Tls. 22.50 to 28. Settlements to date are, 311,942 chests, against 241,871 chests in 1874.

KIUKIANG.—Settlements of Black teas since the 7th June amounted to 2,862 half-chests, at Tls. 28 to 39 for local-packed, Tls. 20 to 40 for Hohows, and Tls. 24½ to 28 for Ningchows. Total arrivals, 106,449 chests. Stock, 1,000 chests.

SHANGHAI.—*Black:* There had been a fair business transacted, but the total settlements since the opening of the market showed a marked decrease as compared with those of last season, the figures being 36,060 chests, against 49,196 chests at the same time a year ago. The only change to notice in prices was a decline of Tl. 1 per picul in Oonams and a fall of Tls. 1 to 2 per picul in the rates paid for medium Ningchows. The settlements for the fortnight amounted to 26,753 chests, comprising 10,861 chests Ningchow at Tls. 25.30 to 40, 8,053 chests Hohow at Tls. 16 to 36¼, 2,729 chests Oonfa at Tls. 23½ to 29, and 5,110 chests Oonam at Tls. 19 to 21. Stock: 19,000 chests, against 13,000 chests last year. *Green:* On the 15th June musters of a chop of Taeping tea and a common Pingsuey were shown; no further musters were placed on the market until the 21st, when some chops of fine Pingsuey were shown. There were 12 chops Pingsuey and 2 chops Taeping on offer. No business had taken place, as buyers were holding off for a larger reduction on last year's opening rates than the teamen were inclined to submit to. The quality of tea on offer was very much like that of last season, both in leaf and liquor. The stock consisted of 5,892 half-chests Pingsuey, and 571 half-chests Taeping.

FOOCHOW.—Messrs. Westall, Galton and Co.'s Weekly Letter says:—At the commencement of the week several very unfavourable telegrams were received from London, which very nearly had the effect of suspending operations for that market. The comparatively small business that has taken place since, for the time of year, has been almost confined to operations for the various Colonial markets. Congou: Notwithstanding that Australian buyers have been operating on a fair scale, a considerable reduction is noticeable on common and flavoury grades—say, a fall from the highest point of Tls. 3 to 4. Medium, good medium, and fine kinds have also declined in value. Souchong: Settlements are without change. Oolongs: Rates have been maintained. Flowery Pekoe: The few parcels that have changed hands show better value. Scented Teas: Previous quotations have been maintained, without the same amount of attention being bestowed on this description. Late arrivals are better scented. The export to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 18,371,455 lbs., against 12,129,336 lbs. at the same period last year; to the Colonies 1,121,041 lbs., against 1,933,660 lbs. last year.

AMOY AND TAMSUI.—Arrivals of Ooloong at Amoy had been 4,304 half-chests, consisting mostly of superior and fine grades, good cargo kinds still being scarce. One chop grading extra fine was settled for the London market at $29.50 short, showing no change in value. Congous: Offers for about 5,000 half-chests were made on a basis of $18 per picul short for fairly clean liquoring teas, but no business had resulted, teamen wanting $2 to $3 more than the above figure. Arrivals to date 35,825 half-chests. Formosa Ooloong: From Tamsui advices to the 26th June reported a continuance of business on much the same scale as advised in our last. Foreigners had been buying very sparingly the teas on offer, which consisted almost entirely of medium kinds, say from good to superior cargo, on which a drop of about $1 per picul was quoted. Fully late rates were maintained for fine and finest grades, while choice and choicest grades continued very scarce. A few musters of second crop teas had been shown on the market and were much better than the spring crop, the appearance of the leaf being decidedly better. The export to date amounted to 969,988lbs., against 858,612lbs. at the same time last year. No further transactions in native packed Tamsuis had taken place, but musters of about 4,000 half-chests would be on show in a few days, and business would no doubt result, as teamen were rather anxious to realise.

CANTON.—Messrs. Deacon and Co.'s Report says:—Our market has been very quiet during the past fortnight, and but little business has been passing. The very unfavourable telegrams received from home immediately after the departure of last English mail have deterred buyers from entering into any extensive operations, and we do not expect to see business generally resumed until more reassuring advices reach us, and teamen are willing to accept lower terms than have hitherto been current. Congous: Settlements have been small, and show no change. From Macao a few shipments still continue to be made, but prices are still above rates ruling at home. Scented Teas: Although a somewhat lower tendency in our market for Capers is generally noticeable, yet settlements have been so unimportant that we make no change in quotations. Purchases of fair and medium sorts show rather better value than formerly, but prices for fine Teas are well maintained, and the supply of these is now small.

SILK.

SHANGHAI.—The Chamber of Commerce Report says:—A comparatively steady market has existed for Silk during the fortnight, the demand running principally on medium and common Tsatlees. The arrivals have come in freely from the interior, and the stock is considerable, but the sales that holders have been able to effect have just been sufficient to prevent them getting uneasy to any noticeable extent, so that quotations are to all intents and purposes unchanged. Taysaams of the coarse sort have hardly been in as much favour as at first, but still buyers have been found for a considerable quantity of Woosich's and Sinszes at from Tls. 235 to 250; Laeyangs have dropped to Tls. 222½ for fair descriptions. Quotations for Chop Silks are Tls. 400, 380 and 360 for Koo-fong-sing's Nos. 3, 3½ and 4 Tsatlees, Tls. 330 for Blue Elephants, Tls. 312½ for Ching-yong-shing's No. 2 Kiahing; the latter sorts are wanted, the former very difficult of sale. The weather has been very unfavourable for the second crop, and any great increase in the export over that of last season is hardly to be expected. Settlements for the fortnight, Chinas, 6,000 bales. Total settlements since 1st June, 1875, 10,000 bales, against 1874-75, 6,500 bales; 1873-74, 5,000 bales. Comparative unsold stock on this market, on the 26th June, 1875, 14,000 bales; 1874, 2,500 bales; 1873, 8,000 bales.

CANTON.—Messrs. Deacon and Co. report:—The current price of No 4 Tsatlee is $330 per picul, or 12s. 3d. per lb., while last London advices by telegram quote same classification 11s. 6d. per lb. There was a moderate demand in the early part of the fortnight, and 300 bales were reported settled for last French mail; latterly, however, there has been little desire to operate, and only 100 bales have found a buyer in the past week. The stock in Canton is gradually increasing, and the tendency of the market is towards lower prices, but it is unlikely that any material drop will take place suddenly. Late arrivals of second crop silk are turning out better than was anticipated, the quality is not on a par with that of previous yield, but the thread is less foul than early musters promised. Loong-kong: there have been no transactions in this description; Long-reel: 70 piculs and 40 bales are the purchases reported for India; Re-reels: No new contracts have transpired.

TELEGRAMS FROM THE FAR EAST.

CHINA AND PERU.

SHANGHAI, AUG. 15.—The Treaty of Commerce concluded between China and Peru was ratified at Tientsin on the 7th inst.

PAGE—On the 19th July, at Port Said, Egypt, William R. Page, U.S. Consul, aged 55

PHILIPPS—On the 8th Aug., at his residence, The Wray, Grasmere, John Philips Philipps, Commander R.N., in his 82nd year.

THOMSON—On the 29th June, at Penang, James Cameron Thomson, of Malakoff Estate, Province Wellesley, Penang.

WILLIAMS—On the 25th June, at Hong Kong, Alcida, daughter of Wm. John and Isabel Williams, aged six months.

Naval and Military.

Admiral Collinson, K.C.B., who has been selected to succeed Sir Frederick Arrow as Deputy-Master of the Trinity House, entered the Navy in 1823, and became lieutenant in 1835. In 1840 he joined the Wellesley, 72, in the East Indies, and during the operations against Canton in March, 1841, he was officially praised for his very skilful and highly meritorious exertions in piloting the Modeste, 18, to an excellent and effective position about 600 yards of the last fort protecting the approaches to the city; and he obtained every favourable consideration also for his useful efforts in sounding, conjointly with Lieutenant Henry Kellett and Mr. Richard Brown, master of the Calliope, and conducting several men-of-war safely to an anchorage off Canton itself. At the capture, in May following, of the whole line of defences, extending about two miles from the British factory, he was further active in getting the ships into their respective positions. He likewise, on August 26, having assumed command of the Bentinck (10), evinced his skill in sounding the channel ahead of the station occupied by the Wellesley, and in then gallantly anchoring within the entrance of the bay. In October he assisted at the recapture of Chusan and the storming of the fortified heights and citadel of Chinghai. He became commander 1841, and in 1842 was appointed to the Plover; and subsequently, on the night preceding the capture of Chapoo, sounded thoroughly and effectively between the anchorage of the ships and the shore, and was engaged in June and July in surveying the channel before Woosung, preparatory to the attack on its batteries; also in the hostilities against Shanghai, and in commendably overcoming all the difficulties in the navigation of the Yangtsze during the advance of the British on Chin-kiang.

A distinguished service reward of £100 per annum has been awarded to the Rev. H. Huleatt, M.A., first-class chaplain to the forces. Mr. Huleatt was appointed chaplain in October, 1856, having previously officiated in the Crimea from September, 1854, to the close of the war in 1856 (medal with clasps and Turkish medal). He was senior chaplain to the China Expedition in 1857, and was present at the capture of Canton, when he was mentioned in despatches. Was also in 1859 present at the unsuccessful attack on the Taku Forts, when he was dangerously wounded by a ball while attending to the wounded on the mud banks. He received the medal with clasp for his services on this occasion.

Major W. Stevens, late of the 2nd Queen's Own Regiment, has been installed a Military Knight at St. George's Chapel, Windsor. Major Stevens has seen much service in the China and Ashantee wars. He served in the ranks of the 49th Regiment throughout our first war with China in 1842, and was present at the taking of Chusan, storming of the heights of Canton and other affairs.

The repairs of the Fawn—which we noticed in May last as likely to be commissioned for surveying work in China or Japan—will occupy about two months. She will be fitted with the boilers from the Royalist.

A FEW days since Dr. A. D. Kerr, M.B. and C.M. was found drowned in the harbour at Millport. Dr. Kerr was last seen standing on the quay, and it is supposed he must have stepped over the quay, and no one being at hand to give him help, lost his life. Dr. Kerr was little over thirty years of age. He had practised abroad in India, China, and Japan, and also served as surgeon on board of some ships.

IT is stated at Berlin that the remainder of the indemnity due to German subjects for the plunder of the brig *Bismarck* in Chinese waters has been paid, and the Governor-General of Canton has written to the German Consul expressing great regret at the lawless act which had been committed.

THE Geographical Congress now in session in Paris has granted exceptional rewards to M. Francois Delaporte, and M. Garnier (deceased), for their journey to Cochin-China, and to the Austrians, Herren Payer and Weyprecht, and Count Wilczeck for their recent North Pole expedition.

ON the 3rd inst. Messrs. John Roach and Son launched from their ship-building yard at Chester, U.S., another steamer for the Pacific Mail Steamship Company. The new steamer is sister ship to the *City of Peking* and *City of Tokio*, and is named the *City of Sydney*.

LOSS OF A MESSAGERIES MARITIMES STEAMER.—The Messageries Maritimes *Nera* went ashore on the 7th inst., eight miles from Batavia. It is impossible to float her. The passengers, crew, and despatches have been saved, but the cargo is under water.

THE King of Holland has granted permission to Mr. W. F. H. Von Weckerlin, resident in Japan, to accept the Commander's Cross, first class, of the Danebrogs Order, conferred on him by the King of Denmark.

THE Board of Trade have received a copy of a notice issued by the Portuguese authorities at Lisbon, declaring Bangkok and all other ports of Siam free from cholera since the 23rd of May last.

THE Eastern and Australian Company's steamer *Bowen* arrived at Brisbane, from Singapore, on 13th inst., two days early, with London mails of 25th June.

The Pacific Mail steamship *City of Peking* arrived at San Francisco on the 5th inst., bringing dates, Hong Kong, 10th; Shanghai, 9th; and Yokohama, 18th July.

LONDON: TUESDAY, AUGUST 17, 1875.

THE STRAITS AND THE MALAY STATES.

IN a Blue-book of 271 pages, which has just been presented to Parliament, we have a very copious narrative of the principal relations between our Government and the States of Laroot and Perak, Salangore, Rambow, Pahang, and Johore, from the early part of November, 1872, to the 23rd of last March. There are no less than seventy-five despatches in the volume, but some of these are not published entire, and there are others referred to in the correspondence which it has not been judged expedient to print. Nevertheless, no one can rise from a perusal of the correspondence now issued without obtaining a very complete insight into the original attitude adopted by our Colonial-office and its local representatives towards the disorganised Malayan dependencies, as well as into the motives and causes which ultimately led to an entire change in that attitude, and to a settlement of the disturbed districts which promises to be as permanently prosperous as it was immediately successful. Mistakes were made—one of them of no small consequence—by the executive authorities in the Straits in the course of their very long and very responsible operations; and, as to the blanks in the papers now made public, we may be quite sure that the passages omitted relate to matters on which the Home Government had some fault to find. The gravest error—one which at the time of its occurrence the mercantile community in Singapore were not slow to condemn—was that committed by the late Governor ORD when he formally recognised the Mantri of LAROOT as an independent ruler, and by an official proclamation authorised that chieftain to obtain arms, ammunition, and other supplies from Penang for the purpose of quelling disturbances in his own district, and setting himself up there in exclusive sovereignty. At a later stage in the events all this policy had to be reversed, and we find the British officials reporting that "the Mantri is undoubtedly lowest "in rank of the four principal officers of the Perak Go-"vernment, and has assumed in Perak a position of in-"dependence which his office and rank do not justify." Further on they condemn this chieftain's conduct in still stronger terms. Yet Governor ORD actually prolonged the disturbances in Perak by mistakingly assisting the Mantri to maintain himself in revolt.

Nothing in this Blue-book strikes the reader with greater surprise than the little knowledge possessed at the outset by the officials in the Straits with regard to the geography, the resources, the history, and local politics of these contiguous native States. This is an evil which, under the new *régime*, is being rapidly remedied; but it does seem astonishing that at the outset, when clouds began to gather, when the Chamber of Commerce in Singapore was first heard complaining, and the Chinese traders were framing petitions, there was really no one in the Straits Government—though there are several who have been twenty and even thirty years in the East—who could pretend to anything more than familiarity with the Malay tongue, long experience of the natives, and a general acquaintance with the coast-line of the unsettled provinces. The causes of this ignorance are not far to seek; in part it was a consequence of a policy long and steadily pursued of non-interference in the affairs of independent neighbouring potentates. There was nothing which any British officer might hope to gain by directing his attention to the condition of provinces which, however important to us, we had made up our minds to let alone. Another circumstance which had influence was that in the Straits there never had been any bureau or department—representing as it were a local Foreign-office—specially charged with the management and conduct of all our business with the Malay provinces in treaty with ourselves. The disturbances now seem to have all been satisfactorily put an end to; the future is full of promise, but the consequences of our own ignorance and neglect might have been much more seriously felt had the crisis chanced to come at a time which found the Home Government less able to give that close supervision to the various transactions than they are proved in the present correspondence to have bestowed. Let us hope that now, with local Residents appointed to control the administration of the principal States, we shall be able at all times to command the most trustworthy information.

It is curious, too, to notice how, as the ignorance just referred to gradually passed away, our Colonial Official slowly changed its views as to the true policy to be adopted. In August, 1872, we find the Colonial Secretary at Singapore stating, in reply to thirty-four Chinese merchants who petitioned for the protection of their property and agents at Salangore, that "if traders, prompted by the "prospect of large gains, choose to run the risk . . . "in these countries, it is impossible for Government to "be answerable, &c." This sentiment is immediately approved by Lord KIMBERLEY. A similar answer is made direct from the Colonial-office in June, 1873, to an English firm who wrote to ask whether British subjects would be protected in Salangore. Not very long after this it began to dawn upon Governor ORD, and also on Earl KIMBERLEY, that the revenues of the Straits Settlements and their commercial prosperity had a vital interest in the maintenance of peace within the neighbouring native States, and in the development of the various resources of those countries. "An entirely different policy" towards the Malay Rajahs is now advocated; Sir ANDREW CLARKE, before he leaves England, is instructed to devote his attention to this matter, and the steps which he took to put things on a satisfactory footing are no sooner reported home than they receive entire approbation. The previous policy of non-interference was indeed a most mistaken one—as is clearly shown in the published correspondence—and it originated in our own ignorance, in our not recognising the true constitution of the Malay régime. This constitution is essentially feudal. The Sovereign of Siam is Lord Paramount of the Northern Malay States, and the slight control he exercises in regulating the succession, and putting down revolt if necessary, is sufficient to preserve each petty government from disintegration and decay. The Sultan of Menang-Kabow, in Sumatra, discharged the same duties towards the provinces in South; but when the English and Dutch between them put an end to the Sultan's authority, they destroyed the Lord Paramount, and there was no Power to take his place. The result has been that disturbances broke out whenever a Rajah died, and interference has at last been forced on us by a state of misgovernment and anarchy, accompanied by piracy and violence of every kind, which might in a great measure have been prevented had we understood our true position, our duties, and our interests better. We hope that the next Blue-book published on the affairs of our Malay dependencies will have a very different tale to tell.

REDRESS IN CHINA.

IN a late issue we alluded briefly to the rumour which, according to a telegram published in the daily papers, had obtained currency in China to the effect that it was under contemplation to despatch a special embassy to England with reference to the difficulty which has arisen in consequence of the murder of the late Mr. MARGARY. The whole circumstances connected with this lamentable affair seem, however, to be drifting so rapidly in the same direction as that into which so many similar negotiations have drifted, that we do not hesitate to recur to the subject, and to point out the danger which the home Government will incur if they

Digitized by Google

fail to act with promptness and allow the Chinese an opportunity of staving off inquiry until they have gained sufficient time to give their own colouring to the facts. There can be no doubt in the mind of anyone who has had experience of the way in which the Chinese officials habitually act in cases of this kind, that one of their chief objects will be to create as much delay as possible; and it is most probably with this idea that they have hit upon the expedient of despatching the special embassy. In respect to the Tientsin massacre, there could be no question that this hope of delay mainly actuated them in despatching CHUNG-HOW, and we may be certain that nothing will favour them more in the present instance, or be more in accordance with their traditional policy, than to stave off the matter until it has become so difficult as to be almost hopeless to arrive at the actual facts and to bring home the derelictions of the officials to the guilty parties. How constantly this policy of procrastination has been resorted to by the Chinese, and how successful it has repeatedly been will be seen by the subjoined extract from the fly-leaf of the DENHAM and GULLY Journal, published in a London paper as far back as 1843:—

December 5th, 1843: The Indian mail which has just arrived has brought the report of the Chinese authorities on the inquiry they were ordered to make respecting the murder of the crews of the *Nerbudda* and *Anne*. This inquiry was undertaken on the demand of Sir H. Pottinger. The report is ridiculously defective in every respect but one, namely, in that which declares the authorities at Formosa to have obtained from the Emperor rewards and honours by fraudulently and falsely representing the mode of the capture of the two unfortunate crews. The parties thus guilty are doomed to punishment. On this point it is plain enough, and so far it fully confirms the statements made in the journals of Captain Denham and Mr. Gully. Those journals will furnish, if the Chinese think fit to use them, the means of obtaining fuller information on other points. And it is even yet to be hoped that they who caused the murder of so many of the captives will be at least equally punished with those who won honours and rewards by false representations. The Chinese Government should be pressed to make further inquiries.

We can only say in the present instance the Chinese Government should be pressed, and firmly pressed, not only to institute the necessary inquiries, but to insist upon the punishment of the guilty parties. This was supposed to be the course adopted, and it is scarcely to be believed that the Government at home—whatever may be the ideas of its representative at Peking on the subject—will depart from this simple treatment of the matter because the Chinese officials desire to adopt in regard to it a line of procedure which can only be designed to increase the already great difficulties in arriving at a true understanding of the matter. It is possible, though we should be sorry to think it probable, that our Minister at Peking may be disposed to listen to the suggestion of a special Embassy being sent, under an idea that that course will spare him much trouble and responsibility; but such a course amounts to nothing less than deliberately allowing the Chinese officials to snap their fingers at his authority, and, if adopted as a precedent, it must have the effect of entirely doing away with the influence of our representatives, while it will most assuredly tend not in favour of, but directly against, any satisfactory settlement of the difficulty. Neither our Minister nor the Home Government can prevent the despatch of the Embassy from Peking, but the answer which should be given to it by the Secretary of State for Foreign Affairs is clear, namely, that while the Home Government is willing to listen to all that may be urged upon it, the settlement of the matter must rest with the Minister at Peking, and the Chinese Government must satisfy him that justice has been done by them.

THE SEIZURE OF THE BRITISH STEAMER "CARISBROOKE."

ACCORDING to the statement of the case connected with the above incident, drawn up by Mr. HAYLLAR, counsel for the defence, it appears to be admitted that the steamer was actually within three miles of Hainan, and consequently within China waters—a circumstance which, of course, diminishes to a considerable degree the importance of the matter in an international point of view, though it does not detract from the grounds of complaint as to the high-handed manner in which the whole affair was conducted, and the undesirableness that Customs' cruisers should be allowed to fire into foreign vessels except the most urgent necessity exist for taking that course. It appears, however, that the matter has been fairly investigated, and that Sir BROOKE ROBERTSON has done all that was in his power to arrive at an equitable settlement of the affair. An unfortunate technicality, however, seems to stand in the way, namely, that the Treaty provides for the confiscation of the vessel and cargo, and not the imposition of a fine; so that, although the Chinese authorities at Canton were willing that a much smaller punishment than seizure of the whole should be inflicted, they have been unable to do so, and the case has had to be referred to Peking. A very important opinion upon the question of confiscations and fines in China was given by Sir FITZROY KELLY and the late Mr. WINGROVE COOKE, in which it was pointed out that a distinction existed in exterritorial countries between confiscations and fines. The former being *in rem* it is competent for the Chinese to make, but the latter being in the nature of punishments and *in personam*, can only be inflicted by the Consul of the party accused. The difficulty which has arisen might be entirely averted by rules being drawn up with due reference to this distinction, that is, making the seizure of the vessel merely the preliminary step, the vessel being held as security for such penalty as the Consul and Chinese authorities sitting together as a Mixed Court shall consider requisite to meet the merits of the case. The matter is to be referred to Peking, and it is to be hoped that this point will be adjusted in this manner. It is obviously unjust that the seizure of a whole ship and cargo should in all cases be made the penalty for the breach of fiscal regulations; but, of course, it cannot be expected that the Chinese will give up their right to take this course, until adequate means are provided for inflicting such penalties as may be in accordance with the merits of individual cases. We are glad to observe that Sir BROOKE ROBERTSON contended that there were several mitigating circumstances in the present instance, and appears to have given complete satisfaction to the defendants by the manner in which he felt called upon to protect their interests and to see that justice was done.

THE report of the proceedings at the meeting of the creditors of Messrs. SHAND and Co., an old-established firm connected with Madras and Ceylon, exhibits a further specimen of the mode of transacting business which has largely increased in late years since the introduction of the new systems of financing. What a firm can expect to come to that accepts bills in the manner shown in the late failures arising out of COLLIE and Co. it is difficult to imagine. The bills of this firm were accepted by either their accomplices or their dupes without any sort of security. In cases such as RAINBOW, HOLBERTON and Co., which commenced with some cotton operations, no goods or documents could be traced, but yet the firm accepted up to £50,000, and were content with COLLIE and Co.'s promises that they would square up in August. These bills, which represented nothing, were swallowed by our first-class banks. It seems clear that once a firm gets into a swing of credit with such a Bank as the London and Westminster everything is "put to their credit" without scrutiny; hence we find advances to KILBURN, KERSHAW and Co. on silk, largely above the market value, and COLLIE'S bills upon men hardly known in the mercantile world. It is of little avail to descant on what has passed, but it is of avail to bring to justice all cases of abstraction of goods such as existed in the case of LYALL, STILL, and Co. and others. In this respect it is to be hoped that Bank directors and creditors generally, will not shrink from making an example of all such delinquents.

IN the account given in the local papers of the destructive fire which took place at Hong Kong on the night of the 22nd of June, we read that both of the Government fire-engines broke down. Apart from the cost of the engines themselves, there is an annual charge on the colony of salaries for a superintendent of the fire brigade, and two deputy superintendents. How comes it that the united talents of these three gentlemen are insufficient to keep the engines in such a state that at all events both of them will not break down? The answer, we suspect, is not very

Digitized by Google

hard to find. All the gentlemen thus employed are busily engaged with other duties—Mr. MAY and Mr. RUSSELL as police magistrates, Mr. CREAGH as deputy superintendent of police. We cannot help thinking that it might be possible to do with a less number of superintendents, and have a thoroughly efficient engineer to see that there is no chance of such mishaps as a break down of both engines occurring. It is a lamentable fact that it scarcely ever happens that the strength of the Hong Kong fire brigade is at all tried but some such shortcoming as that under notice becomes manifest. A vast amount of money has been spent upon organising the force, and the public should insist upon its being properly conducted.

THE QUEEN'S Speech at the closing of the Parliamentary Session on the 13th inst. contains the subjoined reference to the murder of Mr. MARGARY :—

I have learnt with deep regret that the expedition despatched by my Indian Government from Burmah, with a view to open communications with the Western Provinces of China, has been treacherously attacked by an armed force while on Chinese territory. This outrage, unhappily involving the death of a young and promising member of my Consular Service, is the subject of careful inquiry ; and no effort shall be spared to secure the punishment of those by whom it was instigated and committed.

THE CONSULAR REPORTS ON THE TRADE OF CHINA. 1874.

The first instalment of the Commercial Reports for the year 1874 from H.M.'s Consuls in China has just been issued from the Foreign-office, comprising those from Tientsin, Hankow, Kiukiang, Ningpo, Tamsuy, Amoy, Swatow, and Canton. The reports from Newchwang, Chefoo, Chinkiang, Shanghai, Foochow, and Taiwan have not yet been received. The following is a summary of the Blue-book referred to :—

TIENTSIN.—The net value of the import and export trade was Tls. 18,827,577, equal, at the exchange of 6s. per tael, to £5,648,273, figures which, when compared with the returns of 1872 and 1873, are, in Mr. Consul Mongan's opinion, most satisfactory. The disproportion between the imports and exports was more than usually remarkable last year, the values respectively being Tls. 17,682,684 and Tls. 1,144,893. The import trade of 1874, in both its subdivisions, compares favourably with that of 1873, both the native produce and foreign imports showing a marked increase. Of the former the most important articles were silk piece goods, sugar, rice, and paper, the united value of which was more than 4,000,000 taels. The same comparative increase in quantity and value is observable in the three great staples amongst the imports of foreign origin, viz., Indian opium, grey shirtings, and T-cloths, the total increase in 1874 being Tls. 650,935, or £195,280 18s. With regard to drills, English have fallen off largely, Dutch are stationary, and American show an improvement, which is the more noteworthy because from 1869 to 1873 they had been annually, and for the last two years of this period rapidly, declining. On the whole, says Mr. Mongan, the value of the cotton piece goods imported last year represents nearly three-fifths of the total value of the foreign imports during 1874, and grey shirtings alone represent more than one-fifth of the same value. With regard to the unfavourable condition of the trade in woollens, except in the case of English camlets and crape lastings, Mr. Mongan writes :—"Whether it be from the competition of Russian cloth (large quantities of which are sold at Kalgan and Tientsin that do not appear in the Customs' Return), or from the fact that the winter in this province is so severe as to make furs of various kinds more suitable for clothing during the intense cold than woollen cloth, certain it is that the growth of the woollen trade at Tientsin cannot be considered satisfactory." The year 1874 has been more favourable than its predecessor as regards the quantity of opium imported, "an increase of 452·92 piculs in the importation of Malwa more than counterbalancing a total decrease of 78·52 piculs in Bengal and Persian." Native opium appears to be driving Persian entirely out of the Tientsin market, for while in 1871 the amount imported was 310 piculs, last year it was only 21·18 piculs, and in 1872 it disappeared altogether. The prices of opium throughthe year have been unfavourable, and Her Majesty's Consul was informed by one of the chief importers that "the year's business has been a losing and discouraging one for foreigners engaged in the trade." Mr. Mongan makes some interesting remarks on the opium trade, from which much information may be gained respecting the native drug. From a table which he gives, we see that the price of native opium varies enormously, viz., from Tls. 110 per picul in Yunnan, to Tls. 320 in Chihli and Tls. 510 in Shensi. Although the export trade at Tientsin in 1874 shows a decrease of more than Tls. 100,000 when compared with the previous year, Mr. Mongan thinks that there are some encouraging features to be noticed in it, the chief one being a very large comparative increase in the export of camel's wool. The Russian transit trade fell off greatly last year, showing a general decrease in value of Tls. 608,958 as compared with 1873, which is probably to be attributed to an overstocked market. The Chinese passenger trade in 1874 was good, the numbers being 12,952, or an increase of 3,021 over 1873.

HANKOW.—There is no very remarkable feature in the export trade, except the very large decrease (over 6,000,000 lbs.) in the export of brick tea, and an increase of 1,700,000 lbs. in that of green tea ; consequently, though black tea shows an increase of little short of a million pounds, the total export of tea in 1874 was 70,912,533 lbs., against 74,543,089 lbs. in 1873. With the exception of coal, the other exports showed hardly any variation. A similar remark applies to the import of the principal manufactured goods, if we except only drills and long ells, the former showing a falling off of about 120,000 pieces and the latter of 23,000 pieces. In opium there is a decrease of 133 piculs, which, Mr. Hughes says, is explained by the increased consumption of native opium. With regard to this, which seems to be more in favour than formerly in the Hankow district, Mr. Hughes observes :—"It is stated that many well-to-do Chinese who had been in the habit of smoking foreign opium have given it up in whole or in part in favour of the native article, the use of which is believed to be less hurtful to the constitution and attended with less physical inconvenience. For instance, the confirmed smoker of Indian opium generally passes sleepless nights, whereas smokers of native opium do not suffer to the same extent in this respect." The cotton crop in Central China was large, owing to there having been no inundation, and consequently the import shows a considerable decrease. Seaweed shows a large increase, probably owing to the fact that Japanese traders have commenced to establish themselves at Hankow. The total value of the import trade was £5,112,144, the average rate of exchange being taken at 5s. 10¾d. per tael. Under the head of Shipping and Navigation Mr. Hughes gives some details of the working of the competition between foreign and Chinese steamers, and he further notes that the passenger traffic is greatly on the increase.

KIUKIANG.—Mr. Vice-Consul King reports that the trade continues to increase steadily, as it has done for the last four years, the increase being observable in nearly every article imported. Of the various causes, he remarks, of the temporary obscuration of this port, which has now nearly passed, the obstructiveness of officials is the greatest. So much so is this the case, that Chinkiang and Ningpo, shut off as they are from this province by considerable ranges of mountains, are yet able to compete successfully in the import of piece goods with the provincial port, and actually to lay down goods within the district of Kiukiang itself. The increase in grey shirtings and T-cloths is attributed to direct importation ; direct, that is to say, in so far as they are immediately destined for the port, though transhipped at Shanghai. The export of tea showed a notable increase last year, being 2,632,843 lbs. in excess of the previous one. "The tea crop this year (1874)," Mr. King adds, "has been of unexampled excellence, and the prices which the finest kinds of black tea have realised in the home markets have exceeded those of any previous year." With regard to the "Operation of Tariff," Mr. King observes :—"Now that direct importation of piece goods has begun, it is very desirable that the import duties should be levied on them here instead of as now at Shanghai. They are necessarily transhipped at the latter port from the ocean into the river vessels, just as tea is carried hence by the river to the ocean steamers. But while purchasers of tea here and at Hankow pay all duties on the spot, and tranship through the steamer companies without further trouble or expense, direct importers of foreign goods are obliged to be at the expense of having agents, and providing money, at Shanghai, for the simple object of paying the import duty, as the transhipment is still made by the steamer companies. It would be a great convenience, therefore, both to this port and to Hankow, if goods destined for the river paid duty on landing at their port of destination, passing through Shanghai under bond. This would entail no more trouble or expense to the custom-houses at either port, but rather less." Under "General Remarks," at the close of his Report, Mr. King says :—"The renovation of this port, to which I have pointed in my reports of the last two years, has at length assumed a more substantial form. An English and a Russian firm are establishing here ; several firms in Shanghai have determined to send agents here during the season and buy tea, instead of at Hankow, whither formerly Kiukiang tea was sent for sale, there being no market here ; land and house property has risen incredibly in value, and house accommodation is much wanted. Nothing is needed now for the permanent success of Kiukiang and its trade but prudence on the part of those trading here and untiring efforts to realise the privileges granted them by treaty, though refused by the provincial Government."

NINGPO.—Mr. Acting Consul Forrest reports a decrease in the import of all articles except lead, tin, Malwa opium, black pepper, rice, sugar, and a few other articles of Chinese production. With regard to cotton and woollen goods, the decrease is considerable, a very serious cause for this being the fact that "the entire trade has got into the hands of the piece goods

Digitized by Google

guild, which is just as obstructive and non-expansive as the old Canton guilds were. Foreigners have certainly to thank themselves for the establishment of this formidable trade monopoly." This last statement Mr. Forrest explains at considerable length, giving, besides, details of the operations of the guild. Owing mainly to the cheapness of the drug, the consumption of opium increased some three per cent. Mr. Forrest reports that the increase in the growth of native opium is very startling in Chekiang, and is still going on. "It is to be found close up to the walls of Ningpo, and in the gardens at the back of the foreign settlement." At the conclusion of his remarks on this subject he observes :—"I hope to be able to get much fuller information concerning the growth of opium in this Consular district next June, when the crop is ripening. It is entering more and more seriously into competition with the Indian produce each year, and the defects which now make it so inferior in value will, I am convinced, soon be remedied. Nor need the hope be entertained that any official interference will put an end to the production. Any real attempt to stop it would throw the natives—mostly hardy mountaineers, and never well in hand, officially speaking—into open revolt. Now the mandarins do what they think is their duty, and issue prohibitory edicts, which the people read, laugh at, and ignore." By the Customs' returns there is apparently a falling off in the export trade to the net value of £235,943, "but the productions and manufactures which go out of China show, excepting silk, a small increase."

TAMSUY and KELUNG.—Mr. Acting Vice-Consul H. J. Allen reports a steady increase in the trade of the port. It is not only, he remarks, that an advance appears in almost every article of import and export as compared with 1873, and that the total trade of the place is more valuable than it has ever been before ; but if we take a glance at the trade during the last six years, we see that the imports have almost, and the exports more than doubled themselves in this time, and that the total value of the trade is about 100 per cent. greater than it was in 1869." In that year it was £254,604 as compared with £507,671 last year. Annexed to his report, Mr. Allen furnishes some useful meteorological tables, for which he acknowledges his indebtedness to the Customs' officials, and in which matter the other Consulates might take a useful lesson from this small port.

AMOY.—Mr. Acting Consul Phillips's Report does not furnish much information respecting the trade of the port, and no tabulated statistics at all, and contrasts unfavourably with the other reports in this Blue-book. The value of foreign goods imported in 1874 shows a total decrease of £180,833, while that of the native produce, imported chiefly from Newchwang and Formosa, exhibits an increase of £160,735 over 1873. Transit passes came into use in July, 1874, and it is hoped that they will benefit the trade of the port. The exports to foreign countries exceeded in value by £303,779 the shipments in 1873. In 1874 the value of the tea exported to foreign countries was £1,084,450, and to Chinese ports for re-exportation £44,640, the greater part eventually finding its way to the United States. Mr. Phillips states that there were some twenty-four British ships employed during the year 1874 in carrying 7,345 passengers from Amoy to Manila, Saigon, Java, and the Straits Settlements, but there is no direct passenger traffic with Australia, most of those passengers going *via* Hong Kong.

SWATOW.—Mr. Acting-Consul Frater considers that the trade of this port has been progressing, though the combined values of the imports and exports show a falling off of about £5,000, but this, he contends, is accounted for by the adoption, on the part of the Customs, of a new system of valuation. The foreign and native imports have both increased, and the decrease is wholly in the exports. Nearly all the cotton and woollen piece goods show an increase, which in some instances is very marked, as in the case of shirtings, T-cloths, drills, and long ells. Both brown and white sugars have been more largely exported, and Mr. Frater understands that the area of cultivation has been much increased in the neighbourhood, and that much ground, originally used for the growing of rice, has been planted with sugar cane. There appears to be reasonable prospect of the successful employment of steam machinery at this port in the crystallisation of the various raw sugars of the district. Mr. Frater speaks well of the condition of the emigration and passenger traffic, and reports that no casualties have occurred during the year to vessels carrying coolies to Swatow. The port and its neighbourhood continued to be quiet during the year, and, so far as Mr. Frater is aware, there were no clan fights. He regrets to have to state that the authorities have not shown much diligence or interest in questions of debt referred to them, and that, notwithstanding frequent reminders of the existence of the cases, they remained inactive, and have continued to be so.

CANTON.—Sir Brooke Robertson reports that trade has not been satisfactory, the returns showing a decrease, both in quantities and values, the diminution amounting to £793,798. This, he says, may be attributed to various causes which are gradually working a change in the import branch of the trade, the export remaining on a par with the previous year, 1873, with an increase in tea of 1,825,502 lbs., but a decrease in silk of 1,836 lbs. With regard to tea, H.M.'s Consul remarks that "the stir made in the home market about spurious teas has had its effect on this, and the quality offered during the last season has been better and more free from the mixture of extraneous matter than heretofore." Owing to teas going through the Suez Canal there has been more carelessness shown in firing than there was when they went round the Cape, and consequently they sometimes have a musty flavour. Of silk we are told that "the quality of the past season has been much on the average, or may be said to be a shade lower. Purchasers have looked more closely to the packing, or have insisted that the losses of weight *en route* to England above a certain amount should be made good by the seller, and this has had the effect of preventing the silk being watered." Opium shows a slight increase in 1874, but a large additional quantity goes into the province otherwise through the Foreign Custom-house, and it is impossible to give an accurate idea of the amount actually imported. In regard to cotton, the Report states that "the large decrease in the quantity of raw cotton imported, 161,256 piculs, may be accounted for by its having been conveyed from Hong Kong in junks." Towards the conclusion of his Report, which is drawn up with his usual care, Sir Brooke Robertson says :—"As regards the future prospects of the port much depends upon circumstances, but as there seems a firm determination on the part of foreign purchasers to reject both tea and silk which have been doctored in any way, and the teamen are finding it to their interest to stop such proceedings in the country, there is every chance of Canton holding its own in the home markets. The Canton tea has many of the finer qualities of those produced in the Foochow districts ; and necessarily so, as they are grown upon the range on which the best Foochow sorts are gathered. They have, however, a distinct position in the market, and fell in estimation solely through the malpractices of the growers ; but these being corrected, there is no reason why they should not receive their former favour, and increase in export."

THE ROUTE TO WESTERN CHINA.

The manager of a tea estate at Sudiya writes on the route from Rangoon to Western China :—"I am anxious to call attention to what has always appeared to me, during my residence in Upper Assam, as a better, though apparently little considered, route than that through Burmah—namely, the one that for the most part of the way nature has made for us, and which already belongs to us. I speak of the Brahmapootra river. To any one looking at the map, the advantages of this track are evident, when the fact is taken into consideration that the Brahmapootra is navigable all the year through as far up as Dirrooghur, about 27 deg. 30 min., to steamers drawing five feet, and up to Sudiya, close under 28 deg., to vessels drawing about three feet of water ; for the Irrawaddy, I read in your article, is only navigable up to Bhamo, and for vessels only drawing three feet of water. Now, Bhamo lies under 24 deg., I believe ; so we have the Brahmapootra navigable 250 miles, say, further north and nearer China and Thibet than the Irrawaddy. Again, the distance to the sea from Sudiya, notwithstanding the above gain of 250 miles, is, I should think, almost less than the distance from Bhamo to the sea, owing to the southerly position of the mouth of the Irrawaddy at Rangoon. Then it must be remembered that this route is really in our own possession, and in a settled and peaceable district, and that, consequently, the quantity of unsettled country that remains between us and China in the one direction, and Thibet in the other, is comparatively very little, and only inhabited by the most primitive of savages, who have just lately, in our Naga Expedition, shown how little they need be considered as an obstacle to any real effort. Having the river to Sudiya, of course, means less expense in road-making than the Bhama route would require ; and road-making in those climates is a never-ending business, owing to the rapid growth of jungle encroaching upon the roads. It must not be forgotten that the very few explorers who have tried this track have tried it with serious odds against them individually. Mr. T. T. Cooper, the last, was a stranger, and thought he had (according to his book, the 'Mishmee Hills') travelled a great distance when he arrived at Sudiya, and managed to find matter for almost three-quarters of his book before he got there. When I say that I am one among several managers who live in isolated tea-factories within twelve or fourteen miles of Sudiya, without the need of any protection other than the small frontier outpost of 100 sepoys at Sudiya affords, I think it will go a long way to show that the route I propose, from the fact of the settled condition of the natives alone, for such a much longer distance than by the Bhamo route, recommends it to more consideration than it has received. Again, if that little strip of country between us and Thibet were in our possession, we have the best market in the East for our Indian teas, as the Chinese, owing to their distance and terrible difficulties of carriage, would not be able to compete with us. The present want, and one that is becoming serious to the tea interests of Assam, is labour ; by opening up this strip, John Chinaman, than whom there is no quieter, better behaved, or more industrious husbandman, would soon find his way to us, and though we cannot afford to pay the wages he could get in America and elsewhere, still, he would probably have to spend a little time with us *en route*, to find him in travelling expenses. I have heard a Government official in Assam say that, if we let the Chinese in, we should be driven out. That is quite against fact, because the Chinese rarely purchase land abroad ; they prefer having property that is quickly disposed of in case of sickness, as a Chinaman must be buried in his own country or lose his chance of heaven. Coming back to the question of route, the fact that numbers of pilgrims go on foot nearly to Brahmakund from our territory, bad as the jungle path now is, proves that there are but few difficulties up to that point, which is a very few days' journey, at, say, ten miles per diem, from the Chinese frontier. I have been up

Digitized by Google

by boat, a 'dug out,' to within about fifteen or sixteen miles of Brahmakund, but the river a few miles above Sudiya would not be suitable for heavy merchandise, though limestone is brought down to Sudiya in boats from a place it takes two days to get to, or, say, five hours to come down stream from. I can only ascribe the want of attention that the Brahmapootra River route has received to the fact that our being so quiet and settled has allowed us to drop out of sight, in favour of the notoriety Burmah is claiming by her misbehaviour."

Monetary and Commercial.

A telegram has appeared in the daily papers in reference to the report issued by the directors of the Hong Kong and Shanghai Bank, but the figures are incorrect. The meeting will be held on the 18th (to-morrow), when a correct statement will be telegraphed.

The Hong Kong and Shanghai Banking Corporation notify that they have received a remittance from the Chinese Government for the interest due upon the Chinese Imperial Eight per Cent. Loan of 1874, and they will be prepared, on and after the 19th inst., to pay the same to the London holders of the provisional certificates. The certificates must be left three clear days for examination and endorsation of the payment of interest at the office of the bank.

The report of the Crédit Foncier of England for the past half-year states that the available balance of credit of profit and loss amounts to £52,901 2s. 7d., and the directors recommend that the whole of this be carried to credit of the next account, the question of declaring a dividend being deferred to the end of the current year.

The fifteenth half-yearly report of the New Bank of Bombay states that the profit, with the balance brought forward, gives £78,600 for distribution. A dividend at the rate of 10 per cent. is recommended.

At a special general meeting of the Western and Brazilian Telegraph Company resolutions increasing the capital of the company by £48,200, in order to fulfil certain obligations with the River Plate and Brazilian Telegraph Company, were agreed to.

The suspension has been announced of Messrs. Shaw and Thomson, of Leadenhall-street, a firm largely engaged in the iron trade. The liabilities are £250,000, but, the greater part being covered by securities, it is expected that the claims which will ultimately be proved will not exceed £100,000, against which there are assets to the amount of £50,000, of which a considerable portion is cash in hand. The firm is stated to have been possessed of considerable capital at the commencement of the year, and its difficulties are attributable to the failure of other firms within the last few months and to the long and unprecedented depression in the iron trade.

Mr. W. J. Craven, commission merchant, of Fenchurch-street, has also stopped payment, owing chiefly, it is understood, to speculative operations on the Stock Exchange. The liabilities amount to £17,000, and assets to £2,000. The books have been placed in the hands of Messrs. Johnstone, Cooper, Wintle, and Co., the accountants, for investigation.

At the Court of Bankruptcy a first meeting of creditors has been held in the case of Messrs. H. W. Kilburn and W. Kershaw, of St. Mary-axe, silk and silk piece brokers. The debts are returned at £201,456 in the aggregate, with assets £6,577. Separately the debts of Mr. Kilburn were £10,513, with assets £7,300. The proceedings resulted in the appointment of a trustee, with a committee of inspection.

At a meeting of the creditors of Messrs. Strachan and Co. a statement of the affairs was submitted by the receiver, Mr. J. Waddell, showing liabilities to rank £96,938, and open assets £5,711. The liabilities were mainly on acceptances to Messrs. Collie and Co. The general feeling was that the estate should be liquidated in bankruptcy.

Bar silver has again improved in value. At the close of last week transactions took place at 56d. per oz., and, owing to orders for India, the price gradually improved to 56¼d. per oz., which may be considered the present quotation. Mexican Dollars have been sold at a higher rate, 54⅞d. per oz. being obtained, showing a rise of ⅜d. in the price.

The amount of bullion per P. and O. steamer *Lombardy*, from Southampton, on the 12th inst., was—in silver, to Singapore, £48,300.

THE BOARD OF TRADE RETURNS.

According to the Board of Trade Returns for July, there does not appear to have been that check to our foreign commerce which might reasonably have been expected after the numerous mercantile failures. The total value of the exports of the month is returned at £20,249,618, against £21,142,062 last year, being a decrease of £892,444, or 4 per cent.; and the total imports at £34,461,554, against £32,764,234 last year, showing an increase of £1,697,320, or 5 per cent. In the exports cotton yarn decreased 5 per cent. in quantity, and 10 per cent. in value; cotton piece goods decreased 9 per cent. in quantity, and ½ per cent. in value; linen yarn decreased 9½ per cent. in quantity; and ½ per cent. in value; linen piece goods increased 3¼ per cent. in quantity and 3 per cent. in value; woollen cloth decreased ¾ per cent. in quantity, but the value shows no change; woollen yarn decreased 12 per cent. in quantity, and 11 per cent. in value; worsted stuffs decreased 5½ per cent. in quantity, and 3 per cent. in value; iron and steel increased 18 per cent. in quantity, but decreased 2½ per cent. in value; coal, fuel, &c., increased 18 per cent. in quantity, but decreased 4 per cent. in value. In the imports corn shows a total value of £2,768,269, against £2,915,957 in 1874, or a decrease of 5 per cent., but the quantity has increased 14½ per cent.; raw cotton decreased 1 per cent. in quantity and 7 per cent. in value; flax decreased 5½ per cent. in quantity, and 4½ per cent. in value; raw silk increased 2 per cent. in quantity, but it decreased 5½ per cent. in value; wool increased 12 per cent. in quantity, and 11¼ per cent. in value. The value of tea increased 83½ per cent.; and of coffee, 3½ per cent. The quantities of tea and coffee entered for home consumption increased 5½ per cent. and 8½ per cent. respectively.

Commenting upon these Returns *The Times* says:—

It might naturally have been expected that with the disturbance caused to our Eastean trade a great falling off would have been found in the shipments to India, &c., but the returns show that these have been subject to but a trifling diminution, notably in cotton goods, of which the total to all countries is only 1 per cent. less than last July, and the quantities sent to India about 10 per cent. less, while to China there has been an augmentation of as much as 53 per cent. There can be no doubt of the material correctness of these returns, as is proved by the reflex in them of the reports from manufacturing centres during the past month, and the very doubtful question then arises, whether or not these continued shipments leave a margin of profit to the exporters. If we may judge by the way in which the most substantial houses in the East Indian trade have contracted their business, and the ruin which has befallen some who have pressed on shipments regardless of commercial results, we fear the conclusion must be arrived at that even now there are large speculative exports going on at a loss. Still, the returns cannot be looked upon as really bad. The favourite, but delusive opinion has appeared to be that certain foreign markets could and would absorb any quantity of our goods, and, taking their stand on that theory, no restriction has been placed by manufacturers on production, and shippers have also in many cases dearly paid for their excess of confidence. That will, however, soon right itself. In coal and iron the decline in prices has evidently stimulated the foreign demand, for the increase in quantities of each is about 18¾ per cent. above July last year, but in iron the raw material accounts for the greater part of this, the augmentation in manufactures being only 4 per cent., against over 55 per cent. in pig. Alkali, earthenware, leather, and seed-oil also show augmented totals, while yarn of all kinds except silk, haberdashery, and textile fabrics of jute and wool, have considerably declined. In the case of jute goods the falling off is over 40 per cent., which bears out the advices from the spinning districts of the depression existing in that branch of industry, while the percentage of decrease in the various manufactures of wool ranges from 22 per cent. downwards. Smaller articles of export exhibit fluctuations which are about equally divided, and require no comment. The total import value is £34,461,554, or about 5¼ per cent. more than in the corresponding month of last year, but rather less than in July, 1873. About half of this increase is due to the enormous arrivals of tea, the quantity imported being nearly double that of July last year, and three times in excess of the same month in 1873, and the stock in the bonded warehouses is about 75,750,000 lbs., or 17,000,000 lbs. more than at the end of June, although the home consumption has absorbed 5½ per cent. more than in the corresponding month last year. Of course it is hard to say if this article at present leaves a profit to the importer, but the probabilities are to the contrary, and as far as that is the case this increase is not healthy. There is also a nearly general advance in all food products, wheat excepted, and a corresponding decline in the majority of raw products for manufacture in this country. Wool and hemp, however, have increased, but the quantities of these two commodities re-exported have also augmented, and seeing the decline in the export account of woollen goods, this gives little cause for satisfaction. Taken generally, however, the account is by no means so unpleasant as might have been expected, and, if trade be as sound as it is abundant, this country must be allowed to have got through the recent troubles with wonderfully little suffering or loss of command over the markets of the world.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East:—

COTTON YARN.

To		For the Month ended 31st July. 1873.	1874.	1875.
China and Hong Kong	lbs.	1,279,770	831,000	1,377,200

ARTICLES OF IMPORT.

TEA.

Messrs. Jas. Goddard and Co. report :—The Market has been very quiet all through the week, and sales have been somewhat difficult to make ; although importers have given fair support, yet prices show an easier tendency. The quantity of Tea arriving has been heavy, and larger than the trade by any possibility can take off. The telegrams from China show some tendency towards a check to the shipments, and our deliveries are good. At auction there are frequent small sales of New Season's, and old Teas continue to be realised, chiefly black leaf kinds, at 10d. to 11d. Scented Capers are, if anything, easier. Green Teas, not much change. Public Sales.—China Sorts : 15,679 packages, "Without Reserve." A fair quantity of New Season's Red and Black leaf Congou was sold at rather easier prices : Red leaf, 1s. 3½d. to 1s. 8¾d.; Black, 1s. 3½d. to 1s. 5d. Old Season's Black leaf, 9½d. to 11d.; ditto Red 9½d. to 10½d. Green and Scented Teas are dull of sale. Deliveries from London, from 1st to 9th instant inclusive, or 6 days 1875, 4,056,084 lbs., against 6 days 1874, 3,694,777 lbs. Imports, Deliveries, and Stocks in London, from 1st January to 31st July :—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
57,746,234	87,299,242	93,907,376	102,311,526	53,138,652	63,399,926

Messrs. J. C. Sillar and Co.'s Circular says :—We have little improvement to report in this market. The shipments from China have been made upon a scale beyond all precedent, and the banks have already commenced to force the sale of the teas of those houses which have already suspended payment. 50,000,000 lbs. of China Teas have arrived during the last five and a half weeks, and 42,000,000 lbs. remain on the water, making the enormous total of 92,000,000 lbs. already sent off from China to this country. Fine black-leaf Congous have met with more demand, but all the really choice Teas are taken by shippers for the Russian market at prices far beyond what the home trade are willing to pay. Several chops have been sold from 2s. 9d. to 3s. per lb., and a few exceedingly fine ones are reported to have brought as much as 3s. 8d. per lb. Public sales have been held almost daily, and although these have not been unusually large, they have exercised a most depressing influence on the market. About 60,000 packages have been brought forward, of which 10,000 were Indian. We cannot but think that the custom of selling chops of Tea in lots of six and nine packages at a time has an effect prejudicial to the importer or owner of the Tea. It is well known that the prices obtained for the first few lots are named as those of the whole chop, and as the auction rooms are entirely in possession of the "trade," combinations are by no means unfrequent. In clause No. 7 of the conditions of sale will be found in a great measure the reason for this custom : "Lot money to the selling broker as usual."

Messrs. W. J. and H. Thompson's Circular says :—The arrivals have again been heavy, and the amount of business moderate, as the dealers continue supplying themselves only for actual requirements. Prices have been easier for the fair grades of Brown-leaf Congous. *Foochow Congous.*—Siftings are quiet. Fair to medium have been sold at 1s. 1d. to 1s. 6d. per lb.; good to fine, only in small quantities, at 1s. 7d. to 1s. 10d. per lb. *Black-leaf Congous.*—Fair to medium have sold at 1s. 1d. to 1s. 5d.; good to fine, 1s. 8d. to 1s. 10d., and a few sales made at 2s. to 2s. 2d. for finest ; a few extra fine at 2s. 4d. to 2s. 10d. per lb. All old imports are very unsaleable, and fair quality continues to be realised at auction at 10d. to 11½d. per lb. *Tayshans.*—Good common have been sold at 11d. to 11½d.; fair, 1s. to 1s. 1d. *Scented Teas.*—Capers continue to be pressed at auction, and fair quality sells only at 10½d. to 11d. per lb.; good to fine are rather firmer at 1s. 2d. to 1s. 5d. per lb. Scented Orange Pekoes : Canton kinds have been sold, fair, 1s. 2d.; good to fine, 1s. 5d. to 1s. 8d. per lb. Foochow : Good to fine, 1s. 6d. to 1s. 10d. per lb.; finest, 2s. *Green Teas.*—The same low and irregular rates rule.

SILK.

There has been no change in the market during the week.

CASUALTIES.

AMSTERDAM, Aug. 4.—The Sumatra, from Batavia, for Nieuwe Diep, is reported as having put into Cadiz with damage to machinery.

MISCELLANEOUS.

MALTA.—Aug. 2, passed, Glenartney (str.), from London, for Shanghai; 7, Lorne (str.), from London, for China and Japan.

SUEZ.—Aug. 5, arrived, Glaucus, Galatea, both from Shanghai, for London; 7, Tartar, from China, for London; Yrurac Bat, from Manila, for Liverpool; 11, John Bramall, from Batavia, for Nieuwe Diep.

ST. HELENA.—July 14, arrived, Daniele Manin, from Bangkok, for Marseilles; 15, California, from Batavia, for Amsterdam; 17, Imatra, from Rangoon, for Nieuwe Diep; Iris, from Akyab, for Havre; 18, Lycia Till, from Bassein, for Bremen; Argo, from Bassein, for Falmouth; Hesperia, from Singapore, for Marseilles; Tranmere, Rangoon, both from Rangoon, for Falmouth; 22, Sophie D., from Batavia, for Marseilles; Amaranth, from Rangoon, for Falmouth.

PASSED, July 15, Olga, from Rangoon, for Falmouth; 17, Alida from Rangoon; 21, K.C.R.F., from Maulmain, for Falmouth; 22, Mutlah, from Batavia.

ROTTERDAM, Aug. 5.—The Cornelis Smit, for Batavia, which was towed back here after striking against the pier at the Hook of Holland, has been examined by a diver, who reports the metal at the bow badly damaged. Surveyors have ordered her to discharge, and go into dock for further examination.

REPORT OF THE VIKING (STR.).—This steamer, which arrived on the 9th inst. from Foochow, reports that on the 4th July, fifty miles N.E. of Acheen Head, she passed the barque Richmond, of Liverpool, bound to London, which vessel had experienced heavy weather three days previously; all well. She also passed the steamer Montgomeryshire, from Foochow, for London, July 8, in 1 N., 82 E., with engines temporarily disabled, but not in want of assistance. This vessel arrived at Port Said on July 18.

LAUNCH.

An iron screw-steamer, built and engined by W. Simons and Co. was launched from the London Works at Renfrew on the 5th inst She is fitted with compound engines and twin screws, and named the Industry. This steamer is the property of the Crown Agent for the Colonies; and has been constructed to the order of Sir John Coode, C.E., Westminster, for the Government works at Colombo.

NOTICE TO MARINERS.

Hong Kong.—Green Island Light.—A light was exhibited on Green Island on the 1st July. The illuminating apparatus is fixed dioptric of the fourth order, showing a red light on the following bearings, which are magnetic, and taken from seaward:—1. From N. 16°, E. to S. 18°, E. (146°); and showing a green light—1. From N. 16°, E. to N. 44°, W. (60°). 2. From S. 18°, E. to S. 25°, W. (43°). The remaining portion of the whole circle is obscured by the island itself. The focal plane of the light is ninety-five feet above mean sea level, and in clear weather it should be seen at a distance of fourteen miles.

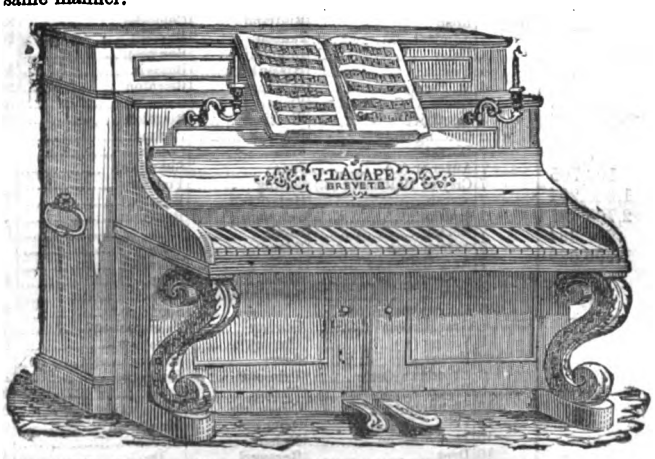
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

NOTICE.

MESSRS. JUSTUS LEMBKE and Co., of Hong Kong, have established a BRANCH of their Firm at HAMBURG, under the charge of Mr. PAUL EHLERS, who is authorised to sign the Firm per procuration.

AMAH.

A LADY can highly recommend her AMAH as either wet nurse, or nurse to young children to any family proceeding to Shanghai by French mail of Aug. 29, or by a previous French mail. Half passage paid.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—By GEORGE ASHDOWN AUDSLEY, Archit and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says:—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

For particulars apply to the Secretary, at the Publishing Office, 13, Hackin's Hey, Liverpool; or to

H. SOTHERAN and Co., London.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each Trade mark—Willow-pattern plate.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Makers of Epps's Glycerine Jujubes (throat irritation).

The Company's Weekly Steamers to Alexandria connect at Alexandria with the English Mail Steamers from Brindisi to Bombay.

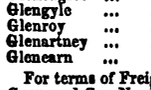
For Passage Rates or information, apply at the Company's London Head Office, 97, Cannon-street, E.C.; or to the West-end Sub-Agency, 51, Pall-mall, S.W.; also to G. and H. FLETCHER and Co., Liverpool; or to SMITH and Co., Rotterdam; also at the Offices of the Messageries Maritimes in Paris, Lyons, Bordeaux, and Marseilles.

*** Passengers eastward of Suez securing their Berths in London are entitled to the conveyance of their luggage free to Marseilles.

GLEN LINE OF INDIA, CHINA, AND JAPAN STEAMSHIPS.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on their advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Glenfalloch	100 A1	2,126	275	Aug. 21
Glenfinlas	100 A1	—	—	Aug. 25
Glenlyon	100 A1	2,119	275	To follow
Gleneagles	100 A1	2,120	330	To follow
Glengyle	100 A1	1,676	200	To follow
Glenroy	100 A1	2,121	250	To follow
Glenartney	100 A1	2,016	330	To follow
Glenearn	100 A1	2,120	330	To follow

For terms of Freight and Passage apply to McGREGOR, GOW, and Co., No. 1, East India-avenue, London.

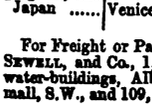


GELLATLY, HANKEY, SEWELL, and CO., will despatch the following high classed SCREW STEAMSHIPS as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Pen., Sing., Hg. K., and Japan	Venice.....	100 A1	1963	V.L.D.	Aug. 28

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W., and 109, Leadenhall-street, London, E.C.

CHINA.



THE following SPLENDID First-class SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong	Marina	A1 12 yr.	W.I.D.	With des.
Hong Kong	Sir Harry Parkes.....	A1 15 yr.	W.I.D.	To follow
Shanghai ...	Agnes Muir..	AA1	E.I.D.	With des.
Shanghai ...	Omba	A1 16 yr.	E.I.D.	To follow

*** Apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

SHAW, WILLIAMS, and CO will despatch the following high class vessels as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Hong Kong	Gryfe	*AA1	1078	E.I.	With des
Hong Kong	Carricks ...	A1 14 yr.	—	—	To follw.
Shanghai ...	Titania ...	A1 16 yr.	879	S.W.I.	With des

For Freight or Passage apply to SHAW, WILLIAMS, and Co., 9, Fenchurch-street, E.C.

Steam via the Suez Canal.

TO PENANG, SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO, taking cargo for transhipment to Java, Australia, &c., at through rates, at shippers' risk, last shipping day, 21st August, the favourite full-powered screw-steamer LOTUS, 20 years in Liverpool Book, 1,407 tons register, 200-horse power nominal; JAMES GRAY, Commander; South West India Docks. This magnificent steamer, built by Messrs. Mitchell and Co., Walker-on-Tyne, in 1873, has proved herself well adapted for the China trade. She has elegant and spacious accommodation for saloon passengers replete with every comfort.

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

With quick despatch.

FOR SHANGHAI DIRECT, the clipper ship WINDHOVER, A1 16 years, 847 tons register. WM. FINDLAY, Commander; South West India Docks. This ship has made some of the fastest passages on record, and is noted for discharging her cargo without damage.

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within (corner of Cornhill), E.C.

Steam via the Suez Canal.

TO PENANG, SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO, taking cargo for transhipment to Java, Australia, &c., at through rates at shippers' risk, last shipping day 17th Sept.; the favourite full-powered screw steamer MONTGOMERYSHIRE, 100 A1, 1,751 tons gross, 1,146 tons net register, 200-horse power nominal; GEORGE BUTLIN, Commander; South West India Dock. This magnificent steamer, built on the Clyde in 1873, has proved herself well adapted for the China trade. She has elegant and spacious accommodation for saloon passengers replete with every comfort.

For Freight or Passage apply to the Owners, D. J. JENKINS and Co., 17, Lime-street, E.C.; or to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

To sail in August.

FOR PENANG, SINGAPORE, HONG KONG, and SHANGHAI.—VIKING, s.s., 100 A1, 1,940 tons register, G. L. CASTLE, Commander; South West India Docks.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

With despatch.

FOR YOKOHAMA and HIOGO, DIRECT, the favourite China clipper TAMESA, A1 16 years, 713 tons register, South West India Docks; F. J. GREEN, Commander.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

CASTLE LINE OF STEAM PACKETS from London, via the Suez Canal, for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for Java and Japan.—The magnificent steamship GORDON CASTLE, 1,988 tons, 100 A1, 255-h.p. nominal, THOS. JONES, Commander; now loading in the South West India Dock. The attention of shippers and passengers is directed to this splendid steamer. She has excellent accommodation for a limited number of cabin passengers.

For Freight or Passage, apply to THOMAS SKINNER and Co., 5, East India-avenue, Leadenhall-street, E.C.

First ship.

YOKOHAMA AND HIOGO (loading in the West India Docks), the splendid clipper ship WESTERN CHIEF, newly metalled, A1 14 years, 750 tons register, J. P. HILL, Commander. This favourite ship, known to be one of the fastest in the China trade, has excellent accommodation for passengers.

KNEVITT and Co., 3, Sun-court, Cornhill.

SHORT SEA ROUTE to AUSTRALIA, for First-class passengers only, via Marseilles and Singapore, by STEAMERS of the EASTERN and AUSTRALIAN MAIL STEAM COMPANY (Limited), under Postal Contract with the Queensland Government, leaving every four weeks.

Offices, No. 34, Leadenhall-street, London, E.C.

With quick despatch.

FOR YOKOHAMA and HIOGO, the well-known China clipper BANDA, A1 13 years 481 tons register; ——— Commander; West India Docks. This fine vessel is confidently recommended to shippers, and has excellent accommodation for passengers.

For Freight or Passage apply to J. D. WILLIS and Co., 115, Leadenhall-street, London, E.C.

STAR BALL LINE OF STEAMERS, carrying his Netherlands Majesty's Mails, for BATAVIA, SAMARANG, and SOURABAYA, taking goods at through rates for all Java ports, the splendid full-powered iron screw steamer ACTON, 100 A1, 2,500 tons burthen, 1,000-h.p. effective; sailing from Southampton on 21st Aug. Has splendid accommodation for passengers.

For Freight or Passage apply to JAMIESON, GRIEVE, and Co., 17, Gracechurch-street, London, E.C.; F. W. BREWER, 1, Peninsular and Oriental buildings, Southampton; or to the Owners, J. B. WALKER and Co., Cleveland-street, Middlesborough.

FOR Tanjong Pagar, SINGAPORE.—The following VESSELS are now on the berth in

LONDON.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on the 19th inst., being four days early. The next inward (P. and O.) mail, with advices, Yokohama 7th, Shanghai 11th, Hong Kong 17th, Singapore 24th July, which is due, *via* Brindisi, on Monday next, the 30th inst., left Galle on the 7th inst., two days late.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Ara*, arrived Aug. 17.—From Yokohama: None. From Shanghai: Messrs. Tyler, Drysdale, Pearcy, Larsen, Huber, Hack, Mr. and Mrs. Vignier, Mr. and Mrs. Fish, Mrs. Roland. From Hong Kong: The Rev. F. A. Roach, Mr. Martin Baker, Mr. M. Smith, Mr. Garein, Mr. Noack. From Saigon: Messrs. Baud, Perrin, Biard, Fiard, Vuillermoz. From Batavia: Mr. Van Hasselt, Mr. Valaine, Mr. and Mrs. Schneither. From Singapore: Messrs. J. K. Murray, St. John, Lind, Zabala, Rosseau. From Galle: Mr. R. Black, Mr. Macdonald, Mr. Jas. Ferrier.

PASSENGERS OUTWARD.

Per P. and O. steamer *Malta*, from Venice, Aug. 20.—To Yokohama: Rev. and Mrs. S. G. McLaren. To Shanghai: Mr. Skeels.

Per P. and O. steamer *Malta*, from Brindisi, Aug. 23.—To Singapore: Mr. G. C. Crump.

Per P. and O. steamer *Australia*, from Southampton, Aug. 26.—To Singapore: Mrs. Donaldson. To Ceylon: Mr. W. Bissett.

Per P. and O. steamer *Indus*, from Southampton, Sept. 9.—To Shanghai: Miss Black. To Hong Kong: Mrs. D. R. Crawford. To Penang: Rev. and Mrs. A. Fearon, Mr. J. Wilson. To Ceylon: Mrs. Moir, Miss Stevenson.

Per P. and O. steamer *Poonah*, from Southampton, Sept. 23.—To Yokohama: Miss A. Hoare, Miss M. A. Cattell. To Shanghai: Rev. and Mrs. R. Palmer. To Suez: Mr. J. B. Elmslie.

Per P. and O. steamer *Baroda*, from Brindisi, Oct. 4.—To Ceylon: Capt. H. W. King.

Per French steamer *Tigre*, from Marseilles, Aug. 29.—To Shanghai: Mr. and Mrs. Billequin and child. To Galle: Capt Fairlie, Mr. Elphinstone, Mr. and Mrs. Cameron, Mr. Thackwell.

Per French steamer *Ara*, from Marseilles, Sept. 12.—To Yokohama: Mr. and Mrs. Basch. To Shanghai: Mr. J. C. Farnham. To Saigon: Mr. A. Spooner, Gen. Reboul.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Shanghai: Mr. and Mrs. Vardel, Mr. Lecgardier, Mr. Aubry, Mr. Schetter. To Hong Kong: Mr. Everard. To Saigon: Mr. Mace.

Per French steamer *Iraouaddy*, from Marseilles, Oct. 10.—To Shanghai: Mr. R. H. Artindale. To Singapore: Mr. and Mrs. Goldie, Mrs. Spooner, Mrs. K. B. Spooner.

Per steamer *Hankow*, to Colombo, sailed Aug. 20.—Mr. J. Sprott, Mr. W. Tennant, Mr. J. Ingleby, Mr. E. F. Vansittart, Miss Reid, Mr. C. R. L. Mesurier, Mr. and Mrs. Clarke, Mrs. Hunter, Miss Hunter, Miss M. Hunter, Mr. Capper and two sons.

Summary of News from the Far East.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

At the moment of the departure of the steamer *Shantung* the enclosed letter has been received. It comes from a foreign gentleman resident at the capital, and can be implicitly relied upon, as the information he has given me was received from Herr von Mollendorff, of the German Legation, one of the party, and a good Chinese scholar:—"A row has occurred which, although it has happily terminated without murder, I consider has done so by a fluke only, and by the presence of mind of the foreigners concerned. Four students from the British Legation and M. von Mollendorff went for an excursion to the Pai Hwa San Temple, forty miles west. They arrived last Saturday, and found a great many Chinese gathered to celebrate the fifth month festivals. They succeeded in getting a small room at the temple. During the evening conversations were had with different parties, the foreigners expressing regret at having arrived, as they feared to interfere with or disturb the natives in their festivals. Everything went on quietly that day, but on Sunday morning early large crowds of Chinese commenced to throw stones at the house where the foreigners were, knocking in the roof and walls. All got more or less hurt, M. von Mollendorff the worst; he was severely hurt on his head and legs, and declares that they only escaped being murdered by getting hold of the head priest, and pointing a revolver at him, declaring to the crowd that if the stone-throwing were not ceased, and if they were not allowed to leave in peace, he would be shot. Some astronomical instruments were ruined, and all their provisions destroyed."

In the *Peking Gazette* of June 19 I find the following Imperial announcement, which at this moment is of considerable interest to British people in China:—

"We, the Imperial Regents, command Li Han-chang, the Governor-General of the Hoo Kwang provinces, to proceed, post-haste, to Yunnan, to inquire into and settle a certain affair which has taken place in that province; and we command Wang Tung-tseo, during the absence of Li Han-chang from his post at Woo-chang-foo, to temporarily perform the duties of Governor-General of Hoo Kwang, together with those of his own post as Governor of Hoo-peh. Respect this!"

This announcement, at the eleventh hour, means, when put into plain English, that Li Hang-chang has been appointed by the Central Government the High Imperial Commissioner to Yunnan, vice Sung Paou-hwa, who had been appointed by Li Hung-chang holding the post of High Imperial Commissioner for Foreign Affairs at Tientsin, and whose appointment has been cancelled, from his incompatibility for the duties required. The Central Government have apparently been fully determined to do justice in the Yunnan case only on compulsion. For how gracefully on their parts would not the appointment of Li Han-chang have appeared in the eyes of the British public, and even in the eyes of the people of China, had they made it while Mr. Wade, the British Envoy, was still at Peking? Such, then, in this vague manner, is the announcement to the people of China of the appointment, by the Central Government, of a high

Digitized by Google

official to proceed to Yunnan for the purpose of investigating into the assassination of the British officer, Mr. Margary, and of his servants; and into the attack on the British officer, Colonel Browne, and his escort, last February. It will be noticed that the edict states that Li Han-chang, who is a brother of Li Hung-chang at Tientsin, has been commanded by the Central Government to proceed to Yunnan post-haste, or with all speed. How does this speed, which has been commanded by the Central Government on the part of Li Han-chang, accord with the reports which we have been all along hearing, in regard to Mr. Wade, H.M.'s Envoy, having the intention to send a commission of two British officers to Yunnan to be present at the examinations of the accused parties, in order to see that justice be carried out? Can it be possible that the most essential point, in order that the exact facts may be ascertained by the British nation, will not be carried out by her Majesty's Envoy?

On the 24th June Li Hung-chang, the Governor-General of this province, passed through the British Settlement anchorage in a small river steamer, towing two small junks, on board of which was part of his retinue, for the fortresses of Sin-ching and Taku, which he will inspect, together with the troops of the Southern Legion stationed in them. After his inspection of these fortresses, and after the arrival of the German corvette *Ariadne*, which is hourly expected to arrive in the Taku outer anchorage, he will proceed on board to inspect her, and to witness the practice of her crew in firing shot and shell with her large guns at marks afloat in the gulf, and on shore on the beach. The C. M. steamer *Leeyuen* has passed down the anchorage, conveying the staff of the Governor-General, composed of the Territorial and Customs Taoutais, the chiefs of the Military Board at Tientsin, and the other portion of his retinue.

The Chinese have a report that certain mines are to be opened in different parts of the Empire, and that Li Hung-chang, Ting Jih-chang, and Tso Tsung-tang are associated to superintend the enterprise.

SHANGHAI.

The present mail brings advices from this port to the 4th July; no later mail from London had been received. The following summary of news is from the *North China Herald*:—

A more perfectly circular argument is seldom achieved than the Councils have succeeded in describing anent wheelbarrows and Yang-king-pang bridges. After all their voluminous correspondence, they have worked round precisely to the starting point. The origin of the whole trouble was the division of the wheelbarrow tax. The French Council wanted half, but the English Council considered they were entitled to only one-third of the total fees collected. And the French Council still want half, and the English Council still decline an arrangement which would practically give it them. We are obliged to go back a little in order to be explicit. The English Council suggested, and the French accepted, as a means of settlement, the fixture of a maximum number of licences, of which each Council should be entitled to issue half. The English Council then suggested 6,000 as a maximum, which would leave either Council at liberty to issue 3,000. But the French Council wish to limit the maximum to 4,000, which is about seventy in excess of the present number issued, urging very plausibly that a large increase in the present number of wheelbarrows would be a nuisance. No doubt. But that is not the real question. The figures 6,000 and 4,000 really cover the original point at issue; for, out of 3,923 licenses now issued by the two Municipalities, the English Council issue 2,614, and the French 1,309—or as nearly as possible the proportion of two-thirds to one-third, which the former claim as a fair division of the fees. To limit the total number to 4,000, of which each Council should issue half, would therefore be to compel 614 of the wheelbarrows which now pay license fees to the English Council to go over to the French, and would thus practically enforce the half division of the total wheelbarrow tax, about which the original difference arose. As we consider that this division is manifestly unfair, in face of the very much greater area of the English and Kongkew Settlements, we are glad to see that the English Council maintain their position. The bridges, in the meantime, are getting on nicely—towards collapse.

On the 30th June the investigation of the claims of passengers for compensation for property lost by the sinking of the C.M.S.N. Co.'s steamer *Fusing*, by collision with the *Ocean*, on the 4th of April last, was resumed at the Supreme Court, before R. A. Mowat, Registrar; and Messrs. J. Thorne and G. W. Coutts, Merchant Assessors. Mr. Drummond appeared for the claimants, who were the rescued Chinese passengers and the relatives of those drowned; and Mr. Wainewright appeared for Captain Brown, of the *Ocean*. The body of the Court was again filled with natives, apparently interested in the case. Although only sixty-one passengers were drowned, there could not have been fewer than 140 family representatives in and about the Court. Before formally commencing the proceedings, Mr. Wainewright made an offer of a lump sum (the amount of which was not, however, permitted to transpire) in settlement of all the claims; and Tong-King-Sing undertook the task of making it known to the assembly. Some time was taken up in this way, the result being that the offer was refused, and the wearisome process of investigating the claims *seriatim* had to be once more resumed. No fewer than twenty-two witnesses remained to be examined; some of the relationships to the deceased being, as described by the claimants, somewhat extraordinary, such as "father-in-law's brother's sister," "aunt's husband's brother," &c. At the rate the examination is proceeding the list must occupy about a week's daily application to get through. When this is finished there will remain the assessment of the value of the ship; and none but a seer can even imagine when this remarkable series of law-suits arising out of one collision will terminate. And all this time the *Ocean* is lying idle in the harbour.

H.M.S. *Thalia*, with Mr. Medhurst on board, has returned to Chinkiang. Our correspondent, writing on June 30, says:—"It is rumoured to-day that our troubles are over, and that the Tartar general, under the influence of the Viceroy, who in turn was more or less moved by the aspect of the *Thalia*, has consented to give up four of the ringleaders in the attack on the Consulate, who will be punished by a flogging, with the cangue to follow. This, if true, is a most satisfactory settlement of affairs; and all honour is due to the energy displayed by our Consul; for the Chinese seemed inclined to be stubborn, and at one time it appeared as though there would be a deadlock. Any one who knew Chinkiang, and only under its usual aspect, would hardly recognise it now, with men-of-wars' men all over the place; for the *Décrès* is here as well as the *Thalia*."

There has been an interruption in the Nagasaki cable, which was repaired by the *H. C. Oersted*. It occurred thirty-five miles east of Gutzlaff, in about twenty-five fathoms of water. The break was maliciously caused, the cable having evidently been cut by an axe, and as there was no wind at the time the act seems inexcusable. For a distance of ten miles from Gutzlaff cable has now been laid weighing eighteen tons to the mile, so heavy therefore that no ship's anchor can lift it. It is, moreover, cased in a double set of iron wires, so that if it be raised, it will be hard to cut. While engaged in this work the *Oersted* had a large iron buoy and forty fathoms of chain stolen off Morrison Island.

At the United States Consulate-General, the case "Liu Sun Kee *v.* Russell and Co." came on for hearing before Mr. Seward, Consul-General, and Messrs. H. B. Endicott and J. Rowse, associates. Mr. Wainwright appeared for the plaintiff, and Mr. Drummond for the defendants. The plaintiff was compradore for Messrs. Russell and Co., at Tientsin, from February, 1862, to June, 1873, except in the interval between the spring and autumn of 1867, during which his service temporarily ceased. He sought to recover a large amount of money (not stated in his petition) as wages, also moneys paid by him on account of the defendants' business, and, further, property belonging to him in their possession; and he also prayed that an account might be taken of what was due from the defendants to him. The defendants, in their answer, pleaded non-indebtedness, and stated that the plaintiff had paid himself out of their moneys, and that the account rendered by him was false and fictitious. The defendants further claimed that plaintiff was indebted to them for the moneys received by him for them, the amount of which was ascertained by an account stated between them, and for which judgment in the Mixed Court was given for the defendants, to be Tls. 5,051. The case as presented is an intricate one. For various reasons, among them being the necessity of examining witnesses by commission at Tientsin, the hearing cannot be resumed until the 16th August.

On June 30, at the United States Consulate-General, Charles F. Meyers was placed on his trial, charged on three indictments with obtaining money and goods by false pretences. The history of the case is somewhat remarkable. The prisoner had formerly been in the American navy, serving on board the *Saco* as engineers' yeoman. Discharged from that vessel, he remained for some time in Japan, and came to Shanghai a very short while ago, having but little if any money, but well-dressed and looking respectable. On June 20 he was standing at the gate of the United States Consulate-General, when a Chinaman, Tung-ah-qua, came up to him, and showing him two letters, one open, the other sealed, asked him to read the names they were intended for. These letters had been given to Cheap Jack and Co., by an officer of the *Palos*, to be handed to Mr. Roche, pay clerk of the *Monocacy*, who was expected over from Japan on the 20th, but did not arrive. The open letter instructed Cheap Jack and Co. to give Mr. Roche what 'money, &c., he might require. The prisoner, on reading this letter, put both of them in his pocket, and told the Chinaman he was Mr. Roche, adding that he would call at the stores next day. He accordingly called there, and by means of the letters he obtained $20. Tung-ah-qua, who is in the shipping department at Cheap Jack's, also has a sail-loft in Hongkew, and from him, by representing himself as Paymaster of the *Palos*, and on the strength of giving an order for fifty mattresses, he obtained $5. The letters appear to have given him the idea of representing himself as an American naval officer, and as he was in possession of and wearing an officer's cap and vest, his deception was greatly aided; in fact, not only enabling him to defraud the Chinamen, but also to make a much greater attempt upon Messrs. Henry Muller and Co., to the tune of $246; though they fortu-

Digitized by Google

nately recovered their property. The charges were fully proved against him, and he was sentenced to six months' imprisonment.

The Quinsan magistrate resumed his investigation of the attack on Mr. Cooper at the Mixed Court on the 28th June, but as the inquiry was held without the presence of H.M. Consul, it carries the case no further. We understand that the magistrate has promised to arrest ten more ringleaders in the riot.

The first garden concert of the Wind Instrument Society took place on the 30th June, the weather being, by a delightful change from the twenty-five days' continuous rain, favourable to a degree for out-door promenade. A cool and refreshing breeze blew from the river, inviting the attendance of a numerous company.

The arrival of summer has, as usual, been marked in the Settlement by the presence of those whom the police term "loiterers from the the surrounding districts," and a sharp look-out is obliged to be kept to prevent mischief. Last week one well-known thief was caught and taken care of; and on the 2nd July two other suspicious characters were seen in Honkew. One of them was captured after an attempt to escape; he was armed with a dagger, and had a chisel and matches concealed in his clothes.

Mr. J. Pidgeon, overseer of drains in the employ of the Municipal Council, has been drowned in the Hwangpoo, by falling from Roberts's jetty, at Pootung. An inquiry into the circumstances was held before Mr. Mowat, and the evidence showing the death to have been accidental, a formal inquest was dispensed with.

The directors of the North China Insurance Company have issued the following notice :—The directors have now declared a dividend in respect of two-thirds of the company's profits for the above term, being eighteen per cent. on the total nett contributory premia, from which will be deducted the amounts already received by each shareholder, as interim dividend on contribution for the years 1872, 1873, and 1874 respectively.

Letters from Kiukiang state that the settlement has been nearly deluged with rain some weeks, and now it is threatened with a flood, the water being already over the bund in some places. The country above Chinkiang is also much flooded, the high-water mark at Hankow being forty feet and half an inch, and the water rising daily.

We hear on good authority from Yunnan that the officials are in a considerable state of excitement, and that the Governor is raising soldiers *en masse* to resist the English, whom he wishes to prevent even investigating the murder on the spot. Our informant adds :—"I hope England will be firm on the full programme she has laid out, or we shall fall lower than ever in the opinion of the Chinese." It will be seen that this information, coming from quite another quarter, is consistent with the report we mentioned some days ago that the Governor had addressed a memorial to the Emperor, offering to keep the frontier clear from the English or any other barbarians who threatened it.

The S. S. N. Company announce an interim (half-yearly) dividend of 3 per cent.; the C.C.S.N. Company 2½ per cent. The French Gas Company do not propose declaring any interim dividend, a large portion of the receipts of the first half-year having been employed in setting up a new gasometer and coal shed. It is hoped, however, to declare as good a dividend as last year at the end of 1875.

The transfer of the Shanghai and Hongkew Wharf to Messrs. Jardine, Matheson, and Co. is formally notified. The several wharves will in future be called Shanghai and Hongkew and Jardine's Associated Wharves.

Captain Bisbee, who has been lately acting as Harbour-master at Foochow, has been appointed to Shanghai in the stead of Mr. Viguier, who goes home.

The hulk *Water Witch* has been sold by auction for Tls. 3,000. The purchaser was Mr. Tong King Sing.

The subjoined items of intelligence are from the *Celestial Empire* :—

The most noteworthy event of the week is probably the sudden drying-up of the rain which deluged us all through the month of June, and the inauguration, on the 1st instant, of the steady heat characteristic of a Shanghai summer.

The China Merchants' Steam Navigation Company have published their intention of commencing a series of Sunday excursions from Shanghai and Ningpo to Pootoo, leaving on the return voyage early on Monday mornings.

A new Chinese paper, we are given to understand, was shortly about to be started in Shanghai; but some difficulties have arisen which at present prevent its appearance. It was to be called the *I-pao*, and was to be managed by a Sung-kiang man, who is *siu-tsai* and Christian, named Chu Liea-foo.

We have advices from Peking to the effect that a High Commissioner has at length been appointed to Yunnan, in the person of Li Hang-chang, brother of the Viceroy of Chihli. More than the bare fact, however, we do not know; but hope soon to be in possession of more complete intelligence. Affairs, however, seem from all accounts to be far from quiet in that region, and the possibilities are in favour of an armed resistance being presented to the Commission on arrival.

We hear that an association has been formed by some Chinese philanthropists in Peking for the suppression of opium-smoking. The use of samshu is also much discouraged: and from what we have been told it seems something like an English Teetotallers Society. The ever-watchful mandarins, however, see more in it than this, and look upon the organisation as a sort of vague conspiracy. They have offered a reward for the apprehension of the president, and seem determined to put down so dangerous a body. Their idea seems to be that the opium suppression is only a blind, and that the true objects of the club are subversive of the public morality and peace.

HONG KONG.

Our advices by the present mail extend to the 10th July; the P. and O. mail from London May 28 was received on the 4th of July. The following items of intelligence are from the *Hong Kong Daily Press* :—

A meeting of the Legislative Council was held on the 7th inst. There were present :—H.E. the Administrator; Hon. Sir J. Smale, Chief Justice; Hon. C. C. Smith, Acting Colonial Secretary; Hon. J. Bramston, Attorney-General; Hon. C. May, Acting Colonial Treasurer; Hon. P. Ryrie; Hon. W. H. Alexander; Hon. H. Lowcock; Mr. Wodehouse (Clerk of Councils).

The Administrator moved the second reading of an Ordinance to provide for Public and Bank Holidays. The Ordinance was read a second time, and the Council then went into committee on it.—Mr. Ryrie thought it unnecessary to have a holiday on the 2nd day of January.—The Acting Colonial Secretary said it had been customary to have two days' holiday at that time.—The Administrator said the draft had been sent round to the banks, and the managers had approved of it.—The Chief Justice said that if the holiday could be taken without any inconvenience to the merchants, the bankers not objecting, it would be a good thing.—Mr. Ryrie said there was no special reason for having a holiday on the 2nd of January last year, and he should hesitate before he sanctioned a compulsory holiday on the 2nd of January every year.—After some conversation the Council omitted the 2nd January as a holiday.—The day of the Accession of Her Majesty was also struck out.—On Good Friday being mentioned, the Chief Justice said that it was in England generally regarded as a holiday. Lord Brougham once sat on that day; and an ex-Attorney-General said his Lordship was the only judge who had sat on that day since Pontius Pilate.—The Ordinance was then passed.

The Administrator moved the second reading of an Ordinance for licensing small passenger steamers and for other purposes. The Bill was read a second time, and the Council went into committee on it.—The Attorney General said that by the Ordinance steam vessels under 100 tons would not be allowed to carry passengers without a license. That would include all vessels of the size of the P. and O. steam tug, *Saada*, which was of ninety-nine tons. The words "gross tonnage" were added after "100 tons."—The passing of the Ordinance was postponed.

The Administrator moved the second reading of an Ordinance to authorise the appropriation of a supplementary sum not exceeding $150,000 to defray the charges of the year 1874.—The Ordinance was passed.

The Administrator moved the second reading of an Ordinance to provide for the Devolution of Site of St. Paul's College, and to provide means for altering the Statutes of the said College.—The Bill was passed.

We hear from Macao of an attack having been made upon Mr. Da Silva. It appears that two men were lying in ambuscade in an empty house, which is at present undergoing repairs, in Cathedral-street, from which there is a passage leading to the Praya Grande. Mr. Da Silva generally went that way to church, and on the morning in question, accompanied by one of his younger sons, he was proceeding along, when a man named Barretto suddenly stepped out and struck him with a thick stick from behind. Mr. Da Silva at once caught hold of his adversary by the neck, and placing him against the wall gave him a severe blow on the face. Before he could repeat it, the second man, who is named Da Silva, rushed out from the empty house, and began to strike Mr. Da Silva mercilessly with a life preserver. Barretto was taken to the police-station and locked up. Da Silva has absconded, but the police are in search of him. It is said that the assailants of Mr. Da Silva had been enraged at several articles which had appeared in the *Independente*, of which he is editor. Considerable indignation has been expressed at the cowardly attack. Mr. Da Silva is wounded on the head, and has sustained several contusions on different parts of the body.

We regret to note the departure, by this mail, of the Rev. F. A. Roach, of the London Missionary Society, Canton. For a considerable time past Mr. Roach has been in a very feeble state of health, and latterly he became so ill that his medical advisers ordered him home at once. Mr. Roach has officiated in Shameen Church with much acceptance, since the departure of the Ven. Archdeacon Gray. During Mr. Roach's stay in Canton he has made many friends among the foreign community there, and much regret has been expressed at his departure. We trust that ere Mr. Roach's arrival in England he will be thoroughly restored to health, and that before long he will find some suitable sphere of labour.

Another case of skedaddling has occurred at Yokohama. An engaging young man, who has acted, for some time past, as bill-collector to several firms, conceived a sudden fancy to revisit the scenes of his childhood, or some other country with a more genial climate than that of Japan, and took passage for San Francisco

Digitized by Google

on board the P. M. str. *Great Republic*, on the 24th June. He has omitted to hand over the amount of several large bills which he has collected.

The church recently erected at Tokio, Japan, by native Christians, was opened for public worship on the 19th June. Several Protestant Missionaries of Yokohama and Tokio, and one or two Japanese, took part in the services, which were attended by about 500 persons, native and foreign.

The steamer *Ly-ee-moon*, Captain Stevens, which left England in October last for China and Japan, after a thorough repair, with new engines and boilers, is advertised for sale by auction at Hong Kong.

SIAM.

—o—

A meeting of the foreign residents was held at the British Consulate on the 2nd July, to devise some arrangement for the speedier delivery of mails from Singapore and Hong Kong, and for the despatch of mails for those places. At present the foreign Consuls undertake the delivery to and despatch of letters forwarded by the subjects of their respective countries, there being no such thing as a post-office in Siam, and the Siamese Government being evidently ignorant of the conduct of a postal service. Moreover, all letters from Siam must be prepaid in Singapore or Hong Kong postage stamps, the Consuls receiving nothing for their trouble beyond the thanks of the community. This being not only a very one-sided arrangement, but a serious tax upon the time and patience of the Consular officers, it was deemed advisable to have a regular post-boat, to receive and take charge of all inward and outward mails, with men to sort and deliver hem on arrival. H.B.M.'s Consul-General was desired to eneavour to obtain a refund of a portion of the outward postage rom the Singapore and Hong Kong Post-offices to cover the ost of this arrangement; meantime the expense would be derayed by monthly subscriptions contributed by the merchants.

Despatches received by the Siamese Government announce disturbances on the Burmese frontier, in the province of Cheen Hau, where a large band of dacoits, some 2,000 in number, were committing depredations. They had plundered a few towns, but at latest advices some 2,000 Cochin-Chinese had gathered to resist their incursions. A Siamese Commissioner had been sent up to collect reliable information as to the doings of the plunderers, and endeavour to ascertain the true cause of the disturbances, and, if necessary, a Siamese force would be sent up to assist in protecting the inhabitants of the province.

At Chiengsaan, also, a number of Burmans and Koens had cated themselves on Siamese territory, and the Siamese authorities of Chiengmai had organised a force of about 2,500 men to expel them. A Commissioner had been sent to Chiengmai from British Burmah, where he met an officer of the British Consulate-General of Siam; both were treated as guests by the Siamese Royal Commissioner. A later despatch states that the Siamese forces, after frightening away a number of Burmese settlers, had burnt down some 240 of their houses.

BORNEO.

—o—

SARAWAK.

The *Gazette* has the following on the return of Rajah Brooke:

Saturday, the 19th June, was a great day in our capital, a day, indeed, which had been looked forward to with longing by every portion of the community, as the one on which to welcome the Rajah and Ranee with befitting rejoicing on their return from their long sojourn to England. For many days before the people in the bazaar might be seen busily at work whitewashing their houses, building triumphal arches, and in other ways adorning their different quarters in anticipation of the looked-for holiday. People of all classes vied with one another in a grand display of bunting and coloured cloths, and the gardens of the different bungalows were put in requisition and their flower-beds pretty well taxed ere all the decorations were considered to be complete. The bazaar presented the appearance of an arcade from one end to the other. Doubts were entertained about the weather, which for many days had been stormy and wet, but the 19th, to the general delight of all, dawned sunny and calm.

At eight A.M. all were astir; the Government officers in full uniform, with the head chiefs of the district, repaired to the Astana to await the arrival of the steamer. They had not to wait long; a signal from a distance announced her approach, which was soon taken up by the lelahs of the Malays in the different kampongs along the river's banks. A general stir was next visible among the Chinese in the bazaar, and crackers and bombs were set a-going in deafening profusion.

The *Royalist*, rounding the point, steamed quietly past the town, with the Rajah's flag at the main, and anchored within a short distance of the Astana landing-place. Great enthusiasm was shown by the people as the Rajah and Ranee were seen to descend from the ship and make for the shore in a State barge, which was sent to receive them.

JAVA.

—o—

BATAVIA.

A correspondent states that the N. I. S. N. Company intend to run a steamer between Bali and Singapore:—A few days ago a telegram was received here to the effect that the steamer *Banda*, belonging to the N. I. S. N. Company, is to open a fortnightly service between Singapore and Macassar, *via* Samarang, Sourabaya and Buleling. We may thus in future count upon three steamships of that company in one month, one of which will touch at Banjoewangie and other coast places in the east of Java. The telegram does not state whether or not the *Banda* will anchor here on her return voyage from Macassar. Most of the traders here are very joyful at the opening of this new steam line. Above all, this has been the case since they have been assured that the *Banda* will not be in such haste as the ordinary mail steamer, but that, as long as there is cargo on shore, she will quietly lie at anchor. This is just what caused the British steamer *Vidar* to do so much business here. Captain Barrow was always patience and obligingness themselves, and it is owing to him that the *Vidar's* owners, as I hear, gained in a single year, from the steam line between Singapore and Bali alone, a profit of upwards of seventy thousand guilders. As soon, however, as the *Banda* is laid on the line the *Vidar* will do much less business. It will be the same with the *Rosa*. I fear even that both these steamboats cannot stand the competition within a comparatively short time. The N. I. S. N. Company has that in its power.

In the latest received Batavia journals there is but little news from Atchin. On this subject the Batavia *Handelsblad* says:—So far as we are aware, the Government has received no further intelligence from Atchin since the departure of the last mail; we have received a private letter from the seat of war. On the 21st June last the enemy essayed an attack on the outposts situated on our southern line. They had, however, learned prudence from us, and these lessons have not been without effect, for their attacks were confined to firing from a distance. All that they effected during this attack was confined to slightly wounding an Amboynese soldier, and to shooting a leak in a soup boiler.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 17th July; no later mail from London had arrived out. The following summary of news is from the *Straits Times*:—

His Excellency Sir William Jervois left in the *Pluto* on a visit to the East Coast of the Peninsula, accompanied by Mr. Swettenham.

The *Government Gazette* notifies that Her Majesty has confirmed Ordinance V. of 1875 (an amendment of the Indian Straits Land Act XVI. of 1839). The Secretary of State for the Colonies has confirmed the Hon. T. Braddell's six months' leave of absence on half salary. H. E. the Governor has provisionally recognised the appointment of Mr. V. Krieger as Vice Consul for Denmark at Penang. H. E. the Governor has been pleased to appoint Mr. G. C. Harman to be Acting Postmaster General from the 2nd inst., during the absence of Mr. Trotter on leave, or pending further orders.

The present low rate of exchange in India, here, and in China, is a matter of very serious import to trade, and its gravity is not diminished by the consideration that, according to all appearances and so far as circumstances enable anyone to judge, there is little prospect of either the rupee or the dollar recovering their once comfortable par values of two shillings and four and sixpence for a long time to come. When we mention that in India at the present moment the value of the rupee is only about 1s. 9⅛d., with bar silver at 55½d. per oz., and that dollars can be laid down here by the banks at 3s. 11½d. to 4s., the loss to merchants remitting for piece goods,—to Paterfamilias remitting for the support of his family,—to all paid by salaries fixed at sterling figures calculated at former par value of the rupee or dollar,—and in fact to all residents in the Far East, in one way or another, will be at once seen to be a most serious item in expenditure. Indeed, there can be little doubt that the continued decline in the value of silver currency, the almost universal medium of trade, has been one of the main causes which have contributed to the general great depression of business, which has been prevalent now for some years in India and China, and which has resulted in so many large failures of houses, once flourishing and with ample capital.

A large party of ladies and gentlemen from Penang were entertained at Larut by Captain and Mrs. Speedy at a three days' picnic, which, from the account contributed to the *Penang Gazette* by one of the excursionists, was one of the pleasantest entertainments ever given in these parts. The ladies were escorted over from Penang on Friday, the 2nd inst., by Mrs. Speedy in person, in the steamer *Quedah*, the gentlemen proceeding in the steamer *Fair Malacca*, and on arrival were comfortably accommodated, the ladies at the Residency and the gentlemen in the Court House, which was fitted up with bedsteads and other fur-

Digitized by Google

niture for their accommodation. On Saturday evening a Ball was given, which was a great success, and on Monday the party made an excursion on elephants to the waterfalls, which is described as an exceedingly pleasant trip. There were seventeen elephants, on whose backs about forty persons were accommodated, so that the excursion party, in addition to the novelty of the mode of transit, must have presented a very imposing appearance. The entire party enjoyed an uninterrupted round of pleasure during three whole days in Larut, and returned to Penang on Tuesday, the 6th inst., in high spirits, impressed with the completeness of the extensive arrangements that had been made for their entertainment by Captain and Mrs. Speedy, and the princely hospitality of which they had been the recipients.

The following is in reference to China :—

British officials of the present day in China, from H.M.'s Plenipotentiary in Peking and the Admiral commanding in the China Seas downwards, seem one and all inoculated with the policy of conciliation, which, it was thought not long ago, was to inaugurate the Millennium, but of which less is now heard. This policy is incomprehensible to a Chinese mandarin. Moreover, it is a most illogical one in regard to England's position towards China. The Chinese Government do not want to have anything to say or do with foreigners, and would be glad if they all left to-morrow. Great Britain obtained a qualified admittance to the Empire by force some forty years ago, and she has had to maintain her rights and claims by force more than once. Our right to be in China at all rests upon might, and might only. We refuse to recognise that China has any right to isolate herself from intercourse with other nations. China, however, maintains that she has such a right. Whatever the ethics of the question may be, the fact remains, and is indisputable, that Great Britain has obtained and maintains her position in China simply and solely because she is the stronger power.

The *Royalist* is announced for sale.

We understand the approximate value of the cargo of the *Comete*, whose loss by fire in Banca Straits we recently reported, is about $80,000.

CEYLON.

(FROM A CORRESPONDENT.)

In a previous letter I mentioned that although the present rage was for coffee lands and plantations in the new districts, there were better bargains frequently to be got in the old; whereupon you remarked that "doubtless investors knew what they were about, and would not prefer the new if the old were better." In this hypothesis, however, the case does not fairly appear. Of late years a good deal of capital has come to Ceylon in inexperienced hands, which yet has fructified abundantly, owing, however, more to the circumstances of coffee produce and property having gone up from 50 to 100 per cent. during the last three years than to the superior knowledge of the investors. The rise in prices, together with the run upon new lands and new districts, has forced up the first cost of land in those districts far out of proportion to the value in the old districts. Hence my remarks that better bargains may frequently be got in the old than in the new. Let me give you a few instances. Two practical planters two years ago bought an estate for £7,500; within a year and a half (or eighteen months from time of purchase) it had given them back £3,000 of their capital, while the estate had also improved in value. Two other planters bought an estate for £6,000, and got back half the first year. Another planter bought an estate for £4,500, and almost immediately after sold the half of it for the price he paid for the whole. A small estate in an old but good district was sold the other day for £400, whose *coming* crop was expected to be worth that sum. And so on, and so on. Cases might be multiplied indefinitely. A new coffee estate, of course, takes from three to six years to give a first full crop, according to climate, seasons, elevation, &c. There is field enough, however, in both new and old. The capitalist who can afford to wait for his return will perhaps still prefer new land, even at the greatly enhanced prices paid of late, while the man of small means, who looks for an early return, will invest in property, at a moderate figure, which will be productive from the outset.

For such estates, with land attached, whether forest or cleared, a demand is springing up, which, if tea is to be a success, promises speedily to be active. At this moment inquiries are abroad for lumps of 400, 500, and 1,000 acres suitable for tea, in districts where coffee has had but a partial success. There are many districts in Ceylon considered too elevated or too wet for coffee that are expected to grow tea well. Our high lands are for the most part wet. Wet is productive of leaf, and leaf is just what the tea cultivator desires.

It stands to reason, therefore, that while tea is yet in its infancy in Ceylon, while coffee lands have been run up to £10 to £15 per acre, attention should be directed to such lands as promise to yield the leaf in remunerating quantity. The cultivation of this plant may be now said to have passed the stage of experiment. Samples have been sent home, and very favourably reported on. Large clearings have been opened within the last twelve months, and others are now being made which promise, at no distant date, to make Ceylon as celebrated for its leaf as it has long been for its berry. The cultivation of the cinchona is likewise extending rapidly, chiefly, too, in districts not over high for coffee. But it grows well, also, in higher land than the ordinary coffee districts. In this cultivation there is yet room for considerable extension. Quinine of late years has risen in value considerably, owing, I hear, to the forests where it grew in South America having been cut down, and not replanted, while few of the plantations in the East have yet come into full bearing. This febrifuge is said to be used also for other purposes than medicine, so that the price keeps up, notwithstanding the great extension of the cultivation lately, both in Ceylon and India, as well as in Java. As yet, however, our spicy isle has taken the lead. The practice is now becoming common to plant out a few acres of cinchonas with every new coffee estate in districts suitable for the growth of the bark. This, too, will greatly enhance the value of the coffee plantations in which the cinchona abounds, as each such tree is considered worth from 15s. to £1 sterling, and about 400 trees will be contained in an acre of ground. Many planters intersperse them among the coffee, which plan is very economical, as the same ground and the same cultivation serve both.

Commercial Report.

(For dates see first page.)

EXPORTS.

TEA.

HANKOW.—Messrs. Drysdale, Ringer, and Co.'s Report says :—The business of the past week has been of the most trifling character, settlements since June 23, date of our last, being only 1,392 chests 935 half-chests 910 boxes at 1s. 4½d. to 1s. 7½d. per lb., 143 chests 742 half-chests at 1s. 3½d. to 1s. 4d., and 625 chests at 1s. per lb. In our last we advised the arrival of two or three musters of second crop Tea. Since then about fifty chops have been placed on the market, and these fully confirm the reports we referred to regarding the damage done to the crop by continued wet weather. The Teas are wanting alike in strength and quality, and are probably the poorest seen for some years. On their first being shown Teamen asked Tls. 24 to 25 for the best of them, this being their laid down cost on this market, but although the asking prices have been gradually declining, only two small lots of Nip-car-see have so far found buyers, one chop being settled at Tls. 18½, the other at Tls. 19½, rates much too high, in our opinion, for safety. There being no buyers on this market teamen are already shipping them in quantity to Shanghai. Unless they find more favour there than they have done here, we may fairly look forward to a very short second crop, particularly as there is no break in the weather. The country all round is flooded, and we shall barely escape having the Settlement under water. Customs export to date is as follows :—

Hankow Teas	...	32,287,757 lbs.	against 1874	25,901,057 lbs.
Re-export Kiukiang Teas		8,707,472 lbs.	„	7,540,784 lbs.
Total	...	40,995,229 lbs.	„	33,441,841 lbs.

KIUKIANG.—Musters of second crop Teas, representing 3,500 half-chests, had been placed upon the market. The quality was regarded as inferior, and it was quite evident that the excessive rainy season had seriously affected the crop. One parcel had found a buyer at Tls. 25.50, but teamen were asking Tls. 27 to 30 for the best chops. The first crop Teas were considered as practically finished, especially as regards Ningchows. The following were the statistics of supplies to date :—Ningchows, 152,262 half-chests; Hohows, 51,530 ditto; Kiukiang-packed, 18,605 ditto; total, 222,397 half-chests, or an excess of fully 30,000 half-chests over last year's yield.

SHANGHAI.—*Black :* There had been only a moderate business. The stock of first crop had been carefully weeded of almost all the good parcels, and there had also been more attention paid to common kinds, which at Tls. 18 and upwards showed rather better value than last mail. Some second crop Oopacks had arrived, and offers of Tls. 24 to Tls. 25 for some of the best had not led to business. These Teas showed evident signs of rain damage, though the leaf was in most cases well made. A few second crop Ningchows had arrived, and on chop had been settled at Tls. 30, but buyers were not inclined to go on at that price. The quality seemed to be fair. Settlements for the week 12,315 chests. Stock 11,500 chests. Prices paid had been :—Oopacks, &c., Tls. 24½ to 29; Hohows and Ninchows, Tls. 16 to 40; Oonams and Oonfaas, Tls. 17⅜ to 31.—*Green :* Teamen still held for much above the ideas of buyers. Few offers were made, and no settlements reported.

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says :—Buying has continued on a considerable scale during the week, and operations have been chiefly for Australia and the Continent. A few musters of second crop Teas have been shown, but no opinion can yet be formed as to the general quality. Natives assert that we may expect Teas of very inferior quality. Congou : Medium kinds have maintained previous rates. In common and flavoury grades a fair amount of business has taken place, owing to the Teamen having given way in their ideas; a decline in these descriptions of Tl. 1 may be quoted. Souchong : Settlements show a reduction of Tl. 1 to 2. Oolong : Purchases show a heavy decline. Flowery Pekoe : A few chops have been taken on a par with last quotations. It is evident that the supply of this description will be very short. Scented Teas have been taken on decidedly better terms, and promise even a further decline on last quotations. The export to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 20,139,998 lbs., against 15,292,186 lbs. at the same period last year. To the Colonies 1,595,361 lbs., against 3,682,765 lbs. last year. To America nil, against 154,936 lbs. last year.

Shipping Intelligence.

ARRIVALS.

At SHANGHAI.—From Hamburg, June 30, Atalanta (str.).

At HONG KONG.—From London, July 9, Hervatske; from Liverpool, Gaelic (str.); from Glasgow, Argyll (str.).

At MANILA.—From Liverpool, June 22, Leon (str.); from Cardiff, 28, Glee Maiden; July 2, Christine; from San Francisco, June 18, Springfield; 24, Corsica.

At SAIGON.—From Mauritius, July 2, Ville de Lille; from Marseilles, 8, Perseverance; from Suez, 10, City of Exeter (str.); from Bordeaux, 12, Fres de Mayo.

At SINGAPORE.—From Glasgow, July 15, Antipodes.

DEPARTURES.

From SHANGHAI.—For London, June 26, Tartar (str.).

From HONG KONG.—For Callao, July 7, Jacobine.

From MANILA.—For London, June 22, Titan, Banquereau; for Liverpool, 25, Yrurac Bat (str.); for Channel, f.o., 26, Bato; 30, Ludovic and Charles; for Boston, June 30, Favorita; July 3, Yo-Semite.

From SAIGON.—For Belle Isle, f.o., July 3, Mirzapore.

From SINGAPORE.—For London, July 12, Tartar (str.); 16, Mogul; for Liverpool, Bertie; for Odessa, 12, Tchihatchoff (str.).

THE MAILS.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, AUGUST 18.—The P. and O. Company's steamer Nizam leaves at 11 A.M. for Southampton, where she may be expected on the 22nd inst.

INWARD MAIL DUE SEPTEMBER 13.—GALLE, AUGUST 19.—The P. and O. Company's steamer Gwalior leaves here to-day for Suez and Southampton with the mails from China and the overdue mail from Australia, ex Ceylon. Australian gold for Europe, £640,000.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, AUGUST 17.—The P. and O. Company's steamer Lombardy, from Southampton 12th inst., arrived at 5, and left at 8 P.M. to-day for Malta and Port Said. She experienced foggy weather. All well.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Aug. 15, at Rotterdam, from Banjoewangie, Henriette Adriana; 18, at New York, from Batavia, Olivet; 15, off Dungeness, from Batavia, for Amsterdam, Europa; 20, at London, from China, Glaucus (str.).

DEPARTURES.—Aug. 17, from Troon, for Singapore, Lugar; 19, from Cardiff, for Singapore, Nuova Verito; 19, from London, for Yokohama, Albuera; for Rangoon, Knight Commander.

LAID ON.—At Liverpool, for Padang, Singapore, Hong Kong, and Shanghai, Antenor (str.).

SPOKEN.—Maria Sarah, from Singapore to Marseilles, July 14, 9 S., 14 W.

CASUALTIES.—The Laurens Coster, from Shields to Sourabaya, got on shore on the ridge on the 19th inst., and came off after three hours.

MISCELLANEOUS.—The Prins van Oranje (str.), from Nieuwe Diep, for Batavia, passed Gibraltar on the 16th inst.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

GREIG—On the 6th July, at Hong Kong, the wife of James Greig, of a son, still-born.
MORRIS—On the 27th June, at Foochow, the wife of Benjamin John Morris, of a son.

MARRIAGES.

DELMEGE—GEDDES.—On the 4th Aug., at Ottawa, Canada, A. A. Delmege, of Ceylon, son of the late C. C. Delmege, M.D., Staff Surg. Major, to Edith Hannah Armstrong, daughter of William Allan Geddes, Canadian Civil Service.

DEATHS.

CALDBECK—At the residence of his brother-in-law, 21, Highbury-hill, John B. Caldbeck, late Agent for the P. and O. Company at Singapore.

TELEGRAMS FROM THE FAR EAST.

FLOODS IN BURMAH.

RANGOON, AUG. 17.—Heavy floods have occurred in the neighbourhood of Prome, in Burmah, exceeding in extent and disastrous effects those of 1871.

Digitized by Google

Naval and Military.

Sir Charles Shadwell, K.C.B., late Commander-in-Chief in China, has been informed that the action taken by the commanding officers of the ships employed at Bangkok, at the time that a civil war was anticipated, owing to the dispute between the two kings, has met with approval at the Foreign-office; and despatches to that effect have been forwarded to the present Commander-in-Chief for the information of the officers named.

At the Portsmouth Police-court, on the 18th inst., James Goodhall was charged with having made a false statement on enlisting into the 98th Regiment. In the beginning of 1873 the prisoner was invalided from Hong Kong, and discharged as unfit for service, from the 80th Regiment; but on enlisting into the 98th, he asserted that he had never served Her Majesty before. It transpired, however, that more than six months had elapsed from the time of his enlistment, and he was, therefore, discharged.

The Inflexible, turret ship, is being rapidly pushed forward at Portsmouth, the number of shipwrights employed upon her having been increased from 560 to 700. In consequence of the extreme breadth of the monster ironclad, 75ft., the substantial wooden jetty and the massive stonework of the dock entrance will have to be cut away about 8ft. on either side to allow of her being launched.

The death is announced, at the age of eighty-nine, of Dr. Franklin, Inspector-General of Hospitals. The deceased was one of the senior fellows of the Royal College of Surgeons of England, and one of the oldest medical officers in the Army. He entered the service in 1808, and served in the Peninsula and in India, and was present at the battles of Chillianwallah and Goojerat.

Lieutenant J. G. K. Young, of the 80th Regiment (Hong Kong) has retired from the army by the sale of his commission. Lieutenant H. H. Harward, of the 80th, has gone out to Hong Kong to join headquarters, on transfer from the 1st West India Regiment.

The Diamond, 14, screw corvette, Captain Bosanquet, sailed on the 14th inst. from Spithead, for the Australian station, *via* the Cape of Good Hope.

Capt. Picot, Capt. Hughes Hallett, one sergeant, one drummer, and eighty-five rank and file, 57th foot, are held in readiness to embark for Ceylon.

The Lords of the Admiralty contemplate proceeding to Malta to make an official inspection during September or early in October.

OUR POSITION IN CHINA.—Mr. Boulger, in a letter to *The Times*, says:—Your Shanghai Correspondent's letter, while it deserves the thanks of every one interested in China, is a sign that the time is fast approaching when even minor difficulties will receive the attention they deserve, and more serious complications will never occur, because the Mandarins must perceive, if real reparation has to be made on each occasion, that no benefit can be derived from injury or insult offered to foreigners. It is admitted by most that even under present circumstances the majority of the Mandarins are fully aware of our irresistible power in the event of a collision. They therefore confine themselves to a passive indifference to our requests, and think that, as they have so often evaded them, the occasion for rousing our wrath may never arise. In plain words, they trifle with us as children, and their subjects go from bad to worse; and as long as we continue our present policy, so long may we expect them to continue in the same course of action. Are we not to stir until some fresh occasion offers, when perhaps all that can be done will be too late?

WE regret to record the death of Mr. J. B. Caldbeck, the late agent for the P. and O. Company at Singapore. Mr. Caldbeck had but recently returned home.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, AUGUST 18.

I regret that my last letter, which was posted as usual, did not reach you in time for publication, and as it belongs to the possibilities that it is lost, I think it best to give the entire news of the fortnight. It need scarcely to be said that in these days, when we are anxiously waiting for the announcement that the sea-serpent has made its appearance, there is not much worth reporting. Up to this moment Mr. Heemskerk has not reaped much benefit from his extraordinary proceeding in convoking the Members of the Second Chamber during the hot dog-days. To every one's astonishment a large number of our representatives were present, but they came only to state that they had no intention to work. As soon as the session was opened, Messrs. Blussé and Stieltjes announced, each in his peculiar manner, that the Liberals were quite *au fait* of the plans of the Cabinet. Two days later, however, a battle took place, and it was proved at once that it was not the Railway Bill, but the Election Bill which had induced Mr. Heemskerk to convoke the old Chamber. The object of course, was to annul the results of the recent elections, by which the Liberals are placed in a majority. It is, however, a very small one, and by creating three new anti-Liberal districts it could be annihilated. The Liberals, however, were anything but disposed to co-operate with such a project; the new House, they considered, not the old one, ought to decide about such an important Bill, which perhaps would render necessary a dissolution of the Chamber. If the Right succeeded in passing the Bill, the Left would protest by leaving the Chamber *en masse*. But this extreme measure was not necessary, as by a large majority (46 against 23) the Chamber resolved not to deal with the Bill at all. What was most surprising was to see the Liberals supported by the anti-Revolutionists. The temporary session has since been closed, the important legislative labours being postponed for the new Chamber.

It creates a good deal of uneasiness that the number of German Ultramontanes who seek an asylum in this country augments daily. Not only in Limburg—our little Spain—but also in Twenthe, they arrive by hundreds. They seem to be provided with plenty of money, for they purchase magnificent houses, for which they pay cash. It is feared that the number of these establishments in the immediate neighbourhood of the frontiers of Germany may involve us in diplomatic difficulties.

It is stated that a number of strangers is being daily enrolled at Harderwyk in our East India army. The majority come from Belgium, and our *ci-devant* compatriots seem to be much inclined for service in the Far East and for fighting the Atchinese. The bounty, a couple of hundred guilders, is as a rule expended in the little town in all sorts of extravagancies. The kidnappers are doing a good business—and earn a rich harvest by their scandalous trade. A good deal is being said to induce our anti-military population to declare in favour of compulsory military service, but I do not think with much success.

Some days ago disturbances took place at Utrecht, which assumed at one time a serious character. The matter arose from the fact that the daughter of an Ultramontane baker had fallen in love with a Protestant artisan. The father refused, not only to grant his consent for a marriage, but, acting upon advice given him by the priests, he transported his daughter to an institution for lost girls. The neighbours interfered to prevent this abuse of authority by the father, and hence some riots took place. The matter, however, is all over now, and Utrecht is as peaceful as ever. Whether the young baker's daughter will marry her admirer or not I cannot say.

The leading Ultramontane paper, *De Tyd*, states that a seminary is to be established in this country for the special purpose of educating missionaries for China and other "heathen countries." For this purpose a house has been purchased in the village of Steyl, near Venlo. The directors are already appointed, and they consist of an Austrian, a German, a Dutch, and a Luxemburg priest.

Some days since the East Indiaman *Sourabaya Packet* started from Rotterdam for Persia, under charter to the Persian Trading Company. It is hoped that this new undertaking will prove a success.

At the annual meeting of the members of the Association for Promoting Dutch Industry and Manufactures it was resolved that the necessary steps shall be taken in order to ascertain by what means Dutch industry can best benefit by the establishment of Prince Henry at Port Said, and that an address shall be forwarded to the Government asking for a subsidy to be granted to the Company Nederland for carrying the Java mails.

Rumours are circulating that the Minister of the War Department will ask for a credit of three and a half million of guilders for the execution of the fortress law.

The King (who still resides in Switzerland, where he lives *sans gêne*, just like the humblest of his subjects, and about which complaints are made by English tourists) has conferred the knighthood of the Netherland Lion upon Messrs. F. Beyerinck, resident of Kediri, and J. C. Th. Kroesen, assistant resident of Blitar; whilst the brotherhood of that Order has been conferred on Sergeant H. Scharer. Mr. B. C. Kornfeldt is appointed preacher for the inland Christian communities.

The Java *peintre artiste*, Mr. Radhen Saleh, has arrived at the Hague, and has had an audience with the Queen.

Complaints are made in the newspapers about the unseaworthiness of the coasting traders in Java. They consist mainly of vessels unfit for sea, which, without being properly repaired, are chartered. It is urged that experts should be appointed in every harbour, in order to prevent this scandalous traffic, by which much capital, and many lives are lost. It is not only necessary that the vessels should be sound, but that the masters and officers should be competent, which is at present seldom the case.

PRODUCE MARKETS.

Our market for Colonial Produce has been very firm, and as a rule confidence prevails. Money is very cheap, the banks are well provided, and trade seems in a very healthy condition.

COFFEE.—Prices are very firm, and only small lots are offered. Passaroeang is quoted 59¼c. to 59¾c. To-day the Trading Company will offer for sale 95,900 bales Java and Macassar.

TEA very firm; but owing to the high prices only limited transactions are reported.

SUGAR.—Holders are not much inclined to operate. Superior qualities are quoted f.½ above July prices, and they have met with a good demand. Inferior qualities are difficult to sell. The transactions include about 5,000 mats. The Trading Company will offer for sale the whole stock, viz., 5,200 mats.

RICE.—7,929 bags Kandanghauer, ex Koning der Nederlanden, changed hands at a price which did not transpire. About 20,000 bags Bassein and Rangoon have arrived. Prices are firm.

SPICES.—Quiet, in waiting for the forthcoming auction on the 25th. Small parcels have changed hands. Prices unaltered.

JAVA TOBACCO.—The parcels sold by private tender include the following lots, which were, as it will be seen, sold at very high biddings:

799	bales	P.K. (Gold Med.)	Blitar	136c.
1,181	„	„	Temples, in average...	101½c.
530	„	„	Djambeau	131c.
550	„	„	Tales	120c.
776	„	„	Eppe/Blitar	142c.
192	„	„	Le Comte	125c.
70	„	„	G. W. and C/D	145c.
1,197	„	„	B. v. L. and R. and N.	147½c.
852	„	„	Kaoeman Mayangan	155c.

Sumatra fetched from 102c. to 105c. Since July 15 the imports reached the cipher of 11,200 bales. The stock is 40,000 bales Java, and 3,547 bales Sumatra.

COTTON.—The quotations of American and of the new crop are slightly lower. Lots on the spot have met with a good demand.

INDIGO (JAVA).—Small lots have changed hands. The quotations have remained unaltered.

LONDON: MONDAY, AUGUST 23, 1875.

SIR RUTHERFORD ALCOCK ON KASHGAR AND CHINA.

EXCEPTING the small item of intelligence furnished about three weeks ago by the *Invalide Russe*, we have not had any very recent accounts of the precise condition of affairs between Kashgar and China, and we know absolutely nothing at present of the progress of events. We can only speculate on what is going on in that remote region, and on what the course of the war may be, but Sir RUTHERFORD ALCOCK'S remarks on the probable issues of the conflict—as put forth in his laborious contribution on the great Eastern question to the current number of the *Fortnightly Review*—may well make us pause and look with some degree of alarm and anxiety to the result of the death-struggle which is now impending, or which, for aught we know to the contrary, may now be raging in the direction of the fertile valley of the Tarim, or, mayhap, in the more inhospitable districts surrounding Urumtsi and Manasse. Sir RUTHERFORD puts the dilemma in the following words, either result being clearly adverse to British interests:—"YACOOB BEG may be left unaided from Russia and defeated, in which case the extermination of the whole "Mussulman population will inevitably follow, and the "frontier in Chinese hands will be hermetically closed, as "it was before; or the Russians may enable him to successfully resist the Chinese arms, and his independence "will be lost, as the price of such aid, with exactly the "same consequences as regards our trade, the policy of "the Russians being to exclude all competition. This "would . . . open the gates of China, through the "valley of Kashgar, to Russian arms and commerce." Look at the matter from which ever point of view we may, the result appears likely to be disastrous. The question which here naturally arises is, what makes China so persistently bent on recovering, if possible, this outlying portion of the inheritance of the Great Mogul? This question Sir RUTHERFORD answers incidentally in a manner which seems to bear some probability on the face of it. "From Kuldja," he says, "annexed to Russia in 1872, to Si-ngan-fu, the great "capital of North-Western China, lies the great caravan "road which has been traversed for 2,000 years between "Kashgar in Central Asia and the Celestial Empire, with "no mountain range to interpose, an easy gradient, and "abundant coal and wells along the steppe-like country." This, and not so much hatred of the Mahometans, is very likely the chief "reason why the Chinese at the present "moment attach so much importance to regaining pos-"session of the revolted province, and excluding the Rus-"sians from the most vulnerable point in their frontiers "against foreign intrusion." Sir RUTHERFORD ALCOCK seems to think, as we understand the drift of his paper, that Russia has no ulterior designs on the Chinese Empire, or at any rate that China is not her real goal, but that sooner or later she will rather force her way southwards from the Black Sea to the Bosphorus, or through Persia to the head of the Persian Gulf. If his vaticination be well founded, she may not interfere directly in the impending struggle between Kashgar and China, and under such circumstances the result of the conflict in the long run can hardly be doubted; for to what quarter is the Ameer to turn for aid against his colossal and overpowering enemy, with boundless resources—undeveloped, it is true—and countless multitudes at her back? He will scarcely look to "Great Britain behind the Himalayas—too far off to "aid, and too uncertain of her policy to take any decisive "action." All things considered, and much as it is to be regretted for many reasons, we fear that the future is but a black and cloudy one for the Ameer of KASHGAR, unless, perchance, some unforeseen turn in the wheel of fortune should befriend him. China has not been in the habit of consulting or being consulted by European Powers, but still an unexpected combination on their part, and a firm, and perhaps threatening remonstrance at Peking might have the effect of inducing her to let Kashgar alone, though, knowing her obstinacy and foolhardiness of old, we are inclined to doubt the possibility of this solution of the difficulty.

Let us now turn for a brief space to Sir RUTHERFORD ALCOCK'S more general remarks with regard to China. Russian advances in Central Asia and on the borders of China during the last half century he considers to be the initial cause of by far the greater part of the changes now in progress, and no one can doubt that he is right in this statement. "The contact of this semi-Oriental Power," he says, "with western culture and policy, together with the "rapid extension of her frontiers into the heart of Central "Asia and on the banks of the Amoor, has stirred to their "depths Asiatic elements in all these directions. The oc-"cupation of nearly one half of Manchuria, the patrimony "of the Manchoo Tartars, now on the Chinese throne, "taken in connection with the attacks of the Western "Powers on the sea face, has roused the whole Chinese "Empire, with its three hundred millions of a homogeneous "race, from a sleep of ages to an excited and angry ac-"tivity." There is, doubtless, a certain amount of truth in this, but still we must take leave to doubt the strength of this excited and angry activity. Sir RUTHERFORD, further, points out another disturbing element that may come from the side of Russia to plague China in the future, viz., the religious crusading spirit of the Greek Church, which has hitherto been carefully suppressed as far as China is concerned, "not to excite hostility at Peking, "which might have jeopardised other and more immediate "aims of territorial and commercial extension." This element has always been a powerful one in urging on the advance of Russia in other quarters, and if it be introduced into China, when Russia's reasons for excluding it have vanished, it will indeed be "a new source of fermentation and activity" in the Chinese mind, and one which will disturb them more than any of the religious difficulties which they have hitherto experienced. After a few other general observations on the religious question as affecting China, our late Minister at Peking lays down the not very novel *dictum* that it has long been evident that the Chinese are preparing for action, and he sums up the indications of this in a manner which shows that his views on Chinese affairs have altered somewhat for the better during the past few years; however, he takes the opportunity afforded by the casual mention of report of an American general going out to put the whole Chinese coast in a state of defence, to say sneeringly (it appears to us) that "if this prove correct, it is probably one of the "many ill-conceived schemes suggested by trading firms "with a view to large contracts, in which the Chinese "may very easily waste their resources, and accomplish no "really useful result." This sneer at the mercantile community had far better have been omitted, and is, so far as we are aware, quite uncalled for. We cordially agree with Sir RUTHERFORD in thinking that the Chinese "would "be better advised if they spent, what they could well "afford, much larger sums in developing a system of rail-"roads and telegraphic lines, and working mines with "European machinery and artificers, while creating a "really effective land and sea force placed upon a good "footing." If they would only do all this, he is of opinion that they would soon "become a Power which would not "only be able to hold its own against all enemies, but "assert its right to be taken into European Councils in all "Asiatic affairs." In his next sentence he furnishes himself the best comment on this:—"China, however, has much to learn before this can come to pass." Much, in-

Digitized by Google

deed, has she to learn, much to do, and much to undo; so much, in point of fact, that, however great an admirer he may be of China and her institutions, Sir RUTHERFORD, we conceive, can hardly hope that the very startling change which he has shadowed forth can well be effected in the present century.

THE QUEEN'S SPEECH AND MR. MARGARY.

UNTIL the close of this session of Parliament we do not suppose that a junior officer of the China Consular Service was ever alluded to in a prominent paragraph of the Queen's Speech. On Friday last, in releasing the Lords and Commons from their attendance in Parliament, Her MAJESTY, almost at the commencement of her speech, was pleased to say—"I have learnt with deep regret that the "expedition despatched by my Indian Government from "Burmah, with a view to open communications with the "Western Provinces of China, has been treacherously "attacked by an armed force while on Chinese territory. "This outrage, unhappily involving the death of a young "and promising member of my Consular Service, is the "subject of careful inquiry; and no effort shall be spared "to secure the punishment of those by whom it was in-"stigated and committed." These words will, we doubt not, be weighed and studied in China with the closest attention and with somewhat varied feelings. The Consular Service will note, with pardonable pride, Her MAJESTY'S gracious acknowledgment of the late Mr. MARGARY'S merits as a Consular officer, and the community at large will rejoice to hear that no effort will be spared to secure the punishment of his murderers, though they will probably smile when they think of the "careful inquiry" that is going on. The real value of Her MAJESTY'S words, or rather of the words of her responsible advisers, depends entirely upon the meaning to be attached to this promise, "no effort shall be spared, &c." Are we to understand that Her MAJESTY'S Government are prepared to go to war with China in order to secure the punishment of the authors of this cruel outrage? We very much fear that nothing short of one of our "little wars,"—so much ridiculed, but which, nevertheless, are indispensable—will suffice to attain the object in view, and the question is whether Her MAJESTY'S Government will go to that length or not. If they do not impress upon the Chinese that they are really prepared for this eventuality, and intend, if necessary, to demand reparation for this outrage by force of arms, its instigators and perpetrators will never receive their punishment in this world. Time wears on apace, and the world is weary of waiting for the *dénouement* of this tragedy; six months have now elapsed since Mr. MARGARY was brutally murdered, and yet nothing worth speaking of has, up to the present moment, been done to avenge this barbarous assassination, which took place, as Her MAJESTY expressly states, "on Chinese territory." Meanwhile our *prestige* in the Far East is suffering beyond all power of calculation; and not only in the Far East, but all through India and Central Asia will creep the humiliating rumour which, as the ancient poet said of yore,

Mobilitate viget, viresque acquirit eundo,

that Great Britain has received from China a gross and flagrant insult, which she hesitates to avenge.

Literature.

One of the *Academy's* Paris correspondents, M. Ph. Burty, a well-known writer on Fine Art, contributes an interesting paper on "Japonism," a term which he claims to have invented himself for the study of the art and genius of Japan. In contributing some articles under this title to a young French journal of literature and poetry, M. Burty says his "object was to attract public attention to Japan, and thus promote useful essays in science, criticism, and art. All is singular and delicious in this country and this race; the poetry, the brevity of which contains treasures of delicacy concealed under heaps of allusions; the history, which is chivalrous and romantic, made up of laughter and of love; the painting, which is brilliant; the sculpture, which is full of fine observations and delicacy; the art of working metals and that of manufacturing china, which have been carried to the highest point of perfection; drawing and printing in colours, managed by processes of which we are ignorant in Europe, and which are the surest means of artistic propaganda among the popular classes." All this is certainly well worthy of consideration, and the more so as the influence of Japanese albums on artists of all kinds is becoming very great. A Society of Japanese Studies was formed at Paris after the meeting of the Congress of Orientalists two years ago, and has published a volume of most interesting reports, illustrated with explanatory engravings, in which questions of history, linguistics, geography, the arts, &c., are dealt with. A member of this society, M. Paul Ory, is undertaking a series of translations, the general title of which is "The Manufacturing Processes of the Japanese," beginning with a rendering of a notice which is addressed to children in the country itself, and treats of the lac tree. M. Paul Ory's pamphlet is adorned with a quantity of woodcuts, reproducing the drawings of the original treatise with the most scrupulous fidelity, and it gives all the information necessary to Western nations desirous of acclimatising this useful tree. In the earlier portion of his letter, of which we have given an abstract, M. Burty refers incidentally to two *brochures*, relating more particularly to China, which he mixes up with Japanese matters in an incomprehensible fashion; the one of these is a translation of a Chinese tale by M. Leon de Rosny, which is called "Loung-Tou-Koung-Ngan; or, A Husband under a Bell," and the other is an essay on Jade, by M. Blondel, who is also the author of a history of Fans. After some remarks on a translation, published in 1871, of the "Heika Monogatari," which consists of narratives of the feudal history of Japan in the twelfth century, M. Burty devotes the remainder of his long letter to an account of the translation of a Japanese novel, just published by M. François Turrettini, of Geneva, with Japanese text opposite the translation and four facsimiles of original engravings. This novel is called "Komats et Sakitsi," or "La Rencontre de deux nobles cœurs dans une pauvre existence, nouvelles scènes de ce monde périssable exposées sur six feuilles de paravent, par Riutei Tanefico." The author, a fertile Japanese romance writer, who answers among French novelists to the school of Alexandre Dumas *père*, flourished rather more than fifty years ago. A first translation of the work in question was published at Vienna in 1847, by Dr. Pützmayer, who, says M. Burty, had the good fortune and the laudable audacity to begin, almost without a guide and without a lexicon, the translation of a literature which no one dared to tackle. In 1872 M. Anselmo Severini, of Florence, published a new and, of course, more exact translation of this same novel in Italian. That of M. Turretini initiates us more closely still into the intentions of the original, and in his preface the translator gives the public an analysis of the difficulties of all sorts over which European Japanisers stumble. M. Burty then proceeds to give a sketch of the plot of this novel, through which our limits will not allow us to follow him. He is evidently very enthusiatic on the subject of "Japonism"—a word which, by the way, we trust may not take root in our own language, and as he progresses with his studies it is to be hoped that he will learn to draw a nicer distinction between matters Chinese and matters Japanese; meanwhile, we are quite ready to agree with him that "*le Japonisme* is not an unprofitable study," and are willing to go further and say that it is likely to prove a very attractive one.

Rights and Privileges in Japan. By M. G. BOSQUET.—M. George Bosquet, of the Japanese Government Service, has contributed a very able article to the *Revue des deux Mondes* for July, under the title of "Les Mœurs, le droit public et privé du Jupon." Although short, this essay conveys a clear and accurate idea of those customs and laws which have been the mainsprings of the history of this interesting country, and without understanding which it is impossible to form a critical and sound appreciation of the events which have taken place, or of the feelings, opinions and traditions which are likely to influence the nation in the future. One of the great difficulties under which Europeans labour in an endeavour to form any accurate idea of countries such as China, India, and Japan, is the want of a recognised and well known standard, with which a state of society in which a large number of ancient customs that have long passed away in Europe are still retained can be compared. Ordinary writers, in their attempts to form comparisons between China, Japan, and European countries, habitually fail, because the differences between the states of society thus placed mentally in juxtaposition are so great that all deductions from analogy are likely to be wide of the truth, and to tend rather to confirm people in errors, misconceptions and prejudices than to convey any truthful idea of the subject under explanation. To be able to judge of countries which have retained to the present day so many elements of Archaic Society, it is essential to have an accurate acquaintance with the history of ancient laws and customs, and, as most generally known to educated men, no better standard can be adopted than the history of the law in the earlier periods of the Roman Empire. M. Bosquet, who is evidently thoroughly versed in this subject, takes this as his standpoint, and thus, as it were, introduces a common multiple without which all comparison would be hopeless. "Of all the manifestations to which a people is led by the natural development of its faculties, none reflects better its genius, or more clearly reveals it character than its legislation. It is here that every nation deposits the secret of the tendencies and of the creative forces the evolution of which constitutes its greatness or its

Digitized by Google

decadence. Had all the monuments of Roman history perished we should still find in the dry reading of the *Corpus Juris* a faithful picture of the Society which lived at Rome, of its civil and political constitution, of its moral ideas and social standard. The history of the law may also instruct us better than a dry chronicle, with regard to that Japanese 'Middle Age' which has been perpetuated down to the present day." Taking this position, M. Bosquet passes under review in a succinct and masterly manner the main characteristics of Japanese Society at the various periods of its history, which he divides into two leading epochs, the first from 660 B.C. to 1192 A.D., during which the supreme power was exercised by the Mikados; the second, from 1192 down to 1868, when it was exercised by the Shogoon, or military commander, persistently called by Europeans by the incorrect title of the Taikoon. It was only at the commencement of the seventeenth century, with Yegas, that the Shogoonate became established as a recognised legal institution. The writer proceeds to describe in the first period the origin of the Imperial power, its means of preservation, and finally its elements of feebleness and dissolution. The form of Government was a theocratic despotism over-topped by a military oligarchy. The reforms instituted by Yegas were influenced greatly by Confucian philosophy, which had been studied and in a great measure adopted by the governing classes. His object was to perpetuate a pacific domination to his posterity and a fixed form of Government for his country. His legislation partakes rather of the character of a testament than of a code, and seems thus to bear some analogy to the *edictum perpetuum* of the Romans. A large number of customs which are detailed by the writer are singularly analogous—indeed, in some cases identical—with those of ancient Rome; and to the student of ancient law the paper under notice will be found of singular interest. The same attempt to qualify absolute enactments by legal fictions, which Sir H. Maine points out, is the chief element to be borne in mind in the history of Roman Law, is shown to have existed largely in Japan, while the family system, with its absolute domination of the head mutual responsibility of its members, the subordinate portion of its female members, the rule by which the woman is "the beginning and the end of a family"—are all found existing as the recognised basis of Japanese Society. "The Japanese family is like the Roman family, a small state furnished with all its organs;—it has an absolute chief, who represents and conducts its subjects, slaves devoted to it. and who do not quit it, a common property, a deliberative council formed of the older agnates, without limit either as to number or age." M. Bosquet traces how this family system became enlarged into clans and into a strong aristocracy, the movement culuminating in the eighteenth century in a reaction in favour of the Mikadonal power, and he then passes on to the revolution of 1868, in which the power of the Daimios passed away, and an attempt was made to replace them by an oppressive bureaucracy. In M. Bosquet's opinion, "through a misfortune common to all revolutions made by authority, that of 1868 was too rapid, and on its accomplishment, finds no one to support it, because no one was prepared to make it." He says, *en résumé*, "Japan has no longer any institutions. How will she obtain any? In our opinion, she ought to look much less without and much more within. Laws cannot be transplanted from one soil to another; they can be durable and efficacious only on condition that they answer precisely to wants already borne to instincts formed to suitable general customs. The patient and often ungrateful work of the legislator, is to foresee from afar towards what state of mind he wishes to bring the nation, and to form its ideas gradually before dictating to it laws. It is not certain that by appealing to foreign lights the Japanese ministers have taken into account the difficulties of their enterprise, and of the time which it would take. The *Code Napoléon* seemed to them like the law, *par excellence*, of civilised people, and they hardly saw any other course to pursue than to translate and promulgate it with the smallest possible delay. Called upon in 1872 to inaugurate in Japan the study of our legislation, I did not take any time to recognise and to declare the emptiness of the hasty work which it was desired to undertake. It was resolved at that period, that instead of transferring laws to the country in haste, they would undertake a parallel and profound study of the laws of custom so confused and diverse, and of the French laws taken as a type of the modern laws of Europe. They would not attempt to adopt any part of it until they had penetrated from all sides into the spirit of the institutions. The legislative activity ought to be confined to a few urgent provisional reforms in procedure and jurisdiction, an attempt to separate the administrative and judicial authority and to the regulation of Civil Acts. They adopted thus a plan the execution of which must take a long series of years, but which promises more complete results."

The above will give a general idea of the very able and statesmanly paper under review, of which, however, we recommend the perusal in detail to all who are interested in the history, customs, and future destiny of Japan. We regret that our space does not permit us to enter more largely upon it, but can only say, in conclusion, that though it may be disappointing to such as might hope to see more rapid progress made, there can be little doubt in the minds of those who have in any way studied the history of law as to the correctness of M. Bosquet's views. How difficult a task it must be to supply a code of law likely to meet the diverse requirements of such a country as Japan will be apparent if it be remembered that notwithstanding the elaborate works of the jurists applied under the celebrated Constitution of Valentinian III., the Gregorian and Hermogenian collections and the Theodocian Code, no less than four different attempts were made in thirty years to consolidate the laws of Rome, as ultimately effected, in the Justinian Code and Digest.

The *Athenæum* has the following review of Mr. Dennys's Handbook of the Canton Vernacular:—

The study of the dialects of China is worthy of all encouragement. An acquaintance with them serves the double purpose of furnishing materials by which we are able to trace back the language to its original form, and thus bring it within the scope of comparative philology, and also of giving to foreigners residing in the southern provinces the power of communicating their wants to the natives, and of interesting themselves in the thoughts and opinions of those around them. The frequent appearance of grammars and handbooks of the dialects is, therefore, a healthy sign, and may be taken to indicate that the days of "Pigeon English" are numbered, and that foreigners are becoming impatient of the small amount of mercantile and other information which they are able to gather from their compradores and servants through the medium of that intolerable jargon.

Mr. Dennys is well known as a writer on Chinese matters, and the present work is a very creditable production, compiled, as he tells us in his Preface it was, in the brief intervals of leisure allowed by more pressing avocations. To his assertion that the vernaculars are not dialects of Chinese, but are distinct languages, we cannot assent, and a study of the pages of his dialogues is sufficient to disprove his case. The grammar and construction of the sentences are precisely the same, with only such trifling modifications as it is natural to find between two dialects so widely separated as the Mandarin dialect—which is spoken over the whole of the north and of the west of the Empire—and the vernacular of Canton. The main difference between the two consists in the pronunciation of a large proportion of words and in the characters employed to express others. It has come to pass that, in the course of time, certain characters have fallen into disuse, and have been replaced by others chosen for the similarity of their sounds, but without regard to their meaning. Such characters are, for the most part, indicated by the addition to them of the radical *kow*, "a mouth," to mark that they are used phonetically only. In writing, for example, *Lai*, "to come," there is used, as often as not, a character bearing the same sound, but having for its meaning "black" or "many," with the addition of *kow*, "a mouth," instead of the authorised character. Many other characters are similarly treated. But as this system of writing probably arose, in the first instance, from the mistakes of ignorant penmen, it in no way indicates that the vernacular in which it occurs is other than a dialect of Chinese.

The lessons are arranged somewhat on the Ollendorf system, that is to say, each lesson is headed by a list of words which form the subjects of the dialogue which follows. These words are well chosen, and the conversations are just such as might be turned to daily use in the districts of Canton or Hong Kong. To foreigners residing in those neighbourhoods Mr. Dennys's book will be a great help, and their gratitude is due to him for thus assisting them to liberate themselves from that state of ignorance as regards the language which unfortunately characterises the foreign communities in China.

We have received from the publisher, Mr. Harrison, the *Foreign-office List* for 1875. In addition to the usual contents, we find in the present issue a complete list of the appointment, promotions, transfers, retirements, and deaths which have been made or have occurred since the last edition.

Correspondence.

THE COLLIE TRANSACTIONS.

(To the Editor of the *London and China Telegraph.*)

SIR,—In an article upon Messrs. Collie and Co.'s failure which has appeared in your paper, you, as regards my late firm, put the case unfairly, and I must ask you to insert the following explanation:—We entered into joint account transactions with Messrs. Alexander Collie and Co., of London, in cotton, the documents for which were held by Messrs. George Collie and Co., of Liverpool—a separate and distinct firm—who had the cotton for sale. I personally visited Liverpool on two occasions, and warehouse receipts for the bales said to be held on our account were exhibited to me. It is not the practice in Liverpool to grant warrants, but simple receipts are accepted from the wharfingers, so that my firm had no hesitation in accepting Messrs. Collie and Co.'s bills, believing, as we did, that the cotton was in existence, and the documents for it, also, were in the hands of respectable third parties. From time to time we had valuations of the cotton given to us by Messrs. George Collie and Co. and Mr. Alexander Collie; and as lately as the 14th of June—the day previous to Messrs. Alexander Collie and Co.'s failure—were advised by Mr. Alexander Collie to defer the sale of it until August—the present month. No notice at any time was given us to lead us to suspect that the cotton, or any part of it, had been disposed of, and it was not until the 16th of June—the day after Messrs. A. Collie and Co.'s failure—that we learnt by telegram from Liverpool, in reply to a message sent there, asking for fresh valuations, of its non-existence. Mr. Alex-

Digitized by Google

ander Collie on the 18th of June, for the first time, informed me "that something very wrong had been done; that the cotton had been sold, and replaced, and sold again, so that all trace of our interest in it had been so mingled with other accounts as to be lost." On visiting Liverpool the same night I found this to be the case. I need not say that had we had any idea that the cotton had been sold we should have at once, without any regard to consequences, have refused our acceptance to Messrs. Collie's drafts or renewals of the same. The transactions throughout were made in good faith, and my firm has never received one penny of commission for accepting such bills.—I am, &c.,

CHARLTON C. RAINBOW.

London, 18th August, 1875.

THE SINGAPORE JAIL.

(To the Editor of the *London and China Telegraph.*)

SIR,—I see by the papers that "Captain Waller Ashe, late of the Dragoon Guards, has accepted the appointment, vacant by the death of Mr. Digby Dent, as Superintendent of Prisons at Singapore." I really think, and I am sure a great many Singaporeans think with me, that the appointment of strangers from home to govern far-away colonial jails is open to very great objections. Captain Ashe may have had more experience than Captain Dent possessed when he left England, but I much doubt that the Dragoon Guards is the school where to learn the management of natives; and it is to be feared that we may have to face another outbreak, with serious loss of life, from somewhat similar causes, if the Government continues to favour us with officers, of great merit, doubtless, but totally ignorant of the class of people they have to deal with.—I am, &c.,

London, Aug. 17, 1875. SINGAPOREAN.

OUR GRIEVANCES IN CHINA.

(To the Editor of the *London and China Telegraph.*)

SIR,—Affairs in China seem rapidly approaching a crisis, owing to the suicidal policy of the British Government. We now have on hand no less than four outrages on British subjects in three months, viz., murder of Margary and attempted massacre of Colonel Browne's party. 2. Seizure of the British steamer *Carisbrooke* on the high seas by a Chinese gunboat, an act of war having been committed by firing into a vessel sailing under the British flag—the commander of the Chinese vessel and the men who pointed the guns being British subjects. 3. Attack on the British Consulate at Chinkiang by Chinese soldiers. 4. Attack on, and attempted murder by strangulation of Cooper while out shooting near Shanghai. For all those outrages we have not received, nor are we likely to receive, any satisfaction unless some measures are adopted, sharp, short, and decisive. It would appear that any nation can get redress from the Chinese except the English, as their Government is understood to suffer any indignity. It seems to me absurd to expect the Chinese Government to punish the murderers of Margary, as they were an armed force under Chinese officers and obeying their orders. Our course should be to take vengeance on the spot, and levy a heavy indemnity upon the Government, but not have it paid by the foreign Customs, as in the Tientsin massacre. The *Carisbrooke* is seized on the ground that she was smuggling opium into Hainan. The facts already stated go to disprove that, but what I contend is that there is no such thing in China as smuggling, in our sense of the word. What do we understand by smuggling? Simply passing goods into a country without paying the lawful duty. Now I contend that it is almost impossible to do that in China. In the first place, there is no regular tariff except as regards foreign goods, and that is set at naught by the Chinese levying a second impost on the first purchaser who takes delivery of any goods from the foreign importer; besides this, every five or ten miles all over China there are barriers erected, at which squeezes are levied, only limited in amount by the squeezability of the individual carrying the goods; there is no regular tariff. That being the case, shows the iniquity of our Government in allowing the Chinese war vessels to levy black-mail on vessels leaving or entering Hong Kong on behalf of the Viceroy of Canton, as every payment made to him does not free those goods from the exactions of the local officials at whatever port the vessel lands her goods, and she cannot land those goods without entering some harbour or port, and the name of Chinese mandarin is legion. They are ubiquitous, and found everywhere on the watch to seek whom they may devour. To my mind it is absurd to accuse the *Carisbrooke* of smuggling, but it answers the purpose of the Chinese authorities to justify any outrage, and our authorities are so simple as to believe their false representations. The legal tax on a chest of opium here is $40, but it cannot be landed in Shanghai without paying a lekin or war tax of $42 in addition, or $82 in all, and this in defiance of our Treaty; but, besides this, it has also to pay at every barrier it passes, and all other goods also in like manner. The action of the Home Government in allowing the Chinese to blockade the port of Hong Kong and levy black-mail has caused great indignation amongst British residents in China.

H.M.S. *Egeria* has gone to Hainan to watch the proceedings of these Chinese gunboats, as they have returned to Hainan with the avowed purpose of seizing another British steamer, the *Pearl*, from Singapore, bound to Hainan, to land passengers, and thence to Hong Kong. It is to be hoped that the Admiral may step in at last and take matters out of the imbecile hands in which they are now placed. The farce of an inquiry was commenced yesterday into the Cooper case, but adjourned, as the Chinese magistrates refused to produce the two prisoners captured, or to arrest the ringleaders, the attacking party being 400 or 500 in number, and armed with swords, spears, &c. As a contrast to this, the captain of the *Ocean* steamer, which ran down in a fog the Chinese vessel *Fusing*, is harassed by no less than four legal processes, served on the sanction of Sir E. Hornby, although the captain was exonerated by a competent naval Court from any blame. He is now harassed by the Supreme Court, Admiralty Court, Consular or Mixed Court, and Police Magistrate, and two assessors, and the case seems interminable, as fresh claims are admitted after the decree was given. The Chinese seem to have everything their own way.—I remain, &c.,

SHANGHAI.

Shanghai, 20th June, 1875.

THE SEIZURE OF THE "CARISBROOKE."

(To the Editor of the *London and China Telegraph.*)

SIR,—The seizure of the steamer *Carisbrooke*, off the island of Hainan, has excited much interest here, and we anxiously wait to see what action our authorities will take in the matter. It may be safely assumed that Messrs. Wade and Robertson will take the Chinese view of the case, in opposition to their own country, who pays them to look after her interests in this part of the world. The original source of this imbroglio is the very objectionable practice of giving the British flag to Chinese who are ostensibly British subjects, but are only so in name, not in reality. The consequence of this is that the English flag, as in the *Arrow* case, is disgraced and brought into contempt. Another glaring lapse of duty on the part of our authorities is their tacit connivance with the breach of treaty stipulations as to opening the ports to trade. Those ports in Hainan and on the west coast are declared *open* by the Treaty of Tientsin, and it was therefore the bounden duty of our authorities to notify British subjects that they were open to trade. Then the Chinese would have been forced to make regulations accordingly. Sixteen years have elapsed, and those ports remain closed, and not even a remonstrance from our Minister, Mr. Wade, whose clear duty it was to see that the Treaty was carried out in its integrity. The Chinese are very quick at complaining of any infraction of the Treaty on our side. A very important question arises in connection with the late seizure of the steamer *Carisbrooke*, and the act of firing into her on the high seas, while under the so-called *protection* of the British flag, viz., by what authority did the Chinese act? She was not a national vessel of war in any sense of the word, but merely a cruiser belonging to and paid by the Hoppo of Canton, who farms the revenue of that port from the Viceroy. She is not commissioned by the Peking Government, but is simply a cruiser levying squeezes, legal or illegal, for the Hoppo. With the exception of three cruisers belonging to the Maritimes Customs, the appointment of whose officers rests with Mr. Hart, Inspector-General of Customs, all the so-called Chinese gunboats are merely local vessels under each provincial Governor or Intendant of Customs, and they seem to be very little else than organised pirates. In Mr. Lay's letter of May 14 to *The Times* he points out the danger to be apprehended from allowing men-of-war to be placed under the orders of the Provincial Viceroy, and he declined to be a party to any such arrangement as to the gunboats lent by the British Government, knowing well that they would soon degenerate into pirates. We now see the working of this very system in the blockade of Hong Kong by piratical vessels, commanded by unscrupulous foreigners, the harassing of the unfortunate native traders and confiscation of their property, and this under the guns of British men-of-war. The commanders of these vessels are not commissioned officers, or belonging to any regular navy, but composed of foreigners picked up for their pliability of character, or, as in the Shanghai gunboats, selected from Chinese compradores, bum-boatmen, or pilots. These are most unfit people to be intrusted with the important duties of commanding gunboats or men-of-war. These circumstances account for the pertinacity with which those vessels follow up junks and boats trading with Hong Kong; but our Government ought to look very narrowly into the constitution and acts of those vessels, especially when they presume to overhaul ships sailing under the English flag. It would be desirable that the commanders of our men-of-war should satisfy themselves that the men in command of these Chinese cruisers have commissions signed by the Emperor of China, otherwise they should not be accorded the status of war vessels, as otherwise the Chinese Government cannot be held responsible for their acts. We can now understand the reason for the opposition of the Viceroy of Canton to the opening of the ports of Kweichow and Tienpak, on the west coast, which would cause a diminution of his black-mail; yet our Government quietly look on and see his myrmidons robbing the Chinese boats entering or leaving Hong Kong. A more disgraceful or iniquitous system was never carried out in any part of the world—I am, &c.,

A SHIPOWNER.

Hong Kong, July 5, 1875.

Monetary and Commercial.

Telegrams from Hong Kong announce that at the meeting of the Hong Kong Bank on the 18th the accounts were passed, showing profits for the half year $263,000, of which $154,000 is set aside for special losses, $3,000 rebate, and $106,000 carried forward.

Tenders for £700,000 in bills on India were received at the Bank of England on the 18th inst. The amounts allotted were, to Calcutta £653,100; to Bombay, £45,700; and to Madras, £1,200. Tenders on all the Presidencies at 1s. 9$\frac{3}{4}$d. will receive about 24 per cent., above in full. These figures show a considerable improvement in the demand for remittances to the East.

The report of the Anglo-Californian Bank (Limited) for the year ended the 30th of June last states that the net profits, after providing for all charges in London and San Francisco, amount to £38,387, or, with the balance brought forward, to £41,398. An interim dividend of 8s. per share was paid in

Digitized by Google

March last, and it is proposed to distribute a further 10s. now, making 9 per cent. for the year. £5,000 is carried to reserve, and the balance of £3,575 to the new account.

The report of the Submarine Telegraph Company states that the result of the business for the last six months enables the directors to add £2,251—being the usual proportion of the gross receipts—to the reserve fund, and to recommend a dividend at the rate of 15½ per cent. per annum, carrying over a balance of £325 to the next account.

At a meeting of the creditors of Messrs. John Ranking and Co., of St. Helen's-place, the liabilities were stated at £106,897, and the assets at £58,391. It is understood that the estate will be liquidated by arrangement. A meeting has also been held of the creditors of Messrs. John Anderson and Co., of Philpot-lane, London, and Duncan Anderson and Co., of Colombo, when it was resolved to wind up the estate by arrangement.

It was arranged at the adjourned meeting of Mr. J. C. Fowlie's creditors to liquidate the estate by arrangement and not in bankruptcy. The probable dividend is expected to be about 1s. in the pound, but this is contingent upon certain bills being withdrawn which it is arranged shall not rank against the estate if 10s. in the pound be paid on them by a third party whose name they do not carry. These particular bills represent, we are told, a loss made on silk, marks being upon them as if the silk were still in existence, when it was nothing of the kind. What amount the liabilities actually shown against the estate come to we have not been told, but it may be remembered that the firm failed for nominally £100,000.

No meetings have yet been held of the creditors of Messrs. Sanderson and Co., and Young, Borthwick, and Co., bill discounters, but meanwhile the liabilities of each house have been largely reduced by the arrival of bills at maturity, and final arrangements will probably soon be entered into. There is some prospect, it is understood, of the latter firm resuming business on the 1st prox.

The P. and O. steamer *Ceylon*, with the Australian mails, and £765,000 in gold on board, and which has been overdue for some days, has arrived at Galle under sail. The cause of delay was the breaking down of her engines. A premium of eight guineas per cent. had been paid at Lloyd's to effect her insurance.

Bar Silver has, in consequence of increased orders for the East, improved in value to 56½d. per oz. standard. Mexican Dollars are in better demand, and for those now on the market, by the French steamer, a slightly higher price will be obtained.

ARTICLES OF IMPORT.

TEA.

Messrs. Goddard's Circular says:—The Market has continued to be much over-weighted, and the quantity of business done has been insignificantly small, compared with the quantity offering. Prices have been very irregular, and occasionally forced sales have been made, lowering value considerably, although in other instances fair support has been given by importers. The arrivals have been mainly from Foochow, from which place the parcels are generally comparatively small, contributing largely to the quantity of samples showing, and the difficulty of dealers in tasting and examining the bulk. Black-leaf Congous up to 1s. 5d. have been somewhat inquired for, the market having been barely supplied; a few of the finest have been selling. Red-leaf kinds are very difficult to dispose of. Scented Capers are again cheaper, and are largely offered at auction; also New Season's Congou, chiefly the Foochow kinds. Green Teas are without change. Deliveries from London, from 1st to 16th inst. inclusive, or twelve days, 1875, 7,940,000 lbs.; against twelve days, 1874, 8,232,774 lbs. Imports, deliveries, and stocks in London, from 1st January to 31st July.

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
57,746,234	87,299,242	93,907,376	102,311,526	53,138,652	63,399,926

Messrs. Arthur Capel and Co.'s Circular says:—Our market is quiet in tone, with large supplies daily offering both privately and at public auction, but as prices have now settled down at a moderate scale there is but little alteration to notice generally, black-leaf kinds being steady, with, however, occasionally rather lower prices for fair red-leaf kinds, more of which have been offering. *Congous.*—Red-leaf kinds: Siftings have sold from 8d. to 10d. per lb. for common to good, being ½d. per lb. lower. Old season's common to fair red-leaf have sold from 9¼d. to 11d. per lb., showing no change. Fair to good Kaisow kinds have sold rather lower, but Saryunes have maintained former value; fine Kaisows remain much as last week; in finest a few parcels have been sold from 1s. 11d. to 2s. 1d. per lb. Pak Lin kinds remain without material alteration; the demand is, however, only moderate. Black-leaf kinds: Old season's find a slow sale at 10d. to 10½d. per lb. In new, common to fair have sold from 1s. 0½d. to 1s. 1½d., fair to good medium 1s. 2d. to 1s. 6d. per lb., fine 1s. 7d. to 1s. 10d., finest 2s. to 2s. 3d. per lb., extra choice being still taken for export. New-make kinds: Common have sold from 10d. to 10¼d., fair 10½d. to 11d., good 11½d. to 1s., being rather easier rates, the better kinds from 1s. 2d. to 1s. 4d. being wanted. Oolongs: The demand being limited and supplies rather larger prices have become unsettled, and all kinds but really fine must be quoted fully 1d. per lb. lower. A few sales of fine Souchong have been made at last week's prices. *Scented Teas.*—Canton Capers: Prices show no improvement, all but the finest kinds being difficult of sale; prices have ranged from 9d. to 10½d. for common to fair, 11d. to 1s. 1d. for good, a few fine realising 1s. 5d. to 1s. 8d. per lb. Orange Pekoes remain much as last week. Foochow kinds of Capers show no change. Orange Pekoes: Good sold at public auction at 1s. 7d. per lb.; fine have been less in request, and to make sales rather lower prices would be necessary.

SILK.

The Market continues without animation. China Silk of the new season does not attract much attention, and as importers are very firm only a few parcels have as yet changed hands. In Cantons there is more doing, and prices are a shade better. Japan Silk is in fair demand, and prices have slightly improved. Deliveries, 1st to 18th inst., inclusive:—China, 1,771 bales; Canton, 326 bales; Japan, 452 bales; total, 2,549 bales.

Messrs. Arles, Dufour, and Co.'s Lyons Circular, dated 14th inst., says:—In Raw Silk transactions have scarcely extended beyond immediate requirements. For European sorts the chief feature is the very limited figure of contracts "to arrive," which usually take place after the crop. Buyers have not only refused to submit to higher prices asked for new Silk, on the basis of those paid for cocoons, but in several instances obtained concessions on prices of old Silk. This is a striking contrast with the activity of looms and the increased rate of consumption, and tends to show that, according to the general impression, the production of raw materials will be fully adequate to wants for some time to come. Transactions in China Raws, which had been very quiet for some time past, were expected to revive on the arrival of new Silk, and the first unloadings led, indeed, to several sales, but the eagerness of holders to move their old stock, coupled with low offers from London bankrupt-estates, is now checking the good dispositions of buyers. It is, however, expected that prices will become more regular, and business more active as soon as the cheapest parcels have disappeared from the market.

COFFEE.

During the greater part of the interval a decidedly animated demand has prevailed for all descriptions, speculative transactions being larger than for some time past, and the upward movement in prices has continued. Public sales of Plantation Ceylon have been unusually small this week, and with an active demand prices further advanced about 3s., but a weaker tone has been observable during the last day or two. Thuriday, however, a larger supply than any previous day in the fortnight was offered, met a good demand, and firm rates were realised, middling selling at 113s. Native is very scarce, and good ordinary quoted 97s. The closing quotations for Plantation Ceylon are: triage and ordinary 90s. to 104s. 6d., common grey to coloury small 105s. to 110s., fine ordinary Demerara grey 108s. to 110s., low middling grey 110s. 6d. to 112s., middling coloury 112s. 6d. to 113s. 6d., good middling to fine middling 114s. to 116s., good to superior bold coloury 117s. to 120s. 6d., peaberry 127s. 6d. to 131s. The sales of other East India include 600 bags Manila (good ordinary greenish Indian) at 90s. to 94s. per cwt.

The Dutch Trading Company's public sale of 95,953 bags Java, &c., held Thursday in Rotterdam, went off at 1c. to 1½c. above valuations, good ordinary Java selling at 60c. to 61c., against 56¾c. to 57c. at the June sale. Subjoined is the result in detail:—

	Bags.	Valued at.—Cents.	Result.—Cents.
No. 1 ...	1,193 ...	61½ ...	63 to 63½

14 ...	1,458 ...	61½ ...	62 to —

SUGAR.

The demand for refining qualities of West India has fallen off considerably, and only limited sales have been made, but no decline can be reported, although previous rates are obtained with difficulty. Brown qualities have been neglected, and only a small business has been done at rather lower rates. The business in East Indian descriptions continues very limited. About 200 tons Native Penang in bags have been sold at fully the previous value, viz., 16s. 6d., but baskets are neglected. Both clayed and unclayed Manila continue dull, and sales can only be effected on easy terms; unclayed Zebu has been sold at 15s. 6d., and fine clayed at 18s. In auction 14,304 bags superior clayed, import 1873, were bought in at 19s. per cwt.

CAMPHOR.—The market is firmer, and about 500 cases China have been sold from 67s. 6d. up to 70s. per cwt.

COLOMBO ROOT.—Good and fine qualities are scarce and in request.

COIR GOODS.—The public sales on the 6th and 13th offered 1,384 bales and 87 tons Yarn, 238 bales Fibre, and 26 tons Rope. There was a steady demand for Yarn, and the whole was sold at steady rates, and rather dearer for fine. Fibre sold at easy rates. Rope sold at a further decline, except 4 to 5 inch, which was steady.

COCOANUT OIL.—Ceylon has been in better demand, and prices have assumed an upward tendency; old has changed hands at £36 10s. to £36 15s., and new at £36 15s. up to £37 5s.; Cochin has been sold to

Digitized by Google

limited extent at £41 to £42, and Sydney is quoted £30 to £36 per ton.

COTTON has exhibited more steadiness, although a quiet tone has again prevailed. On the spot a larger business has been done, and prices in some instances are ⅛d. per lb. higher; the bulk consists of Tinnivelly and Western Madras, which close at 5½d. and 4⅞d. respectively for good fair. There has been more demand afloat, but sales continue on a small scale. Tinnivelly has recovered ⅛d. per lb., closing at 5 7-16d. for good fair.

CUTCH.—The market is quiet, and sales have been small, but prices are firmly supported, fine Pegu being quoted 27s. 6d. per cwt.

DRAGON'S-BLOOD.—Market steady, of 8 cases offered, a few sold, good bright lump at £9 per cwt.

EBONY.—No business effected.

ESSENTIAL OILS.—*Cinnamon* quiet; 2 cases good sweet sold at 4s. 3d. to 4s. 4d. *Citronelle* quiet, but steady; of 38 cases 2 only sold at 1⅝d., buyers in quantity 1½d. *Lemon Grass* quiet; and of 138 cases only about 20 sold at 2⅜d. per oz. *Aniseed* steady; and small sales at 10s. 9d.; about 100 cases sold at rather less. *Cassia* quiet; small sales at 4s. 4d. *Nutmeg* quiet; 9 cases retired.

GUMS.—*Benjamin* unchanged in value; public sales have embraced of Sumatra 109 cases; one-third sold, fine almondy glassy seconds at £10 17s. 6d. to £11 2s. 6d.; fair seconds £9; brown thirds 92s. 6d. to 95s. *Siam* steady; 3 cases retired. *Copal* quiet, and small sales of fair to good hard at 28s. to 30s. Of 680 cases offered a small proportion sold at 25s. 6d. *Damar* firmly held, but little doing; 142 cases at public sale retired. *Gamboge* steady; of 24 cases about 20 sold at £11 10s. to £11 12s. 6d. for good pipe, partly run.

GUTTA-PERCHA continues very dull, and no transactions are reported.

GALANGAL ROOT.—Market steady; small sales of fine quality effected at 22s. per cwt.

GALLS.—China have been in demand, and are very firmly held; 300 to 400 cases have been sold privately at 57s. to 59s., and 134 cases sold at auction at 56s. 6d. to 57s. per cwt. for fair unworked quality.

GAMBIER.—The market has been quieter, and prices of block are lower, but only small sales have been effected on the spot at 27s. 6d. to 28s. 3d., closing at the former price. At auction 317 bales block were bought in at 27s. 9d.; 258 bags 37 half-bales and 1 ton loose were mostly sold, fine free cubes at 40s., block 27s. 6d. per cwt.

HIDES.—At the periodical public sales there was a fair quantity of East India brought forward, but a considerable portion had been offered at previous auctions, and of the fresh parcels the quality was generally indifferent. The demand was again restricted, and little over one-third of the quantity offered was disposed of.

HEMP.—The market for Manila has been dull, and previous rates have been easily obtainable, but no decided alteration was apparent. Privately about 1,000 bales have been sold, superior brown at £29, fair to good fair at £30 10s. to £31 10s., good to fine at £32 to £33 10s. At the public sales Thursday of 2,618 bales offered only about 400 bales sold, brown at £28 to £28 5s., fine brown and mixed qualities at £29 to £29 10s., fully fair to good fair at £30 15s. to £31 10s., one lot fine £33 10s., the remainder being bought in.

JAPAN WAX is about 1s. per cwt. higher; 77 boxes sold at auction at 51s. to 53s. per cwt. for fair to good saucers.

PEPPER.—*Black* has been quiet, with only moderate transactions in Singapore at 5½d. to 5⅝d.; Penang at 4⅞d. to 4⅝d.; and of 6,550 bags at auction, a small proportion sold; Singapore, good at 5½d.; fair 5⅜d.; Penang, fair 4⅞d. *White* firm; small sales at 7¼d. for fair. At auction, of 2,125 bags, nearly two-thirds sold; fair to good bright at 7½d. to 7⅝d.

PLUMBAGO.—At auction 765 barrels Ceylon were offered, of which about 750 barrels sold, fine clean but small lump at 16s. to 16s. 6d., middling chips at 7s., dust (of which the bulk consisted) from 8s. 6d. for common to 9s. 9d. for good.

RICE.—The market has undergone some fluctuation, for after a better demand for floating cargoes at a recovery of fully 3d. per cwt., there has been less inquiry and the advance is not sustained. On the spot there has been a better demand for Bengal, and a larger business has been done in white than for some time past, and prices are firmer. The stock of soft grain consists chiefly of Rangoon, in which a fair business has been done at steady rates. The sales on the spot comprise white Bengal, fine SR at 12s. 6d. to 12s. 9d., TR at 11s. 3d., Ballam at 10s. 3d., Madras at 9s. 6d. for low to 9s. 6d. for fair, Necransie at 8s. 3d., old Rangoon at 8s. to 8s. 1½d., and new ditto at 8s. 6d. per cwt.

RATTANS.—The market has been steady, and about 30 tons have been sold under the hammer, chiefly damaged, at £11 15s. to £25 5s. per ton for inferior to good quality.

RHUBARB.—China has been steady, and of 27 cases offered the bulk sold at 4s. 2d. to 4s. 4d. per lb. for bold fine fracture and coat, 2s. 8d. to 2s. 11d. medium and bold, mostly good fracture, 1s. 6d. rough, and 9d. wormy.

SAPANWOOD.—The market has been firm, the import having been scarce, and in request; 4 tons Manila damaged sold at auction at £9 5s., and about 30 tons sound of good quality sold privately at £11 per ton.

STICKLAC.—A rather better demand has prevailed, and privately about 150 cases Siam have changed hands at full rates, at 95s. for good to 97s. 6d. for fine. At auction of 200 cases good Siam 26 cases sold at 93s. to 95s. 6d. per cwt.

SAGO.—Prices are higher, and about 1,000 bags sold privately; medium 16s. 3d. to 16s. 9d.; small landing 20s. 6d.; and of 1,860 bags at public sale, two-thirds sold at 16s. 6d. up to 17s. 6d. for good large; 16s. 3d. medium, and 20s. good small. *Flour* steady, and firmly held; 500 bags sold at 13s.

STAR ANNISEEDS are inquired for, but no transactions are reported.

SHELLS.—*Mother O' Pearl*; Small sales of Manila at £11 12s. 6d., per cwt. Demand for *Tortoise* very limited.

TAPIOCA has been quiet but steady; of about 2,000 bags offered at auction only a small proportion sold, pearl at 20s. to 21s. per cwt. for dull to good bullets, and 19s. 6d. good large. Flake middling to good Singapore 2⅛d. to 2¼d. *Flour* firm; 412 bags retired, part subsequently sold at 2¼d.

TIN is firmer; Straits on the spot is scarce, and there is inquiry for arrival. Quotations:—Straits on the spot £79 to £80, Banca £82 to £83, Billiton £80 per ton.

VEGETABLE TALLOW.—31 hogsheads good Singapore sold at 40s. 9d.

VERMILION.—Small business in China at 6s.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Though the business done has been on a moderate scale, the inquiry has been quite sufficient to keep values very steady; indeed, in some of the low qualities of Grey Shirtings, Drills, &c., producers have been less easy to deal with, and the prices paid have occasionally been the turn against buyers, as compared with previous rates. For Yarns the demand has been slow, but prices are fairly maintained.

MISCELLANEOUS.

The Ajax, from Shanghai, for London, arrived at Suez on the 18th inst.

Captain Castle, late of the str. Lotus, has been appointed to the command of the Viking, now loading by Messrs. Robertson and Co. for the Straits and China.

THE PACIFIC MAIL COMPANY AND THE CHINA TRANS-PACIFIC STEAMSHIP COMPANY.—Mr. John W. Leonard, secretary of the China Trans-Pacific Steamship Company (Limited), writes to *The Times* with reference to the steamships Vasco de Gama and Vancouver. He says they have not been bought out by the Pacific Mail Steamship Company, but have been under charter to that company now nearly twelve months. Messrs. Russell and Co., of Hong Kong, have acted as agents for these steamers in China, and are largely interested as shareholders. The China Trans-Pacific Steamship Company are informed by telegram that the Vasco de Gama, now on her voyage to the Victoria coal mines, is advertised on her return to inaugurate the service now undertaken by the Pacific Mail Steamship Company between Australia and New Zealand and San Francisco.

THE wreck of the steamer Chusan, which has been lying at the mouth of Ardrossan Harbour since October last, has been sold by auction. The hull was bought for £1,440, the boilers for £170, and the salvage material for £85.

COURVOISIER'S BRANDY

THIS celebrated Brandy is highly esteemed for its purity, delicacy of bouquet, and softness of flavour. It is used in preference to any other in many of the leading Paris and London Clubs.

It was the only one supplied to his late Majesty Napoleon III.

It has also met with the highest approval wherever it has been shipped, and the Proprietors are able to refer with pleasure to the recognitions of its superiority which reach them from every part of the world.

CAN BE OBTAINED THROUGH ANY MERCHANT.

DRUGS, CHEMICALS, &c.,

WHOLESALE AND FOR EXPORTATION.

DRUGS, &c., guaranteed genuine as imported, and PHARMACEUTICAL PREPARATIONS made in strict accordance with the Pharmacopœia.

All Orders accompanied by Drafts, or sent through Merchants, attended to promptly, and executed upon the best terms.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

Part First now ready.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—By GEORGE ASHDOWN AUDSLEY, Architect and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says:—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

For particulars apply to the Secretary, at the Publishing Office, 13, Hackin's Hey, Liverpool; or to

H. SOTHERAN and Co., London.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

THE TELEGRAMS FROM CHINA.

IN another column we give the telegrams which have been published by the daily papers, and a leader from *The Times*. Our readers would judge from the tone of our articles during the last few weeks, that the negotiations of our Minister at Peking with the Government, in reference to the steps to be taken to obtain satisfaction for the murder of Mr. MARGARY, had not been at all satisfactory, but certainly not reaching to the alarming colour given by our contemporaries. According to the best information, the danger of a rupture is by no means so imminent as represented, and the intelligence received at the Foreign-office confirms this view. We are glad to add, however, that we have reason to believe that Government are prepared to support the demands made by our Minister at Peking.

* By Pacific mail *via* San Francisco, received August 24.

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with advices, Yokohama 14th, Shanghai 18th, Hong Kong 24th July, Singapore 2nd Aug., which is due, *via* Marseilles, on Monday next, the 6th prox., left Suez on the 26th inst., one day early.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Sumatra*.—List not to hand.

To Southampton, per P. and O. steamer *Venetia*, expected to arrive Sept. 5.—From Yokohama: Lieut. G. M. Brooke. From Shanghai: Mr. and Mrs. H. J. Meade. From Hong Kong: Mr. and Mrs. Wardlaws. From Penang: Mrs. Davidson.

PASSENGERS OUTWARD.

Per French steamer *Ava*, from Marseilles, Aug. 29.—To Yokohama: Mr. Gotié To Shanghai: Mr. and Mrs. Billequin and child, Mr. and Mrs. Farnham. To Hong Kong: Mr. Nilson. To Saigon: Miss Betemps. To Singapore: Mr. S. Smith, Mr. Campbell. To Galle: Mr. Thackwell, Mr. J. Prinsess, Mr. Lytton, Mr. Martineng, Mr. Escher, Mr. Batayron, Mr. and Mrs. Gaude.

Per French steamer *Tigre*, from Marseilles, Sept. 13.—To Yokohama: Mr. and Mrs. Basch. To Shanghai: Mr. and Mrs. King. To Saigon: Mr. A. Spooner, Gen. Reboul. To Singapore: Mr. and Mrs. Schaalje and three children. To Galle: Mr. Clogstown, Mr. and Mrs. Cameron, Mr. Elphinstone.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Shanghai: Mr. and Mrs. Vardel, Mr. Leegardier, Mr. Aubry, Mr. Schetter. To Hong Kong: Mr. Everard. To Saigon: Mr. Mace.

Per French steamer *Irrawaddy*, from Marseilles, Oct. 10.—To Shanghai: Mr. R. H. Artindale. To Hong Kong: Mr. and Mrs. A. Coxon. To Singapore: Mr. and Mrs. Goldie, Mrs. Spooner, Mrs. K. B. Spooner.

Per P. and O. steamer *Australia*, from Southampton, Aug. 26.—To Yokohama: Mr. G. Joy, Mr. G. Haines, Mrs. A. Hewitt. To Shanghai: Rev. W. Brereton. To Hong Kong: Mrs. Watts. To Batavia: Mr. H. W. Skene. To Singapore: Mrs. Donaldson. To Ceylon: Miss Stevenson. To Suez: Mrs. Moss, Mr. A. Freeman.

Per P. and O. steamer *Baroda*, from Venice, Sept. 3.—To Hong Kong: Mr. H. J. Such.

Per P. and O. steamer *Baroda*, from Brindisi, Sept. 6.—To Yokohama: Mr. A. Bergrin.

Per P. and O. steamer *Nizam*, from Southampton, Sept. 9.—To Shanghai: Miss Black, Miss Gill, Mr. Withers. To Hong Kong: Mrs. D. R Crawford, Asst. Commissary Kernaghan. To Penang: Rev. and Mrs. A. Fearon. To Ceylon: Mrs. Moir.

Per P. and O. steamer *Poonah*, from Southampton, Sept. 23.—To Yokohama: Miss A. Hoare, Miss M. A. Cattell, Mr. and Mrs. T. Willcox. To Shanghai: Rev. and Mrs. R. Palmer. To Singapore: Mrs. Surwongse. To Suez: Mr. J. B. Elmslie.

Per P. and O. steamer *Baroda*, from Brindisi, Oct. 4.—To Ceylon: Capt. H. W. King.

Per P. and O. steamer *Hydaspes*, from Southampton, Oct. 7.—To Yokohama: Mrs. Goodall. To Shanghai: Mrs. Clark, Rev. J. Hoare. To Singapore: Mr. and Mrs. Griffin. To Ceylon: Mr. R. S. Fraser, Mr. A. M. White.

Per steamer *Glenfalloch*, from London Aug. 28.—To Hong Kong: Mr. J. P. Poynter To Singapore: Mr. Allan Boyle. To Penang, Mr. Paul Mengel.

Per steamer *Agamemnon* (Holt's line), from Liverpool, Aug. 29.—To Shanghai: Mr. and Mrs. Williams and child, Misses Davies, Collett, Johnson, Gill, Birt.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 7th July, and by the Pacific mail we have news to the 18th July; the P. and O. mail from London May 14 arrived out on the 26th June, the following French mail of May 21 was received on the 7th July, and the P. and O. mail of May 28 arrived out on the 11th July. The *Japan Herald* supplies the following items of news:—

The opening of the two assemblies, the *Chihokuan Kaigi* and the *Genro-in*, has taken place, the Mikado attending both and addressing the assemblies; but little is known as to their deliberations, and still less as to whether these latter will have any particular results. The first meeting of the *Chihokuan Kaigi*, or assemblage of the chief officers of the *Fu* and *Ken*, was held at the Honganji, a temple of the Sinshu Sect at Asakusa. The Mikado arrived at the temple, accompanied by the Princes, *Daijin*, *Sangi*, and other officers of his household, and entered the temple between two rows of officers. His Majesty then delivered the following address:—

Our object in opening in person this the provincial Parliament has been to secure by its means the thorough discussion of all matters af-

Digitized by Google

fecting the interior economy of Our Empire and of securing to the provinces adequate representation. You have been convoked for this purpose, and in order that your knowledge of the condition and feeling of the people of your several districts may aid you in discussing their requirements and introducing such reforms and changes as may seem to you to be most urgently demanded. It is Our wish that your deliberations should be marked by general harmony, and that sinking minor differences, they should tend to promote the ends in view in calling you together. If with one mind you adhere steadily to this course your conduct will be surely productive of the general welfare, and thus your deliberations may become the foundation of the eternal well-being of the Empire. Understand, therefore, Our views.

Kido replied in the name of the Assembly as follows :—

SIRE,—We have the honour to be assembled here by the wish of your Majesty. We do not yet know the events which are about to unfold themselves in the bosom of this noble Assembly during the days of its session, for such honour has never been accorded to the nation. It is to the high wisdom of your Majesty that we now owe the favour of which we are proud. As for us, we should be happy if the nation would only profit by a millionth part of the result of our deliberations; for we would be able to say that we have been useful to the nation and the entire country, and would thus have aided at least a little to show before the eyes of the people that our august Sovereign was animated by the best wishes for its welfare, in calling together in general asembly those who are charged to represent it.

The following address was subsequently made by the Assembly to the Mikado :—

We your humble servants, in obedience to your Imperial will, and with profound reverence, have been convoked as members of the *Chihokuan Kaigi*. We cannot foretell the results of this our assembling, in which we have no experience to guide us. But if, happily inspired by your Majesty's benevolence and justice, the results of our deliberations, duly made known to your Majesty, should contribute towards the welfare of the people, then not in vain will the Imperial will have gone forth, and the efficiency of the *Chinokuan Kaigi* will be apparent to all. Our earnest endeavours shall be directed to this end.

The Government, in dread of the freedom and comments of the press, has issued a code of Press Laws, of which fines, imprisonments, and confiscations form the basis. The fines, from a Japanese point of view, are extremely heavy, being as high as 500 yen, and confiscation of printing plant. It may be remembered that the late Minister of Finance, Enouye Bunda, was, some two years since, fined the sum of three dollars for what was described as a "gross violation of the laws of the land," and some idea may therefore be formed of the pressure which is now to be brought to bear on printers, editors, writers, and even translators. It is to be regretted that one of the Yokohama papers has been found sufficiently subservient to the Government to express its approval of these harsh laws.

The Mitsu Bishi s. s. *Kanagawa Maru* met with an accident on the 4th July, which detained her some twelve hours, but was, luckily, unattended with any serious consequences. Whilst nearing Cape Sagami, and just after the light had been sighted, the *Kanagawa Maru* ran into a thick fog bank. The engines were immediately slowed, but finding the fog did not clear, the helm was put hard a starboard to run out again. Unfortunately the current had set her down to the westward, and she ran up on a sand bank to the northward of the light. As the engines were going dead slow, no concussion was felt, and the ship was hard aground before it was discovered. An attempt was then made to back the vessel off, but the bearings becoming heated this had to be abandoned. Some lighters were obtained from the shore, and the ship having been lightened by discharging some 400 bags of sugar, was got off uninjured and proceeded to Yokohama.

A Russian Commission, consisting of a General, a Councillor of State, and three other officials, has crossed overland from St. Petersburg to Vladivostock, and will shortly arrive at Tokio for the purpose of concluding the business of taking over the southern portion of the Island of Saghalien, which, after ineffectually protesting for a series of years against, Japan has reluctantly ceded. From Yokohama the Commission proceeds in a Russian ship of war to hoist the national flag, and take formal possession of the new territory. It is to be made a Siberian penal settlement, and the convicts, amongst other duties, are to work the rich deposits of coal on the island. The want of suitable harbours is the great drawback, or presently the coal might find its way to this market or to China.

The daring and impudence of the native scamps who infest this settlement are daily becoming more apparent. Only a few days ago a European lady was strolling along the Bluff in the afternoon, in a rather unfrequented part, when she was suddenly stopped by a betto, who demanded any money or valuables she might have about her. Naturally the lady refused, and the ruffian then attempted to take by force what he could not frighten her into giving. Fortunately her cries were heard by a native policeman, who hurried to the spot, and promptly arrested the offender. We shall probably soon have robberies under arms, committed on foreigners, and the old and dangerous system of carrying revolvers for defence will come again into vogue.

The great national holiday of the Americans, the 4th July, having this year fallen on a Sunday, the usual festivities were celebrated on the 5th. The men-of-war in harbour hoisted the U.S. flag at their mastheads, but owing to neither the *Kearsage* nor the *Saco* (the only two American vessels in port) being saluting vessels, we were spared the usual deafening noise at noon, which, however, was partly compensated for by an impromptu discharge of fireworks in the streets during the day. Most of the American houses were decorated with flags, and in the evening receptions were held by the U.S. Minister, Mr. Bingham, and by General Van Buren, the Consul-General.

Mr. John Whitney, managing partner in the firm of Staples and Whitney, lessees of the Occidental Hotel, has been placed under the custody of the U. S. Marshal. The reason for this proceeding is that several of the creditors of the firm, suspecting that Mr. Whitney might attempt to depart, have applied for his detention pending some arrangement being made for their benefit.

A bill collector named J. M. Brooks, for some years past employed by a number of persons in collecting their accounts, after embezzling various sums of money, the property of his employers, has surreptitiously left for San Francisco. The total amount of his defalcations has not yet been ascertained.

The new regulations respecting passports for the interior have been made known, and although much more stringent than before, the more objectionable clauses have, thanks to the efforts of the English Minister and some of his colleagues, been considerably modified.

The Government has made an appropriation of 75,000 yen towards the expenses of Japan at the Philadelphia Centennial Exposition.

The collision case against the P.M.S.S. Co., which has been for a long time pending, has been decided in favour of the company.

The *Annie Braginton*, the first sailing vessel this season for New York, sailed with a full cargo of tea on the 25th June.

A new American Church was consecrated on the 10th July.

The subjoined additional items of news are from the *Japan Mail* :—

We allot a considerable space to a translation of recent proceedings in the assembly of Provincial Notables, less from regard to the nature of the subject—though that is possessed of a certain interest—than with the view of informing our readers of the attitude of the native mind in such a position. The speeches appear to be characterised by directness and simplicity of expression and good sense, and if a considerable space of time has failed to show a correlative result we must allow for the novelty of the situation in which the members found themselves. It is worthy of remark that the proposal to maintain the roads to the shrines in their former condition was negatived as unpractical. The chief object of debate has been to determine whether the people shall be represented by the *Kuchos* and *Kochos*, owing their appointments to the Government, or by members of their own body elected by themselves. On learning that the question had been decided in favour of the former the deputations from the Kens, who had accompanied the Governors, met together at the *Kofuku Anzen* Hall in Yedo and there determined to petition the Government against this resolution, expressing a strong conviction that the representatives should be elected by the people. The petition was signed by twenty-four persons of twelve different kens. The official closing of the session took place on the 17th July.

The *Nichi Nichi Shimbun* gives the following account of the opening of the native Christian Church on July 10 :—The Christian Church newly erected in Water-street, Yokohama, was opened at two P.M. This church has been erected by the American Missionary Ballagh, and has been called the "Church for Japanese public meeting." It is intended to accommodate 500 to 600 persons. The style of architecture is that of a European church. There was a prayer for the continuance to all ages of the Imperial throne, and that the Japanese people might learn to believe the Scriptures, to repent of their sins, and to serve the Lord with new heart, and for the gradual spread of this religion throughout Japan. Last of all a translation into Japanese was read of a prayer sent by a Chinaman, member of a Christian congregation at Amoy, giving thanks to God that in his mercy the dispute which existed between China and Japan regarding Formosa was soon peacefully settled. It is said there were about 900 Japanese present, and about 100 Europeans.

Warned by last year's losses, says the *Nichi Nichi Shimbun*, the producers of silkworms' eggs have formed themselves into companies for the purpose of regulating the supply for the present season. The heads of these companies have held a meeting, at which it was resolved that the supply of cards for the eggs should be limited to 1,730,000, to be divided among the companies, one-half being for exportation, and the other half for home consumption. This quantity, after some consideration, was reduced to 1,500,000.

Owing to the severe floods in the Niigata ken, the price of rice, barley, and all cereal crops has largely augmented in that district. In reference to the floods, the *Hochi Shimbun* observes that in Koshiu and Shinshiu the water has now subsided considerably, although a large amount of damage has been done by the floods in several low-lying towns and villages of these provinces. Heavy floods are also reported from the Nagasaki and Shirakawa ken.

The *Kaitakushi*, or colonisation department of Yezo, is making

Digitized by Google

further efforts to bring about the settlement of that portion of the island to which its experiments have been hitherto directed. A large body of labourers has been despatched to the colonial head-quarters at Sapporo, where they will be employed in farming operations.

General Rasloff, Danish Envoy to the Court of Japan, was honoured with an interview by the Mikado on the 12th July, and was subsequently entertained by H.I. Majesty's Ministers at the Palace of Hamagoten. The *Daijin* and *Sangi* were present.

The usual monthly number of the Japan *Punch* is scarcely equal to the average of merit of the artist's performances. It is clear, however, that suitable matter has been wanting, and there is no making of bricks without straw.

It is rumoured that the editors of certain newspapers—the *Nichi-Nichi*, *Choya*, *Hochi* and *Akebono Shimbun* are those named—will shortly be summoned before a court of investigation to answer, it is suggested, a charge of violating the newspaper laws.

Rear Admiral Ryder arrived in the *Vigilant* on the 27th June, and accompanied by a number of English naval officers had the honour to be presented to the Mikado on the 13th July.

The native newspapers refer to a prevalent mania for suicide, which they attribute to the heat of the weather.

The following additional directions to bearers of passports granted by H.B.M.'s Minister to British subjects have been issued by the Japanese Government :—

If the bearer does not commence his journey within thirty days from the date of his passport he must return it. If the bearer, while in the interior, finds that he cannot complete his journey within the time named in the passport he must inform his Minister by post of the reasons which prevent his doing so. Refusal to produce this passport to any local officials, such as Kucho or Kocho, or to any policeman demanding it, renders the bearer liable to arrest. He should also show his passport to the landlord of any inn at which he may lodge. The bearer must surrender this passport on returning to the port or place from whence he set out, even if he has not visited all the places named in it. A new passport is required for every fresh journey. The bearer, while in the interior, is forbidden to shoot, to trade, to conclude mercantile contracts with Japanese, and to rent houses or rooms for a longer period than his journey requires. The passport is not transferable. Any breach of these directions will be reported by the Japanese Government to the Foreign Minister, and the person so offending renders himself liable to be refused a passport at a future time.

HIOGO-OSAKA.

Our advices extend to the 12th July; the P. and O. mail from London May 14 was received on the 5th July. The following items of intelligence are from the *Hiogo News*:—

The Chinese Commissioners who are in this country on a tour of inspection of the mines arrived in Kobe on the 28th June, by the *Niigata-maru*. They put up at a house in the Native Town formerly used by Tuck Sung's Bank. Finding the heat too oppressive, they retired to one of the houses by the Waterfall, leaving their property in charge of the owners of the house. The next morning a chest, containing valuable clothes, some money and the all-important Mandarin Seal which marked their rank and official position, was gone.

H.M.S. *Vigilant*, bearing the flag of Vice-Admiral A. P. Ryder, arrived here on the 26th June, from Nagasaki, and was saluted by the U.S. corvette *Monocacy*. Colonel Horace Brown, of the late Yunnan Expedition, and Mr. W. F. Mayers, Chinese Secretary to the British Legation at Peking, were on board as passengers. She left for Yokohama next morning.

An extraordinary meeting of the Municipal Council has been held, at which the terms on which the Japanese Government is now prepared to hand over the recreation-ground, and which had been agreed to by the native authorities and the foreign Ministers, were accepted by the Council.

On the evening of the 6th July, while Mr. Ellman was sitting in front of his store in Division-street, a thief entered his premises from behind, went upstairs and stole $270 out of a box, the lid of which he prized open; he got clear off with his plunder, and we believe no trace has been discovered of his whereabouts.

The annual general meeting of the subscribers to the International Hospital was held on the 7th July, when in addition to the usual business the Small-Pox Hospital was taken over and amalgamated with the International.

The 20th June, being the anniversary of the Accession of Her Majesty Queen Victoria, H.B.M. gunboat *Frolic* and the U.S. corvette *Monocacy* dressed ship on the following day, and the latter fired a royal salute at noon.

No. 120, on the hill, consisting of 371 tsubos of land and a two-storied house and bungalow, has been offered at auction and knocked down to Mr. S. P. Galliver for Mex. $1,600.

Pillar letter-boxes are being erected on the Concession, one being already in position at the South-west corner of the Public Park and another at the corner of lot 31, opposite the Municipal Building.

CHINA.

PEKING AND TIENTSIN.

The *Peking Gazette* of the 20th June contains a curious acknowledgment of a gift of Tls. 20,000 by the late Customs Taoutai at Tientsin, in aid of the military requirements at Chihli. It is easy (says the *North China Herald*) to conceive the impoverishment of the exchequer caused by the lavish outlay upon forts and munitions of war, which has characterised Li Hung-chang's administration of the province. The present donation comes as a rather curious commentary on the Taoutai's late effort to place exactions on the trade of Tientsin, greater than even the long-suffering Chinese would tolerate. Is the present gift an earnest, then, of his genuine desire to help the finances? We scarcely have so much faith in Mandarin patriotism; and suspect it is rather intended to defeat some hostile criticism, or to smooth the way to another post. In any case, we have renewed evidence from the Viceroy's own mouth of the impoverishment which all these warlike preparations are entailing. And what good will they be? There are plenty of ways into China besides the Peiho, and the smallest European State could march an army to Peking to-morrow, if it were worth its while. China's greatest strength is her weakness and stupidity, which made Lord Elgin pity while obliged to coerce her; and a liberal policy would be a far greater protection to her than Taku forts and Armstrong guns, which will always be degrees weaker, and many degrees worse served, than the armaments that will be brought against them if her officials invite war.

The *Peking Gazette* records the termination of the little insurrection in Tientai, near Ningpo. It will be remembered that the people rebelled against certain excessive taxation, banded themselves together, and took refuge in the hills; some of them appear now to have come in, and the others to have been overcome.

It is reported that the Chinese officials at Tientsin are dissatisfied with the awards of the United States Consul in the cases of the *Shantung* and *Chihli* collisions with junks, and that the matter is likely to be appealed. The Chinese have a rumour that the officials are annoyed about the torpedoes they have been lately getting from Denmark for the Peiho; that they understood they were getting them as a present, and have been since asked and consented to pay for them.

In the *Peking Gazette* of the 24th June there is an announcement that Ting Jih-chang, who was on the 10th June appointed by Imperial decree Assistant-Commissioner for Foreign Affairs at Tientsin, had had an audience of the Imperial Regents to take leave and to receive commands before departing. A Tientsin correspondent reports the arrival of Ting Jih-chang and his having taken up his quarters in the Yamun of the Governor-General.

H.M.'s gun-vessel *Mosquito* arrived at Tientsin on the 29th June, and a Russian gun-vessel was daily expected.

SHANGHAI.

The present mail brings advices from this port to the 11th July; the French mail from London May 21 was received on the 5th July, and the following P. and O. mail of May 28 arrived out on the 8th July. The following summary of news is from the *North China Herald*:—

On the 9th July, at H.B.M.'s Consulate, Mr. Medhurst, H.B.M.'s Consul, sat with the Taoutai of Shanghai and Mr. Davenport, to continue the investigation of the claims for compensation by the relatives of the Chinese passengers and crew drowned in the collision between the steamers *Fusing* and *Ocean*. The investigation was conducted under written protest from Captain Brown, the defendant, that the Court had no jurisdiction. The list of claimants was called over, and was objected to by Mr. Wainewright and Mr. Hannen on the part of the defendant, on the ground that the names had not been properly verified. Mr. Drummond, for the plaintiffs, defended the jurisdiction of the Court, and applied that the *Ocean* should be arrested and held to bail pending the settlement of the claims, and also that she should be condemned in all costs. At its rising the Court adjourned until the 12th July.

On the 5th July the Supreme Court was occupied nearly the whole day listening to arguments for and against an application for bail, the case being another arising out of the apparently interminable proceedings in respect of the collision. The application was made by Mr. Wainewright and Mr. Hannen, who, on behalf of Mr. Peter Denny, the owner of the *Ocean*, offered Tls. 41,355 on the security of two sureties, for the release of the *Ocean*, she being now ready for sea again. The application was resisted by Mr. Drummond and Mr. Eames, on the part of the owners of the *Fusing*, on the ground of insufficiency, and the possibility that still further claims were pending against the *Ocean*.—Sir Edmund Hornby delivered judgment on the 8th July. The *Ocean* is to be released upon security not exceeding £8 per ton of her gross tonnage—besides security for the costs of the appeal. We understand that the case is to be appealed to the Privy Council by both parties. The *Ocean* has lodged security in the Supreme Court for her appeal, and the *Fusing* is said to

Digitized by Google

contemplate a cross-appeal. In the inquiry before the Registrar and merchants, a compromise has been effected as to the value of the effects of the drowned Chinese passengers; we are not aware on what terms.

A sad event occurred on the 4th July in one of the London Mission Chapels inside the city. Service had been held there in the forenoon as usual, and there was no sign of disturbance whatever. As Messrs. Muirhead and Barrett were proceeding in the afternoon to a chapel in another part of the city they were informed that the doorkeeper of the former place had been killed, They went at once, and found an immense crowd inside and outside the building, and in a state of great excitement. On getting into the chapel they saw two bodies lying on the floor, one quite dead, and the other weltering in blood, with a knife at a little distance from him. The former was recognised to be the doorkeeper, who had received in the hand, stomach, side, and heart several deadly cuts, which must have caused immediate death. The latter was breathing, yet presenting a ghastly appearance; his mouth was filled with blood, which seemed to be streaming down on either side. There was a wound in his stomach, and a heavy gash in his neck, near the artery. No one knew who he was, but after a while he began to articulate, and said he was a friend of the deceased, who had happened to come into the chapel, and while there a third party entered, who began to fight with the doorkeeper. On his endeavouring to interfere he also received several wounds, and in the meantime the person escaped. Dr. Johnson came shortly afterwards, and offered to attend to the case in the Chinese Hospital. On the arrival of the Che-hsien an official examination took place, when the wounded man repeated a story similar to the above. The impression is, however, that it is utterly without foundation, and the appearance of the man, as well as the circumstances of the case, are altogether very suspicious. At present there is no way of accounting for the deed. The deceased was upwards of sixty years of age, and the wounded man is little more than twenty. He is now in the hospital, with every likelihood of getting better, when another examination will take place, and the truth probably be arrived at.

The anniversary of the Declaration of American Independence was celebrated on the 5th July instead of the actual date, which this year happened on Sunday. Salutes of cannon were fired in the morning, and all the United States ships in harbour were fully dressed with flags. At noon also, in accordance with an annual custom at this port for the last twelve years, the Declaration was read by O. B. Bradford, Esq., Deputy Consul-General, in the presence of several well-known American residents, who, we believe, drank to the future prosperity of the Great Republic, and the success of the approaching "Centennial," in bumpers of champagne. The day was observed as a holiday, and at night there were the usual illuminations, fireworks, crackers, music, and interchange of visits.

A sad case of drowning took place on the 9th July. Mr. Thomas Gilman, third engineer of the steamer *Lord of the Isles*, in company with the third officer, went for a swim in the river. Suddenly Mr. Gilman disappeared, but rising again shortly afterwards, was seen to make great efforts to reach a buoy. The tide was too strong, and he sunk within a few feet of assistance, which Capt. Tucker and some sampans who saw his distress were hastening to render. Deceased was very much respected by all on board.

Two Ningpo coolies employed at the Hongkew Wharf have been drowned in the Hongkew Creek. The men had been bathing, and were in the water for more than half an hour. Suddenly one of them called out that something was pulling him down; his companion went to his assistance, and he also went under. Some sampan men then rendered their assistance, and with their poles recovered both bodies; medical attendance was promptly obtained, but in both cases life was extinct. Another case of death by drowning is also reported at the Hongkew Police Station. A Chinese lad, aged fifteen, in company with some others, was bathing in the Hongkew Creek; he got out of his depth, and his companions, instead of rendering him any assistance, ran away and left him to his fate.

H.M.S. *Thalia*, with Mr. Medhurst on board, has returned from Chinkiang. The sentence predicted by our correspondent in the letter we published last week has been realised. Four of the ringleaders in the attack on the Consulate have been bambooed, and are to be cangued in front of the Consulate. Four other offenders are also to be punished, and a warning proclamation on the whole incident is to be issued.

We learn from Hankow that M. de Roquette, Chief Secretary of the French Legation, arrived on the 1st July from Szechuen, where he has been for six months obtaining satisfaction for the murder of a French priest some time ago. He is said to have had much difficulty, but he got full satisfaction in the end. The Chinese are to pay Tls. 40,000 to the mission, and execute the surviving murderer; at least such is the understanding.

The judgment of the United States Consular Court, in the case Henderson *v.* Thorndike, is completely in favour of the defendant; and the Court even holds that the defendant deserves credit for having exercised, after the loss of the tea security, great pains, without charge to the petitioner, to make the petitioner's loss as small as possible. It dismisses the petition with costs against the plaintiff.

Messrs. Grosvenor and Baber have left for Hankow. Connecting their departure with the appointment of Li Han-chang, we presume it is intended that they shall travel to Yunnan with him. This will at least guarantee their safety, and prevent the misconception that would have arisen from their travelling with Sung Pao-hwa. Still, we should have preferred to see the British delegates enter Yunnan from India independently, and with a fitting escort of British troops; and we can now only hope that the much required display will be made by the despatch of a separate mission from Rangoon, with all the requisite circumstance. It is said that Li will take with him one of the members of the old Burlingame Mission, and will start in about five weeks.

Two Chinamen residing in this Settlement, and between whom, about twelve months ago, a quarrel took place, but which was supposed to have been made up, went together into the native city on the 3rd July to chin-chin joss. While there the quarrel appears to have been renewed, how is not yet stated, and near the joss-house one of them stabbed the other, who died shortly afterwards. The murderer is in the custody of the city authorities.

A Chefoo correspondent mentions an extraordinary rumour that the Chinaman, for killing whom Fawcett was tried there last year and acquitted, is actually alive near the Shantung Promontory, and was only wounded, and not killed as the mandarins stated.

The subjoined additional items of intelligence are from the *Celestial Empire*:—

A squadron of Chinese gamblers appeared on the 3rd July before the Mixed Court magistrate, brought up by the Hongkew police, not only for indulging in their favourite vice, but for allowing its hazards to lead them into a fight, which seems to have caused no small disturbance in the neighbourhood. The combatants being unprovided with munitions of war, sacked two shops, kept by a dealer in second-hand goods and a rice-seller, using their portable contents as weapons and missiles. A good many people were more or less "spoiled," says our informant, in the fray. Most of those who appeared said they were only walking by, or were looking after friends—denying that they were personally engaged in the fight. They were accordingly permitted to go, finding security that they would appear again if wanted. Three of the prisoners, however, being proved gamblers and ringleaders, were ordered to be sent into the city to be dealt with by the Che-hsien.

Another story of robbery with violence comes from a place named Kwan-yin-dong, about two hundred *li* from Shanghai, at the back of Kwen-shan. At this place, which is on the boundary of the provinces of Kiang-su and Chekiang, there is a barrier-station, with a mandarin, clerks, and attendants, seven in all, to conduct the revenue business; and an Imperial gunboat to guard the office, with a crew of thirty-two men. One night the sacred precincts of the Custom-house, Toll-office, or whatever may be its true designation, was attacked by about thirty desperadoes, thought to be creek-pirates by profession. The mandarin and his retinue were far too frightened to make any resistance; the gunboat remained silent and inactive, its crew being paralysed with terror; and the robbers sacked the premises, and carried off a booty of sixteen hundred dollars.

The second performance by the Wind Instrument Society in the public garden was more numerously attended than any previous one. The defective illumination was provided against in a most public-spirited manner by Mr. Saunders, who kept a lime-light of great brilliancy playing almost continuously over the scene, and produced the most curious and pretty effects, especially when it streamed across the lawns in a broad belt of light and fell upon the well-clipped hedges and the moving crowd. The music was exceedingly well rendered, and the selection from "Cox and Box" was greatly appreciated, reflecting much credit upon Mr. Bernard, who had arranged it for the orchestra.

Between five and six o'clock on the morning of the 3rd July two shops in Maiden-lane, Laou-ke-cheong, fell down; and four men, we are told, were very severely injured. These had long been known to be in an unsafe condition; and there are many other shops and houses in the same neighbourhood that are in so dilapidated a state that they may fall into ruins any day.

HONG KONG.

Our advices by the present mail extend to the 17th July; the French mail from London June 4 was received on the 11th of July, and the following P. and O. mail of the 11th June arrived out on the 16th July. The following items of intelligence are from the *China Mail*:—

The cargo on board the steamer *Carisbrooke* has been landed and placed in the godowns of Messrs. Russell and Co., but the shippers refuse to take delivery of their goods by signing a bond for the value of the cargo. We also understand that the shippers have brought actions in Singapore against the owner of the steamer, and that the manifests have in some cases been sent

Digitized by Google

back to Singapore for the purpose of proving the claims. The *Carisbrooke* has been taken up on a slip at West Point to undergo repairs of the damages inflicted by the shots of the *Peng Chao Hai*. An examination of the hull shows that the shots aimed at her were not quite so accurately directed as was supposed. The second angle iron of the frame from aft, on the starboard side, was shot away. Two cargo battens on the port side (opposite the broken plate) were splintered to pieces, and several bags of seeds were burst, some of the cargo being damaged by the se a water which entered through the hole in the side. Amongst the cargo were found about twenty pieces of the broken plate and four pieces of the angle-iron frame; and on the port side opposite, and about fourteen feet from the broken plate, were several pieces of conical shot, the largest weighing 11 lb. Had it not passed through fourteen feet of cargo it would have gone out at the other side of the vessel. Without therefore pretending to say the extent to which the shot fired deflected from its intended course, the results above noted by the official surveyor show that more than the rudder and rudder post was hit. So that altogether the, doubtless innocent, intentions of the amateur gunner were hardly carried out in a satisfactory way. We have already expressed our opinion of the act and its justification; but the evidence taken at Canton does not appear to have made known the actual facts of the case. Aiming at a rudder is one thing, and hitting a main beam is another.

The report of the directors of the Hong Kong, Canton, and Macao Steamboat Company, to be presented at the meeting on the 20th July, is as follows:—

Tho accounts herewith presented show that after paying running expenses, salaries, premia of insurances, repairs, and commissions, and loss of the *Poyang*, there remains, including $19,601.64 brought forward from last half year, an amount of $53,854.79 available for distribution. The directors recommend that $36,000, or 6 per cent. on the capital, be paid as dividend on the half year, $4,247.30 to Reserve and Depreciation Fund, making that fund $150,000, and $2,500 be devoted for their remuneration, leaving $11,107.49 to be carried forward to credit of new account. Of the funds in reserve the sum of $28,720.42 has been invested in Chinese Imperial Government Loan Bonds. The directors have entered into an arrangement with Mr. Quok Acheong to pay him a monthly subsidy of $2,400, but this is subject to notice of immediate cancelment upon opposition being started against the Company.

An extraordinary meeting of shareholders was held on 30th April last, in consequence of the failure of Messrs. Augustine Heard and Co., whereat it was resolved, almost unanimously, to carry on the company under the sole control of the directors, with a paid secretary, and to have the necessary Articles of Association altered, and brought for approval at a special general meeting of shareholders to be held for that purpose. The directors have called an extraordinary meeting, and have circulated to all shareholders a copy of the alterations required to meet the wishes of the shareholders as expressed at that meeting.

The sad loss of the steamer *Poyang*, together with their old servant, Captain Carroll, part of the officers, crew and passengers, is already known to the shareholders, and is much regretted by the directors. The total amount of loss sustained by the company is deducted from the present half year's profit and loss account, as will be seen by the statement. The new steamer *White Cloud* was launched on the 5th instant., and will probably be ready for work in about two months.

A meeting of thirty-one residents has been held in favour of the newly-started Humane Society. The meeting, though by no means so large as the subject deserved, may be taken to evidence the fact that some interest exists as to its objects. Amongst those present were the Hon. P. Ryrie (in the chair), Messrs. J. F. Cordes, Gillies, Tonnochy, Crawford, Cox, Ede, Wilson, Capt. Bradshaw (80th), Dr. Adams, Danby, Notley, H. W. Davis, Capt. Cairns, Gair, Dr. Dennys, McEwen, W. Morgan, Kruse, Cumming, J. K. Davis, Preston, Taylor, C. C. Cohen, and many others. The Chairman having stated the objects of the meeting and advocated their support, stating that in his opinion no very extensive apparatus was necessary to start with, the Society was duly constituted on a motion of Dr. Adams, seconded by Mr. Taylor, under the title of the "Hong Kong Humane Society," and a committee was chosen to draw up regulations, and submit them to a subsequent meeting.

A secret society has been found to exist in a place called Shek Kong village, in Sai Chew district, Namhoi, and the revelation causes no little dismay to the authorities at Canton. The society is presided over by a woman styling herself the Pak Lin Sing Moo, or the Goddess of the White Lotus. Her staff of officers consists of sixteen spiritual generals and twenty-four aides-de-camp. This lady is known as Lee Kwok She, and holds her levee in the night time on the grave of Prince Mok, a native of China who flourished towards the end of the last dynasty and was created a prince by the King of Annam, whither he had gone to trade. At present the followers of this sect are not very numerous, but are growing rapidly, so much so that the gentry of the place have thought it necessary to petition the provincial authorities. On the receipt of this report they at once secretly despatched several hundred soldiers to the place with the view of crushing out this little congregation, but with what success it has not been known.

Some men belonging to the Austrian frigate *Friedrich* appear to have met with rough treatment at Sibuco, in the Sooloo Sea. A boat was sent ashore, the flag of which was mistaken for the Spanish, and the natives fired upon the crew with sumpitans or blowpipes, carrying small arrows, killing three of the *Friedrich's* men. Several others were struck with these irritating weapons, but fortunately the arrows not being barbed were easily extracted. The German steamer *Augusta*, which is running between Labuan and the East Coast, brought down the boat's water casks, and are promised the boat itself next voyage. The *Friedrich* has gone to Singapore to coal, and to wait for the cholera to abate, when she will return and exact satisfaction from the ruler of the territory. If this is not accorded she will, it is said, seize a strip of territory as security.

The *Gazette* notifies the approval of the Secretary of State of the appointment of Mr. A. Lister as Postmaster-General. Mr. Wagner's appointment as First Clerk and Accountant in the Police department is also approved. It also notes that Taro Ando, Vice-Consul for Japan, has reported his resumption of the duties of the Vice-Consulate at this Port.

The following account, duly certified, of the average amount of Bank notes in circulation and Specie in Reserve during the month ending 30th June is published in the *Gazette*:—

Banks.	Average Amount.	Specie in Reserve.
Oriental Bank Corporation ...	$499,471	$250,000
Chartered Mercantile Bank of India, London, and China ...	612,650	205,000
Chartered Bank of India, Australia, and China	471,330	175,000
Hong Kong and Shanghai Banking Corporation	1,432,497	600,000
Total...	$3,015,948	$1,230,000

The search for the *Japan's* treasure does not appear, from all we can hear, to progress very satisfactorily. The only thing certain seems to be that a paddle-box has been grappled, but as that is disconnected from the hull, a knowledge of its whereabouts amounts to but little. The parties searching, however, deserve much credit for their perseverance, and will, we hope, finally succeed.

News has been received that a very destructive fire occurred on the 15th June at Canton. It originated, shortly after nine o'clock, in the shop of a joss-stick manufacturer named Sam Shing, in Yeong Yan Lee, Tah Tung-street. It spread with great rapidity, and was not extinguished till 5.30 next morning. The number of shops destroyed is roughly estimated at from 150 to 160.

In the Supreme Court the Chief and Mr. Justice Snowden have each delivered a lengthy judgment in the long pending case of Landstein against the King of Annam. Both judges concurred in dismissing the motion for damage for wrongful seizure of the *Dang Wee*.

An interesting report by the Surveyor General on fresh schemes for increasing the water supply of the colony has been published.

Gambling still flourishes at Canton, and the Waising lottery is being revived under official patronage.

The *Overland Trade Report* supplies the following items of intelligence:—

The Marine Court of Inquiry into the loss of the British steamer *Poyang* during the typhoon of the 31st May has delivered its finding. The Court is of opinion that no blame is attributable to the master or officers of the vessel, and that everything appears to have been done that was possible to save her, together with the lives of the passengers and crew. There was no evidence to show that the *Poyang* was other than sound, or that there was any defect in her machinery at the time of her loss. The Court was of opinion that vessels of this build were not suitable for the Macao trade during the south-west monsoon.

There is an impression abroad that the recent murder of Mr. Blacklock at Foochow was promptly investigated by the native authorities, and that several arrests of suspected persons were effected. The *Foochow Herald* is informed that the criminals are still at large, and that, beyond depriving two mandarins, civil and military, of their buttons, nothing has been done in the matter. The smugglers are crowing over their victory, and the authorities are apparently powerless; more probably, indifferent.

A new steamer for the Hong Kong, Canton, and Macao Steamboat Company has been launched at Hong Kong. She is designed to take the place of the *White Cloud*, wrecked at Macao during the great typhoon of September last, and has received her predecessor's name. The new *White Cloud* is of 652 tons burthen, and measures 200 feet in length. She was constructed at the shipbuilding yard, West Point, Hong Kong.

A meeting of the shareholders of the China Traders' Insurance Company was held at their office, Queen's-road, Hong Kong, on the 5th July, at which the resolutions passed at the last meeting were unanimously confirmed. At the meeting on the 21st June the Chairman proposed that the interest on paid-up capital should be at the rate of 6 per cent. per annum, but it was subsequently agreed to be 8 per cent. per annum.

A meeting of the Legislative Council was held on the 13th July, when the Steam Launch Ordinance as amended was passed. It transpired at this meeting that there was a notice already in

Digitized by Google

existence requiring steam launches of fifteen tons burden to carry lights. The Marine Stores Ordinance was, after some discussion, and the elision of the eighth section, passed, and the Council then adjourned *sine die*.

Rumours are afloat among the Chinese of Foochow that fresh difficulties are brewing with Japan on the Loo-Chooan tribute question.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 24th July; the French mail from London June 18 arrived out on the 17th July, and the following P. and O. mail of 25th June was received on the 23rd July. We take the following items of intelligence from the *Straits Times*:—

Considerable consternation was caused in the mercantile community on the 22nd July by the issue of a circular from the P. and O. office announcing that should the homeward mail steamer arrive before 10 A. M. on the 23rd she would be despatched the same afternoon. It was settled some time ago by the Postmaster-General in London that the steamer, when not behind her due date, should remain here twenty-four hours, and this rule had been uniformly observed by the P. and O. Company ever since. The P. and O. Agent, however, contended that by the amended contract recently entered into, the P. and O. Company are bound by no such obligation, and Singapore being merely an "intermediate port," he was under instructions to hasten the steamer's departure whenever possible. The question was settled in the present instance by an official requisition to have the steamer detained; as it turned out, the steamer did not arrive until the evening of the 23rd, but the circular has nevertheless caused serious apprehension of future inconvenience.

If the Postmaster-General at home has omitted to include in the new mail contract the former condition regarding the detention of the mail steamer at this port, it is obviously important that the error should be rectified at once. Singapore, though it may be an "intermediate port," so far as the P. and O. Co.'s branch lines are concerned, is yet an important mail centre. Mails from Australia, Java, Manila, Siam, and all parts of the Eastern Archipelago, concentrate here, and have to be sorted in, and forwarded from, the Post-office, besides an enormous amount of local mail matter, and it is impossible for the Post-office to get through the work in the short time proposed to be allowed by the P. and O. Company, even supposing the Java and other mails to arrive in time. Further, the arrival of most of these mails is timed to arrive with the P. and O. Co.'s advertised dates, and serious inconvenience would be entailed on the communities of those numerous and important out-stations were their mails detained here a fortnight through the premature departure of the homeward P. and O. mail steamer. A letter from the P. and O. agent on this subject declares his fixed intention to accelerate the departure of the steamers whenever practicable. The matter is one of great public importance, and should receive the immediate earnest attention of the Postmaster-General in London, in order that the question may be satisfactorily settled.

The Criminal Assizes closed on the 20th July. There were two murder cases, in one of which the prisoner was found guilty and sentenced to death, and in the other a verdict of acquittal was given, the prisoner having clearly acted entirely in self-defence. There were an unusually large number of cases of cutting and wounding and murderous assaults, in which very severe sentences were passed, and it would appear from the complexion of the calendar that crimes of violence have become of alarming frequency here.

The Governor-General of the Philippines has authorised Mr. John J. Cassels to act as British Vice-Consul at Ilo Ilo, instead of Mr. D. Munn.

The Philippine Bank at Manila has declared a dividend of 6½ per cent. for the first six months of the present year.

The Governor has appointed Mr. G. C. Harman, the Assistant Postmaster in charge, to be Acting Postmaster-General, with the half salary attached to that appointment from the expiry of Mr. Trotter's three months' leave of absence. This appointment is, we understand, a temporary one, until his Excellency decides definitely what course to pursue with respect to the vacancy. It is, however, an act of justice for which his Excellency deserves credit, and the appointment will meet with the approval of all who have business with the Post-office. It is to be hoped the satisfactory manner in which Mr. Harman has so far carried on the work will ensure his retention permanently in the office.

Sir William Jervois, accompanied by Mr. Swettenham, left in the *Pluto*, on the 12th July, on a visit to the native rulers of the States on the East coast of the Malay Peninsula, and returned to this port on the 23rd July. No particulars of the trip have yet been made public.

At a meeting of the Singapore Sporting Club, held at the Exchange Rooms, it was resolved to hold an autumn race meeting in the early part of November, and the stewards were requested to prepare a programme, to be submitted for approval at a subsequent meeting of the club.

According to the Manila *Comercio*, the number of large commercial vessels that entered the port of Manila during 1874—was as follows: Spanish, 94 vessels, including 20 steamers, of 31,509 tons burden. Foreign, 131 vessels, including 26 steamers, of 18,704 tons. The departures of the same class of vessels during the year, amounted to 99 Spanish and 124 foreign ships.

As the Spanish mail steamer *Panay* was leaving Manila for Singapore, owing to some defect in her steering gear, she deviated from her intended course, came consequently into collision with the *Marques de la Victoria*, a Spanish man-of-war, and destroyed her dead works on the starboard side. The *Panay* anchored again after the collision, but was ordered to proceed to Singapore by the harbour-master.

Captain Walshe, Magistrate of Police, returned to the colony on the 17th July, and resumed the duties of his office, Captain Douglas, who was acting in his place, has taken up the duties of his appointment as Second Magistrate.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The market continued dull and without change. An exception, however, may be noted in favour of Grey Shirtings, which found buyers readily at low prices. In other respects quotations were nominal.

TIENTSIN.—A moderate trade only is reported.

HANKOW.—There had been little or no improvement in the position of the Piece Goods Market. Transactions had again been of the most limited character, and generally there was no change to notice in rates, which in most cases were quite nominal.

CHINKIANG.—Messrs. Spencer and Wolff report:—The lower range of prices established in the Shanghai market has so weakened the hands of holders of Grey Goods here that they have been compelled to submit to a similar reduction. A fair demand still exists for 8¼ lbs. Grey Shirtings at quotations; T-Cloths, however, are but little inquired for. Some settlements of heavy Shirtings have been made during the week at prices which show a fair margin on Shanghai rates.

SHANGHAI.—The Chamber of Commerce Circular says: Cottons.—Until within the last day or two the fortnight has been dull and inanimate in the extreme. There has been no disposition to do more than supply the barest requirements, notwithstanding the inclination of holders to meet buyers. Two days ago, however, tempted by the pressure to sell evinced by one or two importing houses, the trade stepped in, and concluded purchases of 8¼lbs. Grey Shirtings to a large extent, at a reduction of 5 to 8 cands. per piece; Dewhurst's Eagles being done at Tls. 1.8.5, and other chops in proportion. The effect of this movement has been to unsettle the market completely for the time. Buyers are not indisposed to go on, but seem to expect still better terms, while holders, as a rule, prefer to look on, and watch the course of events. 7lbs. Shirtings have been in very moderate inquiry, only the commonest goods being at all freely current at low rates. Heavy weights: 9¾ to 10lbs. have been resold sparingly at Tls. 2.6.2 to 2.6.5. White Shirtings continue very quiet. Prices are nominally about 5 cands. lower, but it would be difficult to force sales. English Drills, after being sold freely at previous rates, seem to have gone out of demand for the moment. Jeans have been offered very generally at a reduction of about 1 mace per piece, and business to a moderate extent has resulted. T-Cloths are only in moderate supply, and sales not being forced quotations are perhaps more steadily maintained. The business done, however, has not been extensive. Fancy Cottons unchanged. Woollens, &c. in fair demand at former rates. Sales chiefly at auction.

FOOCHOW.—Sales were reported of 500 pieces 7 lbs. T-Cloths at $1.875 per piece. Lead was quoted at $8.25 per picul cash, and $9.00 per picul against tea.

CANTON.—There had been a slight improvement in the value of Lead, and quotations closed at $8.40 to $8.50 for L.B., and $8.55 to $8.60 for W.B.; sales for the fortnight had been 800 piculs common quality, and 200 piculs W.B. Quicksilver was quoted $124 per picul.

HONG KONG.—The arrivals during the interval besides the mail steamers had been the s.s. Erl King, Glengyle, Gaelic, Argyll, Priam, and Glenroy, bringing full supplies of manufactured goods for this market and the North. There had been a dull and dragging market during the fortnight, with more pressure to sell on the part of the importers, of which the Chinese had taken advantage to obtain further concessions, while the transactions reported were upon the same limited scale as before. At the outports there was little or no inquiry.

BANGKOK.—The market had been very quiet. The only demand had been for Turkey Red Yarns (12lb., No. 40), of which the stock had been cleared at 290 Tic. per bale.

BATAVIA.—The market had been visited by dealers from the coast and the interior, and although the total of their purchases was not considerable still a greater amount of business in some articles was transacted than had been the case of late. Owing to the lower quotations at home, importers had met the demand more readily, and were willing in most instances to concede a little in prices in order to effect sales.

SINGAPORE.—The market had been very quiet during the fortnight; demand generally had been dull, excepting for T-Cloths (6 lbs. especially), for which there had continued a good request, and fair sales had been made. Grey Drills and Madapollams of light weight, of which stocks were small, were also saleable.

PENANG.—The market during the fortnight had been exceedingly quiet, and transactions had been very limited. There had been no special demand for any particular staple, and prices were generally unchanged.

Digitized by Google

EXPORTS.

—o—

TEA.

YOKOHAMA.—The market had been rather brisk, settlements for the closing week amounting to 4,300 piculs. Rates had been rather stiffer after departure of last mail, but closed quiet. The arrivals since the 10th July amounted to some 7,500 piculs, and stocks on hand were about 12,000 piculs. The general character of teas shown was rather inferior, and far from equalling average quality offering at the same date last season. The T. A. Goddard had obtained a full cargo for New York. Current rate of freight £3 per 40 cubic feet. Quotations: —Common, $20.00 to 23.00; good common, $24.00 to 26.00; medium, $27.00 to 30.00; good medium, $31.00 to 34.00; fine, $35.00 to 37.00; finest, $38.00 to 40.00; choice $50.00 (very scarce and quotation nominal.)

HANKOW.—Messrs. Evans Pugh and Co.'s Report says:—Second crop Teas have been arriving freely of late, and up to the present time about 36,000 chests have come to market. The quality of them is generally considered unsatisfactory. The appearance is pretty fair, but the liquor, though not wanting in strength, is poor in quality, and the leaf after infusion is dark. Teamen having asked higher prices than most buyers were prepared to pay, the business transacted has been on a moderate scale, only about 12,000 chests being reported as settled within the last fortnight. The few first-crops that have been sold have in some instances shown rather better value. Second-crops have brought from Tls. 17 to 23½ per picul, against Tls. 17 to 25½ last season. Total arrivals during the fortnight have been about 44,000 chests, against 53,000 chests during the same period last year. Shipments for sale in Shanghai show a considerable falling off, as will be seen from the figures given below. Quotations are:—For fair to medium Oopacks Tls. 18.25 to 25.00, against Tls. 17.00 to 25.50 at same date last season; Oonfas, Tls. 16.50 to 24.25, against Tls. 17.00 to 23.75; Oonahms, Tls. 12.00 to 20.50, against Tls. 13.00 to 20.50. Settlements to date are, 323,992 chests, against 265,391 chests in 1874. Shipments on Native account, 46,450 chests, against 73,985 chests. Contracts, 804 chests, against 4,020 chests. Stock is estimated, at 11,240 chests, against 7,946 chests.

SHANGHAI.—The Chamber of Commerce Reports as follows:—Black: Settlements during the interval have again only reached about half the total of those during the same period of 1874. The business on the whole has been uninteresting. "Common Teas," during the early part of the fortnight, were again a little cheaper, but all other kinds have realised full prices. There are very few first-crop Teas left in stock. Second crops have arrived in quantity during the last few days. As a rule they are poor and pointless in the cup, and dark in infused leaf. A few 2nd Ningchows have been bought at Tls. 30 and 31, but no settlements of Hankow Teas are reported, though one chop Yung Lao-tung is said to have changed hands at Tls. 25½. Settlements for the fortnight, 14,469 chests; reshipment on owners' account, 3,275 chests; stock, 30,300 chests. Green: Stocks have accumulated to a considerable extent. No real offers are being made, but the figures named by foreigners as those at which business might result are so very far below the cost of the Teas and the ideas of owners that there is little likelihood of an opening of the market for some time to come. A few lots made up to imitate Japans have been shown, but neither in make nor water will they bear comparison with the Teas they would have to come into competition with. In appearance the Pingsueys do not reach to the average standard. In water also they are hardly up to the average. New Fychows and Teenkais are expected down in about ten days. Stock.—New Country Tea, 1,717 half-chests; Pingsueys, 15,600 half-chests; Old Tea, 2,000 half-chests.

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says:—A considerable falling off in the scale of operations has taken place during the past week, and the market closes very quiet. What remains of the first crop is of most undesirable quality, and but little of the second has as yet come to hand; heavy arrivals, however, are shortly looked for. Congou: Operations during the week have been chiefly in the common and flavoury kinds, which have recovered from the decline last quoted; other grades are without change. Souchong: A good business has taken place at rather easier rates. Oolong: Some fine teas have been taken for America, and a line of common for England, showing a considerable advance on last quotations. Flowery Pekoe: The supply of this description has nearly ceased, showing a very short crop; purchases this week are without alteration. Scented Teas: There is no change to report. The export to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 22,592,106 lbs., against 15,438,849 lbs. at the same period last year. To the Colonies, 3,889,135 lbs., against 4,090,311 lbs. last year. To America, 27,276 lbs., against 154,936 lbs. last year.

AMOY.—Congou: During the fortnight settlements had amounted to 6,888 half-chests, principally flavoury kinds at $25 to 27, and good common at $20. Stocks on offer amounted to 38,661 half-chests, but at least one-third of this quantity was mixed with spurious leaf, and accordingly unfit for export. Oolongs: The total supply to date was 25,890 half-chests, against 63,703 half-chests same time last year, showing a marked difference. No settlements reported. The picking of the second crop had commenced up-country, but was going on slowly. Musters were not expected for another month. Formosa Oolongs had been freely purchased at previous rates. At Tamsui very little crop leaf was left upon the market, and fine and choice grades were in demand, commanding higher rates.

CANTON.—Messrs. Deacon and Co.'s Report says:—Advices from home still being very discouraging, and not of a nature to impart confidence to buyers, we have again to report a very trifling business in our Tea market during the past fortnight. The almost entire indifference of buyers has not, however, led Teamen to take the initiative in offering any inducement by generally lowering their rates, though in some kinds purchases can now be made on better terms than previously. Congous: There have been few settlements, and prices are without alteration. We hear of no actual settlements at Macao, but large shipments have been made for a firm in Hong Kong, and settled there at very high prices for low and spurious Tea; a class of Tea which it is difficult to understand any discreet buyer shipping in the face of the Adulteration Act coming into force in England on the 1st January next. Scented Teas: A very small business has been transacted in both Capers and Pekoes, and of the settlements made a portion is destined for the Colonies. Medium Capers may be quoted about one tael lower, but other grades show no change; the few fine Teas on offer are firmly held. In Pekoes, fair and medium long leaf sorts are rather easier, but the business done has been so trivial that we make no change in quotations; of fine and finest Teas there is now a very small stock. "New-make" kinds have been dealt in at former rates, and are in moderate supply. Canton Greens: The whole of the settlements have been made for the Colonial markets.

SILK.

YOKOHAMA.—Scarcely anything had been done on this market. So insignificant had been the transactions that comments on quality and price of the new staple are postponed till the season opens in good earnest. Everything seemed to point to a late opening this year. The greatest uncertainty still prevailed as to the probable supply of silk-worms' eggs for the season.

SHANGHAI.—The following notification had appeared on this market. "Notice is hereby given to Foreign merchants of Shanghai, that on and after to-day, the 5th July 1875, cash payment will be required against delivery of Silk, as soon as the same has been weighed, and an account of the cost arrived at. Interest at the rate of three mace per mil per day, calculated from time of payment to date of departure of vessel, will be allowed to the buyers. By order of the members of the Silk Guild, (signed) Wang Yih-cha, Secretary." To its terms, many foreigners had submitted, but others, disliking the dictatorial tone, and the spirit of combination implied, had resisted, so that coupled with unsatisfactory telegrams from home (of failures and stagnation), the "notice" had helped to restrict business. The business of the fortnight aggregated to a fair amount, and presented no very notable feature. The demand continued to run almost entirely on the grades of Tsatlees costing from Tls. 260 to 290, on Kiahings from Tls. 240 to 290 and on coarse Taysaam from Tls. 230 to 250; prices show hardly any alteration, although the lower rate of exchange favoured buyers. In Chop Silks, transactions had been few and far between, and they were less firmly held, but not much asked for,—Koo-foo-sing's Nos. 3, 3½, and 4 had been sold at Tls. 392½, 352½, and 372½; Pahhoc at Tls. 305, Tsz-kee-yuen's Nan-ling Kiahing at Tls. 290; Re-reeled Silks, which were considered of very bad quality, had been taken for America at high prices. Settlements for the fortnight, Chinas, 4,000 bales. Total settlements since 1st June, 1875, 14,600 bales; against 1874-75, 11,500 bales; 1873-74, 8,500 bales. Comparative unsold stock on this market, on the 10th July, 1875, 15,000 bales; 1874, 12,000 bales; 1873, 8,000 bales.

CANTON.—Messrs. Deacon and Co. report:—Buying commenced early in the fortnight at about last closing rates, and a considerable business was transacted for French mail, resulting in settlement of nearly 500 bales. For this mail steamer 380 bales are reported to have changed hands. Nos. 4 and 5 Tsatlee have lately been bought at a slight decline, and the former quality is now quoted $320 to 325 per picul. Last London advices by wire give 11s. 6d. per lb. as present value there. Third crop samples are daily looked for. The weather lately has been very favourable for producing, and an unusually large yield, estimated at about 4,000 bales Tsatlee, is expected. Loongkongs: 20 bales of this description are included in above settlements. Long-reels have been taken by Parsees to extent of 100 piculs. Re-reels are in small demand, and no fresh transactions are reported. Stock is computed at 900 to 1,000 bales Tsatlee, 150 bales Loongkong, 100 bales Cumchuck and Lacklow, and about 200 to 300 bales of inferior kinds.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Aug. 25, at Liverpool, from Rangoon, Bacchus; at New York, from Colombo, Pandila; at Amsterdam, from Akyab, Lennatin; from Rangoon, Nehai; 26, at London, from Akyab, Callao; at Falmouth, from Akyab, Isida; at London, from Rangoon, Beau Monde; 27, at Antwerp, from Akyab, Ravenna; 25, at Amsterdam, from Passaroeang, Cornelia; from Banjoewangie, Pieter Adolf; 27, from Samarang, President van Ryckevorsel; July 15, at Callao, from Hong Kong, Frances Amanda; 29, at Falmouth, from Bassein, Chasca; from Akyab, Blandina P.; from Rangoon, Annie Fish.

DEPARTURES.—Aug. 25, from Cardiff, for Singapore, Europa; 24, from Glasgow, for Batavia, Bromo (str.); 26, from Cardiff, for Galle, Tranquebar; 25, from Penarth, for Singapore, Star of the South; July 17, from Buenos Ayres, for Batavia, David Babcock; Aug. 27, from Liverpool, for Singapore, Magdala; from London, for Shanghai, Titania; 24, from Kiel, for Singapore, Anna Bertha; 27, from Greenock, for Rangoon, Mandalay (str.); 28, from Liverpool, for Shanghai, Agamemnon (str.); from London, for China and Japan, Glenfalloch (str.).

SPOKEN.—Ferninand Louis, from Amsterdam, to Samarang, July 13, 7 N., 22 W.; Andreas Rickmers, from Akyab, to Bremerhaven, July 17, 7.16 N., 28.45 W.; Bavelau, from Maulmain, to Cork, July 5, 13.46 S., 8.31 W.; Aurora, from Glasgow, to Manila, July 21, 12.12 N., 26.36 W.; S.K.J.Q., from Cardiff, to Singapore, Aug. 2, 1L30 S., 24.53 W.; Nicolaas Witsen, from Amsterdam, to Singapore, Aug. 13, 21.40 N., 23.30 W.; Wilhelmine, from Cardiff, to Galle, July 16, 10.50 N., 2.57 W.; N.S.J.D., from Rotterdam, to Batavia, July 25, 14 N., 27 W.

MISCELLANEOUS.—At Port Said, Aug. 24, the Craigforth, from Shanghai, for London. The Tecumseh, from Singapore, for Liverpool, arrived at Port Alfred on the 25th inst. Glasgow, Aug 25.—The Bromo (new str.), 1,249 tons and 220-horse power, built by Messrs. Caird and Co., Greenock, for the Netherlands India Steam Navigation Company, left here for Java on the 24th inst.

MISSING SHIP.—The committee of Lloyd's will be glad of any information regarding the Success, Captain Gent, which sailed from Liverpool for Shanghai on the 27th November last.

MARINE INSURANCE RISKS.—A HARD CASE.

UNDERWRITERS who grant policies on the vessels or cargoes of foreigners, and indeed all commercial men who are apt to imagine that in our Foreign-office, and its local representatives, they possess sure champions to protect British interests, and resist the damage done to our commerce by any self-interested injustice, will do well to peruse, in a newly-issued State paper, the correspondence between Lloyd's Salvage Association, Messrs. SMITH, SUNDIUS, and Co., the English Foreign-office, and the German Government, relative to the capture, during the Franco-German War, of the ship *Turandot*, and the indemnity paid by the French on account of that capture. The German vessel *Turandot*, from Hamburg to Hong Kong, was taken into Saigon by a French cruiser. Cargo on board to the value of £6,400 had been insured at war risks by a London firm, and English underwriters had also covered the hull to the extent of £4,550 on the same terms. Both ship and goods were immediately sold in Saigon, and realised, the one 4,500 francs, the other 104,347 francs. On the news of the capture reaching England both policies were claimed and paid.

It happened, however, that when peace was concluded, this capture had never been adjudicated upon in a Prize-court; the moneys were therefore still in the hands of the French, and under the provisions of the Treaty, the shippers belonging to neutral nations received their portions direct from the French Government, while the portions resulting from shipments made by Germans were handed over to the authorities at Berlin for distribution among the parties entitled to them. The German Government, when applied to by the German owner, repudiated their liability, on the ground that he had already got his money from the underwriters; and similarly, when the underwriters applied, the answer made by the German Chancellor was that his Government were not bound to do anything further than indemnify the losses of the owner, and that the latter had already been compensated from other sources (*i.e.*, by the underwriters). The Prussian argument, in fact, comes to this, that underwriters for their own profit insure vessels at high rates of premium in times of war, and if any loss ensues they must bear it. Now this is a very hard state of things. This ship and its cargo were never condemend in a *Cour de Prises;* the whole proceedings were voided before completion by the Treaty of Peace, and in that Treaty it was specially agreed that where any ships or cargoes had not yet been condemned, either they, or, if that were impossible, the full money value shall be restored to their owners. So, in the *Turandot's* case, the neutral owners got back their money from the French Government; the English underwriters, who represent the German owners, *got nothing.* The risk the underwriters took was the risk of complete and proper capture according to international law, but this capture was never completed in a prize court; hence the argument that they must sit down with the loss, because it was the risk they contemplated in the insurance, for which they were paid by a high premium, falls to the ground. The fund now in German official hands is therefore a salvage, somebody is entitled to that salvage, and the somebody must either be the owners or the underwriters. In no case can the Prussian Government keep it for their own profit; the owners having been already satisfied, Germany is merely the trustee for the underwriters. That property irregularly captured should be given up is one of the chances in his own favour which an underwriter contemplates, and which modifies the rate of premium he demands for his protection.

It is clear that if the ship and cargo had been restored to the owners by the French, instead of the money realised by the accident of their sale, the underwriters could and would have recovered -by legal proceedings if necessary— the value of the policies. These underwriters strictly represent the owners, and under the treaty the uncondemned ships and goods, or their money value, "are to be restored to the owners." Our own Foreign-office decline to interfere. Their first plea was that they could not recognise Lloyd's Salvage Association; that each individual underwriter must make his own separate claim; but this evasion was dropped later on, for though Lloyd's offered to see how far the condition would be complied with, they pointed out the absurdity of it, that the strength of the underwriters is the strength which numbers give them, and that to each individual the loss, as to the shareholders by a railway accident, would be a mere trifle. Our Government ultimately decided that "the underwriters cannot claim to be in a better position than the owner of the ship, a German subject, and as the German Government could not be called upon under German law to repay the owner (we presume because he has already recovered his insurance), the decision of the German authorities in this matter cannot properly be questioned by Great Britain." We hope that our readers can discover the force of this objection; we cannot. It is clear that the underwriters made a mistake originally—a mistake due to an honest zeal to maintain their own credit and reputation for punctual payments, by handing over the amounts due on the policies before the "capture" was complete. It was a case of money paid in error, and nothing can be more discreditable than for a powerful civilised Government like that of Germany to be keeping back a paltry sum which has accidentally come into its possession as trustee for the subject of a friendly nation. Let our insurance offices take warning from such a case as this, and be more careful as to what risks they accept and what prompt payments they make where foreigners are concerned. The English Foreign-office has shown itself ready enough to act where a wrong is done in a weak South American State; but it sometimes backs out in what the Yankees would call rather a "mean" way if the fault is committed by a Power whom it would be unpleasant to press.

WE understand that the project of establishing a Professorship of Chinese at the Oxford University will be shortly brought before the Council. The first occupant of the chair will, we are glad to learn, be Dr. LEGGE, whom we trust will be long spared to discharge its duties. Sir RUTHERFORD ALCOCK, Mr. TAYLOR, and others have bestowed much attention to the accomplishment of this object, and we trust it will be carried through.

WE are pleased to notice that M. GIQUEL, Director of the Chinese Arsenal at Foochow, has been raised by the French Government to the dignity of "Officier of the Legion d'Honneur." His plain-spoken opinions on the errors of the policy pursued by France in the Far East have not, we presume, done him any injury, but, we trust, some good.

WE understand that Rear-Admiral KRANTZ, Commander-in-Chief of the French naval division in the China and Japan seas, is to be replaced, in October next, by Rear-Admiral VERON.

MAJOR GREY has been appointed Superintendent of the Jails at Singapore, and will leave in about three months.

THE new Governor of Labuan has not yet arrived in London from the West Indies.

SIR RUTHERFORD ALCOCK ON JAPAN.

IN his elaborate, but withal rather discursive, paper on Eastern matters, which appears in the current number of the *Fortnightly Review*, and to some points in which we have already called attention, Sir RUTHERFORD ALCOCK discourses of many peoples and many lands, but until almost the conclusion of his article he says little or nothing about Japan, though he fully admits that "since its revolution it has been daily rising in importance." He thinks that the day is not far distant when Japan's place in the comity of nations may be willingly conceded, not only on account of her geographical position, but because she has shown "an earnest desire to assimilate Western civilisation and culture." This is very true to a certain extent, and Japan has already taken a certain place among the nations of the world. Her diplomatic and consular representatives have been received and acknowledged by this and other countries on a footing of perfect equality, but before we go further, and take quite so sanguine a view of her condition, and her right to be counted among the civilised Powers of the earth, as that which is entertained by Sir RUTHERFORD ALCOCK and some other writers, would it not be well to be better assured of the permanence of her new institutions and of the absolute reality of her "desire to assimilate Western civilisation and culture?" We gladly admit that, as far as human judgment can at present determine, her progress onwards appears to entitle her to considerable commendation; but still, and we regret to see it, there are matters in which she vacillates and shows a retrogressive tendency. The question of opening the interior of the country is still in an unsatisfactory state, and until that is settled in a liberal sense, Japan cannot expect to have her "place in the comity of nations willingly conceded." We had hoped, indeed, that this vexed question had been finally set at rest, and that the Japanese Government had fully made up its mind to admit foreigners into the interior under a reasonable passport system. This hope seems destined to disappointment, for we learn from the *Japan Herald* of June 23rd that "the Japanese, with their usual short-sighted illiberality, "are seeking to make the terms on which passports are "granted to foreigners, to enable them to travel in the in-"terior, still more stringent," though at the same time it is but fair to add that there is some chance of "the more obnoxious regulations" being modified. Still, this retrogressive action on their part, though it may not in the end be of a very serious nature, is discouraging, and makes men hesitate before placing implicit faith in the permanence of the new institutions in Japan and in the enlightened liberality of her monarch and leading statesmen. Then, again, there is the recent action in regard to the Mint, and the rumour that the Japanese Government has under consideration the idea of placing some restrictions on the liberty granted to the Press. These and other matters, taken as a whole, point out unmistakably the very unsettled nature of Japanese institutions, indicating that of late years her pace has been too fast for solidity and permanence. When this transitory and unsettled condition of things has come to an end, and that very desirable consummation is patent to the world, then, and not till then, can we be reasonably expected to subscribe to Sir RUTHERFORD'S idea that "European policy and alliances for peace "and war will have to take account of their presence in "the high roads of Western and Eastern commerce across "the Pacific and in the Chinese seas;" for until their power is much more developed, we fail to see that they would "prove very useful allies and troublesome enemies to the "commerce of any other State having a great Eastern "trade." Though his views, as enunciated in the paper to which we refer, are of a little too roseate a hue, most thinking people will, we conceive, readily agree with Sir RUTHERFORD'S concluding remarks in regard to the Japanese. "Russia," he says, "has lately obtained "possession of their half of Saghalien in exchange for the "Kurile Islands to the north of Japan. I do not know "that any valid objection can be raised to such an ex-"change, but it is to be hoped that this kind of traffic may "end there. Japan has always been jealous of her inde-"pendence, and she may now count upon the interest "which all the Western world has in its preservation."

"THE TIMES" ON TRANSIT DUES.

IN another column we give an article from *The Times* on the Transit Dues, in which the writer states:—"Under the "transit clause of the last Treaty foreigners *enjoyed an advan-"tage over natives* in being able to send cotton and woollen "goods into the interior by paying a fixed transit duty, "amounting to half the import duty, while natives remained "subject to the capricious exactions of the mandarins;" and goes on to say that advantage was taken of this circumstance by certain foreigners to sell their names to natives who were thus "able to pass goods, which they had bought, into the heart of the country under the transit duty." The case has repeatedly been stated in this form, but it is not by any means in accordance with the facts, although such a view of the subject is to some extent borne out by the general appearance of the provisions in the Treaty. The truth is that it was never intended that the Treaty should place the foreign merchant at any advantage over the native; nor, in fact, did the provision which was made tend in any way to do so. By the 28th article of the Tientsin Treaty it was agreed that, in order to put a stop to the irregular inland duties levied upon English goods or upon produce for the English market, the Chinese authorities should "declare the amount of duties leviable "on produce between the place of production and the place "of shipment, and upon imports between the Consular "port in question and the inland market named by the "Consul." This, however, was never done, the Chinese officials always raising difficulties when asked to state what the actual amount of duty was, and hence a compromise was agreed to in the commercial articles supplementing the Tientsin Treaty to the effect that the British merchant could pay *either* the actual inland duties *or* a commutation of 2½ per cent. *ad valorem*. In practice the commutation was always resorted to and transit passes granted through the Consul on this basis. These were given to the natives, and it was fully understood that according to the Treaty the payment of the commuted duty of 2½ per cent. covered all charges, either from the place of production or that of consumption. At first the passes were respected, but after a time the local officials brought pressure to bear upon the Chinese holders of the goods, to obtain further dues, and hence it was that some foreigners lent their names to Chinese and declared themselves owners of goods which were entitled to be exempted from transit exactions, but which were taxed if they were considered the property of the Chinese. On matters reaching this stage the Chinese local officials resolutely maintained that the tax was leviable upon foreign goods when once they had passed into the hands of the natives, although there was no doubt that the design of the treaty was precisely to prevent this, and to establish one uniform tax on the goods, irrespective of ownership. The matter was subsequently, on a special case, referred to Peking, and Mr. WADE succeeded in obtaining from the Imperial Government a declaration to the effect that the rights under the transit dues clause were not affected by the ownership of the goods, and that Chinese holders of foreign goods upon which the commuted transit dues had been paid were equally entitled to be exempt from the further payment of inland taxes in transitu. This decision at once shows the true bearing of the Treaty, and places the action of the foreign merchants who had lent their names to the Chinese holders in a very different light to that in which it would otherwise appear. It makes it clear that, although they were, strictly speaking, guilty of an evasion, they evaded not a legitimate tax, but what was simply an illegal and impudent imposition.

THE S.S.N. CO.'S LATE S.S. "CHUSAN."

In compliance with an order of the House of Commons, made on the motion of Sir Wilfrid Lawson, a copy of correspondence which the Board of Trade has received on the subject of the ship *Chusan*, wrecked on the coast of Scotland on the 21st of last October, has just been made public. The three principal documents are—(1.) Report by the Court of Inquiry, held at Ardrossan before two Justices of the Peace and two Nautical Assessors, into the circumstances attending the loss of the steamer; (2.) Report on the vessel by the Principal Shipwright Surveyor to the Board of Trade and the Chief Examiner of Engineers, Marine Department, Board of Trade (W. H. Turner and J.

Digitized by Google

McFarlane Gray); and (3.) Letter from the Board of Trade to Mr. C. L. Norman, the registered sole owner of the vessel. The first two documents are too voluminous to admit of a detailed summary being given, but we condense below some of the leading items of information which they contain.

The *Chusan* was an iron paddle steamer of 953·43 net register tonnage, built by Messrs. John Elder and Co., of Glasgow. "The vessel was a steamer, intended for river and sound navigation, of the peculiar type known as the Hirsch model, the speciality of which may be thus described. The keel is recessed into the bottom of the vessel, the greatest depth of hold being in the bilges, which are in a horizontal plane with the bottom of the keel, and which in this case are 13½ feet distant from the keel. She was propelled by a single cylinder vertical beam-engine of 300-horse power, nominal, similar to those used in American river steamers. She was registered in London in the name of Charles Lloyd Norman, as sole owner, but she was in reality the property of the Shanghai Steam Navigation Company, of which the registered owner was simply the agent in England. She left the Clyde on the 10th of October, bound for Shanghai, with a crew of forty-eight persons all told, thirty-nine of whom were coloured men, commanded by Mr. G. C. Johnston, who held a master's certificate of competency. There were in addition, three members of the master's family on board, Mr. May, the Engineer, who superintended her when building, and Captain King, who is to take the sister vessel, now building, out to China. The two latter persons were to be landed when the pilot left the vessel." The steamer arrived at Waterford in due course, and owing to circumstances which had taken place during the voyage the master took measures to have her surveyed. It being reported that "she could return to Glasgow with safety (in order to be strengthened), but was not fit to proceed to China," she accordingly left for that port on October 19th, and, as is well-known, she was wrecked at the entrance to Ardrossan harbour, having drifted on to the Grinan Rock and broken herself in two about 100 feet from her stern. Nine persons, including the captain, were unfortunately drowned. "After careful consideration of the evidence, as well as of the written opinions of the professional experts sent down by the Board of Trade," the Court came to an unhesitating conclusion that the vessel, independently of its model, was faithfully built of good materials, but that a vessel of her peculiar model and dimensions was not safe and seaworthy for a passage to China at that season of the year; that the master was responsible for the navigation of the vessel back from Waterford; that he was to blame for not having the sails bent or gear rove, and that some other errors of judgment were committed. The Court further added some remarks and recommendations about the method of managing rocket apparatus and the lifeboat station, as owing to some shortcomings in this respect, at least two lives were undoubtedly sacrificed. They also beg to represent to the Board the gallant conduct of three ship carpenters and a pig iron labourer, all of Ardrossan, and to recommend them for rewards for their strenuous efforts to save life on the occasion.

The professional report on the steamer is a very complete one, but it necessarily abounds in technicalities, and it is impossible to summarise it briefly; one or two points, however, are worthy of notice. Notwithstanding their statement "that the *Chusan* was not strained by the sea before she actually struck the beach or the rocks, that the extreme deflexion was a mistake, that the broken rivets in the boiler casing were unimportant, and that the cracked frames are the result of an accident of the launching,"—points, be it observed, the supposed importance of which caused the vessel's attempted return to Glasgow,—the experts are of opinion that "the *Chusan*, when she left the Clyde, and when she left Waterford, could not be certified to be a seaworthy vessel for a voyage to China" at that season of the year, though when she "got on her superstructure of houses, if she had got out safe to China, she would have become perhaps a strong vessel, but for the voyage out she was weak in respect to deck ties." Alluding to a marked defect of the *Chusan* as a sea-going vessel, they observe that if she "had been fitted with a false keel, the leeway would have been much less, and the vessel would have been less influenced by an over-immersed paddle-wheel, but she would have been less sensitive to the helm." In their opinion "the vessel was wrecked because she was unmanageable in a severe gale; she was unmanageable because she had no efficient keel, and because of the great surface she exposed to a beam wind when on the rock; she broke up because she was deficient in deck-tie strength." A short time after the inquiry was over, a copy of the report made by the Court was forwarded by the Board of Trade to Mr. C. L. Norman, the registered owner, accompanied by the following pointed remarks:—"From this report, and from the evidence given before the Court, the Board are advised that the conclusion may be drawn that vessels of the *Chusan* class are not safe and seaworthy for an ocean voyage from this country at all seasons of the year. The Board of Trade trust that you will not overlook this expression of opinion, as it may be their duty to interfere, under the Merchant Shipping Acts of 1871 and 1873, with the attempted sailing of similar vessels from ports of the United Kingdom on long voyages, unless commenced at seasons when there is a reasonable prospect of the vessels arriving at their destinations without encountering very heavy weather during the passage."

THE REFLECTIONS OF THE BURMESE KING.

(SPECTATOR.)

"Praise to the All, and to my intelligence, I have outwitted that dangerous barbarian, and carried all my points, without declaring war! With my 40,000 troops, and my new cannon and Leeseetahi's aid and the jungle to retreat into, war would not have been too dangerous, but I have done without war. That man in Calcutta has been trying to bully me, and has got less than nothing for his pains. He sent the big Envoy here with an escort to worry me about some officer's death in China and the rights of Western Karens and his own claim to send an escort to his Residency at Bhamo, and he threatened and collected troops, and demanded my reasons for entertaining my Chinese friend, and seemed as if he were about to invade Burmah. His predecessors did just those things, and my predecessors lost provinces in consequence, but I kept my head. There were all my counsellors as frightened as girls on the ghaut when they see an alligator, but, fortunately, I am the King. I did not give way, and I did not fight. The big Envoy had the impudence to send up from Prome to ask why I entertained Leeseetahi, as if any representative of China was not his superior. So I told him Leeseetahi was here on a ceremonial mission from my protector at Peking, and he believed me, and came up the river placably. Leeseetahi can send me troops if I want them, for all that. Then the big Envoy wanted an audience with shoes on his feet,—that is, equality with Me! No, no! not in Burmah, or where would my throne be next day, and my treasures? He may have a carpet out of my benignity, white feet being too tender for the pavement, but he must have nothing as of right. He was told to take off his shoes, and he did. Then I knew he did not want war in order to seize my kingdom, and I meditated how to avoid smaller unpleasantnesses. There was the murder of Margary. Well, I did not order that; I never heard of Margary. I only told my envoys, as they started for Peking, that those intrusive white men, always hunting about to steal my trade, must be stopped, or I would hold them responsible, and the white men were stopped quite successfully. The King is well served. So I told the big Envoy I knew nothing of the murder, and was very sorry it had happened outside my territory; and when he showed his letters instigating the murder, I accused a priest of forgery, and punished him, and what could the big Envoy say? He said nothing, and looked angry, and what are his looks to Me? Then there were those Karens. The Calcutta man says they are his. His! Every Karen alive is the slave of the heir of Alompra, whose empire stretched from China to the Ganges, and who are these special Karens? Still, the Calcutta man did not ask them for himself—that would have been perplexing—but only that they should be independent, and of course I granted that. Why should they not be independent—of him, at all events? I am a warrior King, and can conquer independent States very easily, when nobody is looking on. Let Koonti call himself independent. So was Pegu when Alompra set up his standard there, and half exterminated its people. Nothing is lost by that agreement. Then there was the demand for escort for the next expedition to explore China, or to punish Leeseetahi. That was impossible. An escort?—then their trade would be safe, and by-and-by they would make profit, and then they would be angry with my monopolies, which I said I would give up, and then they would eat up Me. That would not do, so my Minister—whom I must remember to execute, for he was far too civil to that big Envoy—told him that an escort could not be allowed. Nor shall it. I must have money, and I cannot tax as these English do, and my trade is my treasure, and nobody shall come between me and my customers, and hunt about and make roads, and undersell Me. I was afraid about that refusal, and delayed it to the last minute, but the big Envoy is gone, and there is no war. Perhaps, the Calcutta man is afraid of war and of Me."

THE CONSULAR REPORTS AND TRANSIT DUES.

(THE TIMES.)

The reports from Her Majesty's Consuls in China for the past year are of considerable interest from several points of view. As a general rule they show that the foreign trade of China is on the increase, but side by side with it we find the fact that it is more and more changing its complexion. A period of encroachments has again set in, and native traders, as well as native officials, are steadily pursuing a course inimical to all foreign interests. To some extent, we are told, foreign merchants are themselves to blame for this state of things. They, it appears, took, some years ago, a rather questionable mode of extending their business in the interior of the Empire. Under the Transit Pass clause of the last Treaty, foreigners enjoyed an advantage over natives in being enabled to send cotton and woollen goods into the interior by paying a fixed Transit duty amounting to half the import duty, while natives remained subject to the capricious exactions of the Mandarins. Under that system the trade was pretty well divided between foreigners and natives, we are told, the latter buying from the former, and taking their chance of getting the goods through. But the foreigners were not content with that arrangement; they wanted to control more fully the internal trade, and to that end sold the use of their names to native traders, who were thus able to pass goods that they had bought into the heart of the country under the Transit duty. This acted very well for a time, but, being resorted to by all native dealers, it seems to have gradually caused the Transit trade to drift into their hands, and now it is impossible to get goods into the interior from some ports, except by means of native guilds, who charge just what duty they please. The consequence of this is that the old capricious, greedy, treacherous ground is once more that on which foreign trade with China threatens to rest, and the exactions under which foreign merchants groan threaten by-and-by to produce the old result. In spite of this enormous draw-

Digitized by Google

back, the volume of foreign trade with China is increasing, and native merchants do not materially trench on the ground of the importer. They confine themselves, from mixed motives of pride, jealousy, and inordinate greed, to hustling the foreigner out of the internal markets, and establishing an order of things which enables them to torture and fleece him to their heart's content.

A chief topic in these reports is the opium trade, and it is one that possesses very strong interest to this country for several reasons. All testimony seems to concur, for example, in sustaining the fact that the competition of native-grown opium is yearly gaining ground upon the Indian. There is still a great demand, of course, for the Indian drug, and a great deal of the native is used either merely to supplement it or by the people in districts where but for it no opium would have been used at all. But, making all allowance for these considerations, it remains that the native opium is gaining ground. A taste for it is said to be growing up among people who formerly smoked Indian, and the consistently hostile policy of Chinese officials in many places fosters the former against the latter. Few disillusions are, in fact, more complete than that produced by a study of the Chinese mode of handling the opium traffic, and well-meaning philanthropists in this country might moderate their wrath against a corrupt and inhuman Indian administration did they realise how steadily Chinese officials have treated opium as a source of inordinate gain. At present they handle the conflicting opium interests with their accustomed skill. Against the native grower all manner of edicts are fulminated. He is forbidden under the severest penalties to cultivate the poppy, and then when he defies the law officials are able to make him pay what they please for his impunity in doing so. Thus, the righteous, self-denying edicts raised against native opium are useful as a means of raising irregular contributions towards the mandarins' expenses. Foreign opium is differently dealt with, on the same principle that regulates Chinese dealings with other branches of foreign trade. It has been consigned to the native guilds, just like cotton or woollen goods, or any other imported article. The treaty stipulations are not ostensibly gnored. On the contrary, if a foreign merchant pays the transit duty, and sends his opium into the interior, nobody will say him nay. But he will not be able to sell it freely when once he has got it in. Whenever he makes a sale the purchaser will be pounced upon to pay to the guild at least twice the duty that it would have exacted had the merchant consigned his opium to its charge at the first. This method affords splendid opportunities of plunder to the official class who go shares with the guilds over the whole range of the import trade, but it acts with peculiar force on Indian opium, which is subject to "squeezes" to an extent that has driven the English merchant out of the trade altogether. It is now almost entirely in the hands of native traders and smugglers, who ship it from Hong Kong and Shanghai to the other ports, and take it inland as best they can. No doubt this system militates against prosperity in the Indian opium traffic, but that is not a circumstance our English merchants should regret, although one which, coupled with the spread and improvement of the native product, may cause considerable trouble to the Indian Exchequer. Even it can have this consolation, however, that mere greed will prevent the Chinese from so loading the Indian drug with imposts as to drive it from the market altogether, so long, at least, as the native article does not offer the same chances of profitable robbery.

The exports of China beyond tea and silk are chiefly noticeable for the indication they afford of what China might be capable of were it opened up and free like a civilised country. There is nothing to hinder China from becoming a great exporter of raw cotton, wool, metals, coal, corn, tobacco, sugar, and a host of other things which the rest of the world could find room for and consume. As yet the small streamlets of her exports give but the faintest indication of what might be, but the tendency is towards increase, and the taste of profit which the small beginnings afford may yet work wonders in opening up the country.

THE NEWS FROM PEKING.

(THE TIMES.)

The commercial interests of England in China are enormous in extent and importance, and there is a considerable resident European population which is accustomed to look to the Great Powers of the West for security against murderous outrage and indiscriminating plunder. It is not likely that Mr. Wade, who knows the Chinese character thoroughly, and who fully appreciates the dangers to English life, English property, and English trade that would be involved in an outbreak of Celestial fanaticism will incur any unnecessary risks. At the same time, in dealing with the Chinese it must always be remembered that weakness is the most perilous of all politics. If Mr. Wade were to relax the rigour of his demands for reparation on the score of the Manwyne disaster, with the hope of averting some dreaded explosion of popular rage, he would do more to precipitate the catastrophe than if he exacted successfully the punishment of a hundred criminals. While, therefore, prudence is indispensable in the conduct of the negotiations which are at present in the hands of Mr. Wade, courage is even of greater importance; and it is certain that only a judicious union of both will pilot us through the difficulty in which, by no fault of our own, we have become entangled. Of course, if the Chinese are determined to try their fortunes in war once more, they can easily force a quarrel upon us; but we are disposed to think that for the moment they are rather inclining towards a martial assertion of that superiority in the world, which is the most deeply rooted of their convictions, than absolutely determined upon it. For many years past—indeed, we may say since the conclusion of the last war—the Chinese have been "letting I dare not wait upon I would," amassing all the weapons of modern warfare on the one hand with which to crush the "barbarians," and on the other yielding to the influences of European civilisation a reluctant but eminently practical homage.

This attitude of doubt and suspense has been due partly to the abiding effects of the sharp lessons they were taught when they last measured their strength against that of Europe, and partly to the personal character of the Prince of Kung and some other statesmen at Peking, who believed that a foreign war would break up the Empire. But a generation has now grown up which forgets the burning of the Winter Palace, and the power of the Prince of Kung has been shattered and his party dissolved. These restraining motives, then, are no longer operative in Chinese policy, and it is, therefore, a question whether the patriotic arrogance of the Government will not get the better of mere worldly wisdom. Why, the war party among the Mandarins are doubtless contending—why should we spend our money in buying all sorts of costly and curious engines of war, the artillery of Armstrong, of Whitworth, and of Krupp, rifles on the Snider, the Chassepot, and the Dreyse systems, if we are to make no use of them after all? These Peking statesmen have purchased a new weapon, and they would like to try it to some purpose. Already they have advanced for the reconquest of two important provinces which were torn from their Empire by the great Mahommedan revival, and they have, in fact, succeeded in eradicating the faith of Islam in Yunnan. Whether they will be as fortunate in Kashgar may be doubted. The adventurous Yakoob Khan, whom we knew a few years ago as the Ataligh Ghazee, is said to have repelled their invasion, to have assailed them in turn, and to have carried a war of vengeance into the heart of the Chinese territory. But we must not forget the overwhelming torrent of mere numbers that China could fling upon any foe not more civilised than herself.

Even an European Power would now find the Chinese a vastly more formidable enemy than they were thirty or even fifteen years ago. We should not get out of a war with China without having to pay heavily in men as well as in money. Nevertheless, the issue could not be doubtful. We should assuredly be victorious, though the victory would have to be attained by blows struck at those parts of the Chinese Empire which feed our trade most copiously. But the result of which we should be most apprehensive, if we were again to be forced into a mortal struggle with China, would be the anarchy that would inevitably follow the defeat of the Peking Government. The existing dynasty, already discredited, and secretly believed by the population to be effete, could not stand the shock of another disaster. The Imperial Family would fall and probably involve in their ruin the whole order of Mandarins, who have been practically trained in the work of Administration. Both the elaborate official system by which the provinces of the Chinese Empire are held together and the organisation of the army would at the same time go to pieces. China would be splintered into a score of petty principalities, and, losing the long and potent tradition of its divinely-ordained Government, could only be redeemed from social dissolution by the vigorous grasp of some civilised conqueror. But what nation would dare to accept the charge? With all our faith in the governing capacity of England, we own that we should recoil from the addition of two more Indias to that which we rule already.

Monetary and Commercial.

Lord Cairns's third and final award in the Albert Life Assurance Arbitration has been made public, and declares the affairs of the several associations, societies, and companies comprised in the Arbitration Act of 1871 to be completely wound up and finally settled. The total claims established against that company amounted to £1,667,231 7s. 3d. The call on the shareholders actually realised £117,343 16s. 6d.; the other assets amounted to £246,992 6s. 8d.; these, together with interest on the investments, made up a general fund of £374,205 7s., but only £338,575 7s. 11d. was applicable for dividend on the claims of unsecured creditors. The three dividends of 3s. 11½d. in the pound consumed £329,972 12s. 9d. The total expenses of the arbitration amounted to £88,169 1s. 11d.

We learn by telegram from San Francisco that the Bank of California has suspended payment. The President of the Bank says there are plenty of assets but no available cash. This Bank had considerable transactions with China and Japan. The agent in London is the Oriental Bank Corporation, who are fully covered.

At a meeting of the Mediterranean Extension Telegraph Company (Limited), the report was adopted and a dividend at the rate of 3 per cent. per annum was declared, as well as the half-yearly dividend on the 8 per cent. preference stock, and £500 was carried to the reserve fund, making it £7,848.

Mr. E. Roche has retired from the firm of Lloyd, Matheson, and Co., tea-brokers, of Fenchurch-street.

At a meeting on the 24th inst. of the creditors of Messrs. Edmund Jones and Co., merchants, of King William-street, trading with Burmah and China, who stopped payment in July, a balance-sheet was submitted by Messrs. Andrews and Mason, the accountants. The liabilities shown amount to £102,898, the assets to £54,235, but the whole situation is not revealed in these figures. Of the liabilities £56,000 are on Collie bills, for which no goods are traceable, and only £24,000 on actual goods account. The chief asset is the balance of a sum of £55,812, due by the Rangoon firm of Jones and Co. to the London firm, which amounts to £49,403. This it appears the London firm cannot tell the value of. Although trading under the same name and supposed to be one, the firms are not constituted alike. The sole partner in the Rangoon house is Mr. Cowie, but in London the firm consists of Messrs. Batchelor and Cowie. Mr. Batchelor has recently returned from a tour in China. Until Mr. Cowie sends home a power of attorney nothing can be done, but when that comes it is the intention to

Digitized by Google

present a petition for liquidation by arrangement. The total available cash possessed by the firm in London at the time of its suspension was £1 13s. 8d., and the goods on which there was no lien were worth £28 5s. Except this Rangoon debt there was not £5,000 worth of assets shown, and everything therefore depends on whether it be worth anything or not.

A meeting of the creditors of Messrs. Schultze and Mohr, in the East India and China trade, whose suspension was announced last month, has been held, when it was resolved to liquidate the estate by arrangement, Mr. Arthur Cooper (Cooper Brothers and Co.) being appointed trustee, with a committee of inspection. The immediate discharge of the debtors was unanimously granted. The statement of affairs shows liabilities expected to be proved £142,524 6s. 5d., against assets £7,971 11s. 3d., or only 1s. 1½d. in the pound. Large losses have been made in speculative operations in wheat, which was sold to arrive before the late important advance in prices. Probably little would have been gained morally by throwing the firm into bankruptcy, and the dividend would certainly have been less—perhaps nothing at all.

A meeting has taken place of the creditors of Messrs. Da Costa, Raalte, and Co., when, pending the receipt of further advices from Egypt, it was resolved to adjourn till the 30th inst. The liabilities amount to £135,580, exclusive of a claim by Behrend Brothers, of Alexandria, for about £130,000, while the assets, including £49,800 claimed by the latter firm, but believed to be the property of Da Costa, Raalte, and Co., are estimated at £85,200.

A meeting of the creditors of W. J. Craven, in the China trade, will be held on the 6th Sept.

Messrs. J. and A. Yule, of Fenchurch-street, have arranged with their creditors by a composition payable by instalments, and the proceedings for liquidation by arrangement will not be proceeded with. Messrs. Taylor and Kier, Shanghai, who drew on Messrs. Yule against shipments of tea, &c., have made an assignment for the benefit of their creditors.

Mr. John P. M'Laren, shipowner, of Greenock, has suspended payment, with liabilities amounting to £15,000.

The quantity of tea delivered from the bonded warehouses in London during the week ended the 21st inst. was 3,557,358 lbs., of which 2,077,873 lbs. was for home consumption, 756,360 lbs. was exported, 709,477 lbs. was removed coastwise, 110,351 lbs. was sent coastwise for export, and 3,297 lbs. was for ships' stores. The duty received amounted to £51,947, or about 9 per cent. less than in the previous week. In the year 1874, as is shown by an official return, the Customs' duties amounted to £3,435,586, being an increase on the preceding year of £134,980.

The amount of bullion per P. and O. steamer *Australia*, from Southampton on the 26th inst., was—in gold, to Galle, £75 ; in silver, to Singapore, £64,700 ; total, £64,775.

The market for Bar Silver has improved to 56⅜d. per oz., and Mexican Dollars, those by the French steamer, have been sold for China at 55½d. per oz., showing a rise of ¼d. per oz.

The P. and O. steamer *Nizam*, which arrived at Southampton on the 23rd inst., with the heavy portion of the last inward P. and O. mail, brought £63,218 in Japanese gold coin.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From London, July 3, Duke of Abercorn ; 4, Galley of Lorne (str.); 12, Jessie McDonald, Satsuma ; from New York, 3, Ukraine ; from London, &c., Aug. 23, Flintshire (str.).

At SHANGHAI.—From London, July 2, James Shepherd ; from Liverpool, 8, Sarpedon (str.); from New York, 6, Benefactor ; 8, Haze ; from Hamburg, Aug. 18, Bellona (str.); from London, &c., 21, Quang Se (str.) ; from Liverpool, — , Stentor (str.).

At HONG KONG.—From Swansea, July 10, Amadine ; from Liverpool, 11, Rover of the Seas ; from London, &c., Aug. 14, Quang-Se (str.), Stentor (str.); from Portland O, Aug. —, Gazelle ; from London, &c., —, Cybele (str.), Naples (str.).

At BATAVIA.—From London, July 4, Nicolo Tommaseo ; from Cardiff, 15, Brothers German ; from Newcastle, 15, Saarikoski ; from Bordeaux, 15, Mater ; from Holland, 7, J. B. Walker (str.), Kosmopoliet III.; 9, Friesland (str.); from Cape Town, 6, William Clowes ; from Santos, 8, Cometen ; from Buenos Ayres, 6, Christina ; 16, Richard McManus ; from Liverpool, Aug. 13, Jan Pieters Koen ; from Nieuwe Diep, 18, Voorwaarts (str.) ; from Genoa, 20, Batavia (str.).

At SINGAPORE.—From Liverpool, July 22, Menelaus (str.); from Cardiff, 21, Geo. Peake ; 22, Arvis ; from Sunderland, 22, Orion, Josephine ; from Bordeaux, 22, Therese and Nelly ; from London, Aug. 18, Kate Carnie ; from London, Aug. 19, Paraguay (str.), Bristow ; from Liverpool, —, Orestes (str.).

At PENANG.—From London, July 12, Hope ; Aug. 26, Teviot (str.)

DEPARTURES.

From FOOCHOW.—For London, Aug. 22, Tom Morton (str.).

From YOKOHAMA.—For New York, June 25, Annie Braginton ; 30, Stillman B. Allen.

From SHANGHAI.—For London, July 4, Ajax (str.), Altona (str.).

From HONG KONG.—For London, July 13, Altona (str.) ; 14, Ajax (s.).

From BATAVIA.—For Marseilles, July 16, Robertus Hendrikus ; for Holland, 11, Kennemerland ; 13, John Bramall (str.), Marie ; 17, Prinses Amalia.

From SINGAPORE.—For London, July 16, Mongul ; 19, Hougoumont. Florence ; for Liverpool, 16, Bertie ; for Mauritius, 20, Formosa ; for London, Aug. 20, Glenroy (str.); 23, Aegean (str.).

From PENANG.—None.

VESSELS LOADING.

At YOKOHAMA.—For New York, Mora, T. A. Goddards, Walton.

At SHANGHAI.—For London, Lord of the Isles (str.), Deerhound, Norman Court, Scindia, Westbury, Zephyrus.

At HONG KONG.—None.

At BATAVIA.—For Marseilles, J. B. Walker (str.) ; for Holland, Prins Hendrik (str.), Friesland (str.), Maria Elise.

At SINGAPORE.—For London, Tynedale ; for Liverpool, Star of Peace ; for Marseilles, Ulva ; for New York, Bengal.

At PENANG.—For London, Zehlima ; for New York, Enrico Dandolo.

FREIGHTS AND CHARTERS.

From YOKOHAMA.—To New York, £3 per 40 c. feet.

From SHANGHAI.—To London, £3 10s. per 40 ft. ; sailing vessels £3.

From HONG KONG.—To London.—No vessel loading.

From BATAVIA.—To Amsterdam, coffee 80f., sugar 70f., tobacco 90f., hides 110f., tin 50f.

From SINGAPORE.—To London per steamer :—Tin, 15s ; sago and tapioca, £2 17s. 6d. ; coffee, £4 ; measurement goods £3 15s.

From PENANG.—To London, by steamer tin, £1 10s. ; tapioca, £3 12s. ; measurement goods, £4 10s. ; to New York, sailing vessel, tin £1.

TELEGRAMS FROM THE FAR EAST.

YAKOOB KHAN IN CHINA.

ST. PETERSBURG, AUGUST 27.—Advices received here from Kashgar announce that Yakoob Khan is capturing Chinese towns one after the other, without resistance on the part of the inhabitants. The troops sent three years ago from Peking against Kashgar have not yet reached their destination, having been obliged on their way to build quarters, sow grain, and await the harvest in order to provide themselves with food before continuing their march.

THE MURDER OF MR. MARGARY.—REPORTED DIFFICULTY WITH CHINA.

BOMBAY, AUGUST 27.—The *Bombay Gazette* of to-day publishes a telegram stating that Mr. Wade, the British Minister at Peking, has been thwarted and insulted in his negotiations with the Chinese Government, and has in consequence telegraphed home for instructions, at the same time demanding more troops.

CALCUTTA, AUGUST 27.—No official intelligence has been received confirming the statement of the *Bombay Gazette* that Mr. Wade, the British Minister, had been insulted at Peking. Mr. Wade, up to the present, has only expressed to the Home Government his dissatisfaction with the attitude of the Chinese Government, and suggested that it might be expedient to have troops in readiness to be despatched to China should the necessity arise.

SHANGHAI, AUGUST 26.—The foreign squadrons are concentrating at Chefoo.

SHANGHAI, AUGUST 28.—Advices received here from Peking state that Mr. Wade, the British Ambassador to the Chinese Government, when paying an official visit to the Viceroy Lihungchang, was kept waiting at the door, and consequently withdrew. The Viceroy, however, immediately tendered an apology to Mr. Wade, and the incident is not considered to bear a serious aspect.

THE MAILS.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, AUG. 24.—The P. and O. Company's steamer Venetia, with the heavy Indian and China mail, left at 7 P.M. for Southampton, where she may be expected about the 6th proximo.

HEAVY PORTION OF LAST INWARD P. AND O. MAIL.—SOUTHAMPTON, AUG. 23.—The P. and O. Company's steamship Nizam, from China, *viâ* the Suez Canal, arrived this morning with the heavy India and China mails, 158 passengers, £63,218 in specie, 17,793 chests of tea, 433 bags of coffee, 1,615, bales of silk, and about 3,500 packages of miscellaneous cargo. She left Shanghai on June 24 ; Hong Kong, July 3 ; Singapore, 10th ; Penang, 12th ; Galle, 21st ; Aden, August 1 ; Suez, 9th ; Port Said, 10th ; Malta, 14th ; and Gibraltar, 18th.

NEXT INWARD MAIL.—SUEZ, AUG. 26.—The Messageries Maritimes steamer Hoogly, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be looked for on the 3rd of September.

INWARD MAIL DUE SEPTEMBER 20.—GALLE, AUG. 21.—The Messageries Maritimes steamer Irawaddy, with the inward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF JULY 30.—GALLE, AUG. 22.—The Messageries Maritimes steamer Anadyr, from Marseilles 1st August, left here to-day for Singapore.

OUTWARD MAIL OF JULY 9.—SHANGHAI, AUG. 20.—The P. and O. Company's steamer Surat, with the London mails of the 9th of July, arrived here to-day.

DUTCH OUTWARD MAILS.—SOUTHAMPTON, AUG. 21.—The Star Ball steamship Acton sailed to-day with the Dutch mails and a general cargo, for Batavia, Samarang, Sourabaya, &c.—BATAVIA, AUG. 18.—The Nederland Company's steamship Voorwaarts arrived here to-day, thirty six days from Southampton, via Padang.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

DE CALICE—On the 20th Aug., at Vienna, the wife of Baron de Calice (born Castellain), Austrian Minister at Bucharest, of a son and heir.

DOUGLAS—On the 20th Aug., at Larkbear House, near Southall, the wife of Robert K. Douglas, Professor of Chinese at King's College, of a daughter.

DYER—On the 12th July, at the Imperial College of Engineering, Tokio, Japan, the wife of Henry Dyer, of a son.

HAUSCHILD—On the 14th July, at Hong Kong, the wife of L. Hauschild, Secretary, Imperial German Consulate, of a son.

HENNESSY—On the 18th Aug., at 12A, Curzon-street, Mayfair, Mrs. Pope Hennessy, of a son.

HUNT—On the 6th July, at Kobe, Japan, the wife of H. J. Hunt, of a son.

KERSHAW—On the 26th Aug., Mrs. John Kershaw, Park House, Willesden-lane, N.W., of a son.

OJEDA—On the 11th July, at Yokohama, the wife of Emilio de Ojeda, of a son.

MARRIAGES.

FORREST—PARRY.—On the 19th Aug., at Trinity Church, Kentish Town, Edward Forrest, of Ceylon, to May, only daughter of the late William Valentine Parry.

GALLIE—FARNHAM.—On the 12th Aug., at the English Episcopal Church, Hamburg, by the Rev. C. F. Wiedemann, F. William Gallie, of Hamburg, to Adella Matilda, only daughter of S. C. Farnham, of Shanghai.

HANCOCK—RUSSELL.—On the 21st Aug., at St. Mary's, Tyndale's-park, Clifton, Harris Scott Hancock, of Hankow, son of the late Rev. Robert Hancock, vicar of Bathford, to Mary Elizabeth Russell, daughter of the late Christopher Russell, M.D., formerly of Ennis Kerry, county Wicklow.

HERBST—HEUERMANN.—On the 3rd July, at St. John's Cathedral, Hong Kong, by the Rev. R. H. Kidd, Colonial Chaplain, Charles Edward Herbst, of Hamburg, to Adeline Wilhelmine Wilner, daughter of F. W. Heuermann.

KAHN—HECHT.—On the 23rd Aug., at Havre, Leopold Kahn, late of China and Japan, to Adèle, daughter of Samuel Hecht, of Havre.

ST. GEORGE—ELLIS.—On the 3rd July, at Yedo, Japan, Herbert A. W. St. George, son of the late Frederick St. George, of Worcester, to Augusta, daughter of William Ellis, of Belfast.

SHAW—HARRIS.—On the 3rd July, at the Cathedral, Shanghai, by the Very Rev. Dean Butcher, Randle Walker Shaw, to Rachel Harris.

DEATHS.

CASWELL.—On the 19th Aug., at 25, Inverness-road, Bayswater, Edith Florence, infant daughter of J. G. and Florence Caswell.

CHING—On the 26th Aug., at her residence, 84, Clapham-park road, Miss Amelia Ching, daughter of the late Mr. Charles Ching, late of Canterbury-place, Lambeth, aged 66.

COARE—On the 24th Aug., F. W. Coare, of Canton, aged 45.

CURTIS—On the 3rd Aug., at sea, between Hong Kong and Singapore, William Curtis, formerly of Brighton, aged 47 years.

DENHOLM—On the 9th July, at Shanghai, Robert Denholm, Chief Engineer s.s. *Poochow*, 33 years of age, a native of Greenock, Scotland.

HALL—On the 21st Aug., at Tunbridge Wells, aged 69, Spencer Hall, F.S.A., for forty-three years the much respected Librarian of the Athenæum, Pall-mall.

SAUL—On the 8th July, at Hong Kong, Meyer Moses Saul, aged 26 years.

The reports of the observations and deep-sea soundings made in the course of the recent surveying expedition of H.M.S. Challenger in the Atlantic and Pacific Oceans, the Torres Strait, and the China Sea have been published. The Admiralty have done well in issuing these reports, which cannot fail to be of great service to nautical men.

The 1st battalion of the 10th Regiment, now stationed at Singapore, is not expected to be transferred to Gibraltar until March next. Major R. W. Davies has left England for Singapore, to join on promotion. The 28th Regiment is expected to leave Malta early next year for Hong Kong.

THE SETTLEMENT OF THE FORMOSA DIFFICULTY.—Some "further papers" in reference to the late difficulty between China and Japan in regard to the Island of Formosa have been issued. They consist chiefly of the following letter from Sir Harry S. Parkes, of which Lord Derby subsequently expressed his approval. The letter is dated "Yedo, March 9th, 1875," and is addressed to Térashima Munénori, the Japan Foreign Minister:—"I have been informed by Lord Derby, Her Majesty's Principal Secretary of State for Foreign Affairs, that Mr. Uyeno Kagenori, the Japanese Minister accredited to Her Majesty, paid his first visit to his lordship on the 14th January, and took the opportunity to express officially the thanks of his Government for the part which Her Majesty's Minister at Peking had taken in preventing a rupture between China and Japan. Mr. Uyeno also assured Lord Derby that the service thus rendered would be gratefully remembered by his countrymen, Lord Derby informs me that he stated, in reply to Mr. Uyeno, that it was the wish, as it was the interest of England, to preserve peace and prevent unnecessary quarrels wherever English influence extended; and that it would have been a subject of deep regret to the people of England if war had broken out between two States with both of which our political relations were thoroughly friendly, and our commercial relations, as we hoped, were destined to increase from year to year.

THE death of Mr. W. Curtis, recently publisher of the *Hong Kong Times*, and formerly of Brighton, is announced. It seems that early in July Mr. Curtis was indisposed, and took a holiday, visiting Macao and Australia. He returned to Hong Kong in apparent health. Subsequently, it is presumed from some relapse, he took a voyage in the mail steamer which left Hong Kong on the 31st July, but died at sea on the 3rd inst. The details of the melancholy event, which will be learnt with great regret by Mr. Curtis's friends, have yet to be received. Deceased was forty-seven years of age, and leaves a widow and five children, who, with the exception of the eldest (associated with his father in the management of the *Hong Kong Times*), are in England.

IN addition to the steamer of 3,400 tons, contracted for by the directors of the P. and O. Company with Messrs. Stephens, of Glasgow, and already noticed, we understand that purchases have been made of two other steamers of 3,000 tons and 500-horse power, built by Messrs. Caird and Co. for the North German Lloyd's Company in 1873.

THE Eastern and Australian Company's steamer *Bowen* arrived at Sydney from Singapore on the 18th inst., with London mails of 25th June. The Company's steamer *Brisbane* left Singapore for Brisbane on the 21st inst. with London mails of 23rd July,

LOADING.

At LONDON.—STEAMERS VIA SUEZ CANAL.—For Penang, Singapore, Hong Kong, Shanghai, Yokohama, and Hiogo: Lotus, Glenfalloch. For Singapore, Hong Kong, and Shanghai: Glenfinlas, Viking, Venice, Montgomeryshire, Braemar Castle.

SAILING VESSELS. — For Yokohama and Hiogo: Western Chief, Ullock, Banda, Tamesa. For Shanghai: Titania, Windhover, Omba, Ellen Browse. For Hong Kong: Marina, Carricks, Sir Harry Parkes, Caroline. For Batavia, Samarang, and Sourabaya: Sir Robert Sale, Paul, Professor Van der Boon Mesch. For Singapore: Mallard. For Penang: Ocean Rover. For Colombo: Scawfell, Coldinghame, Haidee.

At LIVERPOOL.—For Yokohama: Lochleven Castle. For Penang Singapore, Hong Kong, and Shanghai: Deucalion (str.), Agamemnon (str.), Achilles (str.). For Batavia: Loch Doon. For Singapore: Batrak (str.).

CASUALTIES.

Advices from Rio de Janeiro, August 23, state that the Carolus Magnus, from Liverpool, for Hong Kong, with coal, had put in there for examination, having struck near Abrolhes.

The Dutch ship Laurens Coster, from Newcastle, for Atchin (coal), entered Flushing harbour on the 22nd inst., making much water, having been ashore on the English coast.

The Robert Boak, from Cardiff (patent fuel), for Hong Kong, was abandoned on July 4, in 24 S., 29 W., in a sinking state; crew taken off by the Coloma; second officer and 4 seamen were transferred to the Sovereign of the Seas, from San Francisco, and landed at Liverpool on the 22nd inst.; captain and remainder of crew landed at Queenstown same day.

MISCELLANEOUS.

PORT SAID.—Arrived, Aug. 21, Patroclus, from Liverpool; 25, Glenearn, from London, both for Shanghai.

MAURITIUS.—Sailed, June 25, Guayaquil, for Saigon; 6, Jacmel for Galle; 11, Trento, for Rangoon; 12, Elizabeth Ann, for Manila.

MALTA.—Arrived, Aug. 19, Prinses Amalia (str.), from Batavia, for Nieuwe Diep.

FALMOUTH, AUG. 20.—The George Croshaw, from London, for Singapore, put in here on the 19th inst., with pumps choked, and sailed again on the 22nd.

QUEENSTOWN, AUG. 21.—The Yanikale, at this port, from Sourabaya, reports that on June 19 experienced a sudden shock. Ship shook and trembled as if she had struck on a reef; the noise lasted three minutes

Digitized by Google

At 7.30 P.M. a similar shock, lasting one minute. At 8 P.M. another, lasting ten seconds, and at 5 A.M. following day another shock, lasting ten seconds, lat. 40 S., lon. 23 W.

GUNBOATS FOR CHINA.—Two gunboats for China, the Cheing-Sing and Tu-Sheng, 150 tons each, are fitting out on the Mersey, and are expected to leave shortly for Hong Kong.

LAUNCHES &c.

On the 17th inst. an iron steamer named Connaught Ranger, built for Mr. J. G. M'Cormick, Liverpool, London, and Dublin, was launched from the shipbuilding yard of Messrs. Harland and Wolff, of Belfast; her dimensions are 218 feet in length, 34 feet 6 inches in breadth, and 21 feet 6 inches in depth, registered tonnage 1,200 tons; she is to trade between England and China.

Messrs. Scott and Co., of Cartsdyke, launched, on the 17 inst., from their shipbuilding yard, a steamer of 2,000 tons register, which was named Auchices by Miss Natalie Shand. She has been built to the order of Mr. Alfred Holt, for the Ocean Steamship Company, of Liverpool, and is sister ship to the Stentor and Orestes, built this year by Messrs. Scott and Co. for the same owners, for the China trade.

On the 19th inst. Messrs. Wm. Denny and Bros. launched from their yard at Dumbarton an iron screw-steamship of the following dimensions—225 by 34 by 21, and 1,350 tons gross measurement, for the China Merchant Steam Navigation Company, Shanghai. She will be fitted with compound direct acting inverted engines of 240 h.p. nominal by Messrs. Denny and Co., engineers, Dumbarton. On leaving the ways she was named Fung-Shui, by Miss Hall, London.

On the 21st inst., from the yard of the Barrow Shipbuilding Company, was launched an iron sailing ship of the following dimensions:—Length, 235 feet; breadth, 37 feet; depth, 22 feet 3 inches; about 1,360 tons gross register, and classed 100 A1 at Lloyd's, special survey. This vessel has been built to the order of the Royal Exchange Shipping Company, of London, and will be commanded by Captain James Watson, who has been for many years in the employ of Messrs. John Patton, jun., and Co., the managers of the company. She was named the Western Monarch, by Miss Fleming, daughter of the secretary of the Barrow Shipbuilding Company. She is built on the lines of the well-known clipper ship Eastern Monarch, owned by the same company, and intended for the Australian and China trade.

There was launched on the 23rd inst., from the shipbuilding yard of Messrs. Blackwood and Gordon, Port-Glasgow, a finely-modelled screw-steamer, for Rajah Brooke, of Sarawak. Her dimensions are 135 by 21 by 9·6, and 290 tons B.M. On leaving the ways she was named the Aline, by Miss Jeanie Blackwood, daughter of the builder. She will be fitted with a pair of surface-condensing engines of 50 nominal h.p. She was built under the superintendence of Mr. A. C. Crookshanks, and will be fitted with all modern conveniences, and have large and commodious accommodation for passengers, captain, officers, and crew. Being intended for the protection of the Borneo coast as well as for trading, she will carry on deck two large swivel guns.

The ship County of Peebles, with four masts, built on the Clyde, was left off Rathlan Island on the 17th inst. by the steamtug Vanguard. The master of the tug reports that after throwing off the ship he followed and watched her progress in a dead beat out by the North Channel, against a strong north-west wind. The four masts were covered with canvas, and on both starboard and port tacks all the sails "drew well," and she made good progress, soon getting out of sight. This new vessel is the property of Messrs. R. and J. Craig, Glasgow, and is one of their "County" line of Clyde and Java traders. She was built by Messrs. Barclay, Curle, and Co., Whiteinch.

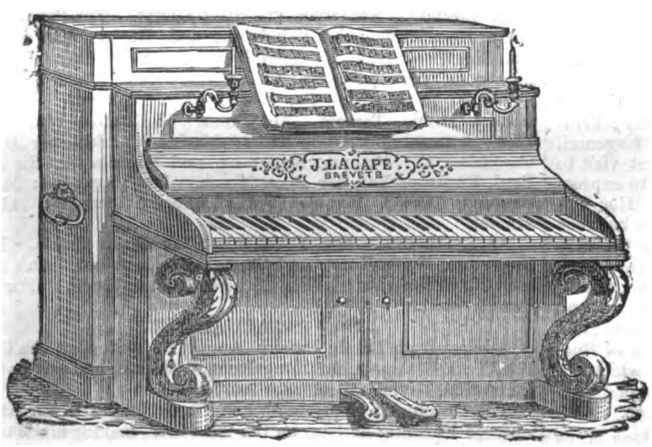
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. Orders should be accompanied either by a remittance, or a reference for payment in London. All communications to be addressed, and remittances made payable, to

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—

By GEORGE ASHDOWN AUDSLEY, Architect and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says:—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

For particulars apply to the Secretary, at the Publishing Office, 13, Hackin's Hey, Liverpool; or to
H. SOTHERAN and Co., London.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each Trade mark—Willow-pattern plate.

PROPRIETORS:—

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter, or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s. 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL BACKHOUSE & CO., LEEDS

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

Per P. and O. steamer *Hydaspes*, from Southampton, Oct. 7.—To Yokohama: Mrs. Goodall. To Shanghai: Mrs. Clark, Rev. J. Hoare. To Singapore: Mr. and Mrs. Griffin. To Ceylon: Mr. R. S. Fraser, Mr. A. M. White, Mrs. Skinner.

Per French steamer *Tigre*, from Marseilles, Sept. 12.—To Yokohama: Mr. and Mrs. Basch. To Shanghai: Mr. and Mrs. King. To Saigon: Mr. A. Spooner, Gen. Reboul. To Singapore: Mr. and Mrs. Schaalje and three children. To Galle: Mr. Clogstown, Mr. and Mrs. Cameron, Mr. Elphinstone.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Shanghai: Mr. and Mrs. Vardel, Mr. Lregardier, Mr. Aubry, Mr. Schetter. To Hong Kong: Mr. Everard. To Saigon: Mr. Mace.

Per French steamer *Iraonaddy*, from Marseilles, Oct. 10.—To Shanghai: Mr. R. H. Artindale. To Hong Kong: Mr. and Mrs. A. Coxon. To Singapore: Mr. and Mrs. Goldie, Mrs. Spooner, Mrs. K. B. Spooner.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 24th ult., and published in our last issue.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

In my last letter I gave you information of an outrage which had been committed upon four students of the British Legation, and a student of the German Legation, Herr von Mollendorff, at a temple forty miles distant in a westerly direction from Peking. Previous to that attack, I have learnt, Dr. and Mrs. Bushell, of the British Legation, were stoned in the streets of Peking. On the 4th July Mr. Waeber, H.I.R.M.'s Consul at Tientsin, stated publicly that he had just received tidings from Peking that Mr. Lensey, the Chinese Secretary of the Russian Legation, while passing on horseback along a street in Peking which foreigners had been hitherto daily in the habit of traversing perfectly unmolested, he was attacked by Chinese, and knocked off his pony by a blow received from a brick thrown at his back. A few days ago the Rev. Mr. Barrodale and wife were pelted with mud by villagers when at a place about twenty miles distant from Tientsin. These undeniable facts prove to the foreign world that at present there exists amongst the Chinese populace of this part of China a hostile feeling towards foreigners.

If the Chinese Cabinet had been only endowed with common sense (together with the necessary honesty) to have promulgated to the people of China by an Imperial Edict, and by proclamations issued by the Governors-General of the provinces, that Mr. Wade, Her Majesty's Envoy, had the kindness and friendship to use his good offices to save China from getting into a war with Japan when she was quite unprepared to do so, we should not, perhaps, at the present hour be witness to the Chinese population every now and then committing outrages on British subjects and other foreigners in the north of China. I have, it will be noticed, said perhaps; for as everything in China is almost always contrary to what we see and experience in Europe, it may, after all, be quite probable that the committing of outrages on British subjects is the national Chinese manner of reciprocating benefits rendered to the Chinese people and the Chinese Government. This is a subject, therefore, which requires the attention and calm study of Mr. Wade, as a guide for his future policy in dealing in Chinese international affairs. It occurs to me pretty strongly that if Mr. Wade would for once try an opposite policy to what he has hitherto good-naturedly pursued, his countrymen in China would be benefited by it. The departure from Peking, while the Yunnan outrage is being discussed and remains quite unsettled, of the families of Mr. Wade,

Digitized by Google

Her Majesty's Envoy; of Mr. Mayers, Her Majesty's Chinese Secretary; and of Mr. Hart, Inspector-General of Customs—all men who are, in the minds of the Chinese populace at Peking, in a position to feel the pulse of the chiefs of the Tsung-li Yamun (and hence of the Ministers of the Cabinet, as some of the chief members of the Tsung-li Yamun are also Cabinet Ministers), in regard to their feelings towards the British Government—has tended not a little to lead the populace at Peking to the idea that these officials foresee a war between China and Great Britain; and that fear has caused them to remove their families for safety from the metropolis of China. Imagining, probably, that the British Lion is at this moment at their mercy, they, brute-like, consider it the fitting time to maltreat British subjects at and near Peking.

I should have thought that when Mr. Wade considered it his duty to reside at Shanghai, where he is within a few hours' communication with Lord Derby, and where every one can clearly see he ought to reside at this conjuncture, instead of at Peking, he would have deemed it of importance for the interests of his country to leave Mr. Mayers, considered on all sides as the ablest official of the British Government in China, at Peking, where he could oversee and watch what was daily taking place, and from whence he could give his chief correct information as to all passing events at the metropolis. In fact, this idea occurred to me so forcibly when Mr. Mayers passed through here on his way to Shanghai, that I could not avoid mentioning it. Although I pay no small attention to diplomatic and political events that are taking place in the North of China, yet I am at this moment unable to mention the name of the person left in charge of British interests at Peking; hence I cannot but infer he must be an insignificant individual. Mr. Mayers, on the other hand, has a wide reputation as an able British official, and he is the proper man, in my opinion, to be in charge of British interests at this moment at Peking.

An inflammatory placard has been lately posted on the walls of the Tartar City of Peking, abusing Foreigners and their religion on the old grounds which the "Death Blow to Corrupt Doctrine" and the placards of the Tientsin massacre have made familiar. Apart from its accusations, the placard itself is a literary curiosity. The strong Taoist smack about it indicates a priest or a fortune-teller as the probable author. Whether the unfriendly spirit which the Chinese are exhibiting means anything definite, or whether it is purely accidental, remains to be seen. It is at any rate sufficiently like earnest to need very sharp curbing.

I hear that Herr von Brandt, the German Minister, gives a hebdomadal banquet to the chiefs of the Tsung-li Yamun, which I may say is quite a new feature in diplomatic life in Peking. Being a bachelor, he can easily and conveniently forward the interests of his country in this manner. I further hear that the Chinese Government have made a large purchase of needle rifles from the Prussian Government, which they (the Prussian Government) no longer require, as they have armed their forces with a new kind of rifle superior to the needle.

A short time back I was told that Mr. Hart, Inspector-General of Customs, when last at Tientsin, arranged with Li Hung-chang for the purchase of fifty or sixty large Armstrong cannon. I have further been told that Herr von Brandt sent a letter to Mr. Avery, the U.S. Minister, expressing it as his opinion that Mr. Sheppard had acted properly in not allowing Mr. Twinem, the Commissioner of Customs at this port, to sit with him when investigating the *Shantung* steamer collision case.

On the 4th July his Excellency Ting Jin-chang sent his cards to the Consuls at Tientsin, informing them he had arrived, but was too unwell to call, which meant that he had arrived and was prepared to receive their calls.

On the 8th July the Viceroy accepted the resignation of Dr. Macartney, as manager and superintendent of the Nanking Arsenal, which was established and built up by his indefatigable efforts. The resignation was offered some time since, and was made in consequence of some disagreement with the mandarins connected with the institution. Dr. Macartney's retirement will be a serious loss to the Chinese.

A few nights ago the godown of G. W. Collins and Co., at Taku, was broken into by thieves, who sawed or chiselled away the frames into which the iron gratings are set, and secured goods to the amount of $40 or $50. No clue to the culprits has been obtained.

SHANGHAI.

The present mail brings advices from this port to the 18th July; the French mail from London June 4 was received on the 16th July. The following summary of news is from the *North China Herald*:—

The Municipal minutes have been published containing apparently the final correspondence on the Wheelbarrow and Bridge question. The English Council adopt willingly the French Council's proposal that each should issue its own licenses independently, and the French Council formally announce that they are willing to bear half the cost of repairing the Yang-king-pang bridges. None too soon, therefore, these repairs are to be taken in hand. We are glad to see that the question of Lekin taxation in the Settlements is under discussion, and that the Council have taken the opinion of their legal advisers on the subject. That opinion, we believe, sustains the obvious view that any additional taxation beyond the import dues, within the limits of the port, is contrary to Treaty; and we are glad to think that the matter is likely to be pressed to a conclusion. If all other means fail, we should advise the Council arresting a few runners as thieves—*i.e.*, for extorting money to which they are not entitled. The wharfage dues for May show a decrease of Tls. 823, as against the same period last year. The cash balance on the 30th June showed Tls. 3,358 in hand, beyond the special deposit.

A parade for the distribution of prizes won at the Volunteer Spring Rifle Meeting is to be held as soon as weather permits. A parade will, we believe, be welcome to the Volunteers, who have not been called out now for some time. It is satisfactory to hear the arms and ammunition are in serviceable order. It is quite as well they should be, when so many "burning questions" are pending.—We are glad to learn from the Public Works' Report that negotiations are going on for making the two new roads—from the Cemetery to the Sikaway-road, and from Alpha farm to the Jessfield-road—which were promised at the annual meeting. The Cemetery road will be especially convenient, as avoiding the objectionable village outside the West Gate. The Council lament the difficulty they find in widening the roads in the Settlement, and we join in their lamentation. If Shanghai is to remove to Chinkiang it does not much matter; but if a railway should ever come to increase the business of Shanghai the present narrowness of the streets will be a continually increasing nuisance. At any rate, one important step has been gained in widening the Foochow-road 3ft. between Szechuen-road and the Bund. Some interesting particulars of other schemes of the same kind will be found in the report.—The Consuls have been asked to communicate with the Chinese authorities about cleaning out the Soochow Creek.—As we mentioned some time ago, steps are being taken to have the interior of the race-course levelled. This will make it available not only as a drill-ground, but for various purposes which its unevenness now defeats.—Steps have been taken to procure the desired information from England regarding water works.

Judgment has been delivered by H.M. Consul in the case for compensation brought against Captain Brown, of the *Ocean*, on behalf of the representatives of the passengers and crew drowned in the collision with the *Fusing*. No further evidence was adduced; but the *Ocean* having, in consequence of her release on bail in another suit, received her papers from the Shipping office of H.B.M.'s Consulate, and taken her departure for Newchwang, Mr. Drummond, on behalf of the plaintiffs, said he was instructed to state that they would hold the British Government responsible for the claims now made!—Mr. Hannen, for Captain Brown, said he had appeared in the Court solely out of respect to the Consul; but, not acknowledging his jurisdiction, would not offer any defence.—The Court decided that Captain Brown was blamable for the collision which caused the loss of life, and adjudged him to pay Tls. 300 to the families of each of the twenty-four officials drowned, and Tls. 100 to those of each of the thirty-eight servants and crew. The fact of the *Fusing* being also to blame did not relieve the responsibility of the other; and the master of the *Ocean*, being blamable, was liable. Both parties to pay their own costs. The Court expresses an opinion that the damage sustained by the relatives of those drowned exceeds the sum awarded, and it is, in fact, said that the C.M.S.N. Company has had to make good, to the families of the drowned officials, damages to the extent of Tls. 24,000.

The steamer *Ocean* has at last got away. We published last week the decree of the Chief Judge, fixing the amount of her bail. This was given, and she left on the 10th July for Newchwang. When it became known that she had been released by the Supreme Court, and had cleared for Newchwang, the parties interested in the then pending suit in the Consular Court wanted the Taoutai to despatch a gunboat to arrest her. His Excellency, however, had the discretion to see that he would be putting himself in the wrong by such a proceeding, and declined. The Taoutai was advised by Her Majesty's Consul, directly news reached him that the idea had been mooted, that the proceeding would be a mistake; but he had already seen it in that light, and had negatived the proposal. We almost regret he did not act upon it. It would have brought the persecution to a climax.

A discreditable incident happened on the 15th July at the Mixed Court, during the hearing of a suit brought by Mr. D. M. Henderson against a Chinaman, to recover the Tls. 10,000 which were recently the subject of inquiry at the U.S. Consular Court. The defendant in the original suit, Mr. J. K. Thorndike, was present, and, it is alleged, becoming irritated at something said by Mr. Henderson in his evidence, struck him a violent blow on the head with an umbrella. The incident occasioned some excitement, and Mr. Thorndike was required to leave the Court. He went away, and so far the matter ended, but we hear it is to be the subject of investigation in another court.

A clever capture of two deserters from the U.S. gunboat *Saco*, now at Yokohama, has been made in this Settlement. Among the items of news copied into the *North China Daily News* from the *Japan Herald*, received by last mail, was one to

Digitized by Google

the effect that a ship's corporal and a seaman had stolen a considerable sum in dollars, deserted, and had not since been heard of. This put the authorities at the U.S. Consulate here on the alert; and the Marshal, Phœnix, with P. C. Boysen, of the municipal police, kept a look-out for arrivals from Japan. On board the next Mitsu-Bishi steamer, the *Takasago Maru*, two men were found whose appearance excited suspicion that they were the runaways. They were accordingly arrested, when they gave the names of Frank Moore and Henry Rogers, both afterwards found to be fictitious. On the way to the Consulate the one calling himself Rogers asked what he was arrested for, and was told by Boysen that he would know in due time. He hesitated a moment, and then said, "I suppose it will be two years for us," adding that he had had the custody of the mess money on board the *Saco*, had asked leave to go ashore, was refused, and then made up his mind to desert, which he did, taking the mess money with him. Afterwards, at the other prisoner's persuasion, he left Yokohama for Shanghai. Their real names are Nathaniel Sprague and Henry Tweston. The man Meyers, who was recently convicted of obtaining goods by false pretences, had also served on board the *Saco;* and on the two men being taken to the cells, they were, to their great surprise, greeted by their real names by their former shipmate, whose incarceration was previously unknown to them. They are remanded for communication with the U.S. naval authorities.

A cunning native has inaugurated a new way of putting brass dollars in circulation in this settlement. He went into a shop and purchased rice to the value of $3, telling the shopkeeper to send his coolie with him, and he would pay the money on reaching home. After proceeding some distance, he told the coolie he would pay him them, and take the rice home himself. The coolie, of course, took the dollars, which were found by his master to be excellent imitations in plated brass. It further appears that the sharper was successful in a like manner in two other instances. The police were set to work, and he was apprehended and taken before the Mixed Court, where, in consideration of his age, he was only fined $100, and to be kept in prison until the money is paid.

Messrs. Kelly and Co. advertise a "Confucian Copy-book,' which is likely to be useful to beginners in Chinese. The copies are composed of the radicals only; there are seven parts, each containing thirty-eight characters, which are repeated, copy-book fashion, in red ink on a number of pages, and the student is supposed to paint these over with black. To quote from the preface—"The natives learn to write by the use of similar books, tracing these red lines with black ink, under the direction of a teacher. Their copy-books, however, are selections from their classics, and possess none of the advantages of this system. When one has learned to write the radicals with freedom, he can readily combine them to form other characters; common sense, therefore, points to the use of what the author has been pleased to term the 'Confucian Copy-book.'"

A collision has occurred in the Peiho, between the steamers *Yunching* and *Shantung*. Our informant states that the *Shantung* was at anchor at 9 P.M. on the 7th July, at the Nine Forts, the night being very dark and squally. At about 10 P.M. the *Yunching*, while coming down the river, struck her stem on, cutting through the water ways and plates and doing serious damage. The *Yunching's* stem is also very much injured. Both vessels have arrived here, and will undergo immediate repairs.

The C.M. steamer *Lee Yuen*, which left on the 13th July, bound to the Northern ports, returned next day, having been in collision with a junk about forty miles to the northward of Shaweisham. The crew of the junk, with their effects, were taken on board the steamer, and the junk was abandoned, still afloat, it being deemed impossible to take her in tow. The junk was passed by the steamer *Shangtung* on the 15th July, still afloat, with a number of other junks hovering around, apparently bent upon plunder. The *Lee Yuen* has been placed in the Old Dock. The result of her collision with the junk is a perpendicular slit, about four feet in length, on the port bow, below the water line.

The Mitsu Bishi steamer *Kanagawa Maru* (formerly P. and O. steamer *Madras*) struck on a sunken reef between Cape Sagami and Kanonsaki Point, about twenty miles from Yokohama, into which port she was towed by another steamer of the same company. She appears, however, to have sustained no damage of moment, and has since left for Shanghai, in schedule time.

A meeting has been held at Hankow to arrange for the appointment of a Chaplain. The Society for the Propagation of the Gospel have promised to send one, on the community's guarantee of £300 a year. Residents are beginning to breathe, after their apprehension of a flood. The water seems to be stationary, if not falling slightly.

Cool pleasant weather, together with a brilliant moon, led to a large turnout in the Gardens on the occasion of the third concert this season of the Wind Instrument Society, the attendance being more than usually numerous. The selections were excellent, and it was acknowledged that the band has seldom been heard to better advantage.

The Supreme Court vacation will begin on the 1st August, and continue till the 1st October.

The subjoined additional items of intelligence are from the *Celestial Empire:*—

The principal event of purely local interest has been the sojourn among us of the Rev. Sholto Douglas, Vicar of All Saints', Derby, who has been holding three services a day at Union Chapel, the Cathedral, and the Lyceum Theatre during the past week. The evangelistic meetings at the Lyceum Theatre, at six o'clock, have been very numerously attended by all classes, and have left a deep impression on the minds of many who have taken advantage of them. It is impossible for us to give our readers either a catalogue of the services that have been held or a detailed description of their nature; but we may content ourselves with remarking that the past week is one that will be long remembered in the annals of Shanghai, longer still in the history of many of our fellow residents.

We are informed that a commencement is to be at once made with the erection of meeting and reading-rooms, in connection with the Polytechnic Institution, upon their new property, which has been regularly transferred to the committee. We are sincerely glad to hear that this excellent scheme is now about to be practically carried into effect, and may add a hope that the initiatory steps which are now being taken will lead to a further contribution of funds.

At Hankow early in the morning of the 13th July the water, as given in the report of the steamer *Hankow*, was at a height of forty-five feet, and was supposed to be slowly rising at the rate of about an inch per diem. This, however, appears not to have been the case, as the *Fychow*, which started on her downward voyage at about the same hour on the 14th July, reports the height at that time as forty-four feet eleven inches, from which it appears that the maximum has been reached, and that the water is commencing to subside.

On the 30th June the German corvette *Ariadne* arrived at Newchwang from Tientsin with Mr. Bismarck, Consul for the three Northern Ports, on board. She left subsequently for Chefoo, where she will remain for the summer months.

(FROM A CORRESPONDENT.)

SHANGHAI, JULY 17.

The plot seems thickening here, and our "able Minister" is evidently being duped by the wily Chinese diplomatists. He is a mere child in their hands. When Mr. Disraeli was interrogated in the House of Commons on the murder of Mr. Margary, he said that our Minister, of whom he could not speak too highly, had made demands on the Chinese Government, which they had acceded to. We are now four and a half months after the death of Margary, and the Chinese Government have done nothing beyond appointing a man to investigate a disturbance in Yunnan. Mr. Wade is here still, and is doubtless in correspondence with the Chinese Government at Peking, but he might as well be at Timbuctoo. He sent up Messrs. Grosvenor and Baber to Hankow, but they have returned, the commissioner not having arrived there, and, in fact, is not now expected for some time, if he even turns up at all. It seems to me childish to expect the Chinese Government to punish their officers for obeying their own orders, and Mr. Wade has put his country in a false position by making such a demand. If the Chinese are to give reparation for this atrocious murder, it cannot be done in this way, and must be exacted by an armed force on our side. Without this it is useless negotiating with the Chinese Government. They will promise anything, but never perform their promises. Another very discreditable affair to our authorities is the prosecution of the captain and owners of the steamer *Ocean* at the instigation of the Chinese. After commencing a suit in the Admiralty Court for running down the *Fusing* in a fog, the Judge, Sir E. Hornby, condemned the *Ocean* to pay half the value of the *Fusing* and cargo, the whole value of the passengers' effects (valued at £13,000, or Tls. 45,000), the effects of a Chinese passenger generally consisting of a mat, pillow, and rug, value $1½. It subsequently transpired that Sir E. Hornby had no power to make the *Ocean* pay more than £8 a ton, although his decree would have carried three times the value of the *Ocean*, or six times the amount he was entitled to grant under the Merchant Shipping Act. But that Act seems to have been unknown to him and the lawyers.

Not satisfied with this, the Chinese commenced a suit before the Consul and Taoutai as a Mixed Court, and the Consul awarded Tls. 11,000 for the passengers' lives, or more than £3,000, although the same Consul (Medhurst) had exonerated the captain from blame when President of the Naval Court convened to inquire into the collision. It is evident that this outrageous and unjust decision has been given at the instigation of the Chinese, who threatened that if substantial damages were not given in this case they would give no redress in the cases now pending against them. This is authoritatively stated in a letter to the *Daily News* this morning. This is the pass Mr. Wade has brought matters to by his puerile conduct, that a British Consul is forced to stultify himself at the instance of rascally Chinese mandarins. Unless the captain was proved guilty of culpable negligence no such verdict could be given in England, and no such charge is even alleged. Yet he is called upon to indemnify the passengers in the other vessel, the owners of which go scot free. From

Digitized by Google

this decision there is no appeal, according to the *iniquitous rules* drawn up by Alcock and Wade. Can any injustice be greater than this? Can any nation submit to such iniquities? We have a telegram here that the Indian Government have demanded a passage for troops to Yunnan through Burmah and been refused. If this is correct, is not Mr. Wade culpable in sending two of his attachés with their lives in their hands to Yunnan, to be basely murdered like Margary, trusting to the broken reed of Chinese protection, already found wanting in Margary's case, and many others. Should those gentlemen be murdered by the Chinese, Mr. Wade will be looked upon as morally guilty of their deaths. When, oh when, will our diplomatists awaken to the true character of the Chinese Government, steeped in lies, murders, massacres, duplicity, squeezing, breaking treaties, and villannies beyond counting? Now is the time to open the country, seize Formosa, march a force into Yunnan, and the thing is done.

P.S.—It is said that Mr. Wade promised the Chinese to arrest the *Ocean* a second time, but hesitated, and gave it up at the last moment. The Consul detained her papers for over a day and a half after she was cleared at the Customs, which confirms this statement.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald*:—

The Imperialist forces in Formosa are said to be in a state of utter demoralisation. The men appear to have lost all confidence in their officers—who are for the most part rank cowards. The aborigines are quite secure in their own territory, into which the Chinese troops dare not follow them. The Viceroy has, we are informed, written to Captain McMahon expressing his high approval of the soldier-like appearance of the troops under his command. His Excellency at the same time sent a Chinese dagger, a couple of chop sticks, and two silk embroidered tobacco pouches as marks of his esteem.

A very rare phenomenon has occurred here, viz., a lunar rainbow. The brightest aspect was shortly after 11 P.M., when the moon, being very clear, reflected her effulgence on the rainbow arch. The direction of the rainbow was S.E. to N.W. The remarkable appearance is so exceptional that the Chinese consider it the inauguration of "happy times to come." Some hopes, then, for first crop teas.

A rather good story is current anent a certain tea broker at this place, who, in disposing of a particular parcel of tea, on what he considered favourable terms for the buyer (*i.e.*, not more than 1½d. per lb. above London value), gave the strange reason that the teaman was about to die chop-chop, and was anxious before taking his departure from this vale of tears to get out of stock. Who will say after this that Chinamen are not practical men of business?

We are informed that instructions have been received by the Provincial authorities from the *Tsung li Yamen*, requesting that a gunboat should be sent, without delay, to the Loo choos; for what object we are unable to ascertain; but it is surmised that there is some difficulty pending in regard to the payment of the customary tribute.

It is reported that the Provincial Government shortly expect an ironclad man-of-war from Europe. The question arises—what will they do with it? We incline to the opinion that it will prove an expensive and by no means pretty toy. Something like the Arsenal—a white elephant.

We observe with much pleasure that the patch of graves between the English Church and the roadway is being removed. The removal of these obstructions will much improve the approaches to the church, and will in other respects prove a public convenience.

A native in the employ of the Arsenal authorities at the anchorage has committed suicide. No reason is given for the crime, but the man was suspected of being involved in gambling transactions.

HONG KONG.

Our advices by the present mail extend to the 24th July; no later mail from London had been received. The following items of intelligence are from the *Hong Kong Daily Press*:—

Mr. J. M. Price, the Surveyor-General, has submitted to the Government a report on the water works extension. Two alternative projects—the high level and low level—are given, "the first on a smaller scale than the second, and both of considerably less magnitude than the original scheme submitted by me in 1873." The high level project consists of "a plan for bringing the Tytam stream into town from the 500 foot level without the aid or cost of any reservoir." Its estimated cost is £39,000. The low level project is "a plan for a reservoir on the 400 foot level, nearly upon the same site as that proposed in 1873, the water being conveyed direct into town by means of a tunnelled conduit under the dividing ridge of the island in lieu of by a surface conduit winding round the hills in search of tributary streams." Its estimated cost is £122,600. Mr. Price thus compares the two schemes:—"The most practical way to judge of the true money value of the water to be had under the two schemes now before us, and therefore the best way to test their respective merits, is not to rush at once to the lump sums shown in the estimates, but to take the gallon and find what this measure will stand us at under each. The upper project gives us 62 million gallons for £39,000, the lower 283 million gallons for £122,600, that is to say, under the first we pay 0·52 of a farthing per gallon, under the second 0·41 of a farthing, a saving of 0·11 in favour of the low level project, notwithstanding that its total cost is nearly three and a half times as great as that of its less pretentious competitor.

In the Supreme Court the Chief Justice and the Attorney-General have given judgment in the case of Fletcher and another *v.* the Hong Kong and Shanghai Banking Corporation. This appeal is brought by the Hong Kong and Shanghai Bank from the judgment of Mr. Justice Snowden in a suit in the Summary Jurisdiction, wherein the respondents as plaintiffs sued the bank for the wrongful conversion of a certain bill of exchange or draft for $1,123.54 drawn by the Hong Kong and Shanghai Bank at Amoy upon themselves at Hong Kong, payable on demand to the order of Dodd and Co., endorsed by Dodd and Co. to McGregor and Co., of Hong Kong, and endorsed by McGregor and Co. in blank. After summing up the case at considerable length the Attorney General is of opinion that this appeal should be dismissed, and that the costs should follow the event and be paid by the appellants. Judgment is given by the Chief Justice in accordance with this decision. The effect of this judgment will be that the Bank become owners of the draft, and so far are gainers of $123.54, the difference between its value and the damages.

On the 23rd July the steamer *Powan* left the wharf for Canton at the usual hour. It had become quite squally at the time, and as she steamed away a very strong and sudden squall caught her port bow, when she became quite unmanageable, it being found impossible to steer her. She drifted broadside on and her starboard bow came in contact with the port light box of the steamship *City of Exeter*, smashing it up, but doing no further damage. In the lull she sheered off, headed in shore, and drifted down to the wharf again, where she let go her anchor. Some of the passengers, fearing a typhoon was coming on, took the opportunity of coming on shore again.

A Chinese boatman, named Lau Hi Kan, has been charged before the Hon. C. May, in the police-court, with selling samshu to seamen on board the British ship *Abbotsford*. After the evidence of two seamen on board, the boatman was fined $200, in default six months' hard labour.

Jean Filippe, a quartermaster on board the P. and O. Company's steamship *Cathay*, for wilfully remaining behind from his ship, has been sentenced by the Marine magistrate to one month's hard labour at the request of the captain.

Leung Asung, the prisoner recently sentenced at the police-court to four months' hard labour, and to two floggings of ten strokes each time, for picking the pocket of a Chinese fireman on board the steamship *Tom Morton*, has received one of his floggings publicly.

The British steamship *Abbotsford* has been towed over to Kowloon by the steam-tug *Fame*, for the purpose of docking.

The Russian corvette *Bayan* arrived on the 20th July, and as she steamed in from the westward saluted the British flag.

THE HONG KONG, CANTON, AND MACAO STEAMSHIP COMPANY, LIMITED.

The ordinary half-yearly meeting of this company was held at the City Hall on the 20th July. There were present:—Messrs. R. Deacon (chairman), A. MacG. Heaton, T. C. Hayllar, Q.C., Andre, Belilios, Dr. Adams, Middleton, Anton, H. Smith, Head, Hoppius, Landstein, Wheeler, Blakeman, J. Smith, Robinson, Beart, Captain Sands, Scott, Newton, Legge, Dolan, Jameson, Keswick, Cordes, Dr. O'Brien, J. Greig, Baron do Cercal, Blogg, O. Jackson, Hall, Arnold, Peters, Corrall, Davis, and Da Costa.

The notice calling the meeting having been read, the Chairman said, with the meeting's permission, they would consider the report and accounts (which were published in our last issue) as read. He did not think there was much in them calling for any remark of his. They explained themselves pretty well. He thought the past half-year had been a very good one. He would be glad to answer any questions that any of the shareholders might wish to put. No question being asked, the Chairman proposed the adoption of the report and accounts.—Dr. Adams said he had much pleasure in seconding their adoption. He would only ask one question, and it was with reference to the office expenses and agencies at Canton and Macao for May and June. Did the $1,895.80 mentioned in the report include the whole expenses of these offices under the secretaryship?—The Chairman replied that it included everything from the 1st May to the 30th June.—The report and accounts were then put to the meeting, and carried unanimously.—Mr. MacG. Heaton proposed the election of Mr. E. R. Belilios and Mr. W. Keswick as directors.—Mr. Andre seconded.—The motion was put, and passed unanimously.—Mr. Andre proposed that Mr. A. N. Blakeman and Mr. H. Smith be re-elected as auditors.—Mr. Belilios seconded.—The motion was carried unanimously.—The Chairman then announced that this concluded the business of the ordinary half-yearly meeting.

At a later hour on the same day an extraordinary meeting was held, to which a correspondence was submitted, showing that

Digitized by Google

Messrs. Butterfield and Swire and Messrs. Heard and Co. had offered to undertake the General Agency of the Company. The last named firm stated that owing to different arrangements in their staff both at Hong Kong and Canton they could carry on the business for a less sum than was previously estimated by them; and they offered to pay all expenses and outgoings formerly paid by the General Agents, including the cost of the Macao Agency, for the sum of $14,000 per annum, payable monthly, they finding, free of all expense to the Company, storage for all the usual stores and equipments, and for coal up to 1,000 tons. Should their offer be accepted, they would take over the lease of the present offices of the Company from the day of receiving the General Agency, and also the furniture and office appurtenances which have been purchased.

The Chairman then said that, as stated in their last report, the directors had consulted the wishes of the shareholders, which was to carry on the company with a board of directors, with a secretary, and the alterations in the Articles of Association, which would be laid before the shareholders, would meet that view. With regard to the applications to carry on the company, the general wish of the shareholders was, as he had already said, that the board themselves should carry it on. The directors had always sought to make things as pleasant as possible, and to work the company as well as they could for the shareholders and the public at large; and he (the chairman) some time ago spoke to a partner of Messrs. Butterfield and Swire's, and asked him if he would become a director. He said he could not himself, but said he would like to have a talk with him (the chairman) on the subject. The very next thing that he heard from him was the application which had just been laid before the meeting. They did not even say how they would take the company, and what was contained in their letters was all the directors knew on the subject. If there was opposition to the company, he could only say that it would be most lamentable for those who attempted it. Of course in that case the company would lose money, but the opposition were bound to lose much more.

The notice calling the extraordinary meeting having been then read, the Chairman submitted a series of resolutions embodying the alterations in the Articles of Association. He proposed their adoption *seriatim*.—Mr. Heaton seconded them, and they were all adopted.—The Chairman, having requested the attendance of a sufficient number of shareholders fourteen days hence to confirm the resolutions just passed, said he was much obliged for their presence that day, and trusted, with their assistance and the assistance of the public, that the directors would be able to further their interests, and carry on the company—malgre all opposition—as successfully as they had done heretofore. The meeting then terminated.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 31st July; no later mail from London had arrived out. We take the following items of intelligence from the *Straits Times*:—

The estimates for 1876 have been drawn up by the Colonial Treasurer, the Hon. Mr. Willans. They are in the usual form, and are accompanied by two memoranda explaining the differences between the Estimates of Revenue and Expenditure for 1875 and 1876. As compared with the estimated revenue for the current year the estimated revenue for 1876 shows a falling off of $28,851. This is mainly owing to the transfer of the Singapore markets to the Municipality, to the profit on copper coin supplied in 1874 falling to be adjusted in 1875, and to the decrease in interest on surplus funds which have been spent on Public Works. There is an increase, estimated for 1876, on Licenses, Harbour Dues, Postage, Fines, Fees of Office, Reimbursements and Special Receipts amounting in all to $42,769, and a decrease on Land revenue, Rents, Stamps, Sale of Government Property, and Interest, including profit on copper coin amounting in all to $71,620, and the difference between these two sums makes up the deficiency in the revenue. Turning to the estimated Expenditure for 1876, we find that it is less than 1875 by $52,074. Establishments however appear to be still increasing, and the saving has been principally effected by cutting down the expenditure on Works and Buildings, Roads, Streets, and Bridges. The increase in Establishments, it is true, is not very important and is mainly caused by advances of salaries, which of course it is only fitting should be granted whenever due, but the steady increase, year by year of the cost of the *personnel* of Government requires careful watching and checking. We notice also that the item of transport is larger than ever, and that the estimate for Government vessels (Singapore) is put down at $6,250 higher than in 1875, owing to a steam launch being required to replace the *Mata Mata*, now stationed in Penang. A steam launch is doubtless necessary, but we should like to be informed what services the *Pluto* renders the colony for her cost.

Among other details we notice that the salary of the Registrar of the Supreme Court is reduced from $5,460 to $3,600, and of the First Magistrate of Police in Singapore from $3,828 to $3,600, while the salary of the Second Magistrate has been raised to $3,276, and of the Registrar General from $2,400 to $3,600. These changes have been made, no doubt, only after due consideration, and for good reasons, but with regard to the last, we should like to know whether the Registrar General is in future always to act as coroner, and whether, if it should afterwards be necessary to separate the two offices, the reason now given for the advance of the Registrar's pay, viz., in consideration of his ceasing to draw horse allowance, fees, and travelling expenses as coroner, will be remembered or forgotten, and a further increase in establishments declared absolutely necessary. We have no wish, however, to be hyper-critical with regard to the estimates for 1876, which we are inclined to pronounce the most satisfactory budget ever laid before Council since the transfer. The colony will not be slow to recognise and acknowledge the fact that to Sir William Jervois is due the fact of arresting in the first year of his office the downward course of the colony towards impecuniosity and debt, and this will be done all the more readily and heartily because it is a most unpleasant and unpopular duty to perform. The annual revenues and expenditures, actual and estimated, from the beginning of 1868 down to the end of 1876, are given in the following figures, and they are sufficiently suggestive. The last two years are only estimated.

	Revenue.	Expenditure.
1868	$1,301,843	$1,197,177
1869	1,313,046	1,164,354
1870	1,378,748	1,259,376
1871	1,405,703	1,254,111
1872	1,536,274	1,296,311
1873	1,502,094	1,415,828
1874	1,458,872	1,679,210
1875	1,492,616	1,500,289
1876	1,463,765	1,448,215

We think any one scanning the above two columns will require no argument to convince him that his Excellency Sir William Jervois has not applied the break a bit too soon.

On the 21st July a native schooner, or tongkang, named the *Hawk*, commanded by Nacodah Mahrassah Aboobakar, and manned by a crew of nine men (eight Klings and one Malay), cleared from this port for Deli, Sumatra, with a cargo of planks and twenty-two Chinese passengers. These twenty-two passengers were able-bodied coolies, of the Macao and Teo Chew tribes, who had been engaged for service on a plantation in Deli, and over them was placed a guard of six armed Manilamen. Each of the coolies had received $30 advance, paid down after they were safe on board the vessel. After leaving the harbour some dispute arose between the coolies, and the schooner returned to this port, when inquiries made by the Master Attendant proved that the only apparent disagreement was between some of the coolies themselves, which having been settled, they expressed their perfect willingness to adhere to their agreement. The schooner left again on the 22nd, and everything went on quietly until next day, the vessel being then off Pulo Cocob, some miles beyond the Carimons, when all at once, and without warning, the coolies mutinied, and a scene of bloody strife and carnage ensued. The guard of Manila men were taking their meal on deck, having their arms beside them, when the Chinamen rushed upon them and succeeded in getting hold of some of the weapons, and afterward obtained possession of the vessel, which was subsequently run ashore at Ayum Dinat, in the territory of Johore. Nothing was known here of the mutiny, but Captain Dunlop, Inspector-General of Police, having been informed on the 24th July that some of the coolies had been seen in Singapore, had his suspicions at once awakened, and, later, the police succeeded in getting three of the Chinamen, all of whom proved to be wounded. Captain Dunlop, now convinced that there had been foul play, proceeded out to the westward on the 24th July in the Government steam launch, to obtain tidings of the vessel, but returned late in the evening without having made any further discovery. On his return, however, he found that two of the crew, a Malay and a Kling, had arrived and given information of the mutiny, and were able to describe pretty nearly the whereabouts of the vessel.

Early on the morning of the 26th July Captain Dunlop started out again in the launch, and on reaching Ayam Dinat the schooner was found lying high and dry on a sandbank. From all that could be gathered from the survivors, it appears that at the first alarm the eight Kling sailors sprang overboard in the most abject cowardice, and the Malay took refuge in the Nacodah's cabin, where he remained hidden while the bloody work was going on, leaving the six Manila men to fight out the battle unaided. The wounds inflicted upon those of the Chinaman who have been retaken, and the scene presented by the schooner itself, bear testimony how faithfully these six men endeavoured to fulfil their trust, and how terrible and sanguinary must have been the struggle ere the Chinamen could master them. The deck, the lumber which formed the cargo, and everything on board, were covered with huge stains and clotted pools of blood, and there is hardly a doubt that of those six brave men only one remains alive. It appears that the coolies, after gaining possession of the schooner, endeavoured to make their way back to Singapore, but getting into the rough water on the sandy shoal off Ayum Dinat, the vessel became unmanageable, whereupon she was headed direct for the beach, and run up high and dry. They then ransacked the cabin, broke open the boxes of the Nacodah and crew, and robbed them of everything of value, including $50 in money. Finding the Malay man secreted here, they

Digitized by Google

made him fast, lest he should give the alarm to the Malays on shore, and then, launching the schooner's boat from on deck, those of the mutineers who could get into it came on to Singapore, while the rest made their way to the beach and fled to the jungle.

Captain Dunlop prosecuted his inquiries on shore, and learned that three of the Chinamen, two of whom were wounded, had been taken by Maharajah's Malay police; one of the Kling sailors, wounded, was found ashore, and placed on board the schooner, and two or three more had found shelter in a Malay police station further to the westward. Since then, we learn, all nine of the crew have been accounted for; but no tidings have been received of the five missing Manila men, and the presumption is that they have been killed, or thrown overboard in a wounded and helpless condition. Only nine of the coolies have been found so far, but there is every probability that those of the remaining thirteen who have taken to the jungle will be compelled by privation to come into the small Malay village, when they will be made prisoners. The schooner was left in charge of the Nacodah and those of the crew taken back by Captain Dunlop, assisted by a guard of police. There is little doubt the uprising was premeditated from the very outset, and that these twenty-two ruffians engaged themselves merely to obtain the advance of $30, but this being paid only after they were on board and under an armed guard prevented their escape until such time as they could surprise their watchful keepers. This presumption is strengthened by the significant fact that not one of all the gang had a box or baggage of any sort, though they were perfectly well aware they were bound for a place for which an outfit was indispensable. We understand that the offence having been committed within the Maharajah's jurisdiction, the prisoners will probably be all handed over to the Johore authorities for trial and punishment.

We are glad to find that the Governor has recognised the necessity of not confining his attention to the Western States of the Malayan Peninsula, but has recently paid a visit to the Eastern States also. This, we believe, has not been done since Sir Harry Ord went to Pahang, Tringanu, and Kalantan in 1872, since when they have been practically lost sight of; for, if we except the trip of Sir Andrew Clarke to Pahang last year, the Governor has never kept up the acquaintance that was then established. Although these States are less known than those on the other side of the Peninsula, which have the advantage of lying in the direct line of traffic, yet the quiet and order which they have enjoyed for some time past have led to a degree of prosperity which at the first glance is surprising. The account's which we have received of the Governer's visit give a most gratifying picture not only of the friendly disposition of Chiefs and people, but of a general prosperity and contentment prevalent which is in strong contrast to the stories of desolation which the British Residents have had to tell of the States on the West Coast. His Excellency appears to have received everywhere a warm and cordial welcome from all the Rajahs.

The ball given by the Governor and Lady Jervois at Government House on the 29th July, in honour of Her Majesty's birthday, was one of the plesantest and most liberal entertaiments yet given in Government House, reputed as it hitherto has been for its hospitality. The ball-room, entrance-hall, grand staircase, and corridors were chastely and prettily decorated, and the flowers and evergreens which adorned the walls appeared as only the natural accompaniments to a festive scene like this. The excellent band of the 1-10th Regiment furnished the music. The attendance was more than usually numerous, and invitations were extended to every one of social standing in the three Settlements, and the gathering was in this respect what a Queen's birthday ball should be. The guests were at first ushered up the grand staircase, where a guard of honour was drawn up on either hand, into the reception-room, where, after the company had all assembled and been received by his Excellency and Lady Jervois, they repaired at about half-past nine to the ball-room below, and dancing was begun. About midnight supper was announced, and afterwards dancing was resumed, and kept up till nearly three o'clock, when the guests departed, deeply impressed with the hearty hospitality dispensed by his Excellency and Lady Jervois, and highly pleased with the manner in which they did the honours on this occasion.

The finding of the Court of Inquiry on the *Cybele* case appears in the *Gazette*. It states that the Court considers that the Master showed great error of judgment in approaching an island unknown to him within two cables' length, and is of opinion that he should have shaped a course calculated to lead him at least five cables off; but taking into consideration that he was guided by one of the Admiralty Charts, with corrections to September, 1869, which showed no danger south of Raffles Light, where a reef in reality runs out a distance of 900 feet, the Court does not consider it advisable to suspend or cancel his certificate, but censure him for his want of due caution whilst navigating waters unknown to himself, where currents are strong and not to be depended on.

The following address has been presented by the members of the Singapore Bar to Captain Douglas:—

We, the undersigned members of the Singapore Bar, take the opportunity of addressing you on the occasion of your retiring from the post of Acting Senior Magistrate. This appointment you have held for nearly one year, and during that time the able and efficient manner in which you have performed its duties has commanded our highest respect. We appreciate also most highly the great courtesy you have always extended to us when engaged before you in our professional duties, and the willingness you have always disylayed to meet our convenience when not incompatible with the efficient administration of justice. Although we feel great pleasure in thinking that the friendly relations which have existed between us may continue under present circumstances, yet we cannot but give expression to our hope that the high qualities of energy, tact, and administrative ability which have distinguished you in the duties of the post you lately held may soon secure to you some certain and more satisfactory position, either in the performance of these duties or otherwise.

Captain Douglas has replied to this address as follows:—

The address you have honoured me with, I have received and beg to acknowledge with sincere and heartfelt thanks. When I suddenly took office in October, 1874, I was an entire stranger to the Bar, ignorant of the laws in force in these Settlements, and unacquainted with the peculiarities in administering them to a large mixed native population, and although I had performed magisterial functions for over twenty years, I confess I undertook the duties of Acting Senior Magistrate with grave anxiety. That, in your opinion, I have been successful, has to a very great extent been due to the unchanging courtesy, consideration, and kindness I have met with from you, and I thank you as equally for the aids you have so freely accorded to me, as for the flattering record you have presented me of my labours. The concluding paragraph in your address is most gratifying to me, and I assure you in whatever service I may be employed, your appreciation and approval of my first official duties in Singapore will stimulate me to further efforts to secure the good opinion of those I may be associated with.

The various reports of tigers roaming about Singapore are now treated almost as yarns only fit for a marine. However, an instance has occurred which places the fact beyond doubt. On the 24th July last, as Mr. G. L. Harrison was surveying for the Public Works Department at Upper Kallang, about six miles from town, he heard the roar of a tiger, but did not see it, although it was only thirty yards off. Mr. Harrison's men all made off, and he himself, not being armed, thought it prudent to do likewise, but showed his pluck by first cutting a piece of turf having the impress of one of the tiger's feet, and then shouldering his theodolite trudged home. The turf is now in the Raffles Museum.

The Singapore Rifle Association have held another competition at the Rifle Range on the Race Course. The competitors were allowed five shots at each range of 200 and 400 yards, members of the Singapore Volunteer Corps and civilians using the Snider, and the military the Henry-Martini. There were about ninety competitors, and fourteen prizes were distributed, of a total value of $25. The first prize, as at the last match, fell to Sub-Lieut. Drennan, of the S. V. C., who fired with the Snider.

The *Gazette* notifies that, from and after August 9, money-orders will be issued in the post-offices of the colony, drawn on the United Kingdom, at the rate of 4s. per dollar, instead of 4s. 2d. as hitherto.

Commercial Report.

(For dates see first page.)

EXPORTS.

TEA.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s Report says:—A fair business has been done here in second crop leaf since date of our last, July 6, prices, quality considered, remaining steady. There are still only three or four houses buying, the Russian houses having scarcely entered the market. Settlements for the week are:—2,433 chests, 4,251 half-chests, and 1,000 boxes at 1s. 4¼d. to 1s. 6⅝d. per lb.; 9,516 chests and 7,432 half-chests at 1s. 1½d. The range of price has been, for Oonfar Tea, Tls. 19 to 24; Soon-yong, Tls. 19½ to 23; Toong-shan, Tls. 21½; Young-low-toong, Tls. 17¼ to 22; Wun-kai, Tls. 18½ to 20; Cheong-sow-kai, Tls. 18¼ to 20¾; Low-yong Tls. 16 to 19.30; Leeling, Tls. 15½ to 18 per picul. At time of writing there is some tendency towards a decline in prices. A good deal of Tea has accumulated on the Shanghai market, and by latest accounts there seemed to be but little demand there. Customs export to date:—

			1874.
Hankow Teas	37,782,304 lbs.	against	32,028,746 lbs.
Re-export Kiukiang Teas	8,798,578 lbs.	„	7,897,409 lbs.
Total ...	46,580,882 lbs.	„	39,926,155 lbs.

SHANGHAI.—*Black:* There had been a considerable business done during the week. Second crop Oopacks had sold from Tls. 21 to 23½, and Ningchows at Tls. 26 to 31. Prices were about Tls. 2 under those ruling at the same time last year, but the quality of the Teas from the Hankow district was so inferior that the purchases could scarcely be called cheap, even at the present favourable rate of exchange. Settlements had been 16,003 chests. Stock 31,100 chests. Prices paid had been:—Oopacks, &c., Tls. 21 to 25½; Hohows and Ningchows, Tls. 16 to 36; Oonams and Oonfas, Tls. 16 to 27. *Green:* The Pingsuey market had been opened at Tls. 31 for two chops good quality; and settlements had since been made at Tls. 22 to 32. Several chops were also reported as shipped off on owners' account. The prices paid were about Tls. 12 under opening rates of last season, but much above latest quotations either in London or New York. Four chops Taiping had been

Digitized by Google

taken at Tls. 26¼ to 27, against Tls. 33 to 34 as opening rates last year. Settlements and Shipments—Pingsueys, 4,362 half-chests, Tls. 22 to 32; Taiping, 1,089 half-chests, Tls. 26¼ to 27; stock, 26,171 half-chests. Total Settlements :—

	1875-1876.		1874-1875.
Black	36,597,120 lbs.	against	36,493,496 lbs.
Green	189,449 „	„	1,097,073 „
	36,786,569		37,590,569

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says :—During the past week a large business has been doing on this market, some 37,000 chests of Congou having found buyers. A fair proportion of this is for the Colonies. Arrivals and settlements during the week are :—Congou : Arrivals, 34,200 chests ; settlements, 37,073 chests. Souchong : Arrivals, 950 chests ; settlements, 4,495 chests. Oolong : Arrivals, 5,100 half-chests ; settlements, 119 half-chests. Flowery Pekoe : Arrivals, nil chests ; settlements, 585 chests. Scented Teas : Arrivals, 8,000 boxes ; settlements, 8,869 boxes. Congou : All desirable parcels of the first crop are now exhausted, and operations have been in the second crop Teas. Those from the Saryune districts are on about a par in quality with last season's, but Teas from most of the other countries do not appear to be as good, whilst about the same scale of prices is ruling. Souchong : A good many parcels have been taken at about former rates. Oolong : Only 119 half-chests have been settled. Flowery Pekoe : A fair business has been done in this description, and owing to the stock being almost exhausted prices show a hardening tendency. Scented Teas have been taken freely at about late quotations. The export to date to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 22,592,106 lbs., against 18,457,230 lbs. ; to the Colonies, 4,386,276 lbs., against 4,489,586 lbs. ; to America, 27,276 lbs., against 154,936 lbs. last year.

TELEGRAMS FROM THE FAR EAST.

THE REPORTED DIFFICULTY WITH CHINA.

SHANGHAI, AUG. 29.—According to intelligence received from Tientsin, Mr. Wade, the British Minister, has decided to prolong his stay there for the present.

SHANGHAI, AUG. 30.—It is reported here that Mr. Wade has presented an ultimatum to the Chinese Government, and that it is not backed by the other foreign ministers.

ATTACK UPON MR. HENDERSON.

SHANGHAI, AUG. 30.—Mr. Henderson, Chief Engineer of the Maritime Customs, the lighthousekeeper, and their Chinese *employés* have been beaten and attacked by villagers at the Shantung Promontory. The assault is alleged to have been instigated by Lee Hoo, a Mandarin whom Mr. Henderson visited.

BURMAH AND CHINA.

(TIMES TELEGRAMS.)

CALCUTTA, SEPT. 1.—A private telegram from Rangoon states that the King of Burmah refused to receive Colonel Duncan. The report is unconfirmed, and the authority doubtful. Colonel Browne returns from Shanghai shortly. It is believed he has not made much progress with the Yunnan inquiry, owing to Chinese obstructiveness.

BERLIN, SEPT. 1.—The Russian *Invalide* says the King of Burmah has declared himself the vassal and *protégé* of the Emperor of China.

CALCUTTA, SEPT. 3.—The Government has heard nothing of the rumoured refusal of the King of Burmah to receive Colonel Duncan. The report is generally discredited.

The Eastern Telegraph Company's traffic receipts for the month of August amounted to £30,005, against £31,265 in the corresponding period of 1874. The traffic receipts of the Eastern Extension, Australasia, and China Telegraph Company (Limited), for the same period, amounted to £20,072, against £19,697 for the corresponding period of 1874.

We believe that the Eastern and Australian Company propose dividing their services into Mail and Commercial, with a view of affording greater facilities to the trade of the Straits and Java. The mail boats will go direct from Singapore to Queensland as at present, but the steamers in the trading service will call at the Java ports, and be able to give ample time for the loading and discharge of cargo there as well as in Singapore.

DEPARTURES.—Sept. 1, from London, for Shanghai, Glenfinlas (str.); from Liverpool, for Rangoon, City of Manchester; Aug. 28, from Genoa, for Rangoon, Reno; Sept. 1, from London, for Batavia, Paul.

SPOKEN.—'Gravenhage, from Antwerp, to Batavia, July 14, 9 N., 26 W.; Gebroeders Smit, from Rotterdam, to Batavia, July 25, 14 N., 27 W.; N.V.L.W., from Cardiff, to Anjer, June 20, 9 N., 26 W.; Glaritera, from Cardiff, to Singapore, Aug. 23, 48.40 N., 9.18 W.; Liverpool, from Liverpool, to Galle, July 24, 12.30 N., 25.30 W.; Agnes Muir, from London, to Shanghai, Aug. 30, 47 N., 8 W.; Belle of Southesk, from London, to Singapore, July 17, 9 N., 26 W.; N.B.C.L., from Rotterdam, to Java, July 1, 22 W.; Tromp, from Bali Island to Amsterdam, Aug. 2, 15.27 N., 29.30 W.

MISCELLANEOUS.—Malta, Sept. 2, passed, from London, for Shanghai, Gordon Castle (str.).; Sept. 2, at Port Said, from Liverpool, for Shanghai, Nestor (str.).

THE ORDER OF ST. MICHAEL AND ST. GEORGE.—The following appointments to the Order of St. Michael and St. George are gazetted:—To be Knights Commanders—Anthony Musgrave, Governor of the colony of South Australia; Rawson William Rawson, C.B., lately Governor of the Windward Islands. To be Companions—Frederick Aloysius Weld, Governor of the colony of Tasmania; Edward Newton, Colonial Secretary for the island of Mauritius; Major William Owen Lanyon, lately Colonial Secretary for the Gold Coast settlement and colony; James Hector, M.D., Director of Geological Surveys and Curator of the Colonial Museum for the colony of New Zealand; Colonel Henry Charles Fletcher, lately Military Secretary to the Governor-General of the Dominion of Canada.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ALLEN—On the 27th Aug., at Balham, the wife of Whitworth Allen, Penang, of a son.

GREIG—On the 25th Aug., at Durrington House, Wilts, the wife of M. W. Greig, of Foochow, of a son.

MARCUS—On the 28th July, at Tulloh Blangah, Singapore, the wife of Walter I. Marcus, of a son.

MITFORD—On the 27th Aug., at East Moulsey, the wife of Robert Sidney Mitford, of a daughter.

NORTHMORE—On the 26th Aug., at Colombo, the wife of John Northmore, Cleve House, Devon, of a daughter.

PEIL—On the 10th July, at Chefoo, the wife of F. Peil, of a daughter.

RUDD—On the 28th Aug., at 2, Elm-grove-road, Exeter, the wife of W. Rudd, of Coldstream Estate, Ceylon, of a daughter.

MARRIAGES.

MCGREGOR—ENDICOTT.—On the 31st Aug., at All Saints' Church, Notting-hill, by the Rev. John Light, M.A., James McGregor, of The Hall, Southend, Kent, to Sarah Ann Endicott, widow of the late James B. Endicott, of Hong Kong.

M'KENZIE—M'WILLIAM.—On the 19th Aug., at the Presbyterian Church, Broughshane, Ireland, by the Rev. A. Robinson, assisted by the Rev. W. C. Robinson, Ballykelly, county Derry, uncles of the bride, Alexander M'Kenzie, of Navabedde Estate, Haputale, Ceylon, to Jessie Jane, only child of the late R. M'William, of Turtory, Aberdeenshire.

THEBAUD—DOUGLAS.—On the 26th July, at St. Andrew's Cathedral, Singapore, by the Ven. Archdeacon Hose, Eugene Thebaud, of New York, U.S.A., to Margaret Meffet, daughter of Alexander Douglas, of Aberdeen.

THORNELOE—PRITCHETT.—On the 21st Aug., at the parish church, Edgbaston, Birmingham, by the Rev. Isaac Spooner, James Thorneloe, of Ladywood, to Maria Mary Pritchett (of Ladywood Registry), eldest daughter of the late John Pritchett, of Colombo.

DEATHS.

ARBUTHNOT—On the 29th Aug., at Coworth Park, Berks, John Alves Arbuthnot, second son of the late Sir William Arbuthnot, Bart., aged 72.

ASSITER—On the 28th Aug., at 20, Kempsford-road, William Assiter, late of H.B.M. Office of Works, China.

BEATTIE—On the 28th Aug., at Duke-street, Portland-place, William Beattie, Assistant Manager of the Chartered Mercantile Bank of India, London, and China, aged 57.

FARQUHAR—On the 27th Aug., at Dale Lodge, Grasmere, Maria, Lady Townshend Farquhar, in her 83rd year.

FRASER—On the 23rd Aug., at Inverness, after four years' illness, John Fraser, formerly Manager of the Borneo Company at Shanghai.

FORSTER—On the 16th Aug., at Twickenham, Staff Commander John Thomas Forster, R.N., aged 60 years, principal emigration officer of the port of London.

LAYARD—In June, at Wagga Wagga, Sydney, Raymond Layard, aged 21, youngest son of the late Capt. Henry Lewis Layard, of Ceylon. Supposed to have been feloniously killed by some person or persons unknown.

LENT—On the 30th Aug., at 60, Maddox-street, W., John Oldershaw Lent.

LINDSAY—On the 16th July, at Shanghai, John Lindsay, aged 46.

MITFORD—On the 2nd Sept., at Morton Hall, Notts, Joseph George Mitford, aged 84, late Captain in the H.E.I.C. Service, and third son of the late Robert Mitford, Esq., of Mitford, Northumberland.

ST. LEGER—On the 30th Aug., at Peckham, Robert St. Leger, formerly of county Limerick, and late of the P. and O.S.N. Company.

WATERMAN—On the 20th July, in the Pegu River, Lilias Jean, wife of Col. E. F. Waterman, 17th Regiment Madras N.I., and daughter of the late Brigadier-Gen. Robert McDowall, of the Madras Army.

Naval and Military.

The Lily, composite sloop, 620 tons, 570 (95) horse power, Commander Basil E. Cochrane, sailed from Plymouth on the 28th ult. for the China station, *viâ* the Cape of Good Hope.

Intelligence of the death of Captain James Graham Goodenough, C.B., C.M.G., has been received, he having died at Santa Cruz from wounds he had received from the poisoned arrows of the natives of the Western Pacific Islands. He was captain of Her Majesty's ship Pearl, 17, to which ship he was appointed May 22, 1873; and on receiving the appointment became commodore and senior officer in Australia. For his gallant services he was made a Companion of the Order of St. Michael and St. George, and a Companion of the Order of the Bath in May, this year. He obtained his commission as lieutenant in 1851; commander 1858; and attained post rank 1863. He obtained a captain's good service pension as recently as the 18th March this year. Captain Goodenough from September, 1856, to August, 1857, was senior lieutenant of the Raleigh, 50, on the East India and China station, and from the latter date until promoted to commander in February, 1858, served again in the Calcutta in China. He continued in the Calcutta as second captain until July, 1859.

According to advices from Hong Kong by this mail Her Majesty's ships of war in harbour there are the Hart, Midge, Modeste, and Ringdove. The Egeria left on a cruise, to fire her quarterly allowance of ammunition, on the 21st July. The Princess Charlotte, so many years the senior officer's ship at this station, is announced to be sold by public tender on the 26th of August. The Martini-Henry rifles for the 80th Regiment have been issued, and the Snider rifles are being returned into store for transmission to England. Lieut. Chamberlain, 80th Regiment, has temporarily been appointed First Adjt., in the place of Lieut. Blake, 1st Battalion 10th Regiment, invalided. H.I.R.M. corvette Bayan arrived at Hong Kong, from Singapore, on the 20th of July. The Austrian corvette Friederich arrived on the 17th, and left for a cruise on the 21st.

The Japanese Government has appointed Serg.-Major Hanson, Royal Artillery, on his retirement from the British Army, to be gunnery instructor at Yokohama.

Notice is given to persons interested therein, that the distribution of the amount awarded to the officers and crew of Her Majesty's ship

Digitized by Google

Basilisk for the capture of the Crishna on the 14th of Jan., 1873, for breach of the Kidnapping Act, will commence on the 31st inst., in the Prize Branch of the Department of the Accountant-General of the Navy and Controller of Navy Pay, Admiralty, New-street, Spring-gardens, S.W. The following are the shares due to an individual in the several classes :—Captain, £114 19s. 10d.; second class, £32 12s. 9d.; third class, £27 19s. 5d.; fourth class, £18 13s.; fifth class, £11 3s. 10d.; sixth class, £9 6s. 6d.; seventh class, £6 10s. 6d.; eighth class, £3 14s. 7d.; ninth class, £1 17s. 3d.

All the vessels on the West African Coast that can be spared are to assembly shortly under Commodore Sir William Hewett, K.C.B., in the River Congo, for the purpose of obtaining satisfaction for the pillage of an English merchant vessel in the earlier part of the year. As hostilities are expected, preparations will be made to shell and burn the villages in the event of the natives fighting.

The death of Major Ward, of the 107th Regiment, who in 1860 accompanied the regiment to China, where he was transferred to the 15th N.I. (now the 25th Pioneers), with which he served throughout the campaign in the north of China, including the Taku Forts and the surrender of Peking, is reported.

Major Snow, who served with distinction in the Baltic, and was with the marine battalion in Japan, will command the guard of honour which accompanies the Prince of Wales to India. Lieutenant Lambert, who served with the Iron Duke in China, has also been appointed to the Serapis.

Colonel Milles, who commanded the 75th Regiment while stationed at Hong Kong, has qualified, through length of service, for retirement. He assumed command of the regiment in 1868.

Sub.-Lieut. A. W. Hill, of the 57th Regiment, is under orders to proceed to Ceylon with the next drafts from the depot to the service companies.

An ancient-looking cannon is now on view at Brighton, the inscription on which shows that it was captured from the Japanese at Simonosaki.

The Lords of the Admiralty have ordered the Octavia, 28, frigate, 3,822 tons, 2,415-horse power, to be broken up at Chatham. The ship was built twenty-five years ago, but has seen little service.

Assistant-Controller C. R. Shervinton goes out to assume charge of the Commissariat arrangements in the China command, after having been for fifteen years connected with the Transport Train.

It is reported that the successor to the late Commodore J. G. Goodenough, in command of the Australian station, will be either Captain M. Culme-Seymour or Captain A. H. Hoskins.

Lieut. T. Davison, of the 15th Hussars (Bengal), has been granted six months' leave of absence, with permission to visit Ceylon.

The 81st Regiment, which served in the last war in China, returning in June, 1863, is about to return home from Gibraltar.

Literature.

The September number of the *Cornhill* contains an interesting paper, entitled "The Building of the Bridge: A Chinese Legend." The bridge referred to is that over the river Min, which is believed to be the longest one in China, and the story gives the mythical account of its construction. At the conclusion of the last chapter we find that its founders agreed to call it "The Bridge of Ten Thousand Ages," because "for ages and ages it will seem to remind people how tender, loving, and pitiful is the Goddess of Pity and Love," in whose honour they had built it as a thank-offering for assistance one of them had received from her in the time of peril. In a prefatory note the writer of the paper, who uses the initials "H.E.W.," remarks that "the value of the tale consists in the insight it affords into the curiously grotesque character of the Chinese imagination, when brought to bear upon objects the origin of which appears too magnificent to have been produced without supernatural agency." Amongst a number of entertaining papers *Chambers's Journal* contains one giving a tolerably full account of "Edible Birds'-nests." As he is not quite accurate in his conversion of piculs into pounds, and for one or two other reasons, we are inclined to look with some suspicion on the statistics furnished by the writer of the article; but, nevertheless, he manages to convey a good deal of information. He mentions a fact which will hardly be good news to those Chinese who consider birds'-nest soup as a valuable stimulant. It seems that Professor Troschel, of Bonn, has made an analysis of the nests, and "he finds that the material does not consist of specially nourishing or stimulating substances, but is quite similar in constitution to any animal saliva." Considering the price he pays for these dainties, this information ought to cause the thrifty and practical Chinaman to reflect on the folly of indulging the absurd taste.

Fifteen months have elapsed since the competitive essays on the subject of *British Opium Policy, and its Results to India and China* were sent in for adjudication, and the names of the prize winners of £200 and £100 have not yet been announced. We have no desire to hurry the decision, but, as Sir Bartle Frere, one of the adjudicators, proceeds to India in the retinue of the Prince of Wales next month, it would be satisfactory to know whether he and his colleagues, Sir Charles Trevelyan and Sir Louis Mallet are likely to make the awards before his departure, or wait until he returns to England some eight months hence. We may be quite sure that Mr. Pease, the munificent donor of the prizes, is ready to hand the amounts over to the successful competitors immediately the decision is given; and, after waiting such a time, it would be only courteous to the numerous essayists that their suspense should no longer be prolonged. In connection with this subject are the transactions of the "Anglo-Oriental Society for the Suppression of the Opium Trade," which apparently have ceased, since the debate on the Opium Question in the House of Commons on the 25th of June. Moreover, the organ of that Society, the *Friend of China*, after giving a report of the debate *in extenso*, last July, has no issue for August, and we understand none will appear until the middle of October. On these points some authoritative statement should appear, explaining the causes of this long delay.

Mr. J. F. Dickson, of the Ceylon Civil Service, has in the press, for the *Journal of the Royal Asiatic Society*, an edition of the "Pâtimokkha," or Confession Service of the Buddhist priests. Mr. Dickson is the first European who was ever present at one of these services, and in his preface he gives a full account of the proceedings.

Mr. W. W. Mundy, who received severe injuries on the Canton river last August, has written a narrative of his residence in China. It contains special chapters on "Piracy" and the "Typhoon of 1874." It is to be called "Canton and the Bogue."

Messrs. Macmillan will publish in October the Life and Career of the late Sir James Brooke, of Borneo.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, SEPT. 1.

We are in the season when every Party has its congress. The warp and woof of all discussion is, as Shakespeare describes it, "Past and to come seem best, things present worst." Our literary men have met at Maastricht. The heads of the middle-class schools are debating about their interests in this town. The lawyers are in congress at Rotterdam, and the members of the *Institut de Droit International* have assembled at the Hague. The papers are filled with reports of the matters with which these Congress members are dealing. The most interesting debates have been those of the "Institute of Ghent." The speeches displayed extraordinary learning, and the reports were most valuable although at the same time terribly abstruse. Learned people from all parts of Europe have met there. Bluntschli, Parieu, Laveley, Rolyn Jacquemins, Dudley Field, Travers Twiss, Marquardsen, and a large number of other well known men. Bluntschli, an eminent man of most agreeable address, delivered the opening speech, Mr. Moncini being absent, whilst the Minister of the Home Department received and welcomed the members. His colleague, the Minister of the Department of Justice, attended the meetings of "the men of the law" in the Maesetown, where more than a hundred were together. The principal question discussed by them was that of the *circonstances atténuantes*. According to the opinion of some, the law should fix a minimum and a maximum of punishment; but there were others who pleaded that the judge may exercise compassion, whilst the majority defended the principle that the law should only fix a maximum of punishment, because there are cases in which even murder deserves less punishment than robbery. The commission charged with the task of drafting a new penal code adhered to the principle of a minimum and a maximum. Some days ago this draft was published; and it is a very voluminous book. It gives much satisfaction that this commission, after having worked for only five years, is ready with its report, although we may have to wait perhaps another five years before it will have become law. So far back as 1829 it was urged in Parliament that the *Code Napoléon* should be replaced by a new system of national law, but nothing has been done. In 1838 we obtained a new national civil code but no corresponding penal code. The latter was only altered in 1854, when Mr. Donker Curtius abolished flogging and branding; and in 1870 another Minister of the Department of Justice, Mr. Lilaar, took the initiative in the abolition of capital punishment; but we were not delivered from a legislation which was and still is a disgrace to the nation. We were never so far as now on the right way, for there is at least a chance that we may see the last of the *Code Napoléon*. We have at any rate the basis of a new system, but, as I have already stated, an enormous distance extends between a draft scheme and its fulfilment. It is not the first time we have had good prospects of a change. On several occasions a Bill has been laid before the Chamber with the same object. In 1862, in '63, in '64, in '65, in '67 this was done, and without result.

The greatest dulness prevails on the Bourse. Though the rate of discount is very, very low, and money most abundant, there is no speculative demand whatever. Our national funds share the prevailing quietude. The quotation of the Dutch-India Trading Bank has advanced 4 per cent., and for the Netherlands-India Railway Company's shares there has been some demand, which has exercised a favourable influence on prices. There are some unfavourable rumours circulating with reference to the Steamship Company Java. I cannot ascertain any confirmatory facts, but so much is without doubt, that the price of the shares has fallen 10 per cent. A lull has also prevailed in transactions in the shares of the Company-Nederland. Some days ago the "Sumatra Tobacco Company" was established here, with a capital of f.200,000. The managers of this company are Messrs. J. M. Kogel at Amsterdam, and A. Herschel Bz. at Sumatra. The object is to plant tobacco in the island, to buy and sell tobacco, and carry out all that belongs to this branch of commerce. Endeavours are being made to establish a steam line between Rotterdam and the Brazils, but the financial panic which now prevails at San Francisco is not favourable to the development of the project. The Netherland India Gas Company announces a dividend of f.22.50 or 9 per cent.

Mr. de Rochemont, adjutant of the ex-Governor-General of Java, is in a sad state of mind. You will remember that he published some time ago a book entitled "Loudon and Atjeh;" Mr. Van de Putte called it in Parliament "an ugly book," and Mr. Fabius added to this qualification that it was a "lie." This is not quite pleasant. The author has now forwarded an address to the Second Chamber filled with lamentations. The book, he states, was written with the intention to throw light on the cause of our unhappy war with Atchin. He was the only man able to do this, and he sacrificed his personal interest, to those of his country. Parliament, however, slighted his work, and the nation therefore took it for granted that no service had been rendered to the nation, but that Mr. de Rochemont had abused his position. This is more than he can possibly bear, and therefore he asks that opportunity may be given him to prove that he was in the right and Messrs. Van de Putte and Fabius in the wrong. It is not quite clear what this gentleman wants. It is not customary here, as in England, to call individuals before the bar of the Chamber. If he had anything to say or to explain, he should have stated it in this address, or in a *brochure*, or at a public meeting.

It needs scarcely to be said that Mr. Heemskerk, the Premier, is much annoyed at the decision of the Second Chamber to discontinue Parliamentary business. If the Ministerial papers give the correct statement of his intentions it is obvious that he means to engage with the Liberals in a last struggle for life or death. It is, however, not the idea of the Whigs to accept the challenge. They, most certainly, would prefer a moderate Conservative Cabinet without Heemskerk, but they would rather put up with him than themselves take the reins of Government. That the Cabinet is placed in a very false position must be admitted, and likewise it must be acknowledged that the Ministers' policy is not the best that could be adopted. The Opposition is master of the field, as was proved again by the decision to discontinue Parliamentary business notwithstanding that a mass of Bills—about thirty in all—was ready for discussion. Important measures are again postponed, *ad Kalendas Græcas*, because the members of Parliament consider that it is too warm to do their duty.

Some days ago *The Times* told a story about recruiting going on for our East India army in Germany, and it was added that complaints had been made on the subject to our Government. The semi-official papers, however, assure us that nothing of this kind has occurred. Our recruiting agents content themselves with Belgian and French volunteers, to whom enormous sums are paid by our Government to form the army corps which is to fight for "our rights" against the Atchinese. The Dutch know too much to be induced to start for the "pepper country," and they prefer to leave the bounties to foreigners. The German papers contain yet another story, viz., that our King would shortly meet the Sovereign of the Belgians at Ostend to discuss the policy of Bismark and the measures to be taken if Germany should make an invasion upon Holland or Belgium. This statement is also a pure invention.

The semi-official paper, the *Dagblad*, has contradicted the statement of Berlin papers that some young Germans have been enrolled in our East India army. The Berlin *Volks-Zeitung*, however, reiterates most positively that such steps had to be taken by the Government of Germany that eleven young men were released from their engagements. "If," this paper says, "the Dutch like to establish themselves in Atchin, in order to make pepper, as they have already done nutmegs, dearer for us, let them bring their own skin to the market where the pepper grows." That these words are not very polite must be acknowledged, but why do not the Government contradict the statement officially?

To-day the new mail service will be inaugurated between Holland and England, *via* Flushing and Sheerness. This will be a great improvement. I shall now be able to post my letters, *via* Ostend, at seven in the morning, or *via* Harwich at two in the afternoon, and *via* Flushing at four o'clock in the afternoon, and in all the three cases the correspondence will arrive in London the following morning by nine o'clock.

Mr. Tegelberg, director of the Steamship Company Nederland, contradicts most positively the assertion published in the *Java Bode* that passengers, and especially sick children, on board of the steamer *Koning der Nederlanden* were ill-treated when a fire broke out recently on board of that vessel. Both the authorities and the inhabitants of Nieuwe Diep, he says, did their duty.

I hear that as soon as the new Second Chamber meets a Bill will be laid before the members to prevent English "floating coffins" replacing the English flag with the Dutch. Such a "Plimsoll Bill" is necessary, as this scandalous act is quite possible under the present law.

The members of the First Chamber met to-day, and Mr. Coenen will to-morrow interpellate the Cabinet about the circular of the Minister of the Home Department regarding the last elections. This document was forwarded only to the Burgomasters in the provinces.

In our butter-making districts some uneasiness prevails, owing to the competition of Denmark, where a quantity of butter is made for England, and for the colonies also. Endeavours are, moreover, being made in that country to imitate our Gouda cheese.

Some days ago a magnificent silver cup was sent to Java. It is a present from the East India army to Mr. Von Bultzingslöwen, who represented the Red Cross during the two military expeditions to Atchin.

The King will return on the 13th inst. from his trip to Switzerland. The Queen will start in a few days for Wurtemburg.

It is asserted that the Minister of the War Department will ask very large credits in his next budget.

Mr. H. Kolff's appointment as Belgian Consul at Batavia has been approved of by the King.

The statue of Mr. Thorbecke will be inaugurated here early in November.

In a few days the members of the First Chamber will re-assemble.

A conference of astronomers is now in session at Leyden.

AMSTERDAM, SEPT. 2.

The members of the First Chamber met yesterday. The principal subject of debate was the circular, signed by the Minister of the Home Department, forbidding burgomasters interfering with Parliamentary elections. Several members blamed this measure. Mr. Heemskerk defended himself on the ground that what he did had been formerly done by Liberal Ministers, and the matter dropped.

The Minister of the Colonial Department has denied in the most positive manner the truth of the stories told by Berlin papers about our having enrolled foreigners in our East India army. The Dutch Government, the Minister said, has not one agent in their service or anyone to encourage recruiting abroad, and no underhand means are used to obtain soldiers. No recruit is accepted if he is not provided with the necessary papers.

The Association *pour la Réforme et la Codification du Droit des Gens* opened its sittings yesterday at the Hague. There were a number of foreigners present, and amongst them many Englishmen. Mr. Dudley Field took the chair. The discussions are conducted in the French language.

PRODUCE MARKETS.

A general quietude has prevailed in our market for Colonial Produce, and the only transactions have been for actual wants for consumption. The auctions have however given satisfactory results.

COFFEE.—The market is firm, but only for some lots out of the last auction has any demand prevailed. The article looks very healthy, second hands being badly provided.

TEA unaltered, and no transactions in first hands. Lower prices must be accepted to make business possible.

RAW SUGAR.—The most important event of the week is the auction which was held by the Trading Company, at which prices varied from f.½ above to f.½ under those of July. A very trifling business has been done for export, whilst our refiners only buy for direct wants. The private transactions include about 3,000 mats.

RICE.—Arrivals from Rangoon and Maulmain have been very extensive. The market is quiet, and no transactions have taken place. Prices, however, are firm.

SPICES.—The Trading Company has sold in auction 664 casks Nutmegs and 165 casks Mace. The result was very satisfactory. Some few lots of Cloves found buyers. Of Pepper 1,000 bales were sold, but the prices did not transpire.

JAVA TOBACCO.—About 4,500 bales of sundry marks were sold by private tender. To-morrow will be offered for sale at Rotterdam 910,000 ps. Manila Segars and 50 bs. China tobacco.

COTTON is rather firmer, but business has been small.

GUM DAMAR.—A lot of 140 chests has changed hands.

JAVA INDIGO.—Very quiet, and holders are obliged to make concessions to make business possible.

BANCA TIN has met with a good demand at f.52, and a higher quotation is now demanded.

HIDES (E.I.).—The imports have been large, and will soon be brought into the market.

ARRACK.—60 cases Cheribon per Mediterranean have changed hands.

SHIPPING.

ARRIVALS.—Aug. 25, at Flushing, from Akyab, Foreningen; 29, at Brouwershaven, from Cheribon, Paul Thorman; 30, at Brouwershaven, from Rangoon, Gratitudine; at Texel, from Bassein, Dovre; at Flushing, from Akyab, Embla; 31, at Hellevoetsluis, from Samarang, Jonge Jan; at Texel, from Batavia, Prinses Amalia (str.); from Rangoon, Gazelle.

DEPARTURES.—Aug. 28, from Maassluis, for Batavia, Cornelis Smit; from Texel, for Padang, Geziena Maria; Sept. 1, from Texel, for Batavia, Noach III.

THE NEWS FROM PEKING.

(MORNING POST.)

It may be that our relations with China will not be interrupted for some time to come, but unquestionably the matter is open to great doubts. The recent news that our Minister in that country had complained of the attitude of the Imperial Government towards him, and intimated that it might be desirable to have troops ready to be despatched to China, proves that there is an element of mischief at work that may be productive of the most serious consequences; and the assembling of ships of war at Chefoo appears to indicate that it may be necessary at an early date to make a show, at all events, of force to the Chinese. We may hope that war will be averted by a diplomacy at once judicious and determined, but we must not be surprised if it does come. It is no sudden appearance of a threatening cloud in a serene sky that we have now to remark on. For some time past there have been signs of a storm brewing in China. The repugnance of the Chinese to foreigners generally—and especially towards ourselves as the most numerous and pushing of all—seems not to have been mitigated by time and contact. Outside people are still "foreign devils" to the Chinese. Nor can it be said that the repeated defeats experienced at our hands have broken the spirit of the Chinese. For the last few years they have been making arrangements and preparations that betokened the existence of an idea that war might be resorted to. The building of forts and war vessels, the casting of cannon, and the drilling of troops somewhat after European fashion, all pointed to a warlike feeling. It seems more than probable that the Chinese have flattered themselves that their reverses were owing to defects and deficiencies in their military system that could be remedied or supplied. They felt the superiority of our methods of making war, and, overcoming their antipathy to new customs, they set to work to copy many of our ways and arrangements. They had seen the marvellous effects of discipline and good leading upon their own troops during the campaign against the rebels, under Gordon; and it was obvious to them that if all their forces were organised and disciplined like those troops they could make a much better fight of it than formerly. We cannot be astonished, therefore, that the Chinese set to work to reorganise their military system, that they established dockyards and arsenals and fortified the points that had proved vulnerable. It may be remembered, too, that not very long ago, when Chinese agents came to England and took away torpedoes for the protection of rivers and harbours

Digitized by Google

in China, it was alleged openly that the Chinese intended when they had made their coasts secure to repudiate their treaty engagements and to endeavour to drive us out of their country. There can be no doubt as to the torpedoes; and the rumour as to their significance may have been but too true. The signs in China have all been pointing in one direction.

(THE HOUR.)

On Sunday there were rumours, which happily turned out to be false, about certain alleged outrages in China. Since then it has been clearly ascertained that the situation is not so serious as has been supposed. The British Minister, Mr. Wade, will not for the present leave Tientsin, a determination which implies either the courage of our representative, or else the absence of an immediate danger. Mr. Wade is so skilled a diplomatist that his remaining at Tientsin will inspire great confidence in the English residents in the Chinese Empire. They will recognise that he is not affected by any foolish panic, and that the alarmists are not at this juncture the safest guides. Nothing encourages Chinese impertinence more than even the very semblance of fear, and nothing reduces them more rapidly to their normal and cowardly level than a little show of resolution. The war party and anti-European clique are strong in the Flowery Land, but a keen eye to the main chance generally convinces a Chinaman that he must confine his hectoring within narrow limits. He can scarcely forget *in toto* that he is no match for Western prowess, and that when the pinch comes a few European gunboats have a way of recalling him to reason. China keeps herself more or less locked out from the world, but from time to time disagreeable experiences of civilised warfare tutor the Chinese into at least a polite acquiescence in the notions and procedure of Western traders and Western soldiers. Whenever vengeance has been wreaked upon China the method has been harsh and summary. Such eloquent military arguments are rarely forgotten. If they are neglected they have a habit of being repeated.

On these grounds we are inclined not to ascribe much importance to the latest manifestations of Chinese enmity at Shanghai: "Mr. D. M. Henderson, the Chief Engineer of the Maritime Customs, the lighthouse keeper, and their Chinese employees," are said to have been "attacked and beaten by villagers at the Shangtung Promontory." A mandarin is believed to be implicated in the outrage. Should these statements be correct we have no doubt that the Chinese delinquents will rue the day in which they provoked the patience of British authorities, which, though great, is not absolutely inexhaustible. The Marines, whose motto is the noble epigram *Per mare, per terram*, are held in readiness for service in the Far East. King William IV. may have been laughed at by many effeminate persons who were indifferent to the virtues of bluff sailors. But the Sailor King could say a wise and witty thing better than many of his critics, and one of his best *mots* was his just eulogy upon the Marines. When he carelessly threw a bottle away and dubbed it, in the naval slang of the period, a "Marine," he explained that a "Marine" meant a fighting man who had done his duty, and would do it again. We do not envy the Chinese mandarins or their luckless understrappers if the blue jackets of Old England and a staunch detachment of the Marine Artillery are commissioned from home to drill the "heathen Chinee" into a respect for the Queen's Ambassador, and those orderly and pacific merchants and officials whom our Imperial flag protects. With Burmah threatened, and the mandarins an object of just suspicion to our Government, there must be something like judicial blindness at the head-quarters of the Chinese Empire, if no apprehension is felt that England will chastise the arrogance of the *literati*, and give the Chinese ample reasons for an abject and permanent repentance.

(DAILY NEWS.)

The Burmese difficulty, complicated as it is and made serious by the state of our relations with China, is in many ways one of the unavoidable results of our position as an Asiatic Empire. We may, indeed, arrange this or that point of controversy. We may be skilful, or patient, or firm enough to avoid a quarrel this year or the next, but the general conditions on which we hold our Empire in the East must, for a long time to come, be a perpetual watchfulness and presence of mind. No one can overlook the fact that the time has come round when, in the ordinary course of things, the Government of China would begin to show that the lessons of the past were fading out of memory. A new generation almost everywhere means renewed self-confidence, or, perhaps we might say, self-conceit. The Chinese character has always been marked by an overweening self-confidence. The curious mixture of profound philosophical study and superficial and childlike guesses at fact which is observed by all who have looked into the history and the mental peculiarities of the Chinese is nowhere more remarkable than in their political actions. The typical Chinese seems like a boy destiued never to grow up, or like an old man who has outgrown any further instruction, according as we happen to look at him. From age to age there is but little advancement, if there be any whatever, upon the policy of grand maxim and small cunning, of philosophical words and puerile devices, which European travellers observed in the statecraft of China centuries ago. At the present moment it seems almost certain that the new generation of Chinese rulers are inclined to tread the round where their predecessors acquired some barren experience. The lessons of the last wars are out of date. The entry into Peking and the burning of the Summer Palace are events which have little or no influence on the policy of to-day. The new leaders are in a condition of mind to accept the belief that China is now strong enough to shake off the incumbrance of the foreigner's presence and dictation. Since the last war she has really improved her position as a fighting nation considerably, and is very likely indeed to believe that the improvement is peculiar to her. She has better weapons and better war-machinery of every kind, and can be persuaded without difficulty that all other peoples have been standing still. Comparison of facts has never been an attribute of the political or other philosophy of China; and such improvement as the country has obtained is calculated rather to plunge her more deeply into difficulties and mistakes than to keep her out of them. There are only too many evidences at present in favour of the suspicion that China is endeavouring to play what she thinks a deep and cunning game by the help of her friend or vassal Burmah. The difficulty for English statesmen looking over the cards, and with their eyes fully open, is probably to decide as to the relative propriety of affecting not to see or of openly accepting a conclusion and acting upon it.

That difficulty is greatly increased by the fact that in China and in Burmah we have also an English public opinion to deal with. In China, that is in those districts which are open to British trading intercourse and to British settlement, we have little clusters of exiled and isolated Englishmen, who naturally look with the utmost anxiety to any menacing clouds that arise over Peking. Our fellow-countrymen in China occupy a position not unlike that of civilised settlers on the borders of a savage people. They cannot help being suspicious, and easily alarmed, and a little resentful. They know that they are dreaded and disliked, and they are naturally apt to dislike and dread in their turn. The Englishmen in China are likely to be peculiarly sensitive as to the honour and dignity of England. They have good reason to be so, for they know very well that any sign of weakness which English Ministers may show in their dealings with the Chinese Government—any policy which, however judicious from our point of view, may be interpreted as weakness out there—is certain to be visited upon the English residents in some form of arrogant interference or restriction. Our correspondent at Rangoon lately mentioned that, so far as Burmah is concerned, even Burmans are surprised that in our former dealings we did not bring a somewhat heavier hand to bear upon the Sovereign, and compel him to give us a clear and recognised position. There are probably a good many Chinese politicians who have lately been indulging in the same kind of wonder as to our dealings with China and who are already persuading themselves that the reason is, one which ought to embolden them to enterprising action. Our countrymen in China, of course, have long had reason to know of the existence of such a feeling, if it does exist. They could not deal with the pettiest Chinese official without finding it out. They form among themselves a kind of English public opinion which cannot but have some influence upon the policy of our Government. Men in such a position are not by any means the safest advisers always. They are prone to exaggeration, they are suspicious sometimes without cause, and are almost always certain to be vehement in their demand for some decisive action. There is a considerable proportion of Englishmen in all our Oriental settlements who bring to the consideration of every question the previous conviction that all Eastern Governments are treacherous and arrogant, and that we can never be too rough and stern in our dealings with them. Unfortunately, there is seldom wanting evidence enough to sustain such a view, or at least to give the argument sufficient plausibility to entitle it to a hearing. We cannot in this country refuse to pay attention to the representations even of the least considerate of our countrymen in China. They would have to share in all the worst of the consequences which a false step on our part might bring about. They are living on the side of the volcano, and ought to be the first to know when the smoke is to be dreaded. As a matter of sympathy and as a matter of judgment we are compelled to give every attention to their words of warning.

But this is a difficulty for the statesman. It is hard to say when the fears and distrusts of our countrymen are exaggerated and when they are well-founded. It is dangerous to act; it may be infinitely more dangerous to delay. There are two great conflicting tendencies always operating on the same ground—the tendency of the Chinese population to seize on every opportunity to annoy the foreigner, and that of the foreigners to believe that their interests are in danger from treachery. If China were a State of smaller size, it is easy to see how all this must end. No matter how peaceful might be the disposition of our statesmen, no matter how sincere might be their original resolve not to annex new territory, the new territory would be annexed at last. The opposing interests and opposing suspicions would some time or other compel an English Minister to choose between his own people and the other. The decision would become imperative. He would have to see the Chinese prevail over our system or he must make our system prevail over the Chinese. When that crisis came about, as it would come about, the result would be all the same whether a Dalhousie or the President of the Peace Association were at the head of affairs in this country. But in China this is out of the question. We have here to consider the case of a country which cannot be annexed. There are, indeed, many who already believe in a sort of manifest destiny directing that English influence shall one day spread itself over the whole of China. There are kindly strangers who already point to China as our India of the future, and who recommend that we should make up our minds to compromise with Russia's imaginary destiny in India by accepting a similar ordination for ourselves in the farther East. These, however, are dreams with which no practical politician is at present likely to give himself much concern. We have not the faintest intention of recognising any destiny but our own as regards India, and just as little notion of extending our Empire over China. The statesman now when he thinks of our Chinese difficulties knows that they cannot be settled by annexation. Nor can they be disposed of by any policy of retirement on our part. The footing which we have got in China we intend to keep; but we are only too well pleased to be able to keep it without extension of territory. There is, therefore, no short way with our Chinese complications. We must make up our minds that embarrassments will arise again and again. Until China gets civilised enough to reckon with facts instead of calculating by axioms, and opens her eyes widely enough to see that Western influence must come in, we shall probably have fresh occasion for uneasiness and anxiety in every generation. At the present moment it would be idle to affect a sense of perfect security. The danger may pass away; the difficulties may be removed; the deliberate treachery which is suspected may not exist. But no one would feel surprised if a real crisis proved to be close at hand. Nor could any one doubt that if such be the case the most difficult question for our statesmen to decide will be, whether a policy of boldness or a policy of caution is the truer wisdom.

"THE PENANG ASSOCIATION."

IT must be very gratifying to all who take an interest in the affairs of the Straits Settlements to find in the *Penang Gazette* accounts of what seems to be a genuine movement among the Penang merchants of all nationalities to get the interests of their own Colony, and of Province Wellesley close by, better looked after by the Straits Government. The present state of affairs is so well known to most of our readers that it seems almost surplusage on our part to remind them of the disadvantages against which Penang and Province Wellesley have in late years been forced to contend. As to the latter place, though territorially the largest of the districts which make up "the Settlements," in spite of its ever-increasing and mixed population, and in spite of the rich sugar-plantation and tapioca estates which it has to show, it is not represented in any way on any public body; while even Penang—since Mr. BUNN'S decease many months ago—has still been left with a member to take care of her interests in the Legislative Council at Singapore. In former times, before the transfer from the India-office control took place, the Resident Councillor at Penang was a genuinely responsible official, possessing power to decide and act authoritatively in all purely local affairs. Now, we have changed all this; Penang was in those days much smaller and less important than it is at present, yet under the new system every question, even of the most trivial nature, has to be transmitted to Singapore, 400 miles away, to be there considered and dealt with in such manner as shall seem most fitting in the eyes of those who are either too far off to understand properly the local needs of Penang, or perhaps may have interests of their own opposed to those of the sister-dependency. It is not for want of efforts that this grievance has not long since been remedied. Application was made some years back to the Colonial-office, in the hope that a Lieutenant-Governor clothed with suitable and independent powers for purposes purely local might be sent to Penang. The Colonial Minister did not see his way to granting this request; the fact is, that on a map of Asia the distance between Penang and Singapore looks exceedingly small, and while the Home Authorities are far from grasping the diversity of interests and requirements dividing Penang from Singapore, they must also have been reluctant to hazard any division of authority in a colony but newly formed. From some such considerations as these it came to pass that there has been no strengthening of the hands of local government in Penang, and her merchants consequently describe themselves with truth as "without a pilot to guide their "course, drifting anywhere and everywhere, tossed about "by the opinions of many who know almost nothing of "the present capacity, and possibly care still less for the "future of a colony," which—in proportion to its size—promises to become one of the richest in the Far East. It will be recollected how, to save a trifling subvention, the Home Government, a few years back, positively agreed that the P. and O. steamers should cease calling at Penang. This example shows us how little is really understood at home of the wants, value, and tendencies of the Penang trade; and that the Singapore administration, though better informed, is at least equally indifferent is proved by the neglect with which many improvement schemes of great moment to the Penang community have hitherto been treated. Among these are the lighthouse question, the erection of a town-hall and of bridges in Province Wellesley, for all of which Ordinances have passed through Council, but which still remain in abeyance. "The Penang Association," which was instituted by the principal merchants and traders resident at that port some two months ago, is precisely the sort of body required to stir public opinion on the spot and to secure more diligence, interest, and attention to local requirements than has hitherto obtained among the officials who control the destinies of the colony. The first meeting was held on June 23rd, and regret was expressed that none of the officers of the Colonial Government took part in it; indeed, one speaker complained at some length of the wide breach which, even in a small community like Penang, separates the official from the mercantile and planting classes. Undeniably such a division exists—whether it is injurious or otherwise, generally, we will not now discuss—but so far at any rate as concerns "the Penang Association," we believe they will best discharge their functions by keeping clear of all official patronage, official interference, or official "management." They are, so to speak, "the Opposition," and may, perhaps, have many a fight with those at the head of affairs before their career is run. The Association must rely for its support on public opinion, and that public opinion is best secured by independence, activity, and instructed familiarity with all the bearings of each important local question.

KASHGAR.

JUDGING from the tenor of several telegrams which have been received during the past few days from St. Petersburg, Odessa, and Tashkend, the plot would seem to be fast thickening around the Ameer of KASHGAR, and the time cannot be far distant when his fortune will be made or marred. On the east we hear that he is capturing Chinese towns one after another, without resistance on the part of the inhabitants. The only Chinese troops anywhere near him are presumably on the north side of the Tien Shan, and have evidently not been able to arrest his onward course. The force despatched from China as far back as three years ago, with the avowed object of crushing him, has not yet reached its destination, having been obliged, we are told, to stop on its way to build quarters, sow grain, and wait for the harvest, in order that it might have the means of subsistence. With regard to the troops sent since, and for whose equipment and maintenance the recent Chinese loans were to provide the means, absolutely nothing has been heard of their whereabouts. On the east, then, YAKOOB KHAN has matters pretty much his own way for the time being, but meanwhile a threatening cloud has been rising on the west, the ultimate effect of which will probably be to make the Ameer decide once for all whether he will throw himself into the arms of Russia, and, being content to have his kingdom practically merged in that mighty Empire, by that means settle for ever the question now at issue between himself and the Peking Government. Our readers are aware that for some time past an insurrectionary movement has been gradually making head in the Khanate of Khokand, which lies between Kashgar and that portion of Russian territory of which Tashkend is the chief town. As this insurrection appeared to threaten Russian interests, and might possibly extend to her own possessions in Central Asia, Russia has actively intervened in the matter, and has seemingly resolved upon the suppression of the insurrection. Now an unpleasant rumour has got abroad, and gained some credence in the Khanates, that the rising we refer to has been secretly aided and abetted from Kashgar, and this, of course, has naturally led the Ameer to fear that the Russian officials in his neighbourhood will not forward favourable accounts to St. Petersburg of his disposition towards Russia. With the view, doubtless, of doing away with the effect of this rumour, and of smoothing matters generally, YAKOOB KHAN has despatched an envoy to St. Petersburg in all haste, who, we hear, arrived at Odessa on Aug. 25, and was to proceed without delay to Moscow, *en*

Digitized by Google

route for the capital. What further negotiations the Ameer's representative may be empowered to initiate it would, perhaps, be rash to hazard a guess; but if, as seems not beyond the range of possibility, the question of a Russian protectorate over Kashgar should be privately arranged, the effect of the mission will be visible before long in the attitude of Russia towards China.

THE CHINA TRADE.—III.

PASSING to a consideration of the present state of the China trade, we find it gives evidence of two main characteristics, both the natural results of the circumstances connected with it already detailed. The import and export trade has of late years increased greatly in magnitude, but has diminished in profitableness; and such local trade as has been possible, under the restrictions existing, has been inflated to a degree which is now bringing about a very serious reaction. Upon the first point it is superfluous to enlarge, as it is the subject of universal complaint among all those who are engaged in the China trade, or are in any way connected with it. The trade has become so much established, such large sums have been sunk in houses to carry it on, and in all other appliances connected with it, that people must continue their operations perforce, even though the chances of any profitable results become year by year more distant. Some few, but unfortunately too few, have retired in time from a losing game, but many are compelled to go on in a business which they well know to be overdone, and which cannot be profitable again until some great change be brought about in the footing upon which it is conducted. The Chinese are able to look on, with a complacency which our merchants may well envy, upon the redundant supplies of Manchester goods which are brought out by every steamer which arrives *via* Suez; and are equally satisfied, no doubt, at the large amount of funds which are sent out to the banks, and which must find investment either in Tea or Silk, or be returned; and, while we are competing to the smallest fraction the one against the other, are able to bide their time, confident that they have only to wait patiently in order to be able to deal with us upon their own terms. Such has been the pass to which the limited nature of the outlets for trade in China have of necessity conduced; and in the traffic conducted by foreigners in China itself, which may be designated as local trade, we find precisely the same elements at work. The prices of stock, of docks, banks, wharves, and other local enterprises have been dealt in at far beyond their legitimate value, and a marked reaction is now setting in and causing serious anxiety to holders. Speculation and time bargains have forced up every kind of security, and at last even this small outlet as an alternative against the overdone import and export trade is found to be delusive, and people are dolefully comparing the prices of stocks with what they were in former years. In the *North China Herald*, to hand by a recent mail, is an interesting statement showing the fluctuation in shares in the Shanghai market between July 1873 and the present time. This table shows a depreciation in the value of stocks to the extent of about five millions of taels; and in commenting upon the fact, the paper above-named attributes the falling off to the direct influence of general slackness in trade; but in this we think an error is made, as, although the limited opening for furthering trade in the country has been in one sense the prime cause of the falling off in the price of shares in China, the speculation, which, for want of legitimate outlets locally for capital, originally inflated the prices, is the immediate cause of the unfavourable comparison between present prices and those existing two years ago. Speculative and gambling operations are sure to be fostered by a state of things which shuts up the avenues of legitimate enterprise, and this has for years past been notoriously the bane of all local operations in China. To a limited extent such enterprises have afforded an outlet for redundant capital, but their sphere has been too limited to fulfil this function, and they have naturally become tainted with the same over-competition, which, by making the ordinary import and export trade unprofitable, originally caused people to seek an outlet for capital in them. Thus in all directions we find ourselves driven back to one point for the cause of the present depression in the China trade, namely, the degree to which it is limited in China itself, and the old restrictiveness on the part of the Chinese, which almost entirely excludes foreign capital from local investments. Were it possible, as in other countries, to make investments in roads, canals, docks, mines, and other such enterprises, redundant capital would find an outlet and would not be forced to seek investment in a few limited articles of trade, or be a loss to the banks and the merchants. It was only in the nature of a trade thus deprived of the natural element of expansiveness to become completely overdone; and, as there is no chance of competition ceasing, we can look for an improvement only in the removal of the restrictions which have so long hampered the progress of foreign enterprise.

AN extraordinary telegram appears in *The Times* of Thursday, to the effect, namely, that a Russian paper asserts that Burmah has declared herself the vassal and under the protection of China. The Russians are usually so well informed as to what is going on in these countries that it would be reasonable to suppose that the statement has at all events some foundation, though it is possible that the facts do not go so far as would appear from the form in which they are put. If, however, at the present juncture China has in any way offered to *protect* Burmah and the latter country accepted the offer, the circumstance is very significant of the degree to which British *prestige* has fallen in both countries, and the continued arrogance and assumption of China in offering her protection to Burmah, when she has for years past had enough to do to protect herself. If the news is true, there can be little doubt that the protection is designed against Great Britain, and it is time that that nation were moving, when China takes upon herself to intervene in respect to her action towards another country. Coupled with the telegram to the effect that Colonel BROWNE has been able to do little or nothing towards investigating the MARGARY affair in Yunnan, the statement is of much significance.

CUSTOMS' REPORT ON THE TRADE OF CHINA.

The *Customs' Gazette* for the quarter ending March, 1875, supplies the following statistics of the trade at the various ports as compared with the corresponding period in 1874:—

NEWCHWANG.—The tonnage entered has increased considerably, being 8,613, against 1,935 for the same quarter last year; cleared the figures are 3,302. The imports of cotton goods, metals, and native sundries nearly all show an increase; the exports are also higher. The revenue figures are Tls. 10,389.968.

TIENTSIN.—The tonnage figures entered and cleared are higher than in 1874. The imports of cotton goods have increased; metals are much lower than last year; native sundries have somewhat increased; the exports have gone up to some extent. The revenue is less, being Tls. 44,613.0.3.9, against Tls. 45,530.7.3.6.

CHEFOO.—The tonnage figures, both entered and cleared, have largely increased; the imports of cotton goods are in advance of last year; metals are also higher, while native sundries show a slight decrease; the exports are less. The revenue shows a large increase, the figures being Tls. 86,130.7.0.4, against Tls. 78,052.9.2.2 in 1874.

HANKOW.—The tonnage figures both entered and cleared have decreased; the imports of cotton goods and metals are also lower, native sundries have steadily increased; the exports are higher. The revenue figures are Tls. 101,315.3.0.9, against Tls. 85,364.5.1.1 for the same period last year.

KIUKIANG.—The tonnage figures both entered and cleared are lower than in 1874; the imports of cotton goods and native sundries show a considerable increase, while metals have decreased; the exports are in advance. The revenue is Tls. 27,902.2.2.6, against Tls. 18,480.6.0.4.

CHINKIANG.—The tonnage both entered and cleared is less than in 1874; the imports of cotton goods, metals and native sundries are all in advance; the exports are not so high; the revenue figures have increased, being Tls. 24,883.4.7.0, against Tls. 18,561.6.5.7. in 1874.

SHANGHAI.—The tonnage figures both entered and cleared are higher; the imports of cotton goods are lower; metals and native sundries both being in advance; the exports have slightly increased. The revenue has also increased, being Tls. 763,460.2.9.5, against Tls. 656,482.2.3.8 for the same quarter last year.

NINGPO.—The tonnage figures entered and cleared are less. The imports of cotton goods and native sundries are higher; metals show a slight decrease. The exports are much in advance. The revenue has somewhat increased, the figures being Tls. 128,774.4.1.3, against Tls. 101,435.3.0.3.

Digitized by Google

FOOCHOW.—The tonnage entered is higher, cleared lower. The imports of cotton goods and metals are in advance, while native sundries have decreased. The exports are also less. The revenue is below that of 1874, the figures being Tls. 142.887.2.5.0, against Tls. 161,348.9.4.5.

TAMSUI (FORMOSA).—The tonnage figures both entered and cleared show a large increase. The imports of cotton goods, metals and native sundries are all in advance of last year. The exports are also much higher. The revenue has increased, being Tls. 17,264.6.6.9, against Tls. 15,545.1.5.6 for the same quarter in 1874.

TAKOW (FORMOSA).—The tonnage entered is about equal, cleared having decreased, the figures showing 15,699, against 17,918. The imports of cotton goods and native sundries are much higher. The exports have decreased considerably. The revenue figures are Tls. 48,156.4.3.0, against Tls. 51,549.7.1.8.

AMOY.—The tonnage entered and cleared is higher. The imports of cotton goods, metals, and native sundries are in advance. The exports are less. The revenue has somewhat increased. The figures are Tls. 97,216.1.6.3, against Tls. 87,831.2.3.4.

SWATOW.—The tonnage both entered and cleared has increased. The imports of cotton goods show an increase, while metals and native sundries are both lower. The exports are in advance. The revenue is also higher; the figures are Tls. 151,524.2.8.5 against Tls. 146,876.3.0.1.

CANTON.—The tonnage entered and cleared is more than in the same quarter last year. The imports of cotton goods and native sundries are in advance, while metals have slightly decreased. The exports are lower; the revenue figures show an increase, being Tls. 181,247.2.3.5, against Tls. 157,091.5.7.2.

CHATHAM DOCKYARD.

Chatham Dockyard is fast becoming the most important yard in the kingdom, and is worthy of a visit from those who are interested in the construction of our new ships of war; some splendid specimens are to be seen in course of building there. Its interesting old buildings are worth seeing, many of them having been erected in 1604. We like to see new brooms sweep clean, and it is observable on all sides in a cursory walk through the establishment. Captain Fellowes has put the yard through a straightening process, and a place for everything and everything in its place has been organised, even to rubbish bins. Old kentledge has been utilised for bricks to keep something in its place, a piece of a pier which interfered with the navigation of the river has been chopped off and utilised at another part of the dockyard to connect the old floating battery *Thunderer*, which is a great acquisition as a hulk. This new landing was of great service at the launch of the *Alexandra*, when some 200,000 visitors were accommodatde without an accident, a remarkable feat, highly creditable to all the officers of the dockyard.

Amongst the discoveries made in an overhaul of the old stores, &c., was a flag of the time of Oliver Cromwell and an elaborately-carved wooden chest, taken from a Spanish vessel. These relics are now in the hall of the Superintendent's house. The large brass gun taken at the Bogue forts by Admiral Seymour and brought home in the *Nankin*, has been mounted, and is an ornament to the entrance of the yard. Passing down on the left side is the ropery, the lead-mills, paint-mills, rigging-loft, and great store house, about 1,500 feet in length. Lead is here manufactured for all the home and foreign yards —the ropery assisting Devonport to do the same; then you come to Nos. 1 and 2 building sheds—the slips are now converted into huge iron stores, to accommodate the quantities of iron coming into the yard from contractors, and all that manufactured in the yard. Next is No. 1 dock, which is now converted into a smithery—with two bending presses—for heavy armour plates, which are constantly in use, bending the armour plates for the *Alexandra* and *Temeraire*.

No 2 dock is occupied by the *Temeraire*, an ironclad frigate of 5,335 tons, 1,000-horse power, eight guns, twelve inches of armour. This vessel will be one of the most powerful war ships afloat; her armament consists of four 25-ton guns and four 18-ton guns, two of the 25-ton guns being mounted on barbette towers, one aft and one forward, having almost an all-round fire; the bow fire is from three 25-ton guns, stern fire from one 25-ton gun, and broadside fire from three 25-ton guns and two 18-ton guns; she is only 285 feet long, and fitted with twin screws, making her one of the most handy ironclads afloat; her ram, which is eight feet long, is made to ship and unship, and is of a most formidable description. No. 3 dock has a small vessel in it under repair; and No. 4 dock has the *Fawn*, rebuilding and refitting for surveying service on the China station; she is being fitted with a poop and every modern appliance which can be suggested. No. 3 slip is occupied by the *Cormorant*, screw sloop composite, building. No 4 slip is occupied by the *Garnet*, screw composite corvette, building. No. 5 slip is occupied by the *Euryalus*, iron frigate sheathed with wood. No. 6 slip is at present used in preparation of material for the *Euryalus* and another large ironclad about to be laid down on No. 7 slip; this new vessel is to be a sea-going monitor, covered with 18 inches of armour, and to mount four 40-ton guns.

Opposite to the building slips are the manufacturing shop and metal mills, where iron is being bloomed all day and all night long, the mills rolling copper, Muntz metal, and iron all day long; all is activity and bustle in the old yard, and a little further down not less so in the new yard, where are the great basins and new docks, one of the most splendid works in the world. The four docks are each first-class, and the two basins already complete contain upwards of forty acres of basin accommodation; the third, which is now in progress, will, when completed, give Chatham a total accommodation of upwards of seventy acres. No. 5 dock is occupied by two paddle-wheel steamers and a caisson. No. 6 dock is unoccupied at present. No. 7 dock has that noble specimen of an ironclad, the *Alexandra*, in it, which vessel is fast completing for commission; th plates are being put in place as fast as possible, the engines and masts are in, and the rigging is in progress; the account of the ship was given at the time of launch, and with her two separate engines of 700-horse power she is expected to have great speed. No. 8 dock has the *Phæton* and *Royalist* in process of being broken up. This yard is now becoming of great importance; there is a good factory at work, and in a very short time the boiler-shed, now in course of erection by convicts, will be ready for use.

There are nearly 4,000 men at work in the constructive, engineering, and manufacturing departments, 1,200 convicts, 400 in the works department, and about 400 in the steam reserve, making a total of 6,000 in this great establishment, which covers an acreage of nearly 540 acres of land and water, or 250 acres more than Portsmouth Dockyard. Amongst the objects of interest in the factory basin are the *Pembroke*, steam reserve guard ship, with her factory ship astern of her, and the *Atlas* and *Conqueror* ahead of her, the former used as an office for the engineers, the latter as a workshop for the artificers of the reserve. A little further on we find the *Enterprise*, Mr. E. J. Reed's first production of an ironclad, and by her side the *Resolute*, Arctic ship, which was returned to this country by the Americans on her freeing herself from the ice, where she had been abandoned some years before. These two vessels lie side by side as equally interesting specimens of naval architecture of the past ages. There are also two large caissons belonging to the Bermuda Dock, but of obsolete construction.

In a few months the lines of the London, Chatham, and Dover Railway will be brought into the yard, and will vastly increase its capabilities, as well as effect a large saving in the transit of material of the vessels now building and completing.

Monetary and Commercial.

The tenders for £700,000 in bills on India were received on the 1st inst. at the Bank of England. The amounts allotted were:—To Calcutta, £482,700; Bombay, £203,600; Madras, £13,700. Tenders on all Presidencies at 1s. 9 11-6d. will receive about 7 per cent., above, in full. There is consequently a slight diminution in the demand for means of remittance to the East.

The directors of the San Paulo (Brazilian) Railway Company (Limited) have resolved to pay a dividend on the share capital of the company, for the half-year ended June 30th last, at the rate of 12 per cent. per annum, which with the dividend paid in April, makes 9½ per cent. for the year, carrying forward £18,383 to the reserve fund.

The directors of the Anglo-Foreign Banking Company (Limited) have declared an interim dividend at the rate of 5 per cent. per annum, payable on the 6th of September.

At the half-yearly meeting of the General Steam Navigation Company the report was adopted. The accounts showed an increase in the gross receipts and a decrease in the expenditure, and the directors recommended that a dividend of 15s. per share, being equal to 10 per cent. per annum upon the original shares, should be declared, free of income-tax.

The directors of the Credit Foncier of England (Limited) have made a call of £2 10s. per share, the balance not yet called up, on the 100,000 new shares of £5 each, £1 being payable on the 14th inst., and the remaining £1 10s. on the 14th Oct. next. Accompanying the notice is an explanatory circular to the effect that the directors feel themselves compelled in the present state of public credit to take this step "in order to carry on the business of the company without being so dependent upon outside assistance as they have hitherto been." *The Times* remarks:—"The question will naturally be asked, What is the business which the directors wish to carry on? Before paying the call we think the shareholders would do well to appoint a committee of investigation."

The directors of the Mercantile Bank of the River Plate have determined, in consequence of the unsettled state of affairs in that region, to carry the whole of the profits for the half year ending 30th June last to suspense account, instead of declaring the usual interim dividend.

Consequent on the absence of remittances, Messrs. Henry Druitt and Co., South American and West India merchants, of Fenchurch-street, have stopped payment. Their liabilities

Digitized by Google

amount to £70,000 or £80,000, but a favourable liquidation is expected. The firm was established in 1859.

The failure is announced of Messrs. Caldwell and Watson, East India merchants, 17, Laurence Pountney-lane, with liabilities estimated at about £70,000 and assets at £40,000.

At the Court of Bankruptcy a first meeting has been held under the failure of Charles Shand, Alexander Shand, and Ralph Abram Robinson, of London, Liverpool, Madras, and Colombo, merchants, trading as Shand and Co. and C. Shand and Co. The debtors had presented a petition for liquidation, but the proceedings became abortive, and adjudication was made on the petition of the London and County Bank. The statement of affairs disclosed a joint liability to unsecured creditors amounting to £341,980, and assets £38,368. Proofs to the amount of about £270,000 were admitted, without any contest arising upon them, and the proceedings resulted in the appointment of Mr. Bishop (Turquand and Co.) as trustee, together with a committee of inspection. The bankrupts had incurred large liabilities in connection with Collie and Co.

The Court of Bankruptcy has authorised the registration of the resolutions passed at the recent meetings of the creditors of Robert Benson and Co., in favour of liquidation by arrangement, Mr. Edwin Waterhouse, accountant, being appointed trustee under inspection. The Court has permitted a similar arrangement to be carried out in the case of Messrs. Henry and Augustus Ranking, trading as John Ranking and Co.

Another meeting has been held of the creditors of Messrs. Da Costa, Raalte, and Co., when it was agreed to liquidate the estate by arrangement, Mr. Turquand being appointed trustee with a committee of inspection.

In the notice of the meeting of creditors of Messrs. Edmund Jones and Co., which appeared in our last and in *The Times*, it appears that the cash balance named, £1 13s. 8d., was the petty cash, the balance at the bankers being £769. The creditors were satisfied with the statement put before them at the meeting, the whole trouble being attributable to the dishonesty of Collie and Co.

Messrs. J. C. im Thurn, and Co., of East India Avenue, announce that they have re-established themselves under the firm of J. C. im Thurn and Sons. The partners are Mr. J. C. im Thurn, Mr. J. C. im Thurn, jun., and Mr. F. C. im Thurn.

The quantity of tea delivered from the bonded warehouses in London during the week ended the 28th ult. was 4,012,009 lb., of which 2,059,934 lb. was for home consumption, 1,023,109 lb. was exported, 848,160 lb. was removed coastwise, 74,880 lb. was sent coastwise for export, and 5,926 lb. was for ships' stores. The duty received amounted to £51,498, against £51,947 in the previous week, or nearly 1 per cent. less.

There is a peculiarity in the tea trade brought out in the report of the Commissioners of Customs which deserves notice. All the tea that is imported into the United Kingdom is brought to the Port of London. In 1874 we imported 162,782,110 lbs., and of this 162,404,564 lbs. came to London. This convergence of the tea trade upon London is comparatively modern. Ten years ago 3,700,000 lbs. were imported into Liverpool, the total importation being then 121,000,000 lbs. The duty is not all paid in London because the tea is brought to this port. More than 31,000,000 lbs. were last year re-exported without paying duty at all, and 36,000,000 lbs. were removed under bond to other ports of the Kingdom, from which they were cleared by grocers and teadealers. The fact that all the tea that comes to England is brought to London is a proof that there is some advantage in this concentration of the trade, but the completeness of the concentration is most remarkable, especially when it is found that about 2,600,000 lbs. were landed in London and sent immediately by railway from London to Liverpool for export to America without levying of duty.

The Committee of the Glasgow Stock Exchange have taken a step long desired, but which the Committee of the London Stock Exchange have hitherto avoided—they have formally expressed disapproval of the dealings in prospective dividends of railway companies, and have refused to recognise such transactions, or to allow them to take place during the business meetings of the association. A wish has frequently been expressed that these dealings might be deprived of official sanction in London, and since the Stock Exchange Committee are now understood to have determined on taking very high ground as guardians of public morality they cannot do better than follow the example set in a quarter where speculation has not hitherto been regarded with much disfavour.

We have to announce the death, at the age of seventy-three, of Mr. John Alves Arbuthnot, the highly respected senior partner in the firm of Messrs. Arbuthnot, Latham, and Co. The death is also announced of Mr. William Beattie, the assistant manager of the Chartered Mercantile Bank of India, London, and China.

Bar silver is firmer in tone, and we quote the price, 56¾d. per oz. standard, at which rate there are buyers for the Continent. No Mexican dollars have been placed this week The market has a firm appearance.

ARTICLES OF IMPORT.

With few important exceptions the Produce Markets have been devoid of animation, and the total amount of business has been rather below the average at this season of the year. Tea shows some improvement. Silk continues dull. Sugar has been quiet, and prices are easier. Coffee has been in strong demand, at a further advance. Rice has been quiet. Sago and Tapioca steady. Pepper slightly lower. White ditto firm. The periodical auctions of Cinnamon went off slowly at lower rates for good, but higher for common sorts. Cloves quieter. Cassia dull. Nutmegs firm. Hemp dull of sale. Cutch and Gambier firm, with limited sales. East India Hides firm. Shells flat. Tin has been in good request, and prices at the close are higher.

TEA.

Messrs. Goddard and Co.'s Circular says:—A cessation of arrivals has tended to stregthen the market for the black leaf grades of Congou, of the good medium and on fine qualities; also fine and finest have been taken at previous rates; the common sorts of New Season's show a heavy drop at auction, and privately are very unsaleable; the trade supply themselves with old season's Tea at 10d. to 11d., worth in the early part of the year 1s. 2d. to 1s. 3d. Kaisows have been in rather better demand, from 1s. 1d. upwards, but without change in value; the lower qualities are cheaper. In Green Teas no change. In the public sales 12,781 packages were offered without reserve. New Season's Congous were in fair demand, and obtained from 11¾d. to 1s. 5d. for Kaisow; 1s. 1½d. to 1s. 1¾d. for black-leaf. 2,886 boxes Foochow scented Orange Pekoe sold at 1s. 6½d. to 1s. 8d. A few Moyune Greens were sold without change. Indian Sorts.—About 5,700 packages have been offered during the week, and the sales have passed fairly, nearly all being disposed of at about previous quotations. Pekoes sold from 2s. 0½d. to 3s. 4d.; broken Pekoe, 1s. 9¼d. to 3s. 2d.; Pekoe Souchong, 1s. 6⅜d. to 2s. 6¾d.; Souchong, 1s. 6⅜d. to 2s. 3½d.

Messrs. Capel and Co.'s Circular states that the tone of the market has become rather firmer, the arrivals have been on a more moderate scale, whilst importers generally have given support to the market. The amount of business has been moderate, and prices show but little if any change. *Congous.*—Red-leaf kinds: Siftings have sold at public sale from 8d. to 10d. per lb., being again rather lower. Old season's common kinds sell at 9d. to 10d. per lb., showing no alteration. Fair Kaisow kinds from 1s. to 1s. 1½d. went slightly easier at public sale; fair to good medium from 1s. 2d. to 1s. 5d. have been in request at fully previous rates; good to fine remain steady; in finest there has not been much doing. Pak Lin kinds have been rather more in demand, especially the finer kinds. Black-leaf kinds: Old imports show no improvement in price. In new common kinds have sold from 10¾d. to 11½d., being 1d. per lb. decline; fair have been sold from 1s. to 1s. 2d. per lb.; fair to good medium have been inquired for at fully previous rates; good to fine have been saleable from 1s. 6d. to 1s. 10d., and finest have been occasionally sold at full prices. New-make kinds: Common have sold from 9½d. to 10d. per lb., being about previous prices, quality considered. Fair are saleable at 10½d. to 11½d. per lb., good 1s. to 1s. 4d., showing no change. Oolongs are difficult of sale privately; a few at public sale have sold from 10⅜d. to 11¾d. per lb. for common and 1s. 1d. to 1s. 5⅜d. per lb. for fair to good kinds. In Souchongs the few sales made have been at previous rates. Scented Teas: Canton Capers have at length shown a slight improvement both in demand and price, there having been less disposition shown to press sales. The recovery in price is about ½d. to 1d. per lb. for common to fair kinds, good to fine continue saleable at previous prices. In Orange Pekoes there is no material alteration to notice. Foochow kinds of Caper remain as before. Orange Pekoes: About 3,000 boxes good to fine sold at public sale from 1s. 6½d. to 1s. 8d. per lb., being again easier. A few sales have also been made privately at a similar decline. Green Teas: The public auctions still go off without spirit, and prices remain much as before. 400 half-chests Hyson sold at the low prices of from 1s. 0¼d. to 1s. 9d. per lb. for good to fine quality.

	1875. lbs.	1874. lbs.
United Kingdom stock, on the 31st August, 1875, was estimated at ...	85,000,000	74,500,000
Cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included	1,000,000	6,508,000
Amount on the water advised by telegraph to 29th August, against actual shipments to same date last year	33,511,000	50,359,000
	119,511,000	131,367,000

SILK.

Messrs. Waithman, Hogg and Co.'s Circular says:—There has been no change in the position of the market during the past month. Business has again been without animation, and in a great measure restricted to the supply of daily requirements. China Silk of the new season has met with few purchasers; the supply of previous season's (offered at relatively lower prices) being more than sufficient for the demand, prices have undergone little or no alteration. Cantons have met with fair inquiry, and rates have been well maintained. In Japan Silk transactions have latterly been on a slightly increased scale, with a corresponding improvement in prices. The deliveries show a falling off, being 4,494 bales, against 5,120 bales in July; and stock has increased, being 31,057 bales, against 29,181 bales at the same time last month.

Messrs. Durant and Co.'s Circular reports that the deliveries are good, although not quite equal to those of the last two months, but this arises we expect from the extent of direct importations into France, rather than from any diminished occupation of mills or looms. It is no doubt also in a great measure in consequence of foreign buyers being enabled to supply themselves from direct importations that our market has been so quiet. Except for some special things they have scarcely appeared as buyers. The arrivals now comprise almost all classes except chop Tsatlee, and we have symptoms of more general business, the more so as diminished estimates of export from China are beginning to have some influence, especially upon the minds of importers.

LONDON QUOTATIONS—SEPT. 2.

CHINA.	
Tsatlee, No. 1	19s. 6d. to 20s. 6d.
,, No. 2	18s. 6d. to 19s. 6d.
,, No. 3	17s. 0d. to 18s. 0d.
,, Red Peacock	14s. 0d. to 14s. 3d.

Mashta ... ... (none	
Hatchoji ... ... (none)	

Mr. John Kershaw's Circular says:—The arrivals of the new season's Silk have so far shown such a poor selection of desirable Tsatlees that the trade have had to supply their wants from old stock. Coarse Taysaams and common Tsatlees have been out of all proportion in the imports of August; of 5,300 bales which have been warehoused, 2,250 bales are Taysaams, 2,000 of which consist of "9.12 moss," "Chin Cum," "Skeins," and low "Kahings," while of the 3,000 Tsatlees only one-sixth is above a "4¼," and the bulk of the remainder is of "4⅜ to bad 5" class. Quotations remain nearly the same; for desirable Tsatlees just a shade stiffer, while for common descriptions importers are firm for full rates—for Kahings there is a slight improvement in price shown for the 3½ to 4 class; "9.12 moss" and low "Chin Cums" are quiet, prices unchanged. In Japan Silk there has been a good demand throughout the month, and prices leave off at a full 6d. advance on those paid three weeks ago. In Canton Silk there has been some inquiry for the better descriptions of Tsatlee Reel, which have fully maintained former rates.

COFFEE.

Although the tone of the market has undergone slight fluctuations, the demand has been good, and the supplies at auction, which have been larger than for some time past, have been entirely disposed of, and still higher prices have been established. The supply of Plantation Ceylon has been more extensive, but the demand in the early part was brisk, and prices further advanced, but with a quieter tone afterwards slightly gave way, closing with a good demand at 2s. to 2s. 6d. above the currencies of the 19th ult., middling selling at 115s. 6d. Good ordinary has been sold at 99s. 6d., being an advance of 2s. per cwt. A further advance of 2s. has also been established for Native Ceylon. Closing quotations are:—Plantation triage and ordinary 90s. to 103s., good ordinary to fine ordinary 104s. to 112s., common to fine coloury small 105s. to 112s., low middling grey 112s. 6d. to 114s., middling 114s. 6d. to 116s., good middling to fine middling 116s. 6d. to 117s. 6d., good to fine bold 118s. to 121s., pea-berry 129s. to 133s. Native small 91s., good ordinary 98s. 6d. to 99s. 6d., closing at the latter price, good to fine bold 104s. 6d. to 106s. 6d., pea-berry 106s. to 107s. 6d. The sales of other East India include 100 bags good greenish Bonthyne at 99s. to 100s., and 1,400 bags Manila, chiefly mixed Zamboanza, at 95s., fine ditto at 98s. per cwt.

SUGAR.

The market has remained in a dull state throughout; transactions have been light, and prices have shown a downward tendency, but closing quotations are only slightly cheaper. Refiners have again almost entirely restricted their purchases to British West India, holders of which have met the market freely. Few inquiries have appeared for Manila, and the only business consists of 14,000 bags unclayed Ilo at public sale, low to good at 15s. 3d. to 15s. 9d., being easier. In the absence of demand no business has occurred in Penang or other East India.

CHINA STRAW PLAIT.—At auction 568 bales mottled, just arrived per Omba, met a good demand, and were all disposed of at steady rates, as follows: Ordinary at £6 to £7 2s. 6d., good ditto to good £7 5s. to £12, fine £14 to £19 10s.

CUTCH has been quiet, and sales are small, but full rates have been paid viz., 27s. 6d. for a small lot of Elephant mark.

CAMPHOR.—The market has been rather firmer, and about 300 cases China have been sold at 70s. for old re-weights, and 68s. 6d. to 69s. per cwt. new landing weights.

CUBEBS have been in steady inquiry, and of 61 bags placed on offer two-thirds were sold at 28s. for good clean quality.

COIR GOODS.—Only moderate supplies of Yarn have been offered, which went off slowly for common, and prices were cheaper. Roping

Digitized by Google

also sold 20s. per ton lower, but medium to good sold steadily. Rope dull of sale.

COCOA-NUT OIL.—Cochin has been somewhat neglected at £41 to £42 for good to fine, but Ceylon has continued in demand, and has realised rather higher prices, £36 15s. to £37 5s. having been paid for 90 tons old, £37 10s. for some new in pipes, and £38 for 100 hogsheads. 213 casks offered by auction have been chiefly sold at £37 10s. There has also been more inquiry for arrival, and 150 tons August-September and September-October shipments have changed hands at £37 per ton.

COTTON.—Renewed dulness has prevailed, especially for arrival, and part of the recent advance has been lost. Quotations :—Tinnivelly, 5¼d. to 6d., fair to fine ; Western Madras, 4¾d. to 5⅛d., middling fair to good ; Northern ditto, 5¼d. to 5⅜d., fair to good ; Dhollera, 5⅜d., good ; Oomrawutte, 5d., fully fair ; Scinde, 5d., good ; Bengal, 4d. to 5d., middling fair to fine ; Rangoon, 4d. to 4½d., barely fair to fully good fair.

CINNAMON.—The quarterly sales were held on the 30th ult., when a total of 1,969 bales Ceylon was offered, against 1,925 bales at the May sales, and 1,327 bales at the August sales last year. Of the above 116 bales just arrived were not offered, the remainder met a demand about e pual, and nearly the whole (1,750 bales) was disposed of. Fine qualities met less demand, and prices of first sort were 1d. to 2d. cheaper, second sort sold at an occasional decline, third and fourth sold readily at an advance of 1d. to 3d, per lb.

464 bales first sort, superior, sold at	...	3s.	6d.	to 4s.	1d.

156 fourth sort, good to fine ...	...	2s.	0d.	to 2s.	2d.
low to medium	...	1s.	1d.	to 1s.	11d.

A lot of 50 boxes 80 bales broken China was bought in at 11d. or withdrawn.

EBONY.—Market firm ; of 111 logs at public sale part sold at £18 per ton for fine quality.

ESSENTIAL OILS.—Anniseed steady ; and small sales at 10s. 8d. Cassia quiet ; sales at 4s. 3d. to 4s. 4d. Lemon Grass steady ; but nothing of consequence done. Nutmeg steady ; 5 cases good sold at 7d. per oz. Cinnamon quiet ; but fine brings good prices. Citronelle rather better, and of 72 cases two-thirds sold at 1½d. to 1⅝d. per oz. for good, and buyers in quantity at 1¾d. Lemon Grass quiet ; and nothing of consequence done.

GALLS.—China have again advanced, sales of that description having been made last week to the extent of 250 cases worked at 59s. to 69s., and this week a small quantity as high as 65s., also 200 to 300 cases good unworked at 59s. to 60s. per cwt.

GALANGAL ROOT.—Market steady ; sales of fine quality at 22s. per cwt.

GUMS.—*Benjamin :* Siam steady ; and of 14 cases offered the bulk sold, seconds block at £25 to £26 15s. ; thirds, £13 ; siftings in block, £8 15s. to £9. Sumatra steady ; of 100 cases two-thirds sold at £7 7s. 6d. to £9 for rather dull to middling seconds. *Copal* rather firmer, and of 416 cases offered a small proportion sold at 30s. for good, the remainder subsequently quitted at same figure ; also fair small sales privately at 30s. to 32s. *Damar* firmly held and little offering. *Gamboge* quiet, but firmly held ; 67 cases offered, and all retired.

GUTTA-PERCHA continues very dull.

GAMBIER has continued quiet, but advanced prices have been realised for small parcels on the spot, viz., 28s. to 28s. 6d. For arrival 200 tons have been sold, chiefly distant, at 26s. 6d. ex-ship. At auction of 863 bags 508 bales and about 2 tons loose cube about 500 packages sold, fine pale free slightly damaged, &c., at 39s. 6d. to 40s. pressed, repacked at 31s. 6d. to 32s., 1st class 28s. to 28s. 6d. per cwt.

HEMP.—The market for Manila has remained dull, and prices are again rather lower. Privately about 700 bales have been sold, fair to good fair at £30 10s. to £31 10s. In auction of 2,251 bales offered only 450 bales sold, good fair to good at £31 to £32 10s., the remainder **bought in at £31 10s., a few lots white Quilot at £48 per ton.**

HIDES.—Messrs. Dyster, Nalder, and Co.'s Monthly Report says :—The quantity offered at the public sales during the month has been comparatively small, and the business done limited, being confined chiefly to parcels of particular character and cure. North-Western Kips continue difficult of sale, an average reduction of ½d. per lb. failing to induce consumers to purchase. By private sales there has been considerable inquiry, but holders are firm in their demands, and full prices have been realised for the parcels disposed of. The sales by public and private reach 184,988 Kips in the Hair and Tanned, and the stock in brokers' hands is 469,799 Hides. Singapore, Penang, &c., Buffalo Hides have been in fair demand, but at an occasional slight decline. The sales are 5,673 Singapore ; slaughtered, fair to good, first heavy, average 37 to 43⅝ lbs., 6¼d. to 6¾d. ; inferior, first heavy, average 41 lbs., 5¼d. ; seconds, 4¾d. to 5¼d. ; fair to good, first heavy, average 27½ to 32¾ lbs., 5⅝d. to 5⅝d. ; ordinary, first heavy, average 26⅛ to 32¾ lbs., 5d. to 5⅜d. ; seconds, 4¼d. to 5d. ; thirds, 4d. ; light and small, average 5¼ to 13⅜ lbs., 4¾d. to 6¼d. per lb. Java Hides : No sales of Ox and Cow. Few Buffalo offered ; prices are unchanged. The sales are 532 Hides ; unshaved, best, average 13¾ lbs., 8½d. ; ordinary, average 22 lbs., 5¼d. to 6½d. ; thirds, 3¾d. per lb.

INDIA-RUBBER.—Market generally steady, but quiet ; little done in East India descriptions, privately 30 tons Borneo have been sold at 1s. 2¾d

ISINGLASS.—The auctions of the month which took place on the 27th ult. embraced of Penang and Singapore sorts 143 packages, about 120 of which were quitted at an average decline of 1d. to 2d. per lb. on good kinds, and in some cases 3d. to 4d. on low descriptions. Leaf good to fine at 4s. to 4s. 10d. ; middling to fair 2s. 7d. to 3s. 7d. ; low and ordinary and pickings 9d. to 2s. Pipe, fine long 4s. 6d. ; good and very good 4s. 1d. to 4s. 4d. ; middling to good, a little mixed with dark 2s. 11d. to 3s. 11d. ; rough, part dark 2s. 1d. to 8d. Purse, middling dark to fine pale 7d. to 1s. 9d.

JAPAN WAX has continued dull ; 559 boxes good thin squares (import 1873) at auction were all bought in at 53s. per cwt.

MUSK.—The public sales have embraced 45 caddies ; Tonquin pod all sold ; selected well-shaped pods fair damp to very good at 40s. to 45s. ; rough and bally 14s. 6d. to 16s. 6d. ; wet pickings, 16s. 6d. ; and 23 tins grain half sold at 47s. 6d. for fair, rather dark and damp.

PEPPER.—*Black* has been quiet, and rather easier, with sales of Singapore at 5⅞d., and Penang at 4⅞d. to 4⅝d. ; at auction, of 9,200 bags offered, a small proportion only sold. Singapore fair at 5⅜d., grey 5¼d. Penang 4⅝d. to 4½d. Afloat nothing of consequence done. *White* has been firm, and fine is dearer. Of 1,350 bags offered two-thirds sold, fine at 8¼d., good at 7⅞d. to 7⅝d., middling to fair 7⅜d. to 7⅞d. per lb.

PLUMBAGO.—In public sale of 971 barrels Ceylon about 720 barrels, mostly of fresh import, found buyers at steady rates, common chiefly small to superior selected lump from 15s. 6d. to 19s., ordinary to fine ordinary chips 10s. to 13s., common to fine bright dust 8s. to 9s. per cwt.

RHUBARB.—China is barely steady, and of 140 cases offered at auction two-thirds sold at 1s. 9d. to 2s. 3d. per lb. for middling to fair sun dried, 9d. to 11d. middling high dried, and 6d. wormy rough inferior.

RATTANS.—About 5,000 bundles at auction brought full rates, viz., £21 10s. to £29 15s. per ton for good and fine quality.

RICE.—The market has continued very quiet, and floating cargoes have been in only moderate request at a decline of about 3d. per cwt. On the spot supplies of all descriptions are rather small, but sales are effected slowly at previous rates. A lot of 5,500 bags Japan has realised 8s. 6d. to 9s. 6d. per cwt.

SHELLS.—The periodical sales were held on the 31st ult., with the subjoined results :—*Mother-o'-Pearl :* The demand for most descriptions was languid, and a larger portion than usual was bought in ; 178 cases Manila, &c., were bought in at £13 to £15, excepting 50 cases sold, defective £9 2s. 6d. to £9 17s. 6d., chicken £9, pickings £5 10s. to £6 5s. Of *Tortoise* the supply again exceeded the demand, and a dull tone prevailed. East India sold at former rates for good, but easier for common. Of 20 cases (1,690 lb.) Singapore exactly one-half sold, common to good shell at 12s. to 18s. 6d., 1 case (170 lb.) Manila shell at 17s. 6d. *Ear Shells* met a fair demand, and of a total of 461 cases 125 bags and 28 tons loose Japan Silver about 270 cases 125 bags 4 tons sold at full rates to some advance for fine, defective 5s., loose medium and small 10s. to 11s., untrimmed medium and small at £10 15s. to £12, medium £19 15s., bold £25 5s. to £28 10s., good bold at £29 10s. to £31 10s., fine and selected bold at £35 to £40, trimmed medium sizes at £40, inferior and small at £20 to £28 10s., selected bold £70 to £88 per ton. *Green Snail :* Of 160 baskets offered 75 baskets sold at previous rates for bold, but easier for small, bold at 8¾d. to 9¼d., small at 2½d. each.

SPICES.—*Cinnamon :* See report of quarterly sales above. *Cassia Lignea :* The market is dull, and in auction of 1,405 boxes unworked only 350 boxes sold at 53s. to 54s., the rest bought in at 54s. to 55s. *Buds :* Of 95 boxes China only one lot sold at £4 15s. *Cloves :* Amboyna have further advanced 2d. per lb. ; in auction of 56 cases 97 bags about 10 cases 70 bags sold at 1s. 8d. to 1s. 9d., closing at the latter price. Penang are also about 2d. higher, fully 50 cases having been sold at 2s. 2d. to 2s. 3d. per lb. *Nutmegs :* 40 cases Penang met a good demand, and were all sold at steady rates, average 64 nuts to the lb. mouldy at 4s. to 4s. 1d., 70's sound at 3s. 10d., 76 to 75's at 3s. 8d. to 3s. 9d., 111's at 3s. to 3s. 1d., 118's at 2s. 1d., defective at 1s. 9d. *Mace :* Of 5 cases Penang 3 cases sold at dearer rates, good to fine bold at 2s. 6d. to 3s. 3d., pickings bought in at 1s. 8d., and 14 boxes ordinary Java at 1s. 8d. per lb.

STICKLAC.—More business has been done in Siam at full rates, some 400 to 500 cases sold privately at 92s. 6d. to 97s. 6d. for fair to good ; of 491 bags at auction barely half sold in the room and subsequently, good at 95s. to 96s., blocky at 70s. to 75s. per cwt.

SAGO.—Market steady, and of 1,300 bags at auction half sold at 19s. to 20s. 6d. for fair to good small, and 16s. 6d. good large. *Flour* firm, and of 2,120 bags offered, a small part sold at 13s. 9d. for good Borneo.

SOY and STAR ANNISEEDS.—No business reported.

SAPANWOOD continues firm ; at auction of 34 tons 10 tons Ceylon sold at £11 12s. 6d. to £12, and 14 tons damaged Manila at £9 5s. per ton.

TAPIOCA.—500 bags fine to extra fine white Alma Penang sold at some advance at 2⅝d. to 3d. Of 410 bags Singapore 260 bags sold, small at 2¼d., fine white 2⅝d. to 2½d., the remainder Malacca bought in at 2¼d. *Pearl :* Of 1,127 bags offered 650 bags sold rather easier, dull to fine medium at 18s. 6d. to 19s., good bullets at 20s., fine small at 21s., with one lot at 21s. 6d. *Flour :* 434 bags fine Singapore of fresh import sold readily at 2¾d. to 2¾d., being rather dearer. Privately 200 bags Penang sold at 2¾d.

TIN.—The market has been very active and animated ; an unusually large business has resulted, and prices, though not free from fluctuations, have advanced. Current quotations are Straits on the spot £82 to £82 10s., afloat £82, Banca £90, Billiton £86 per ton.

Stock of	Sept. 1, 1875. Tons.	Sept. 1, 1874. Tons.	Sept. 1, 1873. Tons.

MANCHESTER GOODS.

Last week closed with a steady tone and moderate amount of business. This week the market, though still steady, has been less buoyant, buyers having apparently satisfied their most pressing requirements, and in face of the continued firm attitude of sellers have shown less disposition to extend operations. Prices however continue to be steadily maintained at last week's values.

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their shares on the London register receive their dividends at the fixed rate of 4s. 6d. per dollar. Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

Part First now ready.

NEW AND IMPORTANT WORK ON ORIENTAL ART.

Dedicated by special permission to H.R.H. the Duke of Edinburgh.

KERAMIC ART OF JAPAN.—By GEORGE ASHDOWN AUDSLEY, Architect and JAMES L. BOWES, President of the Liverpool Art Club.

To be completed in Two Volumes, folio, 16 inches by 11 inches, containing a comprehensive Introductory Essay on Japanese Art in all its various branches, and a Dissertation on the Keramic Production of Japan from the earliest records to the present day, with sectional articles upon the Pottery and Porcelain of the various Provinces of the Empire.

Illustrated by Thirty-five Plates in full Colours and Gold, Fifteen Plates in Autotype, Thirteen Photo-Lithographic Plates, and numerous Woodcuts.

IN SEVEN PARTS, AT ONE GUINEA EACH.

The entire English Edition (folio) to consist of 1,000 copies.

In speaking of the first part *The Times* says:—"It is a work on which it would be difficult to bestow any higher praise than that which is implied by saying that in every way—in composition, in printing, and in illustration—it is worthy of the exquisite productions of which it treats. . . . The glory of the book is the chromo-lithography, for which, indeed, some new name ought to be invented, so unlike is it to anything which has been called chromo-lithography before."

For particulars apply to the Secretary, at the Publishing Office, 13, Hackin's Hey, Liverpool; or to

H. SOTHERAN and Co., London.

BIRMINGHAM—Manufactory and Show Rooms, Broad-street. Established 1807.

TO PARENTS AND GUARDIANS.

AN ENGLISH WIDOW LADY, who has been residing many years on the Continent, is desirous of obtaining two pupils (English) to educate with her own daughters. She offers a comfortable home, and a mother's care, with all the advantages of the best professors and an excellent governess, combined with that of French, English, and German. Is now residing in the neighbourhood of Versailles, which abounds with charming walks, where there is an English church, as well as similar cours or classes conducted by the same professors as at Paris. References exchanged.

Address, Madame E. H., Poste Restante, Versailles.

NOTICE.

MESSRS. JUSTUS LEMBKE and Co., of Hong Kong, have established a BRANCH of their Firm at HAMBURG, under the charge of Mr. PAUL EHLERS, who is authorised to sign the Firm per procuration.

COURVOISIER'S BRANDY

THIS celebrated **Brandy** is highly esteemed for its purity, delicacy of bouquet, and softness of flavour. It is used in preference to any other in many of the leading Paris and London Clubs.

It was the only one supplied to his late Majesty Napoleon III.

It has also met with the highest approval wherever it has been shipped, and the Proprietors are able to refer with pleasure to the recognitions of its superiority which reach them from every part of the world.

CAN BE OBTAINED THROUGH ANY MERCHANT.

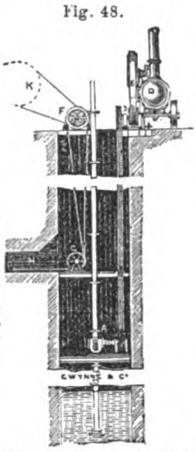
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.

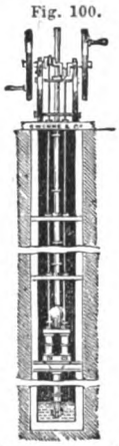
GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.

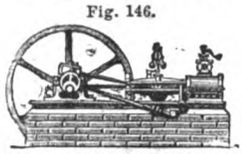


GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,
For Hand-power, adapted for ordinary wells of any depth, of tion, and on the most approved system

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

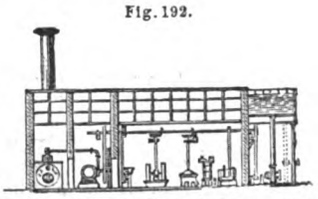
Fig. 154.

GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler

Fig. 142.

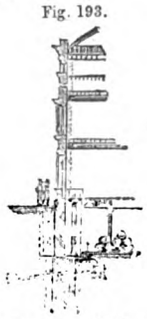
GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.



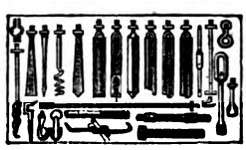
GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES FAT, &C., &C.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.



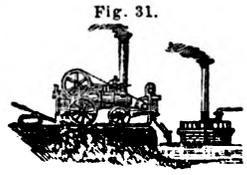
GWYNNE & CO'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 121.



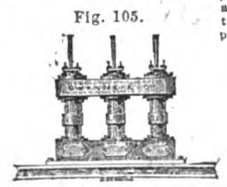
GWYNNE & CO.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and compare on with those of other makers is challenged Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

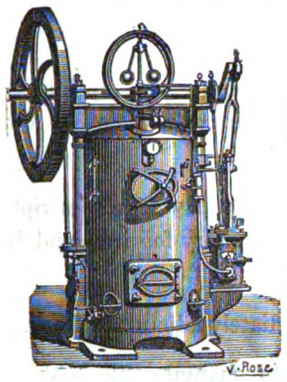
SPECIAL MANUFACTURE OF VERTICAL STEAM ENGINES,

Pumps with Plunge Pistons moved by Vertical Steam Engines.

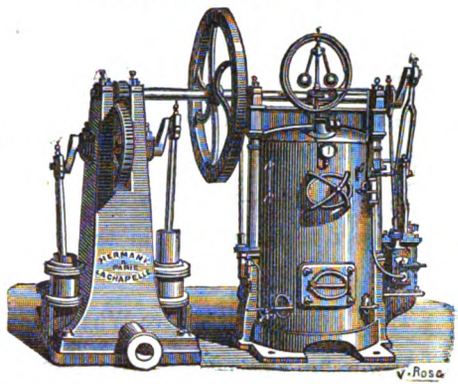
Vertical Engines from 1 to 20-horse power. Boilers with tubes. Important saving guaranteed.



GOLD MEDAL
AT THE
EXHIBITIONS OF
ALTONA and SANTIAGO, 1869.

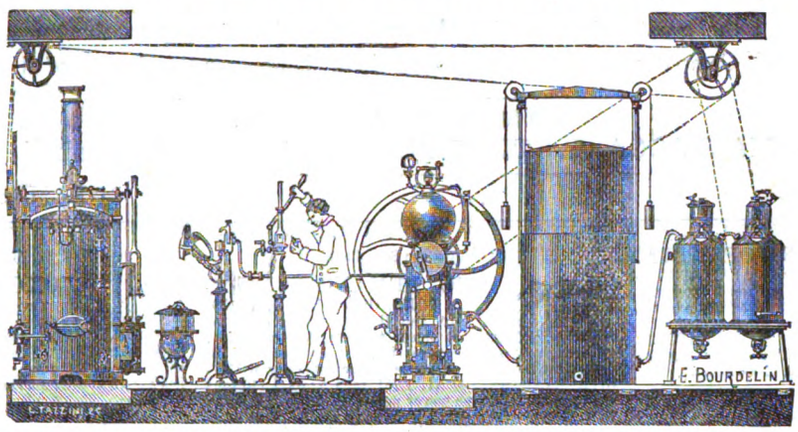
DIPLOMA OF HONOUR,
GOLD MEDAL, & LARGE GOLD MEDAL
AT THE
EXHIBITIONS OF
LYONS and MOSCOW, 1872.
MEDAL OF IMPROVEMENT
(EQUAL TO THE LARGE GOLD MEDAL)
at VIENNA, 1873.

Pumps with plunge piston, moved by Vertical Steam Engines for irrigation and drainage.



CONTINUOUS APPARATUS for manufacturing Gaseous Drinks of all sorts (worked by a Steam Engine).

This apparatus, with mechanical compression and continuous action, is able to produce from 25 to 10,000 bottles of all kinds of aerated drinks per day. It is the only one which complies with all the requirements of the Committees of Health and Safety. The only one which has undergone, before leaving the workshops, the proofs required for any apparatus which has to work at high pressure. The only one adapted to working this branch of industry practically.

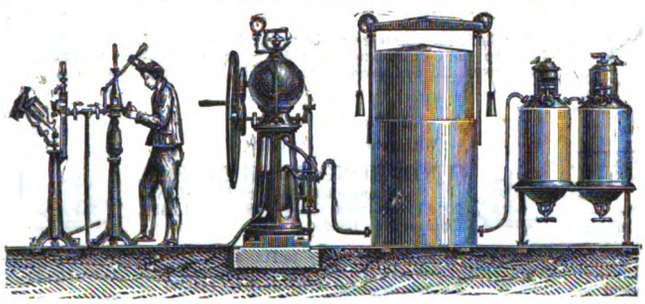


J. Hermann-Lachapelle's Syphons are also very remarkable. Their mechanism is very carefully made, and the decanters are in crystal glass of the best quality. The top of these Syphons is plain, without ornament, and easy to clean, which is an advantage.

COMPLETE APPARATUS for manufacturing Aerated Drinks of all kinds (moved by hand).

SYPHONS.

Large Lever, f.2.25.



SYPHONS.

Small Lever, f.2.15.

HERMANN-LACHAPELLE, 144, FAUBOURG POISSONNIERE, PARIS

Catalogues obtained and Orders received through the China and Japan Agency.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all description of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.

Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 21st July, and by the Pacific mail we have news to the 25th July; the French mail from London, June 4, arrived out on the 19th July, and the following P. and O. mail, of June 11, was received on the 24th July. The *Japan Mail* supplies the following items of news:—

The following letter has been addressed by the Prime Minister to the Assembly of Nobles recently convoked:—

Last year you bound yourselves by a common vow to establish your Assembly, to take deeply to heart the kindness of the Imperial instructions to you, and to discharge to the utmost of your ability your duties as Nobles. This was truly a matter for congratulation, and if the Nobles had striven zealously to realise the practical results of such a resolution it would have been indeed fortunate for our country. Since that date, however, the meetings have been but scantily attended, and I have not learnt that any definite plan has been formed for accomplishing these results. Some, while agreeing with the objects of the Assembly, have

Digitized by Google

gone elsewhere, others, who agree equally with them, stand by almost like mere spectators. It does not seem as if any notice was taken by them as to whether the Assembly was in a state of prosperity or decay —or whether it was being established or abandoned. If such indolence and negligence continues, what is after all the good of your Assembly? Saneyoshi's former rejoicing is turned into sorrow. He is prevented by the pressure of his important duties from attending the Assembly frequently himself, but he cannot forget it by day or by night. He hopes that the members will commit to writing and communicate to him their plans for discharging the functions of the Assembly, together with their views as to the means of increasing its activity for the future. He will aid you in your endeavours. Do ye all give due consideration to these words.

All the evidence points to the suspicion not that the Assembly has in any way been uncompliant to the views of the Government, but that its members have not the necessary force of character to discharge their duties with any real advantage to the country. No one who reflects upon the part played by the great nobles at the revolution of 1868 can fail to make a low estimate of their average personal power, and their present conduct confirms this view. What the country really wants is a man of genius, born in the purple, and who will do for Japan something like what Alfred did for England, Peter for Russia, and Frederick for Prussia.

We have the best reason for thinking that the report that this country is likely to be involved in war with Korea is without solid foundation, so that the newspaper articles and paragraphs which have appeared on the subject are merely misleading. Certainly there is no ground for regarding war as imminent, though the relations between the two countries may not be of a satisfactory nature. We may be quite certain that after recent experiences of the expense entailed even by so small an expedition as that of last year to Formosa, Japan will not undertake one which would cost her ten times as much, unless it is actually forced upon her by circumstances which forbid any other course, and it is most ardently to be hoped that no such circumstances will arise.

Akiyama Tsnetaro has resigned his position as supervisor of the Press, rather than carry out the laws recently promulgated for its regulation. But his act is of course not the slightest evidence one way or the other in regard to the wisdom of those laws. It is wholly impossible that a question so complicated as that of the relations of the Press to society should have received that study from any Japanese, be he who he may, which can make his opinion upon it of much value. It is even observable that no foreign writer on the subject who has denounced these laws has given the smallest shadow of a reason for doing so. Englishmen, whose struggles for liberty during six centuries have given them a free press as the crown of those liberties, imagine that because it is a precious thing for them it would be a wise thing for all nations in whatever conditions. Of course it is easy to raise an applauding shout by crying "Free Press, Free Press;" but it is far better that liberties should be delayed until there is some guarantee that they will be rightly used, than that the most sacred of all causes should be associated with excesses which not only bring it into disgrace, but delay its ultimate triumph.

It is said that the Satsuma officials have sent in a memorial to the Throne expressive of grave dissatisfaction with the present condition of affairs, and complaining specially of the formation of the *Genroin*, a body which they regard as useless and unnecessary.

Captain Douglas, late director of the Imperial Naval College in Yedo, was honoured with an interview by the Mikado on the 22nd July. His Majesty addressed Capt. Douglas as follows:—

Some time ago, in consequence of a request made to your Government, we invited you to take the position of Director of our Naval College. Since then you have discharged diligently the duties devolving upon you, and it is due to you that the studies of the cadets have reached their present state of progress. We have great pleasure in heartily commending this result, being as it is the basis of the development of our navy. You have announced that you wish to resign this office, and return to your country. We therefore offer you a few of the productions of Japan as an acknowledgment of your services, and we wish you every happiness in your future career.

Capt. C. W. Jones, a retired commander of the Royal Navy, succeeds to the post vacated by Captain Douglas.

The *Chikuhokuan Kuagi* was closed by the Mikado on the 17th July, with the ceremonies which attended its inauguration. His Majesty addressed the following Speech to the members of the Assembly:—

We are glad that your deliberations have been conducted conscientiously. We shall in due course, and after consulting with the *Genro-in*, consider the recommendations which you have drawn up for our information and approval, and will take action thereon. Return, now, to your respective offices, and discharge your duty to the State industriously.

The extreme heat of the weather is found to affect the jinrikisha men severely. Two men fell down dead, apparently from sunstroke, on the 17th July in Yedo, and a death from the same cause is reported to have occurred at Homoko. In the latter case the indifference usually shown to the dead was strikingly displayed; the body was permitted to remain for some time at the road-side, during which the little clothing the dead man had possessed was taken away.

A daring attack was made on the 17th July on a small cottage on the river bank at Kawasaki, occupied by Mr. Balaam, bridge-keeper in the Government railway service. A party of thieves, six in number, armed with swords, presented themselves at the window and demanded admittance, but Mr. Balaam prepared his house for a siege, and while carefully guarding himself awaited an opportunity to put his assailants to flight. His revolver was out of order, but he fortunately possessed a musket, which enabled him at length, and after enduring a siege of some hours, to rout the robbers. The report of the fire-arms would not seem to have been heard by the neighbours. Mr. Balaam has not sustained any injury.

All the persons who were tried some four or five years ago for the murder of Hirosawa, a *Sangi*, have been liberated. One of the party confessed to the crime on the application of torture, but his innocence having been since established he also has been set at large.

The festival of the *Kawa-biraki*, or opening of the river Sumida in Yedo, which was celebrated on the evening of the 20th July, was more brilliant and more largely attended than any of its predecessors for many years past. The festival marks the beginning of the *do yu*, a period of twenty-one days corresponding with our dog days, and celebrates the ancient custom of the heat-worn citizens of exchanging their dull and sultry streets for the cool airs and gay enlivenments of the metropolitan river. Nothing could be brigher than the scene presented near the Riogoku Bashi as the hour for discharging the fireworks drew near. On either bank crowds of merry-makers thronged the tea and dwelling-houses, lighted with thousands of gay-coloured lanterns which line the margin of the stream, while the river was alive, and in the vicinity of the bridge was almost impassable, with the closely-packed mass of boats which had come together. The fireworks demand no special notice. They consisted of the usual array of catherine wheels, rockets, roman candles, and set pieces displayed from the Riogoku Bashi. This began at about nine o'clock, and at half-past ten the amusement had ended.

The first of the series of promenade concerts held on the 20th July at the Public Gardens afforded much gratification to its audience, the heat of the day having given place to an agreeable southerly breeze which admitted of the thorough enjoyment of the *al fresco* entertainment. The band of H.M.S. *Audacious* performed a selection of instrumental music with spirit, and some glees and part songs were sung with such pleasing effect as to secure more than one demand for repetition. The success of the first of the series bodes well for those which are to follow.

A report from Ichinoseki, a town in the province Rikuzen, states that on the boundary of the provinces of Sendai and Mogami a terrible catastrophe has just occurred. A violent disruption of earth and rock took place at the foot of the Kamurodakae mountain, whence issued a torrent of water destroying all the people who were using the hot springs at the time. Thirty corpses and one horse have since been dug out. The village of Hiyate, in the vincinity, was also carried away. The loss of life was great, but is not yet accurately known.

An alarm of fire was raised about four o'clock A.M. on the 18th July on smoke being observed to issue from the premises of Messrs. Batavus and Co., ship chandlers, &c., Water-street. It was some little time before the engines arrived and a proper supply of water was available for their use, and in the meantime the fire, fed by the combustible material stored within the building, had obtained such a hold as to defy all attempts to extinguish it. Shortly before five the roof fell through, and the flames were got under. The front portion, or store, contained ships' stores, paint, oils, &c., nearly all of which have been destroyed or rendered valueless.

We learn from the *Hochi Shimbun* that some twenty-five of the deputies who accompanied the Governors of their respective *ken* remain in Yedo for the purpose of learning the decision of the *Genro-in* to their memorial respecting the mode of representation.

It is not so long since we had to point out the ill-usage that the English language meets with at the hands of the Custom-House people. The following may be read upon a new notice board at the French Hatoba. "No body allowed to pass on a jinrikisha carriage sedan or horse-back except cart Custom House."

A temple of note named Yengioji, at Hakata, in Fukuoka, *ken*, was burned on the 18th July.

CHINA.

SHANGHAI.

The present mail brings advices from this port to the 25th July; the P. and O. mail from London June 11 was received on the 22nd July. The following summary of news is from the *North China Herald*:—

We understand that the C. M. S. N. Co., having apparently exhausted all possible proceedings against the *Ocean*, now threaten the *Shunpao*. Something that paper said in commenting on the *Fusing* disaster annoyed the managers, and they threaten an action for libel. The Company's case appears feeble to a degree.

Digitized by Google

The article is verbose and loosely put together, but its purport very evidently is to recommend the Chinese—if they are going in for foreign ships—to give attention to instructing a class of good sailors. The *Fusing* case is merely taken as an instance where more lives might probably have been saved if the sailors had been skilled and prompt to deal with emergencies. The assumption is quite reasonable. If the men had been such trained sailors as English men-of-war's men, it is very likely some of the other boats would have been set free; the evidence went to show how nearly this was accomplished by the exertions of the English officers of the ship. There is not a ghost of a charge against the officers in the whole article, and there is no word of mismanagement on the part of the Company. It employs Chinese sailors, whom the writer does not consider highly skilled, but so do most other steamers on the coast.

The Municipal minutes mention that it has been resolved to construct a full-sized bridge across the Soochow Creek at the end of Szechuen-road, instead of a foot bridge. The Council are wise in doing this while they are about it, as half of the additional expense is promised from private contributions. It would have to be done sooner or later, and may as well be done at first.—The sanction of the American and Austro-Hungarian Ministers and the Portuguese Charge d'Affaires has been given to the amendments in the Land Regulations passed at the late meeting of ratepayers. That of the British Minister has not yet been obtained, but the delay is perhaps incidental to Mr. Wade's stay in Shanghai. The letter asking his approval is no doubt delayed in Peking, and a renewed application to him here would elicit the necessary sanction.

A general parade of the Volunteer Corps has been held. A fair number of Volunteers turned out, considering the weather. Men always exaggerate the exertion and heat of drill, and shrink from what is really only pleasant exercise. About eighty of the four rifle companies fell in—all except the Mi-ho-loongs being represented by less than half their real strength. The Mickies however, mustered in good force. Only eight rangers turned out, out of a force of about eight-and-twenty; yet it is no hotter riding in company than singly, and all the members are men who habitually take horse exercise. The Artillery was absent altogether, and that is inexcusable. Very full musters can hardly be looked for, nor very much drill expected, during the hot weather. What is desired is to get the men together, to show that the force is organised, and is in hand; and when so important an arm as the Artillery fails altogether to put in an appearance one is driven to infer that some need exists for reorganisation. After going through a few preliminary movements in front of the Custom House the force was marched to the racecourse, headed by the band, and went through a few battalion manœuvres very creditably. There were fewer spectators than usual on the ground, but the usual crowd of traps pressed on the column in its line of march, and men who would have looked much better in uniform went through the formality of keeping step in front, rear, and on either flank. The drill ended about seven, and, again headed by the band, the men marched back to the Bund, where they were dismissed about 7.30, after a very pleasant and moderate afternoon's exercise. The band, ably led by M. Remusat, lent life to the marching, and the Volunteers are indebted to its members for turning out so strongly. Carrying big drums, trombones, and such implements, is no joke with the thermometer at 90.

We hear that the Chinese are beginning to complain loudly of the badness of the crops in this and other provinces. A good deal of rice was spoiled by being flooded and destroyed while it was young, and the cotton crop is said to be seriously damaged. In many places they talk of half an average crop as a probable outturn. In some places remissions of land-tax are being asked for. Such an application has been made at Quinsan by a number of elders. The magistrate, we are told, gave them 100 cash a-piece, and refreshment, and told them not to make a fuss, and he would send officers to inspect their land and report.

The native sugar merchants have lately published a complaint of interference in their dealings with foreigners. The rules in regard to the sugar impost have, they say, been continually changed since last year, which has been a matter of extreme embarrassment to the merchants. They have now received orders from the Weiyuen in charge of the Tax-office that sugar merchants must not henceforth have dealings with the foreign merchants, and if they are found disobeying this order they will be heavily punished.

Looking at the official's idea, it would seem that he wishes to prohibit us altogether from buying cargo of foreign merchants. But it is now several tens of years since Chinese merchants have had intercourse with foreign merchants, and there is a treaty to confirm the practice. It is extremely hard that the sugar merchants should be required to stop operations with the foreign merchants all at once. We all respectfully begged to ask what was the cause of this new regulation, and the Weiyuen replied that he had received instructions from his superior official. We asked him to issue a notification for the information of merchants, but were put off with excuses. He said, if you people buy sugar of the native merchants there will be a reduction of 40 per cent. on the impost; if you buy from foreign merchants the full duty will be collected.

The merchants go on to complain that the Fohkien and Chaochow Guilds have been given a monopoly of the right of passing sugar through the Tax-office. The northern merchants object to this. In regard to fines there are no settled laws, and the Weiyuen seems able to mulct them at his own pleasure. An instance is given of a Shanghai hong asking a Fohkien hong to make application to pass forty-five bags bought of foreigners, and which was fined Tls. 163. Another man wanted to pass seventy bags, and was fined Tls. 385; another, with sixty-two, was fined Tls. 752. There have been innumerable other cases. This was not for attempting to smuggle, but merely because the Tax-office found out that the sugar they wished to pass was bought from foreigners. If men are fined for attempting to smuggle it is their own fault, and the memorialists would have nothing to say. But officials in the Tax-office are like wolves and tigers. They keep the merchants in custody on the premises, and coerce them into giving as much as they want. After they have fined them without any legitimate reason, they write it down as smuggling. Two firms which were formerly very flourishing have had to shut up since they were fined; and many other small firms are very much embarrassed.

A rather smart robbery has been committed in the neighbourhood of Kin-le-yuen jetty. The luggage of a foreigner who was about to embark on board one of the outward-bound northern steamers was being conveyed on barrows; on the last vehicle was also a box belonging to his boy, containing clothing to the value of $30. While the boy was busy removing his master's property to the steamer a well-dressed native who had watched the operation went up to the barrow-coolie, said he was a friend of the boy, and would take his box on board. The coolie permitted him to take it away, and it has not been since seen.

The undermanned condition in which some large ocean-going steamers have been lately running has attracted the attention of the local marine insurance offices; and on Tuesday an intimation was given to a captain that unless he shipped five more hands for the homeward voyage a policy could not be granted him. The additional hands were at once obtained.

A serious accident has happened in the Shanse-road, nearly at its junction with the Maloo. A large number of market people had as usual taken up their stand on each side of the road, leaving just sufficient width in the centre for the passage of one vehicle, along which foot passengers also had to walk. One of the Municipal dust carts was proceeding very slowly through this opening, when an aged small-footed woman stumbled against the cart, and was thrown down, the wheel passing over her foot and leg, causing a compound fracture. Information of the accident was given at the Lowza Police-station, and Inspector Wilson directed the poor woman's removal to the Gutzlaff Hospital, where amputation of the limb was performed by Drs. Jamieson and Henderson, and the sufferer seems in a fair way of recovery.

In the case of the collision which recently took place in the Peiho river, between the C.M.S.N. Company's steamer *Yungching* and Messrs. Russell and Co.'s steamer *Shantung*, both sides agreed to refer the investigation of the circumstances attending it to Captain Hutchinson, of the steamer *Haining*. The inquiry took place at the office of the C.M.S.N. Company, being of course conducted privately, and resulted in a decision in favour of the *Shantung*. The cost of repairing both vessels, amounting to something under Tls. 3,000, will therefore be paid by the *Yungching*; her own portion being, we believe, covered by insurance.

The Chinese have lately hit upon a new kind of forgery. They are melting down cheap German lead in Hongkew, and making it into pigs of "L.B." for the benefit of country buyers. The effect will, of course, be to depreciate the value of true L.B. lead in the interior. We understand that the attention of H.M. Consul has been called to the matter, and hope that it will be found possible to check and punish the fraud.

The remarkable rumour that the Chinaman for whose murder Fawcett was tried at Chefoo was not killed seems to be gaining strength. A correspondent writes:—"At the trial Mr. Hannen objected to the written report of the inquest, which was the only thing handed in to prove the man's death, while no *proof* was given that the man had been actually seen dead. The people near the promontory can have no motive in spreading the present report; and it is noteworthy that, since the report has been in circulation, the Che-hsien of Yung-ching, near which town the murder was supposed to have been committed, has been suddenly removed!" We give this extract, as we gave the first rumour, for what it may be worth. It is certainly a very curious one, and at least worth investigation.

The steamer *Nanking* reports that the water mark at Hankow stood at forty-four feet eight inches, and was falling slowly. The country was much flooded, and the weather in Hankow very hot.

The subjoined additional items of intelligence are from the *Celestial Empire*:—

Our Tientsin correspondent draws attention to a fact the significance of which can perhaps hardly be accurately gauged in the absence of fuller information, viz., the refusal of Li Hung-chang to permit the Peruvian Minister to proceed to Peking. From other sources we learn what is rumoured to have been the difficulty. According to this account, the Viceroy is said to have referred to the condition of Chinese subjects in Peru, and to have asked Dr. Elmore whether he was prepared to give the

Digitized by Google

Chinese Government a guarantee for their safety. The Minister replied, as far as we can gather, that he believed there was no cause for alarm on their behalf, but as he had no particular instructions with respect to this especial point he really could not commit himself to any direct reply. "Then," rejoined the Viceroy, "you cannot go to Peking." The step certainly seems arbitrary, and one is really at a loss to understand the position occupied by Li and the peculiar nature of the powers with which he appears to be invested. Is he placed at Tientsin as a sort of outpost, or in Masonic parlance, tyler, to warn off all comers and intruders who may be disagreeable to the Government, on the plea that they are not in possession of certain powers? Is he a sort of buffer to the Tsung-li Ya-mên, an intermediary through whom we shall have in future to approach that august body and without whose sanction foreign representatives will not be permitted to proceed to the capital?

Our Newchwang correspondent writes:—I am glad to be again able to report vigorous and successful action on the part of the Chinese authorities and Imperial troops. Seven days ago another engagement between the banditti and the Imperial forces took place, somewhat to the east, but still near to Ta-kooshan. On either side large numbers were engaged, and it is officially reported that between one and two thousand of the banditti were killed, and between three hundred and five hundred taken prisoners. These are large numbers; and in all likelihood very considerably exaggerated. The banditti have a large and strong stockade, to which they retreated, and which they defended vigorously for some time; but the Imperial troops eventually broke into it, and the banditti, thus defeated in their own stronghold, retreated, the main force making for the Ya-lu. The Imperial troops are in pursuit. Two or three days ago some escort or insurance runners were denounced in our port town here as having been in former times friendly to the banditti. They were apprehended by the police and taken before the magistrate, who has deemed it prudent to send them on to Moukden, where their case will be inquired into. These men were sent under armed escort, but they were not ironed. The action generally of the officials is vigorous, and it is already bearing good fruit, as the district in which our port is situated is unusually quiet and peaceful.

As an apt comment upon the remark that the Chinese invariably get the better of us in the races of both diplomacy and wealth, we may mention a rumour that has lately reached us to the effect that there is an Ocean Steam-ship Company in the course of formation, in connection, we believe, with the China Merchant's Company already in existence. We have no details of the project beyond the mere fact that it is in contemplation, and will probably assume a tangible shape before long, but certainly there seems no reason why the Chinese should not extend their commercial navigation to the shores of the Western countries. It would tend rather to our eventual advantage, in bringing them into closer intercourse with European civilisation, and probably give no small impetus to the now effete and languishing "China trade." We hope to be in possession of further particulars ere long.

We hear of the loss of the lorcha *Anonyma* in the Yangtsze, somewhere about the Lang-shan crossing, on Saturday. She carried away her foremast in the heavy wind and sea, and the mast appears to have knocked a hole in her bow. She sank about eight minutes after the accident. All on board but three were saved in the sampan, and two of the others were picked up by the lorcha *Kin-fan lee*, which saw the accident and bore down to their assistance. The *Kin-fan-lee* brought back the captain and crew to Shanghai.

(FROM A CORRESPONDENT.)

SHANGHAI, JULY 24.

Mr. Wade's attachés, Messrs. Grosvenor and Baber, have returned from Hankow, where they went to meet the Commissioner said to be appointed by the Chinese Government to proceed to Yunnan, but there was no Commissioner there, and he was not expected for a month or two. The rumour now is that the Chinese have marched 100,000 soldiers into Yunnan. The intention of Mr. Wade to send two Englishmen into Yunnan with war impending, is, to say the least of it, impolitic and unjustifiable; valuable lives ought not thus to be thrown away. To an outsider it would appear that the Chinese Government are playing with our Minister. How is Mr. Disraeli's statement in the House of Commons verifiable "that Mr. Wade's demands on the Chinese Government had been conceded," when after four-and-a-half months no advance is made? He has placed his country in a false position by demanding an inquiry. He should have demanded satisfaction within a given time, and he would have got it. In the end it must come to that. We have the power of enforcing our demands by seizing Formosa, and marching a force into Yunnan. The Home Government are evidently trying to shirk their duty, but the Chinese back is up; in fact, so far they are masters of the situation. Without alluding to the Margary case; we have here a Mr. Cooper nearly strangled and his life only saved by other foreigners coming on the scene, his boat gutted and destroyed, and the Chinese refuse to give any satisfaction or to punish the aggressors.

Much surprise has been expressed here at the decision of Consul Medhurst in awarding 11,000 taels against the captain of the *Ocean*, as compensation for the lives of the Chinese lost on the occasion of the shipwreck of the *Fusing*. The Taoutai has, since he has succeeded in getting this decision, peremptorily refused to give any redress in the Quinsan case.

The *Ocean* case is to be appealed home to the Privy Council, who will have to decide whether Sir E. Hornby was justified in announcing his decision against the *Ocean* before he had heard the evidence on her behalf, and whether he was justified in awarding a large sum of money to the passengers by the *Fusing* to be paid by the *Ocean*, the claim not having been put in till after his decision was given. To a non-legal mind such an act seems the reverse of justice, but peculiar notions exist in the judicial mind. Another peculiarity in the case was the ignorance of the legal mind as to the limitation of liability for collisions, under the Merchant Shipping Act, until the case was all over. Sir E. Hornby's decision made the owners of the *Ocean* liable for three times the value of their own ship; this shows the necessity of the limitation provided by law, otherwise owners of ships might be ruined. With regard to the award of Tls. 11,000 for the lives of the passengers drowned in the *Fusing* ordered by Mr. Consul Medhurst with the Taoutai, as a Mixed Court, to be paid by Captain Brown, of the *Ocean*, there is no similar decision by any English Court for loss of life by collision at sea. This was a collision in a dense fog, both vessels going at the same rate of speed. The *Ocean* struck the *Fusing* on the starboard bow, and the latter vessel sunk in four minutes, before there was time to lower a single boat. Had the *Fusing* been a strongly-built vessel she would not have foundered, and Captain Brown lowered his boats and saved nearly half the passengers and crew of the *Fusing*, in fact all who had not gone down in the vessel. Yet, without any negligence, culpable, or otherwise, being proved or even charged against him, he is ordered to pay between three and four thousand pounds out of his private resources. He naturally fails to see the justice of such a decision, and declines to submit to it. It may be in your recollection that last year a man was *said to have been* accidentally killed near Chefoo by a foreigner in the Customs' service at the lighthouse near the Shantung Promontory. After an inquiry before the Consul, Mr. Lay, and the Taoutai, there not being sufficient evidence to convict, as the pistol went off accidentally, shooting a man behind, the man was liberated and went to Japan. The mandarin grossly insulted the English Consul on that occasion, shook him by the arm, and threatened to order his soldiers to kill Mr. Lay, the Consul. Instead of any notice being taken of this indignity, Sir E. Hornby, who arrived at Chefoo shortly afterwards, issued a warrant to arrest the man Fawcett, and dragged him back from Japan. He was tried before a jury and acquitted, and Sir E. Hornby upbraided the jury for giving such an iniquitous verdict. It now turns out that the man was not killed at all, and is walking about as usual. So much for relying on Chinese testimony. There was no proof of a dead body, except that given by the local mandarin, yet the judge pressed for a conviction for murder,—the offence really committed being homicide by misadventure.

HONG KONG.

Our advices by the present mail extend to the 31st July; the French mail from London June 18 was received on the 25th of July, and the following P. and O. mail of the 25th June arrived out on the 29th July. The following items of intelligence are from the *China Mail*:—

A meeting of the shareholders of the Hong Kong Hotel Company took place on the 28th July. There were present:—Messrs. A. Andre (Chairman), Belilios, Burrows, H. Smith, C. P. Chater, Vaucher, Landstein, Erdmann, Fereira, Wisner, Hauschild (Secretary), and others. The Chairman observed that he had no remarks to make; the accounts would speak for themselves. He might, however, mention that since the report was printed another $2,000 had been paid towards the reduction of the debt, and the loan account was steadily decreasing. With this remark he proposed the adoption of the report and the balance sheet. Mr. Landstein having seconded, the motion was carried unanimously. The re-election of Messrs. S. E. Burrows and C. P. Chater as directors was next proposed, and also carried unanimously. The confirmation of the appointment of Mr. Vaucher as auditor, in place of Mr. H. Cohen, who had left the Colony, was approved of, and the proceedings terminated. The following is the report which was presented:—

The directors have again to submit to you their half-yearly report, with statement of assets and liabilities and an abstract of profit and loss account for the six months ending 30th June last. Profit and Loss Account: This account shows a credit balance of $6,815.93. The directors recommend disposing of this profit by distributing amongst the shareholders a dividend of $2.50 per share, thus absorbing the sum of $4,645, and to carry the surplus of $2,270.93 to the reserve fund in order to provide for depreciation. Loan Account: As intimated in last report, this account had by periodical payments been reduced to £77,000. The directors are glad to notice that since the accounts were made up this debt has been diminished by a further payment of $2,000.

The directors have much pleasure in stating that the hotel escaped

Digitized by Google

from the effects of the late fire with very little injury and that the local insurance offices have paid the damage to the building and furniture with their usual promptness and liberality. The business of the hotel has not been characterised by any new feature beyond the fact that the earnings of the lessees appear to be steadily increasing.

That something very like a crisis in the relations between China and the West has at length arrived may, with tolerable confidence, be asserted. A number of circumstances nearly all too little important in themselves to have induced the British Government to take particularly vigorous action have of late tended to strongly impress the minds of our home statesmen with the fact that the existing relations between Great Britain and China are unsatisfactory. The blockade of Hong Kong, the Chinkeang disturbance, the Quinsan riot, the *Carisbrooke* seizure, and, more important than all, the Yunnan outrage, have borne by no means silent testimony to the fact that a better understanding must be arrived at. We learn that an ultimatum has been sent in to the Peking Government with reference to the recent murder of Mr. Margary in Yunnan, and that the conditions therein laid down are sufficiently severe to satisfy those who have protested against the supposed inaction of our plenipotentiary. The Chinese will have twenty-four hours to make up their minds in, and as Mr. Wade, we believe, accompanied the document, there will be but small chance of evasion. The alternative will be such measures as we deem fit. Meanwhile Indian troops have, we learn, been ordered to the frontier of Yunnan. It is evident that the Home Government has made up its mind at last not to put up with half measures. The Home Government has, we understand, come to a decision on two important points. Kiung-chow is to be opened, and the Western trade route is, Mr. Margary's murder notwithstanding, to be properly explored. These decisions will commend themselves to all foreign residents in China, and our insistance on their being carried out will produce a healthy moral effect.

The *Gazette* contains the notification of the appointment of the Hon. W. H. Alexander to be a member of the Executive Council of this colony; the minutes of the meeting of the Legislative Council held on the 7th July; the texts of the Steam Launch Ordinance and the Ordinance for the more effectual protection of her Majesty's Naval Stores; and a proclamation that Her Majesty has been pleased to approve and confirm the Ordinance to provide means for enforcing good order and discipline in the police force employed in the Royal Naval Yard.

Heavy rainstorms have prevailed during the fortnight. The greatest fall was on the 23rd July, when 3·74 inches fell. The weather has been generally "typhoonish," and the barometer several times fell considerably. No unusual gale, however, was experienced, and it is now supposed that heavy storms have prevailed to the southward.

A committee meeting of the Hong Kong Humane Society has been held, when it was agreed to send round a circular to collect subscriptions. Captain McEwen was nominated General Superintendent, and a sub-committee was elected, consisting of Mr. McEwen, Captain Bradshaw (80th), Captain McMurdo, Mr. Gillies, and Mr. Wilson. The uniform agreed upon was a helmet, a blue shirt, and a life belt.

The P. and O. steamer *Gwalior* seems to be rather an unlucky vessel. Scarcely has she well got the better of the accident which befel her off the coast of Hainan, than she again meets with small disasters. Ere leaving Shanghai she was delayed by a breakage or defect of the air-pump bucket; this being put to rights she proceeded on her way, until off Swatow the bending of an eccentric rod caused another stoppage of eight or nine hours. Both the accidents were minor ones, and might have occurred to any steamer; but the public, of course, merely look at the fact of delay having three times been caused by engine-room defects, and, whether justly or not, get an idea that the engines are not in good working order.

A supply of bronze cent pieces has been received from England, and are to be obtained in exchange on application at the Treasury.

A riot has occurred at Kuk-fau (Canton), of which the occupants of a flower-boat were the objects. Two or three thousand people turned out, but no serious harm was done.

The Waising Lottery has again been "abolished" at Canton.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 7th August; the French mail from London July 2 arrived out on the 31st July. We take the following items of intelligence from the *Straits Times*:—

The visit of Sir William Jervois to the Native States on the East Coast of the Malay Peninsula was extended beyond the limits of the visits of our previous Governors, and promises to have more important results. A very considerable trade already exists between the States of the East Coast and Singapore, and the establishment of closer friendly relations between their rulers and this Government will tend materially to encourage the development of their resources. His Excellency received a hearty welcome at all the places he visited, and was enabled to glean from the rulers much valuable information as to the population, products, and resources of their respective countries.

A letter we have received from the P. and O. Company's Agent, Captain Kellock, contains a piece of information which, if we are not greatly mistaken, is new to the community, and yet one which should have been made known publicly and officially long ago. It is contained in the statement that, by the new Contract of August last year between the Postmaster General of England and the P. and O. Company, the Company's ships are only bound to start from and arrive at the terminal ports at the dates set forth, *there being no time mentioned for stoppages at intermediate stations*. Now if this is so, and we are of course bound to accept Captain Kellock's word that it is so, then here is another instance of the carelessness with which Lord John Manners drew up and sanctioned the new Contract. Under the old contract the homeward P. and O. steamers were bound to remain here in Singapore for the space of twenty-four hours. At all events, if this was not mentioned categorically in the Contract, there was a rule to that effect established somehow which was observed and generally understood and relied upon by the community.

Arrests continue to be made of the coolies concerned in the mutiny on board the schooner *Hawk*. Three were arrested at Rhio, and another has been taken at Johore Bahru. Three others who were at Johore at the time the information was received here had left before arrangements could be made to effect their arrest. The total number of coolies now under arrest is thirteen, and strong hopes are entertained that most if not all the remaining nine will yet be apprehended.

A fatal accident has occurred at Tanjong Pagar Dock. It appears that three Chinese painters were slung on a plank over the side of the steamer *Cybele*, lying in the dock, when suddenly the plank broke in two, and all three were precipitated into the stone basin of the dock. One was instantly killed, and the other two were severely hurt, and now lie in the hospital in a very precarious condition.

Among the passengers from Batavia is Miss Jenny Claus, the accomplished lady violinist, who, assisted by Mr. J. Roeckel, intends giving two or three concerts in Singapore.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—Cotton Fabrics: The market continued inanimate, prices ruled irregularly and dealers were still indisposed, or more probably unable, to purchase to any extent. Some transactions are reported in 8¼ and 9 lbs. Shirtings and in Velvets, but in all cases very low prices had been accepted by sellers. Business in Yarns and in other classes of Cotton manufactures had been unimportant. Woollens: A relatively good demand for plain Mousselines was recorded, although prices showed no quotable change. All other Woollens continued neglected. No improvement was expected for about another month. Metals: A large quantity of Belgian Iron had been thrown upon the market, and had exercised a depressing effect upon rates.

HIOGO-OSAKA.—Deliveries had been smaller than during the previous month, and with few exceptions quotations were either nominal or actually lower. Cottons.—Grey Shirtings: The bulk of the business had again been confined to common chops imported by Chinese. Turkey Reds: Prices had still further given way, and even at the decline there was no inquiry. Black Velvets were entirely neglected. Victoria Lawns: The market was at one period weaker, but had since recovered, and closed with firmness. Worsted and Woollens: Black Lastings, Figured Orleans, and Checked Lustres were almost unsaleable. Black Orleans were also for the moment neglected. Figured Mousselines de Laine were weaker, but the other descriptions continued saleable. Cloth: Some forced sales at auction are reported.

TIENTSIN.—The market for Cottons is quoted lower, with only a moderate business.

HANKOW.—A quiet trade has been done during the fortnight.

CHINKIANG.—Messrs. Spencer and Wolff write on the 21st July:—During the past week medium quality Grey Shirtings have been the only goods inquired for to any extent. Our dealers have of course taken full benefit of the lower range of prices established at Shanghai, but have not been induced thereby to make larger purchases than they otherwise would have done.

SHANGHAI.—The Chamber of Commerce Report says:—Cottons: Attracted by the low prices at which goods have been offered during the fortnight the Native dealers have been induced to buy largely on speculation, the transactions of this kind being chiefly in 8.4 lbs. Grey Shirtings and English Jeans. Grey Shirtings: 7 lbs. are rather lower, with small business. 8.4 lbs. have been sold at reduced prices, with a large business, and recently forced sales of one chop have been made to a considerable extent. Best quality have declined 5 to 6 candareens, with some inquiry freely met. For common there has been a moderate demand at slightly lower rates. Large sales of mildewed common, 8.4 have taken place. The prices realised were high compared with the value of sound goods. Heavy Shirtings are unchanged. White Shirtings: Very small business at a reduction. Drills: Quiet and weaker. English Jeans have been offered at low rates, and a large business has resulted. English Sheetings are 1 mace lower. T-Cloths: Common 6 lb. and 7 lb. are quoted slightly under the last prices given. Mex. 6 and 7 lbs. unchanged, business limited. Fancy Cottons: Quiet

Digitized by Google

with prices unchanged. Woollens show some improvement. Medium Cloths, Spanish Stripes, Camlets, and Long Ells have been in good demand at higher rates for Stripes and Long Ells. Lastings and Crape Lastings, unaltered. Common Figured Orleans have declined 3 mace, the better quality being quoted the same at the close as last fortnight. Plain Orleans unchanged, but strong.

FOOCHOW.—Sales: 250 pieces 8.4 lbs. Grey Shirtings, at $2.65 per piece. Also some sales of Lead at $9 against Tea.

HONG KONG.—There had been no arrivals during the interval besides the mail steamers. As might have been expected from the tone of advices from home the market continued dull and declining, with an increasing desire on the part of importers to keep moving supplies, while the Chinese, who were equally informed of current events, make the most of their opportunity, buying merely for their immediate wants, and then only when prices suit them. Advices from the North continued without any encouragement, and at the outports there had been no improvement either in demand or prices.

BATAVIA.—The market continued extremely dull and inactive.

SINGAPORE.—In the last report a general dulness in the demand for imports was advised; so far from any improvement having since appeared, the demand had further fallen off during the fortnight, and the market closed quite lifeless. Stocks of most Cotton staples were moderate, and quotations scarcely showed a change.

PENANG.—There had been no improvement in the import market. Demand generally had been exceedingly quiet, transactions very limited and prices weak, although some importers were at the close holding for improved rates.

EXPORTS.

TEA.

YOKOHAMA.—Large supplies had come forward, and holders, rendered anxious to sell by the knowledge of an excess in the first crop, had given way $1 to $2 per picul. This had led to a large business, and settlements since the 7th July amounted to 15,000 piculs, the bulk being composed of medium to fine grades. Choice Teas were still very scarce, and nominal. Rates of freight, £2 15s. to £3 for sailing vessels, and £4 to £4 10s. for steamers. The shipments of Tea from this port, since the 7th July, amounted to 1,211,238 lbs. Quotations: Common, $20 to $22 per picul; good common, $23 to $25; medium, $26 to $28; good medium, $29 to $31; fine, $33 to $35; finest, $36 to $38. Export from 1st May to date, 4,152,089 lbs., against 3,760,872 lbs. during corresponding period of last season.

HIOGO-OSAKA.—The Chamber of Commerce Report says:—During the month business has continued active, and until the departure of the mail of the 5th July the quotations last given were fairly supported. After that steamer left, however, holders were obliged to concede to some extent to the views of buyers, and prices quickly dropped $2 or $3, until fully good medium was procurable at $30. The market has since continued weak, stocks having accumulated considerably. The latter are now estimated at 5,700 piculs. Settlements are reported at 6,500 piculs. Total settlements to the 16th July are 21,000 piculs, against 21,000 piculs at the corresponding period last year.

HANKOW.—Messrs. Evans, Pugh, and Co.'s Report says:—Operations in second crop Teas at this port since supplies came to market have been on a more extensive scale than in any previous year, and shipments to Shanghai for sale there consequently less. Arrivals during the past fortnight have amounted to about 44,000 chests; settlements on this market 23,000 chests; and shipments to Shanghai on Chinese account to 12,000 chests. Prices, under the influence of telegraphic advices received as to sales of new Teas ex Glenartney, have gradually declined, and most classes of Oo pack and Oonahms may be quoted Tlr. 1 to 2 per picul lower, while Oanfas also show better value. In Seangtams no transactions have been reported. Second crop Chon-sow-kais have sold at 1/2 to 1/4 per lb., Oopacks at 1/1 to 1/4¼ per lb., and Lie-lings at 1/0 to 1/2¾ per lb. These prices are, when the rates of exchange and freights now ruling are taken into consideration low, but the quality of the Teas now offering is inferior. Quotations are:—For fair to medium Oopacks Tls. 15.50 to 20.00, against Tls. 17.00 to Tls. 24.50 at same date last season; Oanfas Tls. 17.00 to 24.00, against Tls. 18.00 to 24.50; Oonahms Tls. 12.00 to 17.25, against Tls. 13.00 to 19.25. Settlements to date are:—355,023 chests, against 285,440 chests in 1874; shipments on native account, 76,293 chests, against 113,710 chests in 1874; contracts, 804 chests, against 4,020 chests in 1874; stock is estimated, 14,452 chests, against 6,097 chests in 1874. Total, 446,572 chests, against 409,267 chests in 1874.

KIUKIANG.—Black Teas: The settlements during the fortnight amounted to 712 chests only. Total arrivals 133,130 chests; no stock. Green Teas: Three chops (650 half-chests) had arrived and gone forward to Shanghai.

SHANGHAI.—Black: A considerable business had been transacted during the fortnight, chiefly in second crop teas. Since the receipt of advices from London reporting losses on early shipments, however, there had been rather less disposition to do business. At the close the market was quieter, and prices had a downward tendency. In fact, some of the latest settlements showed a decline of a tael a picul compared with those made about ten days previously. The bulk of the second crop tea had arrived; its quality was generally condemned. The export continued in excess of last season, and was going forward almost entirely by steamer; only two sailing vessels had cleared for London against six to same date last year. Settlements for the fortnight, 29,831 chests; reshipments on owners' account, 466; stock, 30,400 chests. Quotations: Hohow, common to fine, 10½d. to 1s. 10¾d.; Oonam, common to fair, 11d. to 1s. 2d.; ditto, fair to good, 1s. 2d. to 1s. 4½d.; Ningchow, medium to fine, 1s. 3¾d. to 1s. 9¾d.; Oopack, fair to good, 1s. 1¼d. to 1s. 4½d. Green: The market for Pingsueys was opened on the 9th July by the shipment of three chops to England. Since then they had been in moderate demand, principally for the same market, at prices about 25 per cent. below last year's opening rates. Teas from the Taiping district had also found buyers at figures which showed the same decline on last season's quotations. According to latest advices much cheaper purchases of old Teas could be made upon the home markets. New Teenkais had been shown, but the ideas of teamen and buyers were so far apart that none had been bought. In the cup they were no better than last season, but in make and colour there was an improvement. The following were about the prices paid: For Pingsuey, 5,231 half-chests, at 27 to 31 taels per picul; Taiping, 2,198 half-chests, at 24 to 30.5 tls. per picul.

FOOCHOW.—Messrs. Westall, Galton and Co.'s Weekly Letter says:—During the past week, business has been on much the same scale as previously reported. Buying has continued for the Colonies to a more limited extent, and the bulk of the purchases have been for the London market. Congou: The general quality of the second crop, teas is disappointing, but many are clean and well flavoured. Heavy arrivals have continued, and settlements, with a few exceptions, have been confined to them. During the last few days there has been an especially active inquiry, and though no decided advance in prices can be quoted teamen are firmer and the market closes with a hardening tendency. Souchong: Only a trifling business has been doing at former rates. Oolong: Settlements show no change. Flowery Pekoe: But one parcel has changed hands. The supply of this description is now almost exhausted. Scented Teas have continued to be taken to about the same extent as last reported. Prices have ruled decidedly easier, but the Teas are inferior to last season's, and greatly wanting in scent.

AMOY AND TAMSUI.—Congou: Settlements during the fortnight amounted to 8,500 packages, at $19 to 26. The market was cleared of the better kinds, and the parcels still on offer were mostly undesirable at current rates. Second crop Teas had been arriving freely, but the quality thus far was not reported favourable. Oolong: The market for this description was yet open, and no settlements were reported. Arrivals 33,908 packages, against 95,699 packages same time last year. Formosa Teas: The market at Tamsui was somewhat quieter at date of last advices. Second crop Teas were coming in slowly. For good to superior cargo grades Teamen were asking rather high rates, but with present discouraging advices from New York some considerable concessions will have to be made to induce business.

CANTON.—Messrs. Deacon and Co.'s Report says:—The remarks in our report of the 15th July have again to be repeated in our present issue, advices of the home market continuing to be of a very unsatisfactory character; the firm antagonistic position taken up by buyers and sellers has been maintained on both sides, and the result has been a fortnight's business of the most trivial character. Teamen have shown no disposition to meet buyers, and seem loath to realise that it is for them to give way before business can be resumed. Congous: A few settlements have been made, and in some instances prices have been a trifle in favour of buyers. A few shipments have been made from Macao, but the market there is without change. Scented Teas: There has been no business during the fortnight in Capers; the 2,000 boxes reported below being a settlement made previous to the issue of our last report, though not made public till after the departure of the mail. A few small parcels of fine Pekoe have attracted the attention of buyers, and these have been taken at former rates; of other grades no transactions are reported. Canton Greens: Settlements as given below have been made for the Colonies.

SILK.

YOKOHAMA.—Only a limited business had been done. Settlements of "new crop" had been about 40 bales, purchased at $360 to $380 per picul (in London equal to a cost of 13s. 10d. to 14s. 6d. per lb., and in Lyons f. 38 to f.40 per kilo.). A marked improvement in the quality was apparent, as compared with the two first parcels. About 60 bales of old silk had found buyers, included in which is a parcel of "common and inferior" Hanks, the price reported for same being $330 per picul. Arrivals of new Silk had not exceeded 50 bales, as producers, hitherto, had reeled their silk more to meet the requirements of native manufacturers than foreign buyers. Stocks of new Silk were almost nil. Settlements, from 1st July to date, 150 bales, against corresponding period —season 1874-5, 300 bales; do., 1873-4, 650 bales; do., 1872-3, 1,100 bales. Stock, 200 bales, old silk.

SHANGHAI.—The fortnight had witnessed hardly any alteration in the market. Good Tsatlees, perhaps, showed some little weakness, and (above a cost of Tls. 300 per picul) could be had at a reduction of Tls. 5 per picul, but in the commoner grades of both Tsatlees and Kiahings, rates remained almost precisely as they were, and in these sorts the bulk of the business transacted had taken place. Continental buyers had taken by far the largest quantity of silk. Arrivals continued to come in freely, but the steady demand prevented holders from feeling any pressure, whilst, from all accounts, it would now seem that the export would not exceed that of last season. Settlements for the fortnight, Chinas, 5,000 bales. Total settlements since 1st June, 1875, 19,600 bales; against 1874-75, 18,500 bales; 1873-74, 12,000 bales. Comparative unsold stock on this market on the 24th July, 1875, 16,000 bales; 1874, 14,000 bales; 1873, 9,000 bales.

CANTON.—Messrs. Deacon's Circular says:—Contracts for third crop, to extent of 600 bales have transpired during the past two weeks, in addition to which 280 bales have been bought on the market. Contract prices are said to range from $320 to $327½ per picul for No. 4 Tsatlee, and the quotation for that classification is now $330 per picul. The third crop so far, has not come up to general expectation, and all that can be said in favour of it is that the quality shows a slight improvement on that of immediately preceding yield. It is to be hoped however that subsequent arrivals will turn out better. One-half of the crop is said to be yellow th read. The Native Guild have promulgated a rule, which is to be in force on and after first proximo, to effect that in future Silk be tied up in the seller's shop, instead of in Foreign godowns. It is a matter for regret that a firm stand is not being made against such an arbitrary proceeding on the part of Chinamen, when the decided action of a few buyers would render abortive such dictation to foreigners. Loong-kongs are not in favour, and no settlements are announced.; Long-reels, 80 piculs have been purchased for India; Re-reels have been in trifling request, and only 100 boxes are said to have been contracted for lately. The quality of most descriptions is at present indifferent.

FREIGHTS AND CHARTERS.

From YOKOHAMA.—To New York, by sailing vessel, £2 15s. per 40 c. feet.

From SHANGHAI.—To London, by steamer, £3 10s.; sailing vessel, £3 per ton; to New York, per steamer (via London), £5 10s.

From FOOCHOW.—To London, by steamer, £3 10s.; sailing vessel, £2 10s.

From HONG KONG and CANTON.—To London, by steamer, £3 5s. to £3 15s. per ton of 50c. and 40 c. f. respectively; sailing vessel, £3; to New York, £2 10s. per 40 c. f.

From BATAVIA.—To Amsterdam, coffee 100f., tobacco 100f., tea 120f., indigo 90f., spices 110f.

From SINGAPORE.—To London by sailing vessel, £2 7s. 6d. dead weight £2 17s. 6d. light freight; per steamer:—Tin, 15s; measurement goods, £4.

From PENANG.—By sailing vessel expected from Singapore to fill up for London:—Bag sugar, £2 12s. 6d.; basket do., £2 15s.; pepper £3 5s.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Sept. 7, at Astoria, O., from Hong Kong, Dilharree; 8, at Rotterdam, from Banjoewanjie, Zuid Holland; at Falmouth, from Akyab, Alcedo; at Queenstown, from Rangoon, Venezia; 6, at Amsterdam, from Macassar, Jan Van Brakel; 8, off Dungeness, from Java, for Amsterdam, India Packet; at Falmouth, from Rangoon, Gustav Adolph, Sarah and Emma; 9, Burmah, from Maulmain, Lasker; from Rangoon, Olga R., Felicina Chiazzo, Bianca Borzone; from Akyab, Lofvald; at Queenstown, from Rangoon, Kate Covert; 9, at Falmouth, from Java, Mutlah; from Samarang, Bjorgvin; 10, at London, from Shanghai, Craigforth (str.); at Falmouth, from Akyab, Gefion, Mina, Frederic, Albion; from Rangoon, Tranmere; at Liverpool, from Manila, John Nicholson; 9, at Boston, U.S.; from Singapore, Kingdom of Saxony; 10, at London, from Colombo, Oxford; at Falmouth, from Akyab, Guinevere; 11, from Bassein, Ydun; from Rangoon, Madre; 12, at Falmouth, from Java, Hawkhope; 13, at London, from Foochow, Glamis Castle (str.); from Shanghai, Altona (str.).

MISCELLANEOUS.—Gibraltar, Sept. 5, passed, from Batavia, for Nieuwe Diep, Prins Hendrik (str.). Suez, arrived Sept. 8, from Foochow, for London, Egeria; 10, Sea Gull, Port Said; arrived Sept 10, from London, for China and Japan, Glenfalloch. St. Helena, arrived Aug. 13, Moskwa, from Akyab, for Havre; Famiglia Prima, from Rangoon; 14 Emma F. Secor, from Akyab; 16, Eliza A. Kenny, from Rangoon, all three for Falmouth; Pactolus, from Bassein, for Bordeaux; 17, St. Kilda, from Zebu, for Liverpool; Dorothea, from Rangoon, Nereid, from Akyab, both for Channel; 18, Justitia, from Batavia, for New York; 20 W., G. Russell, from Akyab, for Channel; Shield, from Colombo for London.

DEPARTURES.—Sept. 7, from Cardiff, for Hong Kong, Christian; from Southampton, for Batavia, Conrad (str.); 5, from Amsterdam, for Java, Betsy; 4, from Hamburg, for Hong Kong, Iphigenia; 9, from London, for China and Japan, Lotus (str.); 10, from Amsterdam, for Batavia, Jacob Roggeveen; 4, from Barcelona, for Manila, Aurrera (str.); 10, from London, for Shanghai, Viking (str.)

SPOKEN.—Yvonne, from Batavia, to London, Aug. 16, 29 N., 32 W.; Dordrecht II., from Rotterdam, to Samarang, July 25, 11.44 N., 26.34 W.; Albuera, from London, to Yokohama, Sept. 2, 46 N., 33 W.; Nelly, from Amsterdam, to Macassar, July 26, 9 N., 26 W.; Buston Vale, from Cardiff, to Galle, July 31, 9.15 N., 24 W.; Tromp, from Java, to Nieuwe Diep, Aug. 8, 24 N., 37.30 W.; Gaule, from Reunion, to Falmouth, Aug. 18, 29 N., 36 W.; Ida Gertrude, from Sourabaya, to Falmouth, Aug. 29, 42 N., 31 W.; Friesland, from Amsterdam, to Samarang, Aug. 23, 41 N., 68 W.

CASUALTIES.—St. Helena, Aug, 21.—The St. Kilda, which arrived here on the 17th inst., from Zebu (sugar and hemp), and proceeded for Liverpool, had experienced a succession of gales from lat. 32 S., lon. 32 E. to the meridian of the Cape of Good Hope. On July 24, in lat. 32 S., lon. 31 E., it blew heavily from W.N.W. to W.S.W., and the vessel, after losing upper fore-topsails and main-topgallantsail, was hove-to for fifteen hours; very heavy sea. The gale continued, but less heavily, for thirty-two hours more.

LAUNCH.—On the 7th inst. Messrs. Lobnitz, Goulborn and Company successfully launched from their building yard, at Renfrew, a handsome screw-steamer of about 260 tons B.M. and 50 H.P. nominal, for a Singapore firm. The ceremony of naming the vessel the Pontianak was performed by Mrs. John Campbell, wife of the company's superintendent.

THE SEIZURE OF THE "CARISBROOKE."

(To the Editor of the *London and China Telegraph.*)

SIR,—In reading through the comments which you make upon the above case, and in the general bearing of which I fully agree, I observe that you do not draw attention to one very important point in connection with the subject, nor do I observe that it has been noticed by any of your contemporaries. By the regulations in force among the Chinese, the local authorities making a capture, in consequence of smuggling or evasion of Custom-house regulations, receive the larger portion of the fine or of the value of the property so seized; so that the judge of the case at Canton, that is the Hoppo, is the party directly to be benefited by a decision against the ship. I think this is a point of considerable importance, and one upon which the public at home ought to be correctly informed.—Your obedient servant,

London, Sept. 6, 1875. A CHINA MERCHANT.

The London & China Telegraph.

LONDON: MONDAY, SEPT, 13, 1875.

THE REPORTED "SETTLEMENT" OF THE CHINA DIFFICULTY.

THE *Times* of the 7th inst. contains a telegram, which, if it prove founded upon correct information, is of great importance, but in the correctness of which, as a whole, we can scarcely bring ourselves to believe. It is stated that Mr. WADE has consented to a settlement of the difficulty arising out of the murder of Mr. MARGARY upon the bases of Yunnan paying an indemnity to the family of Mr. MARGARY, a special Chinese Ambassador being sent to London, the Chinese promising to punish the offenders, and the trade route between Burmah and Western China being opened. That these terms are such as it is very likely the Chinese have proposed we have only too much reason to believe; but it is extremely difficult to understand, until further information arrives, how the British Minister has been induced to consent to them. With the exception of one point, the opening of the trade route, they are all of them open to grave exception, and it is too much to be feared that, following his instructions too literally, our Minister has been disposed to give in, or at least abstain from immediate insistance, upon other points in order to obtain the concession of the trade route. That compensation should be made to Mr. MARGARY'S family, if they care for compensation or are in any want of it, is only reasonable; but no such suggestion should have been entertained for a single moment before the punishment of the offenders had not only been promised but accomplished; otherwise we are simply encouraging the Chinese in the idea that every possible offence, insult, or disregard of international obligations can be compensated for by a money payment. The appointment of a special Ambassador to London under the existing circumstances is also open to very grave objections. There can be no other object in it than to gain time, and as we pointed out when the step was rumoured as likely some time ago, to induce the Home Government to assent to terms, which it is well known a Minister on the spot would not assent to. Past experience only too surely makes us know that the promise to punish the offenders is simply worthless; that the probability is nothing will be done towards it, and the certainty that the leaders will escape with only the appearance of being punished, and after being banished to Mongolia, will in a short time reappear in the Chinese Government service in higher positions than they occupied before—as has already frequently happened in such cases. In addition to this the recognition of a special Ambassador under circumstances such as the present must have the effect of depriving our ministers in China of even the little influence which they still retain. As long as the Chinese can gain time they will hope for anything, and, what is more, by force of lying and misrepresentation, will generally succeed in obtaining a great deal. There can, therefore, be no greater mistake than encouraging them to feel that, whatever the British Minister may say, his words are never likely to be immediately followed by action, and that, come what may, there is still always the chance of indefinite delay being obtained by the appointment of a special ambassador to London. The opening of the trade route is of course the one point gained, but even in regard to this there is a condition which may make it of comparatively little practical use. The everlasting and ubiquitous le-kin duty again obtrudes itself. Of course, it is to be hoped that some satisfactory regulation will be arrived at; but considering the difficulties we have experienced on this score in other parts of China it is impossible to be too sanguine. Still, we are free to admit that in the consent of the Chinese Government to open the new trade route a point has been gained, but it is a question whether in the concessions made on our part, in the acceptance of half promises in place of immediate action towards finding out and punishing those concerned in the murder of Mr. MARGARY, we have not bought this concession at what may ultimately prove to be a very dear price.

RUSSIA AND KHOKAND.

IN our article last week respecting the present position of the Ameer of KASHGAR, we casually alluded to the operations undertaken by the Russians in the Khanate of Khokand and their determination to suppress the insurrection there. From information since received from St. Petersburg we learn that at the very time at which our remarks appeared the Russians were actively preparing for a battle which took place on the 4th. Their attack was made upon 30,000 Khokand troops, who had taken up a strongly-entrenched position. The Russians were completely victorious, and carried the fortress of Machrain by storm. General KAUFFMANN, telegraphing to the CZAR on the 6th inst., further states that the enemy was pursued a distance of fifteen versts, and that many of them were either drowned in the *Amu Darya* (? *Sir Darya*), or killed, their total loss being very considerable. The Russian commander adds that he intends to continue his advance upon Khokand as soon as the supplies of war *matériel* reach him from Khojend. The intelligence just received will, doubtless, make YAKOOB KHAN'S envoy, who is now at St. Petersburg, more than ever anxious to accomplish the purpose for which he was sent from Kashgar.

A CORRESPONDENT, whose letter we insert elsewhere, calls attention to what is undoubtedly a very important element in connection with the proceedings resulting from the seizure of the British steamer *Carisbrooke*, which were recently noticed in these columns. The fact that the Hoppo, who sat as judge in the Court for the settlement of the question, was the person who would be directly benefited by the seizure is certainly somewhat startling to English ideas of legal proceedings, though it is nothing much out of the way to those who are acquainted with the anomalies attaching to what it is almost a satire to call the administration of justice in China. Allusion has already been made to the fact that Mr. BROWN, the Englishman who assisted in the seizure, would be pecuniarily benefited by it, and this fact is in some points of view open to objection, though of course not such serious objection as is to be raised upon similar grounds in regard to the Hoppo. It is obvious that the whole subject of our position in respect to Custom-house matters, seizures, and confiscations requires to be re-adjusted, and the present occasion ought certainly to be availed of to place it upon a more definite and satisfactory basis.

A CURIOUS error is fallen into in a recent issue of the *Globe*. The morning papers published a telegram to the effect that Mr. WADE had determined for some time to stay at Tientsin; and, commenting upon this fact, the paper above-named considered it indicative of the re-establishment of peaceful relations. The *Globe* is evidently not aware that the ordinary place of residence of the Foreign Ministers is at Peking, and that, so far as it afforded ground for any conclusion, the fact that Mr. WADE had determined to stay at Tientsin instead of at the capital, went to show that relations were becoming more, not less, unsettled.

A TELEGRAM received at the office of the Chinese Maritime Customs, Westminster, from Mr. HART, states that KUO-SUNG-TAO, formerly Governor of Canton, and HOU-CHIEN-SHEN, a son of the President of the Board of

Digitized by Google

Works at Peking, have been appointed by the Chinese Government to proceed on a special mission to England.

HIS EXCELLENCY HERR VON EISENDECHER, the new German Minister to Japan, has left for Yokohama, *via* New York and San Francisco, accompanied by the Secretary of Legation, the Baron VON GUTSCHMID.

THE NEWS FROM PEKING.

(THE TIMES.)

The telegram from our correspondent at Shanghai encourages the belief that the cloud which lately hung over our relations with China is dispelled. It is announced that an indemnity will be paid to the family of Mr. Margary, and that the guilty parties will be punished. By way of guaranteeing the performance of the promises thus made a special Ambassador is to be sent to us from China: and if these pledges are redeemed in any reasonable fashion the Yunnan outrage will have been satisfactorily settled. The telegram from our correspondent does not stop with this news, good as it is when taken alone. It tells us in addition that a trade route is to be opened between Yunnan and Burmah, and an arrangement made to remove the standing difficulty arising from the attempts to levy internal Chinese taxes on goods of English merchants. The object of Mr. Margary's mission will thus be attained at the same time that expiation is made for his murder. The fulfilment of the agreement will dissipate every cause of dissatisfaction with China and the Chinese Government and a new era of peace and friendship will be opened. Our satisfaction at the reported removal of our grounds of complaint against China is, of course, heightened by the circumstance that we were prepared for news of a directly opposite character. Those who are least given to gloomy views of the future, and have the strongest dislike of that sentiment of aggressive hostility which is the normal mood of some minds towards independent nations of the East, were slowly reconciling themselves to the unpleasant necessity of another war. The prospect was in the highest degree gloomy, but we were ready to accept our fate. There are rules of policy which must be enforced whatever the cost. We hope the relief from this reluctant sense of obligation which the news from Shanghai gives us does not lead us to over-estimate the probability of its truth. The confidence we feel in the accuracy of our correspondent's communication is, however, justified by the reflection that he has never been disposed to be sanguine of a peaceful settlement of the Yunnan outrage, and would, therefore, not be hasty in accepting the report of such a settlement. It is just three months since Colonel Browne arrived in Shanghai upon his special mission to obtain reparation for the outrage, and the English settlement was inclined, as often happens, to complain that there had not been sufficient energy shown in insisting upon a prompt settlement. The result will prove that the method pursued by the responsible Envoy of the Crown was the best. What is reported to have been obtained will, when duly performed, satisfy all our demands, the only point in which the settlement can be deemed to be in any degree faulty being probably capable of explanation upon the receipt of fuller particulars. It is said that Yunnan will pay an indemnity to the family of Mr. Margary, and it is plainly fitting that the Province where the outrage was perpetrated should be compelled to make such reparation. But the payment of the indemnity to Mr. Margary's family ought not to be in any way dependent upon its being raised in Yunnan. The Imperial Government of Peking should make this contribution at once, taking such measures as it may choose for recovering it from Yunnan. The necessary brevity of a telegram from the other side of the world, is, however, probably answerable for the doubt whether the Imperial Government has assumed the duty of making reparation for Mr. Margary's murder. It will be a matter of greater difficulty to verify the punishment of those who are implicated in the murder, and the mission of the Ambassador who is to visit us may perhaps be more immediately connected with this part of the settlement. Proof of actual participation in the crime is easily made difficult, especially when the crime has been committed in an unexplored inland Province of a country like China, and months have passed between the event and the attempt to bring the guilty to punishment.

The statement that a trade route will be opened between Burmah and Yunnan is scarcely less important than the agreement to make reparation for Mr. Margary's murder. The necessity for obtaining reparation was, indeed, urgent and could not brook delay, while we could easily have waited some time longer for the new access to the Flowery Empire. Yet it must be remembered that the mission which proved so fatal to Mr. Margary had for its object the formation of this route, and it is most proper that the opening of it should be made part of the settlement of the outrage. It may perhaps be doubted whether the wealth of the Province of Yunnan corresponds with the glowing estimates which have been formed of it; but it appears certain that it supports a large population, and though the transit of goods through Burmah must always be expensive, the comparative shortness of the route must make it economically advantageous. The distance from Canton is considerably greater, besides which the increased length and risks of sea-carriage to Canton must be taken into account. We need not dwell on the political advantages which may be expected to be secured by the creation of a roadway for trade which will make the English merchant known on the western frontier of China. Although the present difficulty is, as we hope and believe, on the point of being arranged, our relations with China must be more or less insecure for some time to come; and our best security for peace with China is to be found in a widespread sense of our influence and power. The visit of an Ambassador from the Imperial Court may be welcomed as a means of conveying a just impression of our character to China, and it is to be hoped that the Envoy will remain long enough to be something more than a subject of talk and a spectacle for three weeks of the season. The extraordinary change in national policy and character which has been consummated in Japan during the last few years provokes the question why some similar conversion has appeared impossible in China, and stimulates the hope, perhaps delusive, that at any moment it may be on the point of being accomplished.

(THE STANDARD.)

We could have wished that some more definite reparation had been insisted on for the Manwyne murder, which was not so much an outrage on Mr. Margary and an injury to his family as a deliberate and unprovoked insult offered by the Chinese authorities to this nation. The principle of requiring a personal atonement for offences of this kind, which are not personal but national, is in all dealings with Oriental countries a bad one, and in the case of China, as we ought to know by experience, peculiarly unsatisfactory and dangerous. The Chinese Government is never at a loss for expedients by which, while complying with the letter of its engagements, it is enabled to defeat their spirit, so as to appear in the eyes of its subjects as having succeeded in humbling one of the barbarian nations with impunity. The authorities never have any difficulty about punishing the persons who are charged as the agents of the outrage, although the outrage itself may have been, as in this case it certainly was, committed at their own instance and probably by their positive command. The local governor provides the necessary number of criminals out of the gaols, or among his personal enemies, and as it is always impossible to say whether these are the real culprits or not, the nation aggrieved has no resource but to accept this satisfaction. In the present case we may demand, indeed, that the governor of the province and the general in command of the troops should be punished; but it is always in the power of the Chinese Government to shield them by throwing the blame upon some of their obscure subordinates. The principle of making a money compensation for the family of the victim a leading feature in our claim is also a most objectionable one in dealing with Oriental nations, and especially with the Chinese. The family of Mr. Margary have their claim for such losses as they may suffer through his assassination not upon the Chinese but upon the British Government. It is our duty to take care that those who risk their lives in the public service are protected, and it seems undignified to call upon the Chinese to pay that which is a charge upon ourselves. Such an atonement as this is one which it is always easy for a Government like that of China to make, without any loss of *prestige* in the eyes of its subjects, and is therefore no proper satisfaction at all for that which is not an individual but a national injury.

The promise to open a trade route between Yunnan and Burmah is a substantial concession, but it should not be allowed to have any connection with the case of Mr. Margary. It is not a very happy commencement for the trade by this new channel between England and China that it is to open, not because the Chinese are convinced of its advantages, but because Mr. Margary has been murdered. This is to extort by way of punishment what should come of grace and for the mutual benefit of both nations. Had Mr. Margary not been murdered it would still have been our duty to urge upon the Chinese Government the good policy of opening a road through Burmah between their country and India. By making this stipulation a part of the price of blood it is to be feared that we shall not greatly recommend the new arrangement to the Chinese, who ought to have been convinced of the advantages of trading with England without an engagement which in their eyes must appear penal. The value of the concession will in any case depend upon the spirit in which the Chinese authorities on the frontier carry out their instructions, as well as upon the co-operation of Burmah. As we know by experience, it is not enough to obtain from the Chinese a formal licence to trade with a part of their Empire in order to have it thrown open to commerce; foreigners have had for some years the privilege, by treaty, of travelling through any of the Chinese provinces, and yet those who attempt to avail themselves of it do so at their personal peril, and, as in the instance of Mr. Margary himself, are exposed to loss of life. Unless we are to have in the future some better security for the observance of this clause in the agreement than we have had hitherto, it is destined to remain a dead letter, like every other compact which we make with the Chinese, and which it is inconvenient to them to keep. The fact that one of the terms of the new engagement stipulates that a Chinese ambassador shall be sent to England is a proof of the small regard which China pays to treaties, and of the impunity with which she has been allowed to break them. From the year 1839 down to the present time we have had no fewer than four treaties with China, not counting this last, and there is not one, we believe, which did not contain a provision requiring the exchange of ambassadors. Except for a short period in 1860, when Chinese commissioners were sent over to this country, with an equivocal commission and certainly of inferior rank, there has been no attempt to observe this condition. In other respects our experience of Chinese diplomacy is not such as to tempt us to put much faith in treaties made with that nation. It seems hopeless, indeed, to expect that the Chinese Government, which has been more than six months coming to a decision upon the Margary affair, will adhere to any terms which it is possible for it, by any chicanery or lying, to evade. It is doubtful whether it is ever wise to treat such a Government as one to be bound by the moral laws of honour and good faith in force among civilised nations—whether we ought not to have confined our negotiations to a peremptory demand for satisfaction for the Manwyne outrage, instead of permitting ourselves to embark in a general negotiation as to the terms of our future mutual intercourse, and thus permitting the Chinese authorities to escape the very penalty which they are most anxious to avoid, but which is the most effective of all punishments, namely, humiliation in the eyes of their own subjects, as well as of those neighbouring countries which, by their intrigues, have been encouraged to defy and insult the British power.

THE HOUR.

We do not think it is necessary now to uphold the view that the Chinese will not keep their promises. No doubt all their proceedings will be characterised by their usual procrastination, and they will require to be kept up to the mark. But the influences which have

Digitized by Google

wrung from their Government the present terms will be equally available and potent three months hence; nor can it be doubted that the despatch of a Chinese Embassy to London will greatly tend to keep matters in the right grooves. The Chinese have no particular object to gain by defying our power in their seas. If they had they would have chosen this opportunity of standing out against Mr. Wade's demands. As they have conceded everything, it is a reasonable inference that, however they might like to cross our path, they do not feel themselves strong enough to do so. And we know of nothing in the condition of China, either in the shape of money or other material resources, which would enable her to hope that six months hence she will encounter our arms with better hope of success than at present. On the whole, then, we are inclined to regard the result of Mr. Wade's negotiations as highly satisfactory. Time has been wasted, but the upshot is that we have got all we asked. Of course, it rests with ourselves whether these terms shall remain a dead letter or whether they shall be rigorously carried out. But we have no fear that either the Indian Government or the Home Government will be content with mere words, or that they will fail to exact both the letter and the spirit of the bond.

OUR POSITION IN CHINA.

(SPECTATOR.)

Just at this very moment, when the warlike or patriotic party is in power, and is inflated with new successes, and is anxious to build up its reputation, it becomes necessary for England to make the Peking Cabinet submit to a visible and most humiliating defeat. It is necessary, and it is evident from the Queen's Speech that it has been resolved, to demand from China public redress for the murder of Mr. Margary at Manwyne. That seems to England most expedient, and is undoubtedly both just and necessary, but the way in which it strikes a Chinese Cabinet is a very different one. "Here," they say, "are these intruders, who already, under pretext of trade, have become so dangerous on our East Coast, entering on the same pretext within our Western frontier, hitherto sealed up. They have been checked, very properly, but without our orders, by a brigand leader, whom we have just adopted, who is naturally anxious to prove his energy and his zeal, and who has performed important services in the West. Now we are called upon publicly to disavow all connection with this act; to issue a public Commission of Inquiry, as into a crime; to offer a deep affront to the King of Burmah, just as he has submitted; to degrade and perhaps execute the brigand, who is a valuable instrument; to open our Western gate for ever—for if European life is safe there, it will stand open—and above all, to show to the people of the Western provinces, where we are supposed to be divine, that we cannot resist orders from the Europeans. Every Chinaman in the Empire knows that but for pressure, we should do nothing. Is there no way out of such a necessity?"

We are no alarmists in Chinese matters, for we recognise in Peking, as in Constantinople, though not in the same degree, the spell which the West has laid upon the East—the dread of defeat, which even the most resolute cannot always shake off—and know therefore that at the eleventh or the twelfth hour the ruling minds in Peking may decide to begin temporising again, but certainly here are sufficient materials for an explosion, ready stored. And we do not feel certain that the materials for extinguishing it are ready stored also. It is true that our power to act on China after an interval is very considerable indeed. The fleet in Chinese waters is very strong, and we might rely in a dangerous emergency on that of France, and not improbably on those of Germany and Holland also. The Viceroy of India, after an interval, could spare 10,000 Queen's troops, 20,000 Sikhs and Madrassees, and adequate artillery, and could replace them by drafts on Malta, Gibraltar, and England, where we are not quite so badly off for men as Lord Elcho's "Man in the Street" is accustomed to believe. There are, too, about 1,000 soldiers in Hong Kong or afloat, and possibly as many Marines, who could be used to prevent a massacre,, if the Chinese commenced hostilities in their usual way with a mob-riot. But it must not be forgotten that India and China, though Englishmen habitually lump them together, are more distant from each other than America from England; that the Indian Viceroy, head though he be of a military monarchy, does not own a ship; and that the Chinese can always, if they please, reduce us to a land march on Peking. They can block the rivers. Any serious expedition must involve a great loss of time, much and sudden expense, and a movement of troops for which we always seem unprepared. Time and distance are against us, make everything expensive, and compel us to run risks which, with all we now know of Chinese force, deserve most serious consideration. We could not provide against a reverse—and it is vain to say a reverse is impossible—without an effort which, in expenditure at least, would be felt even in this country, where it should not be forgotten that a serious war with China taxes every household, and is felt in the accounts of every poor-house. We are deprived of half our natural strength in China by a geographical embarrassment which does not affect Russia—the Czar owning Manchooria—and the absence of which makes Japan, a tenth-rate power, more formidable to China than ourselves. We have no base of action sufficiently near, no Malta in the China seas, and it is this defect which, as we conceive the situation, our Foreign-office should try to remedy. It is an odd fact that had the contingency which made the *Pall Mall Gazette* so gloomy actually occurred, and England been compelled to fight Spain and China at the same time, we might have struck a terrible blow against both at once by seizing the Philippines, the natural base for a European Power compelled to be formidable in Eastern Asia. That chance, however, did not occur, and as neither Spain nor Great Britain would consent to the exchange of Gibraltar for the islands, the Foreign-office must look elsewhere for the necessary foothold. Lord Derby knows, and we do not, whether the most most attractive of all plans is feasible,—whether, that is, it is possible to form such an alliance with Yeddo as would virtually make of the Japanese "samurai," or feudal retainers, a British sepoy reserve, and give us the power of summoning ten thousand fairly good troops to meet any emergency in Asia. We could have no base equal to the Inland Sea, if only we had the consent of the Japanese, who may yet need help both against external enemies and against the internal difficulties created by an unscientific finance. The possibility of such an arrangement, desirable as it might be, depends, however, upon circumstances and opinions scarcely known in Europe; and failing that—and failing Mr. Forster's still more attractive dream of the alliance which would make of San Francisco a British port—the only plan is, when the next struggle commences, to occupy Formosa, and by just government attract to it the Japanese, who seem so desirous just new to find occupation abroad. The island is equal in size to about five Suffolks, and could easily support a population of 3,000,000, is richly fertile, and on the broad range which traverses it from north to south offers good sites for European or Sikh cantonments. It could be made by a tobacco monopoly in a few years self-supporting, and would give us a *point d'appui* in the Chinese Seas, which would speedily make our Minister the most important foreigner in Peking. It would be a second Singapore, placed three thousand miles further eastward and nearer to Shanghai, which is, and must remain, the pivot of our interests in Further Asia.

Naval and Military.

The reliefs between the Mediterranean and China are to be carried out early next year, when the 28th Regiment will leave Malta to relieve the 1st battalion 10th, which is ordered to Gibraltar to relieve the 31st, ordered home. The troop-ship Himalaya, Captain Grant, will proceed to China next month to carry out the intended transfers.

The command of the Midge, gunboat on the China station which has become vacant in consequence of the promotion to post rank of Commander John F. G. Grant, has been conferred upo Commander Henry Salmond (1870), late of the Magpie, on the East India station.

The court-martial before whom Captain and Brevet Lieut.-Colonel Burton, R.M., was on his trial upon charges of scandalous conduct unbecoming an officer and gentleman, in that he made false statements reflecting on the character of his late commanding officer, Colonel Richards, re-assembled at the Royal Marine Barracks, Stonehouse, on the 7th inst., by order. The same members were present as before—viz., Colonel Boyle, R.M., president; Colonel H. Adair, R.M.A.; Colonel Thompson, 14th Regiment; Lieut.-Colonel Hill, R.A.; Lieut.-Colonel Parsons, 103rd Regiment; Lieut.-Colonel Fowler, R.E.; Lieut.-Colonel Harrick, R.M.; Lieut.-Colonel Blake, R.M., barrister-at-law, being Judge Advocate. The Court was re-assembled by the revising authority to reconsider one or two points, said to be minor points, in the finding. The reconsideration occupied about an hour and a half, no one being allowed in the room but the members of the Court. Neither prosecutor nor prisoner was in attendance. The finding of the Court will, in all probability, be promulgated this week.

Colonel Pomeroy Colley, C.B., 2nd Queen's, now employed on special service at Natal, will assume the duties of Assistant-Quartermaster-General at Aldershot on his return to England. Colonel Colley was employed on special service on the Cape Frontier in 1858-59-61,—and served throughout the China war of 1860, including the taking of the Taku Forts, actions of August 12 and 14, September 18 and 21, and advance on Peking (medal with two clasps). He also served in the Ashantee war from December 17, 1873, in command of the transports and line of communications, and was present at the battle of Amoaful, defence of the posts of Quarman and Fommanah, the battle of Ordahsu and capture of Comassie. He was several times mentioned in despatches and received a Brevet of Colonel, C.B., and medal with clasp.

The armament of the new forts on the Thames is rapidly progressing. At Coalhouse Point the whole of the guns ordered to be mounted are in position, and the first of the guns and platforms for the adjacent fort at Cliff will be received there within a few days. The works at Shornmeade are not so well advanced, but it is expected that in a few months the whole of these fortifications, designed to assist the garrisons at Sheerness, the Isle of Grain, Gravesend, and Tilbury, in defending the river approach to Woolwich and the metropolis, will be in complete order.

Brevet Lieutenant-Colonel H. T. Arbuthnot, Royal Horse Artillery, is to succeed Major Fox Strangways as Captain of the Company of Gentlemen Cadets at the Royal Military Academy, Woolwich, when that officer is promoted. Colonel Arbuthnot served throughout the Eastern campaign of 1854-55, including the battles of Alma and Inkerman and siege and fall of Sebastopol (medal with three clasps, Knight of the Legion of Honour, and Turkish medal). He also served in the Indian campaign of 1857-58.

The First Lord of the Admiralty has conferred the good service pension of £150 a-year, for captains of the Royal Navy, vacant by the death of Commodore Goodenough, C.B., upon Captain Thomas B. Lethbridge, R.N., and the good service pension of £200 a year, for general officers of the Royal Marines, vacant by the death of Sir John Holloway, K.C.B., of the Royal Marine Artillery, upon Lieut. General John Hawkins Gascoigne, C.B., Royal Marine Light Infantry.

No success has attended the efforts of the officials despatched from Chatham Dockyard to obtain hands from the ship-building establishments on the Thames, the workmen refusing to leave their present employment, as the rate of pay offered by the Government is considerably lower than that given by the private yards. A few shipwrights, however, have been entered from the Clyde.

The United States wooden frigate Hartford, Captain Harmoney, arrived at Malta from China on the 27th ult., and subsequently proceeded to Messina. She will probably touch at Palermo and Gibraltar, and then return to the United States, having served in China and Japan as flag-ship for nearly three years.

Digitized by Google

In our issue of the 30th ult. we reproduced from the *China Mail* a statement that the Austrian corvette Friedrich was about to proceed to Sibuco in the Sooloo Sea, to exact satisfaction for an attack made upon a boat's crew of that vessel by natives. This statement was, it appears, incorrect. The Friedrich has already received orders to return, and has left for San Francisco. On her voyage home she will visit some South American Ports, and will therefore hardly arrive at Trieste before June next. The whole affair was simply a "row" between the natives and some sailors who went on shore without any caution whatever, and were without sufficient arms.

The vacancy among the Brigadier-Generals on the Madras Establishment is to be filled by Colonel Mark Walker, V.C., C.B. Colonel Walker served in the Crimean campaign of 1854-55 and throughout the campaign of 1860 in China as Brigade-Major of the 4th Brigade, receiving the medal with two clasps and Brevet of Lieutenant-Colonel for his services.

The time-expired non-commissioned officers and men and invalid troops belonging to the 1st battalion of the 10th Regiment, brought home from Singapore in the steamer Ajax, were landed at Gravesend on the 6th inst.

Lieut. Commander the Hon. A. C. Littleton, who commanded the Salamis on her last commission in China, has been appointed to the Express, of the Mediterranean Squadron.

The old line-of-battle ship Princess Charlotte, which has served so long as commodore's hulk at Hong Kong, is to be sold. She was originally captured from the French.

Captain S. G. Huskisson, 80th Regiment, has again been attached to the Staff of Major-General the Hon. F. Colborne, C.B., commanding the forces in China.

Deputy Surgeon-General A. Croker, who has just returned from service in Hong Kong, has been appointed Principal medical officer at Cork.

Engineer Robert W. Jones, of the Kestrel, on the China Station, is promoted to be Chief Engineer in Her Majesty's fleet.

Assistant-comm. T. J. Kernaghan, of the Control Department, has sailed for Hong Kong.

Miscellaneous.

THE BRITISH ASSOCIATION.

The address to the Geographical Section at the meeting of the British Association which has just been held at Bristol was delivered by Lieutenant-General Strachey, the President. He said that he proposed "to speak of the physical causes which have impressed on our planet the present outlines and forms of its surface, have brought about its present conditions of climate, and have led to the development and distribution of the living beings found upon it." On this text General Strachey spoke at some length to a large and attentive audience. Among the papers read in this section was one "On the Pamir Plateau and the Upper Waters of the Oxus," by Colonel T. E. Gordon, formerly of the scientific staff of Sir Douglas Forsyth's mission to Kashgar in 1873. Major Herbert Wood, who accompanied the Russian survey party in 1873, read a paper "On a probable cause of the change of direction which has occurred in the course of the Oxus, from the Caspian to the Aral." The business of this section was concluded by the reading of a paper, by Mr. E. Delmar Morgan, "On Prijevalsky's Journey through Mongolia."

KEW GARDENS.

Dr. Hooker's Report of the Progress and Condition of the Royal Gardens at Kew during the year 1874 has just been issued. From the statistics given with regard to the number of visitors, it is evident that the popularity of these gardens is by no means on the wane, and from numerous entries in the various subdivisions of the Report we are glad to see that they maintain intimate relations with the Far East. On the latter point we summarise briefly the information given by the Director.

Under "Interchange of Plants and Seeds," we find that "the receipts during the past year have been 4,762 plants of all kinds, and 2,656 packets of seeds from 277 donors," of which there were received from thirty-one contributors in Asia nine "Ward's" cases, 616 packets of seeds, 249 stove and greenhouse plants, and fourteen herbaceous plants. Through the good offices of Messrs. Irvine and Woodward, of Liverpool, Dr. Hooker obtained a large stock of the true Liberian coffee, which "is a larger and perhaps different variety from that received from Cape Coast . . . Large quantities of both have been sent to the coffee-growing British possessions." Dr. Thwaites informs the Director that the Cape Coast coffee sent to Ceylon is doing well, although it was immediately attacked by the leaf-disease. He also remarks that "the Cape Coast and Liberian coffees, although they would seem to differ much as regards size of their respective seeds, yet in the matter of foliage there is great resemblance between them. In this latter respect they differ considerably from the ordinary coffee-plant of Ceylon, their leaves being a good deal larger, more firm in texture, and tapering more gradually to the base." Owing to the disease and insect ravages by which of late years coffee has been attacked in India, Natal, Ceylon, and other colonies, Dr. Hooker states that his attention has been "directed,—(1) to obtaining accurate reports as to the nature of the disease, of which several are confounded under one common epithet; (2) to recommending measures for the cultivation of coffee in colonies once famous for its production where it has been almost abandoned, as well as in others where the cultivation has been scarcely attempted; and (3) to the cultivation of new and important varieties." We hope that his efforts in this direction may prove beneficial to Ceylon and other coffee-growing colonies. Dr. Hooker finds that the demand for seeds of *Encalyptus Globulus* has continued unabated, but he is still unable to endorse the views of those who regard the tree as capable of cultivation in tropical swamps and as a prophylactic against ague and fever. He thinks, however, that in places where it will grow "it will prove a very valuable source of timber of hard quality, and, contrary to the usual habit of hardwooded trees, it is of very rapid growth." An assistant director having "been selected for the Royal Botanic Gardens, Peradeniya, Ceylon, the director hopes that some progress may in consequence be made in the long expected Popular Flora of Ceylon, and that more may be effected in the arrangement of the herbarium, and in the distribution of indigenous types."

Under the heading "Asia" the principal donations of seeds and plants are as follows:—Bulbs of *Amaryllis* (Lady Alcock); seeds of *Cryptomeria Japonica* from Japan (Capt. Bridgeford); orchids from Moulmein (J. H. Gilbert and Rev. C. S. Parish); seeds of *Iris*, sp., from Chefoo (Dr. Hance); case of Mangosteen plants (Major McNair); seeds from Nagasaki (C. W. Strickland); and stones of Apricot and cherry from Chefoo (Consul Swinhoe). The Ceylon and Hong Kong Gardens have also forwarded contributions.

Among the principal objects deposited in the Museums during the year are the following:—A large collection of vegetable fibres, with samples of rope, &c., made from them, exhibited at Vienna in 1873 (Ceylon, Lunatic Asylum); additional specimens of Cingalese manufactures from leaves of palms, *Pandanus* (J. A. Ferdinandus, Ceylon); of these Dr. Hooker observes that "the whole forms a very interesting and important collection;" specimens of vegetable oils and resins from Burmah (India Museum); Siberian grain basket made of birch bark (Dr. Lockhart); large block of "Thinwin" wood of Burmah (Colonel Seaton); and a very extensive and varied collection of Cingalese manufactures made from the leaves of palms, Pandani, &c., together with a large collection of agricultural and other implements, made of native woods, and specimens of beetles *(Baridius aterrimus)* destructive to orchids at Singapore (Dr. Thwaites). The Science and Art Department, South Kensington, have presented a collection of H.R.H. the Duke of Edinburgh, consisting of robes, head-dresses, and pieces of cloth of Tapa or Paper Mulberry *(Broussonetia papyrifera)*, also raw materials and products illustrating the manufacture of paper from *Broussonetia papyrifera* and *B. Kaempferi*.

Among the additions to the Herbarium, under the head of Asia, we find a valuable collection from the neighbourhood of Peking (Dr. S. W. Bushell), Algæ of Ceylon, determined by Professor Dickie (W. Ferguson), and specimens illustrative of the Ceylon coffee fungus, *Hemileia Vastatrix*. Other contributions were received from W. Cuthill (Canton), C. Ford (Hong Kong), Dr. Hance, Consul Medhurst, Rev. C. S. Parish, &c., &c.

ADVICES from St. Petersburg state that Colonel Sosnovski, with his attendants, who is traversing Western China with a view to collect intelligence respecting the Mahomedan rebellion and discover a convenient caravan road to South-Western Siberia, reached the town of Hanchunfu early in April. While on his way to that place a boat carrying his luggage was capsized on the river Han. The Russian Minister at Peking being immediately informed that the Colonel had lost his letter of safe conduct on this occasion, the Chinese Government at once sent the traveller a new passport, which procured him the most courteous reception wherever he went. On July 2 the Expedition left Lanchufu for Tsinchu.

THE Japanese Vice-Admiral Enomoto, ambassador to the Russian Court, has arrived in Berlin, on a short leave of absence. Enomoto, whose mission to St. Petersburg a year ago gave rise to much speculation, has had during this short period of office to conduct diplomatic negotiations concerning the cession of the Island of Saghalien to Russia; also in the dispute between Japan and Peru about the *Maria Luz* affair, which was submitted to the arbitration of the Czar, he represented the interests of his own country.

THE Springfield (U.S.) *Republican* states that Chan Laisun has been removed from his position as Secretary of the Chinese Educational Commission, and accordingly will remain at home, whither he went last December for a visit. The removal is understood to be caused by personal intrigue in China, as there could apparently be no fault found with the manner in which he discharged his duties.

GEN. REBOUL, of the French Marines, will start on the 15th inst. for Cochin-China, to conduct the general inspection of the French forces in that colony. He is expected to spend six months on his mission. He will present, on his return, to the Ministry of Marine, a detailed report of the military situation in Cochin-China, and on the increase of forces required for the defence of French establishments.

THE Occidental and Oriental Steamship Company's steamer *Oceanic* left Yokohama on June 13th, arrived at San Francisco on June 29th. Her entire overland cargo left San Francisco on July 1st, and was ready for delivery in New York on July 11th. Time from Yokohama to New York, twenty-eight days.

HERR VON HOLLEBEN, who has acted as German Chargé d'Affaires at Yedo since the departure of Herr von Brandt as ambassador to Peking, is to be appointed to the newly-created post of minister resident at Buenos Ayres.

THE Russian Government have prohibited the opium traffic in the Siberian Province of Semiretshinsk and the neighbouring district of Kuldsha.

Monetary and Commercial.

A meeting of the creditors of Mr. W. J. Craven, of 134, Fenchurch-street, merchant, who suspended payment on the 16th ult., has been held at the offices of Messrs. Johnstone, Cooper, Wintle, and Co., when the creditors unanimously agreed to accept a guaranteed composition of 1s. 9d. in the pound, payable on the 31st Jan. next. Messrs. Argles and Rawlins are the solicitors in the matter.

In the case of Messrs. Schultze and Mohr, the Bankruptcy Court has permitted the registration of resolutions in favour of liquidation by arrangement, with Mr. Arthur Cooper, public

Digitized by Google

accountant, as trustee. The debtors' statement of affairs disclosed liabilities to the extent of £142,524, and assets £7,971.

A first meeting of creditors on the estate of Alexander Collie was held at the Bankruptcy Court on the 6th inst. It was announced that Mr. John Young, of Messrs. Turquand and Co., had been appointed trustee, with the following gentlemen as a committee of inspection :—Mr. Henry Smith, of the London and Westminster Bank ; Mr. R. Price, of the National Discount Company ; and Mr. Edward Clodd, of the London Joint-Stock Bank. The subjoined statement of affairs, showing that the total unsecured claims amounted to £1,890,992, and the assets to £729,345, but comprising a total of about £500,000 doubtful items, was presented :—

The interim injunction granted by the Court against an attachment issued by the Supreme Court of New York against certain sums due to Messrs. Collie has been dissolved, as the Court considered it incapable of being enforced.

The American Secretary of State has issued a circular to Consular officers in China, instructing them that to every invoice of goods shipped to the United States, made out in taels, a certificate shall be attached, embodying the name of the particular tael in which the invoice is made out and its value in United States money. This course was rendered necessary by the great number of taels prevailing in China, and the diversity of value attached thereto.

The traffic receipts of the Great Northern Telegraph Company for the month of August amounted to 385,001f., against 415,383f. last year, and the total traffic receipts from 1st Jan. to 31st Aug. amounted to 2,794,859f., against 2,902,109f. last year.

The quantity of tea delivered from the bonded warehouses in London during the week ended the 4th inst. amounted to 3,746,227 lbs., of which 2,157,445 lbs. was for home consumption, 854,037 lbs. was removed coastwise, 665,087 lbs. was exported, 66,955 lbs. was sent coastwise for export, and 2,703 lbs. was for ships' stores. The duty received was £53,936, or 4¾ per cent. more than in the previous week.

The directors of the Indo-European Telegraph Company (Limited) have declared an interim dividend at the rate of 5 per cent. for the half-year ended June 30 last, payable on and after October 1.

By the last mail from New York we hear that the Panama Railroad Company had agreed to postpone the due date of a loan of $100,000 to the Pacific Mail Company.

There has been some inquiry for bar silver on the Continent, and the bars brought from Chili by the *Valparaiso* realised 56¾d. per oz. standard. There are but few Mexican dollars here ; those in the market have been sold at 55⅜d. per oz.

The amount of bullion per P. and O. steamer *Nizam*, from Southampton, on the 9th inst., was—In silver, to Shanghai, £3,600.

The P. and O. steamer *Venetia*, which arrived at Southampton on the 6th inst. with the heavy India and China mails, brought £54,000 in Japanese gold coin.

TELEGRAMS FROM THE FAR EAST.

THE DIFFICULTY WITH CHINA.—REPORTED SETTLEMENT.

(TIMES TELEGRAMS.)

SHANGHAI, SEPT. 6.—The Yunnan outrage is reported to be substantially settled on the following bases :—China sends a special Ambassador to England, and undertakes to punish the guilty parties ; Yunnan to give an indemnity to Mr. Margary's family ; a trade route between Yunnan and Burmah to be opened ; and the levy of Lekin taxes to be regulated. The value of the agreement depends on the strict enforcement of its terms.

CALCUTTA, SEPT. 8.—Col. Duncan reports that the King of Burmah received him courteously. Col. Browne has arrived from China, and proceeded to Simla.

(REUTER'S TELEGRAM.)

SHANGHAI, SEPT. 6.—Mr. Wade, the British Minister at Peking, arrived at Chefoo on the 1st inst., and returned to Tientsin on the 2nd, with Vice-Admiral Ryder, the Naval Commander-in-Chief.

REVOLT AGAINST THE CHINESE GOVERNMENT

ST. PETERSBURG, SEPT. 4.—According to intelligence received here from the Chinese frontier, the Dungans have taken advantage of the anarchy which exists in China to renew their previous disorders, and Puitoon, Tarbougouty, and Djinkho are now in their hands. The Chinese Governors-General, instead of uniting their forces against the insurgents, are spending their time in mutual dissensions and hostile action.

LOTTERIES IN CHINA.

HONG KONG, SEPT. 11.—The Viceroy of Canton has been removed, on account of his connection with the Waising lottery. The Acting Viceroy of Nanking has been appointed his successor.

THE MAILS.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, SEPT. 7.—The P. and O. Company's steamer Gwalior, with the Indian and China heavy mail, and the Australian heavy mail, ex Ceylon, left for Southampton at 9 P.M. to-day. Specie, £725,000.

NEXT INWARD MAIL.—SUEZ, SEPT. 5.—The Messageries Maritimes steamer Iraouaddy, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be looked for on the 14th inst.

INWARD MAIL DUE OCTOBER 4.—GALLE, SEPT. 6.—The Messageries Maritimes steamer Peiho, with the inward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF SEPT. 3.—SUEZ, SEPT. 10.—The P. and O. Company's steamers China and Australia, with the outward India, China, and Australian mail of 26th of August and the 3rd of September, left here to-day for Bombay and Calcutta respectively.

OUTWARD MAIL OF AUG. 13.—GALLE, SEPT. 6.—The Messageries Maritimes steamer Djemnah, from Marseilles August 15, left here to-day for Singapore.

HEAVY PORTION OF NEXT OUTWARD MAIL.—SOUTHAMPTON, SEPT. 5.—The P. and O. Company's steamer Nizam sailed to-day with the heavy India and China mails, a full cargo, and specie, &c., value £16,148. She takes out 87 passengers, and 40 proceed by the corresponding steamer from Venice and Brindisi, making a total of 127. The Nizam goes through the Suez Canal to Calcutta, passengers for Bombay changing ships at Suez.

DUTCH OUTWARD MAILS.—SOUTHAMPTON, SEPT. 7.—The Nederland Company's steamer Conrad sailed to-day for Batavia, Padang, Sourabaya, Macassar, and Samarang, with the Dutch mails, a large number of passengers and Dutch troops, £15,000 in specie, and a full general cargo

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BARBER - On the 3rd Sept., at 37, Amhurst-road, the wife of J. S. Barber, late of Yokohama, of a son.

MILLER—On the 7th Sept., at Southleigh, Leamington, the wife of T. Rowley Miller of a son.

PASS—On the 21st July, at Yokohama, Mrs. S. C. Pass, of a daughter.

PEARCE—On the 6th Sept., at Pennington Hall, Southborough, Tunbridge Wells, the wife of G. P. Pearce, A.C.P., of a daughter.

PEREIRA—On the 28th July, at Hong Kong, Mrs. A. M. Roza Pereira, of a son.

ROSE—On the 25th July, at Hong Kong, the wife of E. Rose, of twin daughters.

SHAW—On the 5th Sept., at Fairfield, near Manchester, the wife of William Henry Shaw, of a son.

VOIGT—At Hiogo, the wife of Oscar Voigt, of a daughter.

MARRIAGES.

ALLAN—STEAD.—On the 8th Sept., at the Congregational Chapel, Saltaire, by the Rev. John Marsden, B.A., Taunton, uncle of the bride, assisted by the Rev. D. R. Cowan, Saltaire, James Hugh Allan, second surviving son of James Allan, Glasgow, to Clara, third daughter of Charles Stead, The Knoll, Baildon, Yorkshire.

BATES—BLANE—On the 2nd Sept., at Holy Trinity Church, Hull, the Rev. James Bates, C.M.S., Ningpo, China, to Anna Jane, daughter of Richard Blanc, Ireland.

CARMICHAEL—MACDONALD.—On the 7th Sept., at the Rosse Episcopal Church, Fort William, by the Rev. Hugh Maccoll, Andrew Thomas Carmichael, late of Singapore, youngest son of the late A. N. Carmichael, of Edinburgh, to Jane Helen, only child of the late Captain Duncan Macdonald, Whinniehall, Fifeshire.

DEATHS.

BERGMAN—On the 6th Sept., suddenly, at Shanghai, Robert Henry Bergman, fourth son of J. G. Bergman, Teignmouth, Devon.

LEVESON—On the 7th Sept., at Brighton, Major H. A. Leveson, aged 48 years.

MURRAY—On the 27th July, at Hong Kong, James Murray, quartermaster of th steamer *Peng-Chao-Hai*.

RIDINGS—On the 20th July, in the Shanghai Hospital, G. E. Ridings, aged 45 years.

ROZARIO—On the 17th July, at Hong Kong, J. J. do Rozario, for many years in the employ of the *China Mail* office, aged 34.

ARTICLES OF IMPORT.

TEA.

A firmer tone is apparent in the market, that is, the continuous decline since the arrivals of new Tea has been arrested, as importers have at last made a stand, being encouraged by the improved demand from the provinces, apart from political causes, which it would seem, at any rate, for the time being, are likely to be satisfactorily adjusted. Telegrams from Shanghai report the second and third crop will be short, though for good common Congou prices are actually 1½d. to 2d. per lb. over those current here. At present there can be no fear of scarcity; the increase in the first crop from Hankow and Kiukiang was 6,000,000 lbs., and shipments from all China for the first three months of season 1875-6 over 100,000,000 lbs., and visible supplies at the shipping ports at least another 25,000,000 lbs., with an increasing yield from Japan and India. To lookers on from this side, with the enormous profits made by the Chinese on first crop leaf, and high prices ruling at the shipping ports for common Teas, it is pardonable if people doubt the reports of short supplies; for why should such happen? Scented Teas from Canton show 1d. to 1½d. per lb. advance on sales a fortnight ago, and instead of being at 3d. to 4d. per lb. discount on import cost, the loss to importers is 2d. to 2½d. per lb. This, however, has not deterred buyers in Canton from making heavy purchases, the late telegrams specially ratifying the intelligence. Green Tea shows no change from the depressed state it appears to have settled down to, and it will be well if shipments from China for a time are entirely suspended; there cannot be a doubt the consumption here is less than formerly, and in the States and Canada Japan leaf has taken a permanent hold on the tastes of the community, and China growth has to play a subordinate part.

Deliveries from London, from 1st to 6th inst., inclusive, or five days 1875, 3,245,000 lbs., against five days 1874 3,475,905 lbs. Imports, deliveries, and stocks in London, from 1st January to 31st August:—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
86,886,033	116,404,130	109,629,939	117,850,335	66,558,440	76,968,040

SILK.

There is little change to report. Importers are asking very firm prices for the new arrivals of China Silk, owing to the probability of the quantity to come forward being less than was at first estimated. Buyers, however, do not readily respond to higher rates, hence business is difficult. Deliveries are fair, although they fall short of last year for the same period—being from 1st to 9th inst.:—China, 974; Canton, 170; Japan, 159; Bengal, 68; total, 1,371 bales.

COFFEE.—The public sales have gone off flatly for most descriptions, and Plantation Ceylon has sold at a decline of fully 1s. per cwt., viz., triage at 90s. to 100s., common to good small at 105s. to 109s., low middling grey at 111s. to 113s., middling coloury at 113s. 6d. to 115s., good middling to good bold at 115s. 6d. to 118s., peaberry at 126s. to 131s. 6d. No business in Native Ceylon has been reported. Of other East India 159 bags Singapore offered were bought in, Bonthyne at 100s., mixed bally at 84s. per cwt., and 88 bags Penang have been sold at 90s. to 92s. per cwt.

COTTON.—Continued dulness has prevailed, and sales have been effected slowly at easier rates. Quotations:—Tinnivelly 5⅛d. to 5 13-16d.; Western Madras, 5d.; Bengal, 4¼d. to 4⅝d.

COCOANUT OIL maintains previous prices, viz.—Good to fine Cochin £41 to £42, Ceylon £37 10s. to £38; 120 hogsheads Ceylon sold at £38, and 150 tons August-September shipment at £37 10s., with further buyers thereat.

CANTHARIDES.—Four cases China have been sold at 3s. 4d. to 3s. 5d.

CUTCH.—No business effected.

CAMPHOR is steady at last mail's quotations, only small business doing.

GUM BENJAMIN.—At the sales 5 cases Siam dark drossy block sold at £8. Of 53 cases Sumatra offered 33 cases seconds sold, rather dark to fair greyish at £8 5s. to £9, low dark £6 7s. 6d. to £6 15s.

GAMBIER.—At auction 324 bags fine pale free Cubes sold steadily at 40s. Privately small sales have been made at 28s. 6d. ex-quay, and 30 tons at 28s. ex-ship.

HIDES.—The assortment of East India in the hair offered at Thursday's sales was rather indifferent, and, although more than half the quantity catalogued found buyers, the competition was far from animated, except for a few desirable parcels. Singapore Ox and Cow were in small supply, and very little was done. Buffalo, Singapore, &c., were rather easier, with a limited inquiry, and other sorts were unchanged. Of 2,350 Singapore Buffalo offered, 805 sold, ordinary 1st heavy, average 24⅞ lb., 5¼d.; 2nd heavy, average 24⅜ to 33 lb., 4⅝d. to 4⅞d.; 1st light, average 11⅜ lb., 6d.; light, inferior, unassorted, average 13¼ lb., 4½d.; thirds, 3½d. per lb. 41 Batavia withdrawn. 149 Ceylon sold, heavy, average 29¾ lb., 4¼d. per lb.

JAPAN WAX.—At auction 34 cases sold, good saucers at 52s., yellowish at 48s., slab and saucers mixed at 48s. per cwt.

MUSK.—In Thursday's sales of 78 packages Tonquin offered 49 packages sold, first pile, chiefly good fair and good shaped pods at 47s. 6d. to 49s., good fair shaped a few skinny at 43s. to 43s. 6d., fair shaped with some rather bally and skinny at 40s. to 40s. 6d.; second pile, mixed fair shaped partly hard and bally at 23s. to 24s. 6d., more rough and bally at 13s. to 15s. 6d.; wet pickings 14s., and 8 caddies Yunan fair with a few damp, &c., 36s. 6d. to 37s. 6d.; 14 tins grain were bought in, rather dark at 56s., dark at 50s., except 1 rather foul at 46s. per oz.

PEPPER.—*Black:* At public sale 4,387 bags met offers at steady rates, but owing to the firmness of holders the bulk was bought in. 1,519 bags Singapore were bought in at 5⅜d. to 5½d., but 550 bags subsequently sold at 5⅜d.; 2,443 bags Penang, chiefly West Coast, bought in at 4⅞d.; 425 bags Trang were all sold, grey to good at 4⅝d. to 4¾d. *White:* The demand continues good, and in auction 597 bags were mostly sold at a further slight advance, as follows:—Of 308 bags Singapore 250 bags fair sold at 7⅞d.; of 289 bags Penang 170 bags sold, fair 7⅝d. good fair 7⅞d. Privately 50 bags fine Singapore were afterwards sold at 8⅛d. per lb. cash.

RICE has continued quiet; a limited quantity has sold on the spot, including *Ballam*, at 11s. 3d. An arrived cargo of 790 tons *Rangoon* at 8s.; two of *Bassein* at 7s. 10½d. to 8s. 0½d.; one of *Rangoon* at 8s. 2d. for the Continent; one of *Necrancie Arracan* at 7s. 7½d., ex ship.

SPICES.—*Nutmegs:* The demand has been rather slow, with prices occasionally in favour of the buyers. 101 cases Penang offered part sold as follows; brown sorts, 116 to 110's, 2s. 11d. to 3s.; 121's, 2s. 11d., 85's, 3s. 9d.; 79 to 75's, 3s. 6d. to 3s. 8d.; one case 63's, 4s. 2d.; low and defective limed out at 2s. 6d. 106 packages Java, &c., were chiefly taken in. A few lots low small wormy, limed, sold at 9d. to 1s. per lb. *Mace:* Of 40 cases Penang, about half sold upon lower terms; very ordinary quality, 2s. 2d. to 2s. 3d.; fair to good red, 2s. 7d. to 2s. 9d. The remainder, consisting chiefly of low and common qualities, was withdrawn, reduced offers only being made. *Cloves:* No sales of importance effected. *Cinnamon:* The Tellicherry bought in at last week's quarterly sales has been sold at 3s. 5d. per lb. *Cinnamon Chips:* 480 bags by auction partly sold; low quality at 3⅞d. to 3⅜d.; Bark, 2⅝d. to 2¾d.; Cuttings, 1s. 8d.; broken and quill, 10½d. per lb. No sales reported in *Cassia Lignea*.

SUGAR.—There has been a steady business doing in West India, but the demand for East Indian kinds continues extremely inactive. Of 5,483 bags Penang offered 1,930 bags sold at 16s. 3d. for good brown. By private contract 700 tons Manila have sold at 15s. 6d. per cwt. for Ilo Ilo, and some, ex last week's sale, of very low quality, at 14s. 6d. to 15s.

SAGO.—At public sales 335 bags bold grain were taken in above the value; 172 bags small greyish sold at 19s. 6d. to 20s. per cwt.

TAPIOCA.—620 bags Singapore were bought in, excepting a few lots which sold at 2¼d. to 2½d. per lb. for small, of good to fine quality. *Pearl Tapioca:* 232 bags part sold at 21s. per cwt. for good small grain. *Tapioca Flour:* 782 bags Penang were partly sold at 2½d. per lb. for fine.

TIN.—Early in the week prices gave way, but the market has since become active, and the drop has been fully recovered. Current quotations are, Straits on the spot £82 10s. to £83, afloat, £82, Banca £90 to £91, Billiton £86 per ton. The Dutch Trading Company announce their next sale for the 29th inst., when 22,900 slabs Banca will be offered.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 15s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

The Maria Adolfina, from Java (coffee), for Rotterdam, is reported sinking in the river, having struck on her anchor. About a third of the cargo is transhipped into lighters, sound; the remainder is badly damaged. The vessel is in a very bad position.

The Marie Felicite, from Saigon for the River Plate, has put into St. Marie, Madagascar, with heavy damage, and will most likely be condemned.

MISCELLANEOUS.

GIBRALTAR.—Sept. 6, passed, Glamis Castle (str.), from Foochow, for London.

PORT SAID.—Sept. 4, arrived, from Nieuwe Diep, for Batavia, Acton; 6, Groningen; 7, from London, for Shanghai, Gordon Castle.

SUEZ.—Arrived Sept. 6, Oxfordshire, from Amoy, for New York; Leon, from Liverpool, for Manila.

LAUNCH.

On the 31st ult. an iron sailing ship was launched from the building yard of Messrs. Richardson, Duck, and Co., South Stockton, of the following dimensions:—Length over all, 244 feet 9; breadth, 38 feet; depth, 23 feet 6; tonnage gross (N.M.) 1,494 tons. She is classed 100 A at Lloyd's and twenty years in the Liverpool Registry, but is considerably stronger than required by their rules. The vessel has been built to the order of Messrs. Thomson, Anderson and Co., Liverpool, and is intended for the India and China trade. As she left the ways she was named Sierra Madrona, by Mrs. Reid, wife of Captain William Reid, of Liverpool, who has been superintending the building of the vessel.

The Earl of Dufferin, 1,770 tons (on her second voyage), from Liverpool to Yokohama, with a cargo of about 3,000 tons of coal, was posted at Lloyd's on the 9th inst. as missing with all hands. This vessel sailed from Cardiff in March, 1874, but being dismasted was towed into a Spanish port by a steamer, and afterwards to Liverpool to be thoroughly repaired and remasted; she finally sailed on the 27th November last, was spoken on the 19th Dec., and has not since been heard of. Her crew would number at least, fifty all told.

THE P. AND O. FLEET.—The two steamers recently purchased by the P. and O. Company have arrived in the Victoria Docks, where they will probably remain for two months. These fine vessels are sister ships, and were built by Messrs. Caird and Co., Greenock, in 1873, for the North-German Lloyd's Company, and named Feldmarschall Moltke, and Minister Roon, which will be altered, the former to Assam, and the latter to Siam. Their dimensions are as follows:—Assam, length 351 feet, breadth 39 feet, depth 30·7, gross tonnage 3,027 horse power, nominal 450; Siam, length 351 feet, breadth 39 feet, depth 30·7, gross tonnage 3,009 horse power, nominal 450. The other of the Company's steamers in dock are the Poonah, Indus, Deccan, and Venetia. The Poonah will take the China mail from Southampton on the 23rd inst.

THE SUEZ CANAL.—Consul Percival reports as follows on the trade and navigation of Port Said for the year 1874:—"The number of vessels of all nations with their net tonnage, which have passed through the Suez Canal during the year ended Dec. 31, 1874, was 1,264; total net tonnage, 1,649,188 tons. Of this number, 898 vessels with a net tonnage of 1,209,612 tons were under the British flag, being 71 per cent. of the whole. By comparison with the return for the previous year, an increase of 93 vessels, of which 88 were British, will be observed, thus showing that the traffic through the Canal is steadily augmenting. The requisite depth of water throughout the Canal has been kept up with very little dredging, and I am informed that at the present moment only one machine is at work."

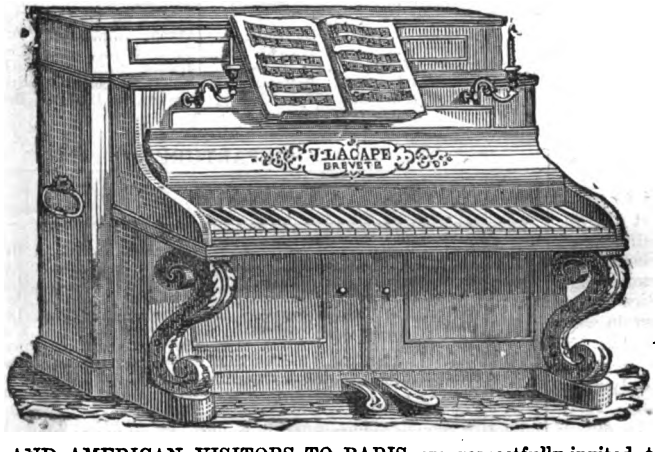
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on the 15th inst., being five days early. The next inward (P. and O.) mail, with a week's later advices, viz. Yokohama 4th, Shanghai 8th, Hong Kong 14th, Singapore 22nd Aug., which is due, *via* Brindisi, on Monday next, the 27th inst., left Galle on the 1st inst., one day in advance of its due date.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Iraouaddy*, arrived Sept. 14.—From Yokohama: Messrs. Fourcade, Fortan, Candrelier. From Shanghai: Messrs. Gay, Findlay, Hodgson, Kier, Bremmer, Cardrick, Mrs. Gepper. From Hong Kong: Mr. Gombard, Mr. Solomon, Mr. Lemann, Mr. and Mrs. de la Forest. From Batavia: Messrs. Van Arnik, De Bruin, Schelta, Van Hoven, Van Veirdin, Leyds, Mrs. Bloghts. From Singapore: Mr. and Mrs. Shield, Messrs. Steere, Judd, James, Duckinger, Horn, Tommasinelli, Yermaun, Rappolt, Augard, Monin. From Galle: Mr. Hughes, Mr. Turner.

PASSENGERS OUTWARD.

Per P. and O. steamer *Poonah*, from Southampton, Sept. 23.—To Yokohama: Miss A. Hoare, Miss M. A. Cattell, Mr. and Mrs. T. Willcox. To Shanghai: Rev. and Mrs. R. Palmer, Mrs. Bryant and party. To Singapore: Mrs. Surwongse, Capt. and Mrs. Worsley. To Ceylon: Mr. L. Young, Mr. J. Cowie. To Suez: Mr. J. B. Elmslie.

Per P. and O. steamer *Baroda*, from Brindisi, Oct. 4.—To Singapore: Miss M. H. Jones. To Ceylon: Capt. H. W. King.

Per P. and O. steamer *Hydaspes*, from Southampton, Oct. 7.—To Yokohama: Mrs. Goodall. To Shanghai: Mrs. Clark, Rev. J. Hoare. To Hong Kong: Sub. Lieut. H. C. Savage. To Singapore: Mr. and Mrs. Griffin. To Ceylon: Mr. R. S. Fraser, Mr. A. M. White, Mrs. Skinner, Mr. F. D. Watson, Mr. E. B. S. Mercer.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 18.—To Ceylon: Mr. F. H. Izard.

Per P. and O. steamer *Gwalior*, from Southampton, Oct. 19.—To Yokohama (*via* Bombay): Capt. Saunders, Marquis of Kildare.

Per P. and O. steamer *Pekin*, from Southampton, Oct. 21.—To Yokohama: Rev. and Mrs. J. Bates, Mr. C. G. Dunlop. To Ceylon: Mr. C. W. Jebb, Miss Jebb, Mr. C. H. Cameron, Mr. and Mrs. H. H. Cameron, Miss M. Cloystown, Miss E. O. Wignon.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Shanghai: Mr. and Mrs. Vardel, Mr. Leegardier, Mr. Aubry, Mr. Schetter, Mr. and Mrs. Peters, Mr. Vachel. To Hong Kong: Mr. Everard, Mr. and Mrs. Daac. To Saigon: Mr. Mace, Mr. Ch. Cany, Mr. D. Doyle and four Missionaries. To Batavia: Mr. Weusman. To Singapore: Mr. and Mrs. A. Breker, Mr. Thomas, Mr. Francis Drake.

Per French steamer *Iraouaddy*, from Marseilles, Oct. 10.—To Shanghai Mr. R. H. Artindale, Mr. Edward Meyer. To Singapore: Mr. and Mrs. Goldie, Mrs. Spooner, Mrs. K. B. Spooner, Mr. C. W. Gros kamps, Mr. A. van Delden.

Per French steamer *Sindh*, from Marseilles, Oct. 24.—To Yokohama: Mrs. Watanabe, Mrs. Nakasima. To Shanghai: Mr. Laing. To Galle: Mr. E. Vex.

Per French steamer *Meikong*, from Marseilles, Nov. 7.—To Singapore: Mrs. Harvey Capt. and Mrs. Ross, Mr. John Ross, Mr. and Mrs. Adamson and child.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are only three days later than those received by the Pacific mail on the 6th inst., and published in our last issue. There are no important items of news. The steamer *Gaelic*, from Yokohama 14th August, arrived at San Francisco on the 3rd inst., and the subjoined summary of her advices has been telegraphed to New York:—

There has been a heavy typhoon in the China Sea. Several vessels were wrecked. The *Gaelic* suffered some damage, and Chief Officer Ritchie and a seaman named Patterson were washed overboard and drowned. Owing to a rainfall of 7½ inches within a few days, great damage is announced in the central provinces of Japan, farms being flooded, houses and bridges demolished, and upwards of $2,000,000 in produce destroyed. There were also a great many lives lost.

Official notice has been received by the Japanese Foreign-office of the appointment of Chinese diplomatic agents to reside in Yedo.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

In the Peking *Gazette* of the 14th July there is an edict announcing that the 12th day of August will be the birthday of the Empress Dowager (not the mother of the late Emperor) Tszegan-twan-yu Kangking; and that on the present occasion, owing to the death of the late Emperor this year, certain ceremonies will be dispensed with. Further on there is a memorial from Lew Tse-heen, the Fantai of the province of Honan, to the Imperial Regents, reporting the death of Tseen Ting-ming, the Governor of Honan, on the 24th day of June, and speaking of the deceased in the very highest terms.

In the *Gazette* of the 15th July, there is an edict in reply to a memorial from Shen Paou-chen, the newly appointed Governor-General at Nanking and High Commissioner for Foreign Affairs in the South, who had spoken of his fitness for office and of his abilities in depreciatory terms,—telling him that the Throne considered him an able official and commanded him to come to Peking as speedily as possible to have audiences. We shall in due course see him arrive in a steamer on his way to the metropolis.—Further on, there is a memorial from Li-Hung-Chang, advocating the re-establishment of Seaou She-pun as magistrate

Digitized by Google

(Chehsien) at Tientsin. He held office here three years ago as acting magistrate, but owing to the death of his mother he ceased holding office. He is a native of the province of Szechuen, has the literary degree of Tsinsze, and is considered an able official by the Tientsinese.

The arrival of the yearly Southern junks, which come from the provinces of Kwang-tung and Fuhkien, and which will be moored as usual off the town of Kokoo, situated about half-way between Tientsin and Taku, is apparently soon expected; as the Customs Taoutai, Lee Chaou-tang, has already notified the Consuls of the port of their early appearance, and of their increased number this year; and he has, therefore, requested that they will give the masters of vessels belonging to their respective countries orders to observe strictly the regulations regarding the navigation of the river at Kokoo, in order to avoid running into and damaging the junks in question.

A few days back, Mr. Waeber, Acting-Consul-General for Russia at Tientsin, notified the Foreign public that the post of Consulate-General of Russia in China, which had hitherto been established at Tientsin, had been removed to Shanghai; and that he himself had been appointed Consul for Russia at Tientsin. Owing to a great quantity of the teas for Russia proper, and all the teas for Siberia, passing through Tientsin, the post of Consul for Russia at this port is a very important one; and an able functionary is required to fill it, in order to protect Russian interests.

A great deal of rain has lately fallen in this region, almost daily; and I have been told by a traveller who came down from Peking three days ago, that in some parts the road was over four feet deep in water; and, of course, the surrounding country is also covered. The crops, where not under water, are looking remarkably well, and promise a good harvest in due time.

SHANGHAI.

The present mail brings advices from this port to the 31st July; the French mail from London June 18 was received on the 30th July. The following summary of news is from the *North China Herald*:—

The steamer *Fusiyama* is on shore at Hen Point. She sprang a leak on her way down from Hankow, and was beached at once, to save as much of the cargo of tea, &c., as possible. We hear that the leak was first discovered while the *Fusiyama* was stopping off Nganking. Finding it was serious, Captain West at once started for a part of the river where the banks were sufficiently shallow to enable him to beach her—the water about Nganking being uniformly deep. The water gained on him so fast, however, that he did not venture farther than Hen Point, near which he put her ashore. It is surmised that the leak must have been caused by her striking something which knocked a hole in her bottom; but not sufficient cargo had been yet got out of her when the *Fychow* left, to disclose the damage. Hopes are entertained that it will be possible to repair the injury and to float her, but the prospect is of course quite uncertain till it can be discovered what the damage is. The *Fychow* has brought down 4,000 packages of undamaged tea from her.

The Engineer in Chief notifies that a Lighthouse has been erected N. 72½ degrees E. from the Woosung Lighthouse, and 400 feet to the N. 27¼ degrees W. of the *Lismore* wreck, on the Port side of the Channel at the entrance to the Woosung River. The Light was exhibited for the first time at sunset on the 22nd July. The illuminating apparatus is *fixed* dioptric, of the sixth order, showing a *red* light visible all round. The light is elevated thirty feet above high-water mark, and, in clear weather should be visible at a distance of five nautical miles. The tower consists of four wrought-iron screw piles supporting a dwelling-room surmounted by the Light, and it is erected in about eleven feet of water at low water. The piles and bracing are painted black and the dwelling-room white. The Ningpo Guild have in consequence discontinued the light-junk recently used to mark the *Lismore* wreck.—It is also notified that the *red* sector of light formerly shown on the Port side of the Channel from the Woosung Lighthouse has been replaced by a *white* one.

A good deal of irritation has been caused by the passage of a body of Chinese soldiers, 1,900 in number, through the Settlement. They came from Takao, in Formosa, in which island they had formed part of the force sent to reduce the aborigines. On landing they were formed up in the usual Chinese order of marching, the van led by a number of banner-bearers, the banners being furled round the pole, and carried in awkward fashion. The soldiers were accompanied by a multitude of coolies, conveying pots and kettles, bedding, &c. On debouching into the Hongkew road they swarmed all across it, and obstructed the traffic so completely that both drivers and pedestrians were obliged to draw to the side and wait till they passed. In addition to the annoyance thus caused, some of the men yelled and made grimaces at every foreigner they saw; whilst others amused themselves by pushing the poles of their pikes and flags against ponies' heads or legs, or, swinging the poles round just over the heads of pedestrians, caused them to duck to avoid a blow, a movement that excited yells and laughter, not only from the soldiery but also from the resident Chinese crowding the thoroughfare. On nearing the English Settlement the troops marched in a more orderly and quiet manner—at least we have heard of no misconduct on the Bund—but after crossing the Yang-king-pang, their rowdyism showed itself in further insults, and in one instance positive outrage. A lady and gentleman were driving along the French Bund, and meeting the rabble, endeavoured to avoid them as much as possible by giving up the road to them. Two of the ruffians nevertheless deliberately lowered their pales, and struck both the lady and gentleman! One blow fell on the gentleman's temple and also knocked off the lady's bonnet; the other blow took effect on the lady's face, and was of such force as to cause a very severe bruise. This brutal conduct, we are told, received the applause of all the Chinese who saw it; the march out of the Settlement being thus marked with the same gross misconduct that distinguished its commencement. The men were *en route* for Kiangnan Arsenal; so why they were landed in Hongkew it is difficult to say. Some of them seemed to be suffering from disease, and could hardly keep up with their more robust comrades; and others, still worse, were obliged to be conveyed on wheelbarrows. Three of the poor wretches died alongside the wharf, the bodies being taken away, we are informed, in sampans. The arms carried by the men were of the most miscellaneous description,—rifles, spears, tridents, pikes, swords, &c.,—all apparently in wretched condition from rust and dirt.

During the excitement consequent on the passage of the soldiery, some Chinese who were engaged firing tea in the store of Chingpah by means of small earthenware firepots left their work and ran outside. In their absence the room took fire, and was soon filled with smoke. An alarm was raised, and a messenger despatched to the Hongkew Police Station. Sergeant Skinner hurried to the place with an extincteur, and in a few moments succeeded in putting out the fire. But for the promptitude displayed, the store would have soon been in a blaze, the firing-pots being closely surrounded with mat-baskets. As it was little damage was done.

If the new O. and O. Steamship Company keep up the time made by the *Oceanic* on her first voyage between China and San Francisco, the route to England will actually be shorter than by the Red Sea. Say:—

Shanghai to Yokohama	... ...	7 days
Yokohama to San Francisco	... ...	15 „
San Francisco to New York	... ...	7 „
New York to Liverpool	... ...	9 „
	Total ...	38 days

from Shanghai to Liverpool; whereas the P. and O. and M.M. deliver their mails in London in forty-five days. The given figures for the American route depend of course on travelling night and day across the Continent, and exactly catching a Liverpool steamer on the other side. Still there is a week to play with.

A meeting of the Committee of the Polytechnic Institution has been held. Correspondence was entered into regarding articles sent for exhibition. A letter was read reporting the formation of a kindred institution at Amoy, and the Committee expressed a willingness to co-operate; Mr. Wylie only objecting, on the ground that it is proposed to exclude religious works of a proselytising character. Steps are to be taken to procure books for the Shanghai Institution forthwith. The land on which the house is to be erected has been paid for, and building will commence forthwith—to cost Tls. 2,960 and to be completed in three months.

A meeting of shareholders in the Racket Club was held on the 30th July. The accounts, showing a profit on the half year's working of Tls. 505.51, were passed. The front and back walls are to be faced with Nagasaki stones, and the east court is to be laid with cement forthwith. A four-handed handicap is to be held in the autumn, instead of pairs, as hitherto. The number of shares to be held by any one member is restricted to five. A set of lawn tennis is to be got out from England, and erected on the smaller green at the back of the courts.

Nothing of importance seems to have come before the French Municipal Council on the 13th July.—Certain jinriksha proprietors have appealed against a rule that the width of their vehicles shall not exceed 50 in., and time has been given them till the 1st November to reduce those which show an excess. The rule is a very necessary one, and the extension of time is a fully sufficient indulgence. The Chinaman's only consideration would be the greatest number of fares he could crowd into his vehicle, with utter disregard of consequent unwieldiness and possible collisions.—Tls. 200 has been fixed by arbitration as a fair payment for a strip of land surrendered by M. Grenot to widen the Rue du Consulat.—The question has been mooted of restricting brothels within certain specified limits; the Inspector and the Chief of the Police have been requested to report upon the subject.

We are glad to learn that the Lyceum Theatre is again able to pay 8 per cent. interest this year to scripholders. The A.D.C. season has not been quite so remunerative as the last, but it has enabled it to pay sufficient rent to cover the amount of the dividend. The report of the trustees mentions that the Theatre-road has been raised and drained, and the theatre itself deco-

Digitized by Google

rated (in part) during the year. A small triangular strip of land at the back of the theatre was sold to the Municipal Council for the purpose of widening the road at that point, and the price obtained for it covered the cost of the improvements to the Theatre-road.

Chen, the Magistrate of the Mixed Court, has been appointed to the staff of Li Hanchang. Chang, the magistrate who sits in the French Mixed Court, is to take his place in the Maloo. Chen has vacated his quarters in the Maloo and removed into the City preparatory we presume to taking up his new appointment.

Our readers will be glad to hear that arrangements for making a tramway to Woosung have been completed. Only Tls. 15,000 are required to make up the required capital. Applications for shares are to be made to Messrs. Jardine, Matheson and Co., who are acting as Secretaries in China.

It is gratifying, as times get gradually worse, to find the appliances for making life tolerable increase. A few years ago not one man in ten could have found his way to "Hell." It was a remote spot in the country, somewhere on the Honkew side, which only some few venturous pedestrians knew of. Gradually a driving road has been extended to the neighbourhood. Then a restaurant was put up near by; then a swimming bath was opened; and now we have it notified that a 'bus will be run regularly from Shanghai, to give people an opportunity of enjoying a morning or evening bath. By-and-bye we are to have a tramway to Woosung; and then, we presume, an Imperial Hotel for the benefit of Shanghai visitors will be erected there.

A curious rumour has been current that Mr. Hart had resigned the Inspector-Generalship of Customs, and that Chunghow had been appointed in his stead. We mention it as we have heard it talked of, without the least idea whether it is true or a rank *canard*.

The Municipal Council have named the following new roads:—That leading from Kiangsi to Honan-road, between Foochow and Canton roads, "Siking" road; and that from Chekiang-road to the bridge crossing the Defence Creek at Sinza, "Chefoo" road.

The Supreme Court vacation is advertised to commence on the 2nd August, and terminate on the 2nd October.

We hear that the steamer *Europe* is bringing down thirty donkeys, bought in the North by Japan speculators, who hope, apparently, that some of the furore which has been lately expended on rabbits will be devoted to these animals.

H.B.M.'s gun-vessel *Kestrel* arrived at Shanghai on the 26th July; she will coal here, and then proceed to Chefoo.

The subjoined additional items of intelligence are from the *Celestial Empire*:—

The Chinese Government have at length decided to send consular or diplomatic representatives to European countries, and the execution of their scheme is looked forward to with much interest. We learn that the editor of the *Wan Kwo Kung Pau* has just received from his Chinese correspondent at Peking the advance sheets of an abstract of all the memorials on this and other foreign subjects recently sent up by the respective Governors-General and Governors of the several coast and river provinces. The abstract is being published at the Tsung-li Yamên, printed at the new foreign press, and is intended for distribution to all the high officers of Government throughout the country. It contains a summary of all the suggestions as to the appointment of Ministers and Consuls to Japan and the West, the recognition and adoption of foreign learning, &c., also of the memorial of Prince Li and the Tsung-li Yamen recommending the adoption by Government of the various suggestions of the high provincial officers. From the number (nine) and unanimity of the several memorials it is to be inferred that the Government submitted the subjects of which they treat to the respective memorialists for their opinions. It is evident that China is slowly becoming conscious of her situation, and ere long considerable changes may be expected in her policy, both as respects her domestic and foreign relations.

It is stated that—it having been considered that the Chehsien of Kwen-shan was either proceeding in his researches with regard to the attack on Mr. Cooper with a slowness that savoured of impudence, or was simply ignoring the matter altogether—Mr. A. Davenport, H.M.'s Vice-Consul, acting with a vigour refreshing to witness, has found it necessary to inform the Taoutai that he would forthwith proceed to Soochow, see the Fautai, and negotiate for the dismissal of the faineant Chehsien, in order to the substitution of a magistrate who would move quicker in the task of obtaining the justice already too tardy. The Taoutai, naturally alarmed at this proof of determination, when perhaps he fondly deemed the affair had gone to sleep, despatched Chen in a great hurry to the Consulate, to entreat Mr. Davenport to pause, and not immediately carry out his threat. We understand that Chen personally pledged himself that the matter should be properly settled before he left for Yunnan.

We have been furnished with some particulars of the official trial trip of a new double-screw iron steam yacht, built at the Kiangnan Arsenal for the Futai of this province. Her dimensions are as follows:—Length between perpendiculars 60 feet, beam moulded 12 feet 2 inches, depth from deck 5 feet 2 inches. Each screw is worked by a separate engine, and working pressure of steam 100 lbs. per square inch. This boat is similar to the one that was sent to Tientsin late last year, which was built and engined by Chinese workmen, from the designs of Mr. John Rolls, and is now used by H.E. Li Hung-chang. The performance of the new boat gave the greatest satisfaction to the Chinese officials in charge of the Arsenal, who were on board; and they expressed delight at the high speed obtained, estimated, from known landmarks, to be forty *li* per hour, or nearly fourteen miles. She is considered by nautical men to be a very handsome model.

On the night of the 26th July a murder was committed in the French Concession, a little way beyond the central police station. The murder was, it seems, committed by a son-in-law on his wife's father, and the criminal being at once seized, was sent to the police-station for the night. Next morning the Che-hsien came to the spot, and held an inquest on the body, which ended in the murderer being sent into the city. There can be no doubt that he will suffer immediate decapitation, that is, as soon as the fact has been communicated to the Futai.

Among the passengers that arrived by the French mail steamer *Peiho* are Signor and Signora Palmieri and Signorina Alice Persiani. The hopes of all in Shanghai who delight in good music have been greatly excited by the accounts of the success which has attended the exertions of these talented travellers in Hong Kong; and we hope that it will not be long before the community has an opportunity of judging of the excellence with which the southern papers have so long aroused our envy.

His Excellency T. F. Wade, C.B., was a passenger for Tientsin in the *Chihli*, which cleared on the 27th July.

The steamer *Gaelic*, arrived at San Francisco, brings later dates than the present mail, viz., to the 6th August, and the subjoined items of news have been telegraphed to New York:—

The declarations of the Chinese authorities respecting the Formosa savages now prove to be empty threats. The troops refuse to follow the aborigines into the heart of the island, and have revolted by regiments. The savages remain masters of the situation, and Chinese military operations have been suspended. A party of returned soldiers from Formosa, soon after landing at Foochow, assaulted an American lady and gentleman with great violence, severely bruising both. An investigation into the affair is being made by the United States' Consul.

The Chinese Government is preparing to send diplomatic representatives to the leading Western nations. According to report they will be preceded by a roving mission, similar to the late Mr. Burlingame's, under Mr. Hart, Inspector of Customs.

Much attention has been attracted by the refusal of Li-Hung-Chang, Viceroy of Chi-li, to allow Mr. Elmore, the Peruvian Charge d'Affaires, to proceed to Peking for the purpose of ratifying the Treaty. The Viceroy demands guarantees for the good treatment of the Chinese in Peru, which Elmore is not prepared to give, declaring them unnecessary. The Viceroy announces that Elmore shall not be permitted to leave Tientsin until such pledges are given. It is commonly understood that this resistance is in consequence of Russia's arbitration against Peru, and in favour of Japan, in the coolie question."

FOOCHOW.

Our advices from this port by the present mail extend to the 1st August.

We have received a copy of the Fourth Report of the Foochow Medical Missionary Hospital, which is under the conduction and care of Dr. Osgood. The institution is in a highly flourishing condition, as will be seen from the fact that the past year's voluntary subscriptions amount to $1,177, which, after paying all the expenses, leaves a balance of $8.16.80, "which" to quote the report, "will nearly suffice for the work during the coming year.'s It is not alone, however, in a pecuniary view, that the hospital sustains its success, for its efforts towards the cure of disease have met with increased attention from suffering patients. During the year 1874-5, ending 30th June, 8,253 patients were treated, and no less a number than 31,988 have received foreign medical treatment since the opening of the establishment. Only two deaths have taken place during the past year, and the report gives some interesting accounts of the various cases which came before the doctors. In looking over the subscription list we notice the usual liberality so characteristic of foreigners resident in China, and are particularly struck with the meagre donations given by the Chinese, compradores and the like giving only from $10 to $2. A bank compradore cheerfully gives $2; according to our knowledge of compradore incomes, either the compradores in question must be very mean, or else the bank must have little bullion passing through its hands. But, considering that the institution is for the good of the Chinese, the well-to-do-native—whose name is legion—might show a kindlier purse in matters of subscriptions.

The subjoined items of intelligence from this port are taken from the *Foochow Herald*:—

We learn of an attack having been made up-country upon Mr. Boysen, of the Great Northern Telegraph Company's staff, under the following circumstances. It will be recollected that a portion of the wire stolen by the mob during the riots about five months ago was subsequently recovered, and lodged by the mandarins in a native house at Hungkow—twenty miles from this place. A few days ago the authorities wrote to the Com-

Digitized by Google

pany's Agent, requesting him to take delivery of the property, and to this end a mandarin was deputed to meet Messrs. Boysen and Mullensteth at Hungkow, there to inspect the material, in conjunction with those gentlemen, and finally hand it over to the Company in Foochow. The man, however, to whom the house belonged, and who, by the way, had himself stolen a portion of the property—which at first he refused to give up, but ultimately surrendered—now came forward with a claim for $70, as a set-off; this was promptly refused by both the mandarin and Mr. Boysen. The mandarin then departed, but on Mr. Boysen attempting to leave for Foochow he was stopped by the mob, by whom he was compelled to deliver up all the money in his possession (about $9). Mr. Boysen was then taken into a Chinese house, where close watch was kept upon him, and where he was detained for some time as a hostage. Meanwhile, Mr. Mullensteth had given the alarm, and on the appearance of the village elders Mr. Boysen was liberated. The mandarins have, we understand, promised to take up the matter.

The Imperial College of Torpedo Engineers was duly opened on the 13th July by the Fantai. H. E. inspected the school and the arrangements carried out by Mr. Betts for the domiciliary and culinary departments of the students. A complete assortment of torpedo and telegraph apparatus, and stores, exactly similiar to those used by the Royal Engineers at the "School of Submarine Mining," Chatham, will arrive in about two weeks, when we may expect to see some evidences of the awakening of the Chinese Authorities to the destructive value of these engines of modern warfare. The students, twenty in number (several of whom have been pupils at the Pagoda Arsenal), are intelligent young men, and will no doubt, in the course of study, extending over three years, obtain a considerable knowledge of this "diabolical" science. His Excellency expressed himself as very much pleased with the general arrangements, and adjourned to a champagne breakfast in Mr. Betts's private rooms, where success to the College was drunk in thorough English fashion.

We understand that the local authorities have issued a proclamation forbidding the illegal combination of coolies engaged in shipping off teas from the foreign hongs. Nearly all these men, we believe, belong to guilds; they portion off the foreign settlement into districts, and will not permit outsiders to work therein. In one of these districts the coolies struck for double wages, at the commencement of the present Tea season; a demand which was foolishly, we think, acceded to. A very short time elapsed, and the same body of men again struck for higher pay; on the second occasion, however, they were not quite so successful; representations were made to the authorities, and the men were compelled to fall back upon the old rate of pay. In England a strike could not be so easily settled, but there more might be said in favour of the men, who are, as a rule, unable to subsist upon their wages; while in this country, the coolie is not only able to maintain himself and family in a style adapted to the climate, but is also enabled to save money from his pay.

A very considerable time has now elapsed since Mr. Blacklock, a tide-waiter in the Customs' service at Pagoda Anchorage, was murdered by a gang of Chinese smugglers, while in the execution of his duty. If, however, there is any truth in the rumours that have reached us, no punishment has as yet been inflicted upon the murderers, nor has any earnest effort been made to bring them to task. The Chinese authorities may be utterly indifferent in the matter; but surely that is no reason why they should not be brought to a sense of their official duty. We have lately learnt, on excellent authority, that the Min Magistrate proceeded to the village some time ago, for the purpose of investigating the case, that he was treated somewhat defiantly by the villagers, who refused to give up the smugglers—although it was well known where they were to be found; that on the magistrate representing that he dare not return to Foochow *without* prisoners, three wretched men were induced, by the payment of sums of money to their respective families, to personate the actual criminals; and that this worthy trio (who had about as much to do with the murder as the King of the Cannibal Islands) are—if yet alive—being paraded as examples of the judicial honesty, energy, and purity of a paternal government.

The statement in our last issue that the "Provincial Government shortly expected an ironclad man-of-war from Europe," was a little wide of the mark. We have since been informed that the local authorities have ordered from England two gun vessels built on the new "Coast defence" principle—as adopted by the British Government. Each vessel will be armed with one 18-ton gun (muzzle loading), throwing a 450 lb. shot. They are short, handy craft, perfectly sea-worthy, though drawing only about six feet of water—a draught that will admit of their coming up to Foochow at almost any state of the tide. The vessels are expected here in October next, and will be under foreign command.

The second mate of the British schooner *Empress of China* has been tried at the British Vice Consulate, Pagoda Anchorage, on a charge of theft, and sentenced to fourteen days' imprisonment and a fine of £10. There were two other charges against him—piracy and assault—but these were, we understand, abandoned by the captain.

As the steamer *Sea Gull* was entering the port her chief officer fell overboard, and, notwithstanding every effort to save him, was unfortunately drowned. It is supposed that the deceased's head was struck by the propeller of the vessel, and thereby stunned, as he did not remain above water more than three minutes.

We understand that the s.s. *Flamingo* is at present under charter to the Provincial Government, for the purpose of conveying troops and military stores hence to Formosa. She has already made several trips across to Tai Wan fu, and will probably leave again in a few days.

We believe that Captain Tracey, R.N., will shortly take the Chinese corvette *Yang Woo* to sea, for a cruise to Japan, the Australian colonies, and, possibly, to Europe.

On the 2nd July a large junk was totally wrecked by the heavy sea on the Takao bar, and a number of lives were lost.

A new vessel (No. 17) is now in rapid course of construction at the Pagoda Arsenal.

H.M.S. *Hornet* will shortly leave for Tamsui and Keelung.

HONG KONG.

Our advices by the present mail extend to the 7th August; no later mail from London had been received. The following items of intelligence are from the *Hong Kong Daily Press*:—

In the Supreme Court Mr. Justice Snowden has been engaged in hearing a suit brought by Captain James, of the steamer *Scotland*, against Leong Ayon, a well-known native ship charterer in the Colony, for the recovery of $903.22. The defendant chartered the steamer for three months on the 9th April, to take passengers to Cooktown, at $14,000 a month. The question at issue was that the ship was not delivered up to the agents until some two days after the expiration of the charter, and the claim was therefore *pro rata* for freight for these two days. Mr. Toller appeared for the plaintiff, and Mr. Brereton for the defendant. The evidence was concluded yesterday, but the argument was continued to-day. Mr. Toller observed that the notice of the expiration of the charter was not given till two days afterwards. He relied on a clause in the charter-party. Mr. Brereton contended that no notice was necessary, that the steamer was at the plaintiff's disposal within the three months of concluding the charter-party. He admitted that the ship was only retained from midnight till six o'clock on the morning of the 9th July, urging that the charter expired at midnight on the 8th, and it was only reasonable to expect the vessel to be delivered up on the day following. The defendant paid the large amount of $42,000 for three months, and it was unfair to ask him to pay for a few hours' delay. Mr. Toller replied, relying upon the 7th clause of the agreement. The real issue was whether the period of three months had been exceeded or not. He based the claim for the second day's detention on the fact of the defendant's flying his flag on board that day, and notice of giving up possession was also served on that day. With regard to the first day, the vessel was in the actual possession of the defendant. After hearing all the arguments, his Honour gave judgment for the plaintiff for a sum *pro rata* for the use of the ship for one day, stating that he should not have given costs had not the defendant persisted in attempting to prove that the cargo was entirely discharged on the 8th July by midnight. As the contrary was the case, he allowed costs in proportion to the amount recovered. Judgment was therefore for plaintiff for $456.50, and costs in proportion.

The bankruptcy case of Messrs. E. Norton and R. Lyall has also been brought before the Court, when Mr. Toller applied for the annulment of their bankruptcy. He stated that above the release of judgment of this Court against Messrs. Norton and Lyall, by Mr. Malcolmson, there was a sum of about £4,000 coming to the bankrupts. The amount awarded to bankrupts in their claim against him was over £6,000 besides about £1,000 costs, the total amount of judgment in their favour being £7,000. Mr. Malcolmson's claim against them was about £3,000, and they were thus the gainers, as he had already said, of about £4,000, and with that they had been enabled to pay their creditors in full. His lordship remarked that the bankrupts had been very fortunate in results, but most unfortunate in what had happened. It was the hardest case he had ever known in his life. Mr. Toller said that every creditor both here and elsewhere had been paid in full. His lordship hoped a very handsome present would be made to the firm for what they had done. It was very much to their credit. He thought that when men were driven into bankruptcy in the way these two men were, and the result turned out as it was, it was only right that they should receive the highest testimonial that the Court could give them. His lordship then asked Mr. Toller to furnish him with a statement of how much money had been received by bankrupts, how much had been paid, and how much they had left. He said he would let the case stand over for this to be done. He congratulated Mr. Lyall (who was in Court), and through him Mr. Norton.

The steamer *Leonor* has been taken round the island on a tria trip. It will be remembered that the *Leonor* and the *Albay* sank close to the Praya in the typhoon of September last. After lying under water for about three months the task of raising them was undertaken by the Hong Kong and Whampoa Dock Company, and was most successfully accomplished. The *Leonor* was floated on the 26th December. She was then taken over to Kow-

Digitized by Google

loon and was docked on the 17th January. Some time elapsed before definite instructions were received respecting her, and in the meantime it was found that the damage she had sustained was very extensive. There was a very large hole under the starboard quarter; in fact, the whole starboard side aft had been knocked away, and she had suffered considerable injury all along forward on the same side. Most, if not all, of her fittings were utterly destroyed, and on the 22nd of March the Dock Company commenced to give her a thorough overhaul. The work has been carried out under the direction of Mr. Liddell, and has been accomplished in the most satisfactory manner. All the joiner's work has been replaced, the houses on deck being new, and also all the cabins. A new propeller was also supplied, and the rudder post, which had been considerably bent, was straightened. The engines and boilers were also thoroughly overhauled.

A meeting of shareholders in the Hong Kong, Canton, and Macao Steamboat Company was held at the City Hall on the 3rd August, for confirming the resolutions passed at the meeting on the 20th July. There were present:—Messrs. R. Deacon (chairman), T. C. Hayllar, Q.C., A. MacG. Heaton, A. Andre, Belilios, Dr. Adams, Captain Sands, H. Smith, Beart, Landstein, Petrie, Dolan, C. M. Rozario, P. A. da Costa, and Krebs. The Chairman proposed that the special resolutions passed at the last extraordinary meeting be now confirmed. He remarked that that meeting represented 6,367 shares. Mr. A. MacG. Heaton seconded, and the motion was passed unanimously. There was no other business before the meeting.

The British steamship *Ly-ee-moon* has left this port for Canton, and will be inspected by the Hoppo there, and if approved of by him will most likely be purchased for the Imperial Government, to be used as a despatch boat.

PHILIPPINE ISLANDS.

MANILA.

The *Diario de Manila*, in its issue of the 29th, 30th, and 31st July, gives some further particulars of the total loss of the Spanish steamer *Corregidor*, which it says occurred near the point of Montufar (N.E. of the Albay Island, lon. 127 deg. 51 min., and lat. 13 deg. 3 min.), on the night of the 17th ult. She had on board a cargo of hemp and a few passengers. The *Corregidor*, Captain Joaquim Lopez, left Legaspi harbour on the same evening, and the weather was at the time very fine and calm. When the vessel was in sight of Montufar, between nine and ten P.M., she struck on a rock. Every effort was made to save the vessel, but without success; the crew and passengers, however, were saved in three boats. The steamer *Leyte* was passing the spot at the time, and took on board part of the crew.

The *Diario de Manila* of 30th July says that in a few days the telegraphic line from Bacolor to Balanga and San Fernando to San Isidoro will commence working. With these two new lines there are now thirteen provinces with telegraphic lines in connection with Manila, viz.:—Cavite, Batangas, Tayabas, Laguna, Bulacan, Pampanga, Pangasinan, Zambales, Ilocos Sur, Ilocos Norte, Union, Nueva Ecija, and Bataan.

The President of the General Commission for the Representation of Spain in the Philadelphian International Exhibition, having invited the Government of the Philippines to co-operate with Spain therein, the Governor-General of the Islands has accepted the invitation, and has appointed a commission to devise measures so that the Philippines may be properly represented in the Exhibition.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 14th August; the P. and O. mail from London July 9 arrived out on the 8th August. We take the following items of intelligence from the *Straits Times*:—

We learn from an announcement in the *Gazette* that Mr. Vaughan resigns the Puisne Judgeship—Mr. Phillippo accepting the acting appointment, and Mr. Bond being nominated Deputy Attorney-General. The changes have a strong resemblance to a return to the old order of things, and strengthen the impression which has lately been gaining ground that the numerous and lavish offices and appointments made by Sir Andrew Clarke have not met with much approval at the Colonial Office, which is well known to stick tenaciously to its patronage. It is said the only one of the recent appointments really confirmed by the Secretary of State is that of Mr. Welner as commander of the *Pluto*, which was recently notified.

We are glad to find a Proclamation in the *Gazette* concerning the Prohibition of the Exportation of Arms, as it clearly defines what in the previous proclamations was doubtful and vague. It will be remembered at the time the former was issued we pointed out the peculiar extent given to its operations by use of the term "Islands in the Eastern Archipelago." The new proclamation limits the prohibited districts to a defined stretch of coast line in Sumatra.

The ordinary Annual General Meeting of the Galena Mining Company, Limited, was held on 11th Aug., when the reports and accounts to the 31st December last were submitted and passed. The Directors also circulated a report to the Shareholders, giving a review of the Company's Workings since 31st December last, which indicated that the Company is now paying its expenses, and that the prospects were assuming a favourable appearance. The Directors are now Messrs. Fisher, Currie, Krohn, Bishop and Brennand.

A telegram received on the 8th Aug. by the agent of the Messageries Maritimes announces the total loss of the Company's steamer *Neva*, on the voyage between this port and Batavia, on the night of the 6-7th Aug., she having run aground when only eight miles from Batavia. The passengers, crew, and mails were all saved. The telegram is not explicit as to particulars, but we understand the vessel is a total loss, though it is expected part of the material and cargo will be saved.

Captain Van der Gevel, of the Dutch steamer *Atjeh*, reports having picked up and landed at Penang the captain and crew of the British barque *Albert Ross*, which vessel had foundered at sea, thirty miles east of Pulo Bras (Atchin), through having sprung a leak. The *Albert Ross* was from Maulmein, timber-laden, and bound to Cork for orders.

The *Sarawak Gazette* contains an order by H.H. the Rajah abolishing the duty on all wine, beer, and cigars from and after the 31st ult.

Commercial Report.

(For dates see first page.)

EXPORTS.

TEA.

HANKOW.—Messrs. Drysdale Ringer, and Co.'s Report says:—Since 20th July a fair amount of business has been done here, buyers picking out the best parcels on offer, which have been settled at about former rates. Shipments to Shanghai have been somewhat heavy for the week and consist chiefly of low common kinds, for which there is scarcely any market here. Settlements are:—212 chests 1,772 half-chests at 1s. 4d. to 1s. 4½d. per lb.; 2,203 chests 7,613 half-chests 1,814 boxes at 1s. 1d. to 1s. 4½d. per lb.; 947 chests 1,295 half-chests at 1s. 0½d. to 1s. 4½d. per lb. Oonfar has realised Tls. 16¼ to 21. Toongshan Tls. 16¼ to 18¼. Soong-yong and Cheong-sow-kai Tls., 16 to 17¾. Yung-low-toong, Nip-car-se, &c., Tls. 13½ to 15½ per picul. The third crop leaf is expected in ten days or so. It is reported to be better than the average of the second crop. The infused leaf is better and brighter, but it is feared the Teas may not turn out strong, owing to too much dry weather up country. The best of them are said to lay down in Hankow at Tls. 16 to 17. Customs export to date:—

	lbs.		1874. lbs.		1873. lbs.
Hankow Teas ...	43,534,246	against	39,953,348	...	41,377,525
Re-export Kiukiang Teas	8,912,081	„	8,306,798	...	7,247,771
Total	52,446,327	„	48,260,146	...	48,625,296

SHANGHAI.—Black: There had been a fair business during the week. Arrivals had come forward freely, and Teamen generally had been willing to sell where any reasonable offer had been made. Prices were from Tls. 1 to 2 under those current two weeks ago, and the laying down cost of most grades were considered cheap. Settlements had been 15,891 chests. Stock 35,250 chests. Prices paid:—Oopacks, &c., Tls. 18 to 25; Hohows and Ningchows, Tls. 16 to 31½; Oonams and Oonfas, 15 to 25; Green: Pingsueys had been taken to a small extent at about previous quotations, and a few chops of Taiping Tea had also found buyers at former rates; but the demand for Green Tea was by no means general, and Teamen seemed rather to fear the reception that later arrivals would be met with. In Tenkais no settlements were reported. Arrivals in quantity of those kinds and of Moyunes were expected shortly. Prices paid:—Taiping, Tls. 27 to 28; Pingsuey, Tls. 24 to 33; Shanghai packed, Tls. 23. Settlements to date, 10,795 half-chests. Stock, 26,250 half-chests. Export to Great Britain to date—

	1875-1876.		1874-1875.
Black	44,662,368 lbs.	against	36,031,516 lbs.
Green	919,610 „	„	1,298,136 „
	45,581,978		39,329,652

FOOCHOW.—Messrs. Westall, Galton and Co.'s Weekly Letter says:—At the commencement of the past week a quieter tone prevailed on our market, but during the last few days operations have again been on a large scale, and some 24,500 chests of Congou have been settled. The comparative shipments to date show the excess of export to London per steamer to be under two million pounds over last year. Congou: Prices for all classes of Tea have been well maintained, and for good flavoury kinds, costing about Tls. 18 short, the market is particularly firm, and in many cases a slight rise is noticeable. A few third-crop Paklings have been shown, but Teas from the up country districts are not expected down for another week or ten days. Souchong: Only a small business has been passing at former prices. Oolong: Settlements show no change. Flowery Pekoe: Two chops have been taken at firmer rates. Scented Teas continue to be settled freely at late quotations. The export to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 29,815,773 lbs., against 24,889,552 lbs. last year. To America, 46,769 lbs., against 154,936 lbs. last year. To the Colonies, 7,174,504 lbs., against 6,620,655 last year.

ARRIVALS.

At YOKOHAMA.—From London, Sept. 11, Coulnakyle; from Liverpool Jessie Jamieson; from New York, Cremona.

At HIOGO.—From London, Sept. 13, Kashgar.

At SHANGHAI.—From London, July 30, Elmstone; from Liverpool, 24, John Parker; from Cardiff, 27, Challenge; from New York, 23, Corea; from London, Sept. 13, Falcon; from Liverpool, 11, Orestes (str.).

At HONG KONG.—From London, Aug. 5, Melbrek; from Liverpool, 4, Ulysses (str.).; from Liverpool, Sept. 15, Hector (str.).

At MANILA.—From London, Sept. 7, Sir Jamsetjee Family.

At SAIGON.—None.

At BATAVIA.—From Liverpool, Aug. 2, Signe; 8, Jan Pieters Koen, Henry; from Glasgow, 6, Veritas; from Newcastle, 8, Alice; from Algoa Bay, 6, Leonore; from Cape Town, 6, Johan Lange; from Monte Video, 2, Emma Muller; from Nieuwe Diep, Sept. 8, Madura (str.).

At SINGAPORE.—From Sunderland, Aug. 7, Charlotte; from Cardiff, 10, Androklos; 13, Princess Louise; from Amsterdam, 13, Henrietta; from London, Sept. 16, Glenartney (str.); from Liverpool, Patroclus (str.).

DEPARTURES.

From YOKOHAMA.—None.

From HIOGO.—None.

Digitized by Google

From SHANGHAI.—For London, Sept. 15, Scotland (str.).
From AMOY.—For New York, Sept. 15, Galley of Lorne (str.).
From HONG KONG.—For London, Aug. 9, Osaka.
From MANILA.—For Channel, f.o., July 22, Dorothea; 28, Christine; 29, Gustav; for Liverpool, 30, Papa; 31, Leon (str.); for New York, 28, Corsica, George; 29, Ceylon; for Boston, 29, Edward May Archer, Springfield.
From SAIGON.—For Falmouth, f.o., July 22, Bluche; for Havannah, Aug. 9, Fres de Mayo.
From BATAVIA.—For Nieuwe Diep, Sept. 9, Holland (str.).; for Rotterdam, Sept. 16, Torrington (str.).
From SINGAPORE.—For London, Aug. 12, Sea Gull (str.).

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Sept. 9, at Amsterdam, from Indramayoe, Petronella; 14, off Dungeness, from Akyab, for Antwerp, Iride; 15, from Rangoon, for Amsterdam, Innocenta; 17, at London, from Hong Kong, Sarpedon (str.); 15, at St. Nazaire, from Reunion, George; Boston, from Singapore, Juno.

DEPARTURES.—Sept. 15, from Cardiff, for Singapore, Glamorganshire Lass; 17, from Liverpool, for Rangoon, Lady Rowena; 14, from St. Nazaire, for Reunion, Anais.

SPOKEN.—Banian, from Liverpool, to Singapore, July 29, 9 N., 26 W.

LAID ON.—At London, for Colombo, Persian Empire.

LAUNCHES.—On the 14th inst. Messrs. S. P. Austin and Hunter, Sunderland, launched from their yard an iron ship, which was named Emily Chaplin. She is owned by Messrs. Moran and Sanderson, of Hull, and is to class A 100 at Lloyd's, and 20 years in the Liverpool registry, and will load immediately for Ceylon.—On the 16th inst. a fine new steamer, named Nellie Martin, was launched from the yard of Messrs. Raylton, Dixon, and Co., Middlesborough. Her dimensions are 286 feet in length, 34 feet beam, 25 feet depth, about 2,700 tons burthen, and will be fitted with compound engines 200 nominal horse power. She is classed 100 A 1 at Lloyd's, on the three-deck rule, and is intended for the "Star Ball" line, for the Java trade.

TELEGRAMS FROM THE FAR EAST.

THE DIFFICULTY WITH CHINA.

(REUTER'S TELEGRAM.)

SHANGHAI, SEPT. 16.—The negotiations with the Chinese Government relative to the Yunnan outrage are not concluded. The only points settled are that a special embassy shall be sent to London, and that the Viceroy Li-Hung-Chang shall institute a commission of inquiry in Yunnan.

THE WAR IN ATCHIN.

THE HAGUE, SEPT. 17.—An official despatch from Atchin, dated the 7th inst., announces that some reconnaissances made by the Dutch troops have led to a sharp encounter south of Longpattah, in which the Dutch had five killed and five wounded, while the Atchinese suffered considerable losses from the effects of the Dutch artillery fire. The health of the troops is satisfactory.

HONG KONG, SEPT. 16.—Grey shirtings, 8¼ lb., $2 50; 16-24 water twist, 103. Tea: Canton, more business doing; Foochow more active. Total exports from China and Japan to the United Kingdom from 1st June to date, 101,250,000 lb.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BUCHANAN—On the 8th Sept., at Harrington, Dimbula, Ceylon, the wife of John Buchanan, of a daughter.
DEACON—On the 11th Sept., at Gernheim, near Maidenhead, the wife of Sidney Deacon, of a son.
MOUNSEY—On the 10th Sept., at Brunn-am-Gebirge, near Vienna, the wife of Augustus H. Mounsey, Second Secretary to H.M.'s Embassy at Vienna, of a daughter.
SCHMID—On the 24th July, at Shanghai, the wife of S. H. Schmid, of twin daughters
SIMPSON—On the 30th July, at Shanghai, the wife of Charles Lenox Simpson, Deputy Commissioner of Customs, of a son.
VAUGHAN—On the 10th Sept., at Albert Lodge, Horsham, the wife of Commander H. Vaughan, R.N., of a son.

MARRIAGES.

FERGUSON—ANGUS.—On the 16th Sept., at Regent's-park Chapel, by the Rev. W. Landells, D.D., Alastair Mackenzie Ferguson, of Abbotsford, Ceylon, son of A. M. Ferguson, of Colombo, to Gertrude Caroline Angus, third daughter of the Rev. J. Angus, D.D., of The College, Regent's-park.
NOBLE-SEXTON.—On the 10th Aug., at Bombay, George Edward Noble, Manager Hong Kong and Shanghai Bank, Bombay, to Frances Marion Bertha (Daisy), eldest daughter of Major J. M. Sexton, Bombay Staff Corps, Assistant-Quatrermaster-General.

DEATHS.

DEMPSEY—On the 14th Sept., at 27, Charterhouse-square, Joseph Meldon Dempsey, M.D., aged 53. R.I.P.
DEWHURST—On the 15th Sept., at Sorrel Bank, Pendleton, Manchester, Henry Sagar Dewhurst, only son of Samuel Dewhurst, J.P., in his 19th year.
ELLIOTT—On the 9th Sept., at Wythycombe, Exmouth, Admiral Sir Charles Elliot, K.C.B., in his 75th year.
FAIL—On the 25th July, at Yokohama, Charles C. Fail, of Shanghai, aged 48.
GUMPACH—On the 31st July, at Shanghai, Baron Johannes von Gumpach.
HOOD—On the 7th Sept., at Dalchaple, Elgin, Alexander Hood, late of Ceylon.
LAMBKIN—On the 14th Aug., at Singapore, the wife of G. Lambkin, aged 49 years.
SCHULTZ—On the 23rd July, at Port au Prince, Hayti, Christian Schultz, Consul for the Empire of Germany and for Denmark, and Consul-General for the Netherlands, aged 63.
SOMERSET—On the 7th Sept., at Homestead, Dundrum, near Dublin, Colonel Poulet George Henry Somerset, C.B., aged 53.
TREMLETT—On the 12th Sept., at Dover, Capt. H. A. Tremlett, Retired List Madras Army, late 17th Regiment N.I.
WESTLAKE—On the 11th Aug., at Singapore, Felicia Adelaide, wife of C. H. West lake, aged 31.

Legal.

COURT OF BANKRUPTCY.

IN RE DA COSTA, RAALTE, AND CO.

The Court allowed registration of the resolutions come to by the creditors in this case in favour of liquidation by arrangement, and appointing Mr. Turquand trustee, with a committee of inspection. The debtors were merchants of London and Manchester, and it also appeared that they had an interest in the firm of Behrends Brothers, of Alexandria; liabilities returned at £135,580, and assets £85,299.

IN RE ANDERSON, DUNCAN, AND ANDERSON.

The debtors, John Anderson, John Duncan, and George Gray Anderson, trading in co-partnership as merchants in Philpot-lane, and also at Colombo, recently presented a petition for liquidation, and the creditors have determined to wind up the estate by arrangement with Mr. Bishop, accountant, Tokenhouse-yard, as trustee; and registration of the resolutions was now ordered. A statement of the joint affairs disclosed total unsecured liabilities £144,746, and assets £31,595, besides doubtful items amounting to about £42,000.

IN RE J. C. FOWLIE.

Registration of resolutions to liquidate by arrangement was ordered in the case of John C. Fowlie, of 18, Leadenhall-street, merchant, whose accounts show liabilities to the amount of £121,637, and assets £10,704.

Miscellaneous.

COLONIAL GOVERNORS.

A correspondence has recently passed between the Earl of Carnarvon and the Board of Inland Revenue which will give general satisfaction to Colonial Governors. Two classes of commissions have been sent out from time to time from the Colonial Office—one a paper commission under the Royal sign manual and signet, and the other Letters Patent, on skins of parchment, issued under the Great Seal. The former is the instrument addressed to Administrators and Lieutenant-Governors, and bears no Stamp Duty. The Letters Patent under the Great Seal, by which alone the Queen appoints Governors to act as Her Majesty's representatives in various parts of the world, have been liable to a considerable *ad valorem* Stamp Duty. The Letters Patent conferring a Governorship worth £3,000 a year have had to be impressed with a stamp of £150; where the salary is £4,000, a Stamp Duty of £200; and so on, at the rate of 5 per cent. on each appointment. Not long since this tax was prospectively abolished, and future commissions will be free from it. But, in looking at its operation in the past, Lord Carnarvon observed that the letter and spirit of the Stamp Act had not been fairly applied. The Act contemplated a Stamp Duty on Letters Patent conferring a new appointment. In Downing-street this had always been accepted as requiring not only that a gentleman should pay the Stamp Duty on first entering on his career as Colonial Governor, but that he should also pay duty on each promotion Her Majesty may be pleased to give him in the service. The present Secretary of State for the Colonies, however, having requested the Inland Revenue Commissioners to consider whether these repeated impositions of Stamp Duty were really in accordance with the Act of Parliament, the Board decided, in the first instance—in the special cases of Sir Hercules Robinson and Sir George Bowen—that one Stamp Duty only could be lawfully demanded from each Governor. On the 10th of last month Lord Carnarvon suggested that, in accordance with this decision, a communication should be addressed to all Governors who have paid more than one Stamp Duty, informing them that they are at liberty to claim a repayment of duty to the extent of the difference between the total amount formerly paid by them and the value of the stamp on the highest salary attached to any Government they may have held, and on the 19th ult. the Board of Inland Revenue agreed to this proposal. To the great majority of Governors this will involve the totally unexpected satisfaction of receiving a not inconsiderable sum, the repayments varying from about £100 in some cases to £800 or £1,000 in other cases. Probably the officers who benefit by this act of justice—the great majority of whom are residing in remote parts of the Empire—will, however, attach more importance to the equitable spirit of the Government than to the amount of money involved, as it shows that their personal interests are not overlooked during their absence, on arduous and responsible duties, from England.

THE TELEGRAPH SERVICE TO INDIA AND THE FAR EAST.—With reference to the St. Petersburg Telegraph Conference recently held, a circular has been issued by the Eastern Telegraph Company, giving in an intelligible form the rules and regulations adopted which are to come into force on the 1st January next. The principal new feature appears to be the adoption of the system of charging for each single word in extra-European messages, while those for Europe will be charged as before by a tariff of twenty words. There will be a uniform rate between Europe and India of 4s. 6d. per word. The maximum length of a word in European messages is fixed at fifteen letters, and for extra-European at ten letters. Each group of figures is counted as a word, provided it does not exceed five ciphers, and if over five figures the excess up to ten is charged as an additional word. The initial letters of the French equivalents for the phrases "answer prepaid," "repeated message," "acknowledgment of receipt," "postage prepaid," and "express prepaid" will be accepted as one word. The rules as to repetitions, registration, prepaid replies, telegrams to follow, multiple messages, cipher or secret letter messages, and reimbursements are also given. The Indo-European Telegraph Company have also sent out a circular with similar information, although there appears to be a discrepancy in the explanations as to the word system, the Indo-European stating that the facility applies to all European States, while the Eastern Company point out that the twenty words tariff for messages will still be he rule in Europe.

THE Messageries Maritimes steamer *Iraouaddy*, with the present inward mails, arrived at Marseilles on the 13th inst. at 8 P.M. She brings 89 passengers and a general cargo, including 564 bales of silk, 5,272 packages of tea, and 228 of sundries for London, which will be forwarded to its destination per Company's steamer *Gange*, due in London on or about the 28th of September.

A PARIS newspaper announces that M. de la Roquette, Secretary of the French Legation at Peking, has succeeded in obtaining a reparation for the murder of a French missionary at Szchuen. The Chinese Government has punished the ringleaders, sentenced the murderer to death, and granted a pecuniary indemnity of 40,000 taels, and reprimanded the local authorities who lacked vigour in their attempt to prevent the outrage.

The delay which has recently taken place in messages from Australia and Java was owing to the Eastern Extension Company's cable between Singapore and Batavia being under repair. The communication, which was interrupted, is now restored, and messages can be sent as usual.

AN American paper states that sixteen Chinese women were sold at auction in California recently, only Chinese being allowed to bid. Eight dollars was the highest price, and one sold for sixty-five cents, her nose being out of plumb.

IT is stated that the Chinese labour question in British Columbia is a political question, the Opposition organs being against the employment of Celestials, whereas the Government papers generally favour Mongolian labour.

The P. and O. steamer *Gwalior*, with the heavy portion of the last inward mail, left Gibraltar on the 17th inst., and may be expected at Southampton to-morrow, or early on Wednesday.

HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, SEPT. 15.

There is a lull in politics, and the Session is on the eve of being closed, to be opened again two days later. There are, of course, several rumours current with reference to the tenor of the Royal Speech, but they are all, of course, purely speculative. Some newspapers are giving long lists of Bills which Mr. Heemskerk will lay before the Chambers, but, though they add some explanatory notes to them, I don't think they are worth reproducing. The Minister of the War Department intends—according to the *Vaderland*—to increase our army by eight battalions of infantry and one regiment of hussars. A promotion of officers, of course, must ensue if this is carried out. The same paper says that there is a question of abolishing the shoulder-badges of our officers, which were introduced some time ago by order of the King, and replacing them with the old epaulets. This would be, I think, rather a retrograde measure, but perhaps the report is only a hoax. A widely spread and credible *on dit* is that Mr. Loudon has finally retired from public life, and that he will establish himself at Lausanne, to return no more to his mother country. The question remains whether he will be the only victim (amongst statesmen I mean, of course) of this Atchin blunder, which costs us so much blood and money. The last news from the pepper country is anything but encouraging. When and where must things end? Harderwyk, the depot of the soldiers intended to reinforce our East India army, is crowded. Some days ago it was even impossible to enrol recruits because there were no places vacant in the barracks. Since then, however, 400 have started by the steamer *Conrad*, and another 200 will be despatched by the steamer *Compton*, of the Rotterdam Lloyd's line. This will give some room, but not enough. A number of Belgian recruits offer themselves daily for this service, and this occurs—as the Minister stated in the sitting of the First Chamber—without the intervention of any recruiting agents.

The Minister of the Colonial Department has laid before the members of the Second Chamber the Budget for the East India Colonies. Its form has been much simplified, and consequently improved. The favourable balances of the financial years 1867 to 1874 are estimated at f.88,557,146, against which, however, several expenses are anticipated (amongst them is an estimate of f.20,000,000 for the redemption fund), so that the nett surplus of these accounts is f.21,766,728. A part of this sum the Minister proposes to expend upon improvements in Java, viz., to protect Batavia from future inundations, f.300,000; to protect Samarang from the same calamities, an equal sum; for building a lunatic asylum at Buitenzorg, f.200,000; for the harbour works at Batavia, f.300,000; for constructing railways in Java, f.4,222,000; for the navy, f.870,000; for abolishing slavery on the west coast of Sumatra, f.500,000; on behalf of the Dutch-India Steamship Company, f.1,200,000. It is, moreover, intended to set aside a sum to complete the fortress-system. The favourable balance being in this way decreased by f.7,862,000, an amount of f.13,900,000 still remains at disposal, whilst it seems quite certain that the Budget of 1875 will leave a considerable profit, owing to the high prices of coffee. So far the Budget shows a revenue of f.140,316,044, and an expenditure to the amount of f.129,488,187, the surplus of 1875 thus being f.10,111,685. The estimated expenditure is f.4,820,597 higher than last year.

The Minister says, with reference to this Budget, that something more ought to be done in behalf of the education of the natives, but he sincerely regrets that new schools are not built with the speed they ought to be. The new Governor-General has drafted a plan to provide every district in Java with a school. The following are the outlines of the proposed scheme to provide Batavia with a harbour:—A port will be constructed at Tandjong Prisk, from whence communication with Batavia will be made by a railway of ten kilometres and a canal of about eight kilometres in length. The estimate for the War Department, f.27,419,365, is much higher than in 1875. Of course this must be ascribed to our war with Atchin. The Naval Department will involve an increased outlay of f.1,334,104. The quantity of coffee to be sold here is estimated to be 750,000 piculs, at 49c. per half kilogramme; that of Banca tin 72,000 piculs, at f.50 per fifty kilogrammes. I need scarcely add that I give you only the merest outlines and the main figures of the Budget, which is very voluminous.

The Congress of the International Law Association was brought to a close at the Hague on Saturday last. The members have given their opinion upon a number of difficult questions, but that the meetings will be of any practical utility seems very problematic. In most cases the greatest diversity of opinion prevailed, and in some instances decisions were only arrived at by a very small majority. Lord Penzance has been elected president for the ensuing year. Before the close of the meeting the Congress adopted a resolution *le couronnement de l'édifice*, that in the interests of humanity and civilisation the Governments ought to enter into negotiations to reduce the existing armaments, and a committee was duly appointed to inform the various Governments of this resolution. Another resolution was carried in favour of international disputes being submitted to arbitration. After having made an end of their business the members took a trip to this town in order to visit several of its institutions.

Our public have been in some degree perplexed by the news that at last the murderers of Mrs. Van der Kouwen have been found out. They are a certain Yut and his wife, who assassinated the lady and her maidservant in order to obtain a large sum of money that they might be able to marry. This amiable couple absconded to America, subsequently visited England, and ultimately started for the Cape of Good Hope. Four or five years elapsed, and they, thinking that all might be forgotten, returned to Holland. But the police were on the alert, and man and wife were arrested, and they subsequently confessed. I should not have made any mention of this sensational fact if the Java papers of some months ago had not told us that a soldier of the East India army had acknowledged on his death-bed that he had murdered this lady and her maidservant.

The Brussels correspondent of the *Amsterdamsche Courant*, a most respectable paper, says that an action has been brought against our Minister of the Financial Department by a family named Dubois, to recover a sum of sixty millions of guilders, which they say is the produce of an inheritance of Mr. Jacques Dubois, who died in 1730 at Batavia. Nothing is known here about this matter.

The papers publish a mass of correspondence inducing the Government to use the steamers of the Company Nederland for carrying the mails from Java to Holland. They are running faster than the French steamers, so much so that merchandise is received here before the consignees are in possession of the bills of lading. The steamers, moreover, ply so regularly that they might very well carry the mails.

In one of our largest iron works, that of Van Vlissingen, a strike has taken place because the managers refuse to grant higher wages. After a few days had elapsed, however, the workmen took the wisest part and resumed work on the old scale.

There is still much discussion in the papers about the recruiting for the East India army. The number of volunteers, especially from Belgium, is so large that hundreds are obliged to return to their mother country.

Some days ago seven young men passed examination before a commission as student interpreters for the China service, in which two places are vacant.

The market for Colonial Produce remains unaltered, and transactions have been limited. Prices, however, are very firm. The Money Market is also without change.

The King has returned from his trip abroad. Prince Alexander will shortly start for Algiers for the benefit of his health.

AMSTERDAM, SEPT. 16.

The Belgian as well as the Dutch papers are uttering sharp protests against the manner in which recruiting for the East India army is conducted. It is now clearly proved that married Belgian subjects have been engaged under false names as single men, and there are so many desertions that some papers advise the surrounding of Harderwyk, which is the depot, by a cordon of cavalry. The German papers of to-day state that an ex-mayor of the Netherland India army (German by birth), Mr. Steek, has been arrested at Darmstadt, on the charge of having enrolled several young Germans for the Atchin army.

The Second Chamber's Session will be closed next Saturday, and the new Session will be opened two days later by the King. The Prince of Orange has started for Paris, where he will stay some time. Contrary to the assertions of some French papers, I can state with authority that his journey has nothing to do with politics.

The borings in the Zuiderzee, which were ordered by the Government, to ascertain whether the bottom is fit for recovering a further tract of dry land from the sea, have given satisfactory results.

A company has been established at Goes to export cattle, eggs, and vegetable produce to England, *via* Flushing and Sheerness.

SHIPPING.

ARRIVALS.—At Texel, Sept. 8, from Indramajoe, Petronella; 9, a Flushing, from Bassein, Chasea; from Moulmain, North Wind; 10 at Hellevoet, from Sourabaya, Yanikale; 11, at Texel, from Tjilatjap India Packet; at Flushing, from Akyab, Malleville; 12, at Texel, from Batavia, Prins Hendrik (str.); from Rangoon, Freier.

DEPARTURES.—Sept. 10, from Maassluis, for Macassar, G. H. Betz.

At the first meeting in the bankruptcy of John Strachan and Co., East India merchants, of Bishopsgate-street, Mr. James Waddell was appointed trustee, with a committee of creditors, Messrs. Lyne and Holman being the soilicitors to the estate. This is one of the failures in connection with Messrs. Collie and Co. The liabilities are £112,309 16s. 6d., with assets in the hands of creditors £15,371 14s. 7d., and free assets £5,711 10s. 3d.

Correspondence.

"WOMENS' RIGHTS" IN JAPAN.

(To the Editor of the *London and China Telegraph.*)

SIR,—It is somewhat interesting to think that, when so much stir is being made in our own country regarding the position women should hold in society, the native press in Japan, a growing powerful institution in that country, among other essays on Western customs, has taken up the question of the rights of women. Of course, in the East, women are a secondary consideration altogether, and the dignified position of a wife is sadly interfered with by the existence of unlimited concubinage. So far, the articles we refer to are more the fugitive ideas of writers than a series of sound arguments started on a strong basis. But they are none the less instructive, even if, from that instruction, a little amusement may be culled. One writer says that "if we look into the theories of Europeans on this subject (womens' rights) it would appear that the possession of equal power by husband and wife is based on natural reason. But if we observe the practice of Europeans, it would appear that the power of the wife is greater than that of the husband, and that this error has been brought about by a want of a correct view of the dictates of nature." And this argument is supported by the reasons that "In going through a door the wife passes first, and the husband follows her; the wife takes the best seat and the husband the next seat; in visiting, the wife is first saluted; in forms of address the wife is first mentioned." It is well that this writer in the *Meiroku Zashi*—the translations of articles in which appear in the *Japan Mail*—mentions, and draws a distinction between the theory and practice of Europeans in the carrying out of the respect paid to women, for though we cannot but cheerfully grant the admitted high position women hold, still the records of our Divorce Courts, and the doings of our Police Courts, show up the wide range there is between theory and practice. The amiability of some husbands for their wives is wonderfully demonstrated by a certain class of Englishmen, whose warm affection is dictated by kicking their wives to death —but there, the position of women is still maintained, for the exception, and happily cruelty to women is the exception, proves the rule. It is of interest, however, to note how these domestic customs of ours appeal to the searching mind and eye of the Eastern student. The Japanese writer, though seeing much good in this elevation of the position of women in Europe, yet fears that by thus giving way to their aspirations, women may suddenly get the upper hand — a matter which appears forcibly to home students of the same subject. "Being lately in the company of some foreign ladies," continues the writer, "I smoked as I pleased. But a foreign gentleman approached me, and requested me to desist, as the ladies disliked it. Of course, I did so, being desirous of conforming under these circumstances to European customs, which, I presume, forbid the practice. But I found the prohibition most unreasonable, and the person rude who asked me to desist. The reason men are thus prohibited from smoking is that the ladies do not like it. But if I smoke, I do so in virtue of my rights as a man, and if the ladies do not like it, they should leave the room. The dislike of women to smoking substracts from the pleasures of men, and there can surely be no reason in this, as it involves a limitation of the freedom of power. . . . If smoking were immoral in itself, or, if it injured the health of others, I would most assuredly not smoke. But when it is not a thing prohibited by law or morals, and a distinction is made between smoking before men and before women, I fail to see the reason of it." The Japanese, like their neighbours, the Chinese, consider women as quite a secondary portion of creation's plan, and the reason for all this superiority of the women is curtly given, "that men idolise their wives for the purpose of pleasing them." It will be a matter of tardy progress, the owning of the rights of women in these Eastern lands, but, even now, the subject is one to which considerable attention is being paid, as though long years must necessarily elapse ere the huge barrier between the sexes be broken down; yet to the inquiring native mind the histories of all great nations will teach the lesson of how potent for good is the influence of women—not in the masculine form it now hopes to assume—and how much of the destiny of kingdoms is worked by them. Women are good, bad, and indifferent, but their good overwhelms their bad; and this conclusion the Japanese press, will have, eventually, to own, despite that "Some of the celebrated women of Europe have behaved in a manner which it pains us even to hear of, and which is terrible."—I am, &c.,

London, Sept. 10, 1875. A.

THE ACTING CHIEF JUSTICE OF CEYLON.

To the Editor of the *London and China Telegraph.*)

SIR,—Of all Crown colonies without representative government Ceylon is perhaps the only one that presents the spectacle of a son of the soil as its Chief Justice. And it is also remarkable that two out of the three judges which now constitute the Supreme Court of the island are natives, viz., the Acting Chief Justice, Sir Richard Morgan, and the Senior Justice, Mr. Charles Stewart; while the Junior Puisne Justice, Mr. Richard Cayley, is an Englishman and a graduate of the Cambridge University. When last year Sir Edward Creasy, the Chief Justice, obtained leave to proceed to Europe for the benefit of his health, it was with great satisfaction that the people learned that the Honourable R. Morgan, Queen's Advocate, would be his *locum tenens*; Mr. Morgan had rendered valuable services to the colony; he had been the chief legal adviser of the Government for more than twelve years, and had given the country several useful and important ordinances. So Governor Gregory, in recognition of his great merits, raised him to the post of Acting Chief Justice, an office never before held by a Ceylonese, and induced the Queen to confer on him a Knighthood. Seeing the satisfactory manner in which he discharges his arduous duties, it would be beneficial to the country if he could be confirmed in the post, but we hear that on the score of health he prefers to go back to his less dignified, though not less influential post of Queen's Advocate. Sir Richard is entirely a self-made man. Born in the island of respectable Burgher parentage, he was educated in the Colombo Academy, a Government institution, under the care of Rev. J. Marsh, father of the present Inspector of Schools in Ceylon. The attention bestowed by Mr. Marsh upon his pupils, and the thoroughness of his teaching, are attested by the fact that most of them have risen to great name and fame in their respective departments, whether of Law, Medicine, Divinity, or Civil Service. Among Mr. Morgan's schoolfellows the ablest and most distinguished was doubtless the late lamented James Stewart, brother of the present Senior Puisne Justice. Entering the profession as a proctor, when he was barely nineteen, he rose so rapidly that in less than twelve years he had stepped into the highest post open to a lawyer at the Bar, viz., the office of Queen's Advocate, or chief legal adviser of Government, and died at the early age of thirty, whilst holding the said office.

Mr. Morgan commenced his legal career as a Proctor in 1840, and his learning and ability, as well as his admirable business habits, soon procured him clients, and he rose very rapidly. He was admitted an advocate of the Supreme Court in 1846, from when he became one of the leading members of the Ceylon Bar. He also for a few years represented the Burgher community in the Legislative Council. The Government, perceiving his merits, appointed him in 1855 District Judge of Colombo, when the seat was vacated by Mr. T. Lavalliere, a civilian; and ever since Colombo has had a professional judge on its District Court Bench; and the office is now expressly reserved for lawyers, having been recently struck out of the Civil Service List, together with the District Judgeship of Kandy. Being well acquainted with the local laws, and having practised his profession for several years with great success, Mr. Morgan found no difficulty in discharging his judicial duties to the satisfaction of the public and Government. Consequently he was in 1857 promoted to the Supreme Bench as an Acting Puisne Justice, and would have been confirmed long ago but that he preferred to hold the office of Queen's Advocate; and he obtained his wish on the elevation of Mr. Queen's Advocate Thomson to the Supreme Court as a Puisne Justice in 1863. To the colony Mr. Morgan's services have been invaluable. No Crown lawyer before him had, perhaps, bestowed so much pains upon his work, and not a few of the useful and popular Ordinances were due to his intelligence, energy, and zeal. His Excellency the Governor did a very graceful act indeed in raising his trusted adviser to the office of Acting Chief Justice, and recommending him to the Queen for a knighthood, though unsolicited by him.—I am, &c.,

Literature.

Le Jade: Etude Historique, Archéologique et Littéraire sur la Pierre appelée Yü par les Chinois. Par S. BLONDEL. Paris: Leroux. 1875.

Among mineral substances jade is certainly worthy of especial attention, though, perhaps, its value has been somewhat over-estimated. In former times samples of the true jade were scarce and very dear in Europe, but nowadays, says M. Blondel, thanks to the relations of Western nations with those of the Far East, Chinese antiquities have become less rare, new and important collections have been formed, and the museums of Europe have been enriched with the most splendid works of art from that part of the world. Under these circumstances he thinks that he will be doing some service to Eastern archæology by publishing this notice of jade, of the history of which so little is generally known. In carrying out his design, M. Blondel has shown great industry in consulting and laying under contribution a wide range of authorities, the mere enumeration of whose names would occupy considerable space. In his pages will be found, we imagine, very nearly all the information which the most enthusiastic lover of Chinese curiosities could possibly desire. The chief drawback to M. Blondel's *brochure* is that he is a little too desultory in the arrangement of his materials, but for all that it will well repay perusal. We cannot, of course, in these columns, pretend to follow him closely through all the

Digitized by Google

various points of his essay, in which he approaches his subject from an historical, archæological, and literary point of view, but we content ourselves with giving the substance of one or two passages, which will probably be interesting to the general reader. One of the chief localities, we gather, in which jade is found in China is Tai-tang, in the province of Shense, but the greater part comes from Khotan, in what was formerly Chinese Turkestan, and it is brought from Tartary by the Bokharians. "In this country whole mountains, so to speak, are of jade; and the purest pieces, precious alike for their beauty and the fineness of the grain, are found principally on the summits. The mountain, called Mirdjai, in the Khotan district, is said to be entirely formed of jade. This mineral is found there of various colours, but at the top of the mountain it is of the quality that is most esteemed. A man, armed with the necessary implements, scales the rocks, detaches the pieces of jade, and lets them roll down below." This statement, we must observe, appears to be made entirely on the authority of Malte-Brun's "Géographie Universelle." In another place M. Blondel tells us that there are two sorts of jade, the one, veined with brown, being found in the mountains, and the other, veined with blue, in the rivers. The former kind, he says, is more commonly met with in China, and the latter in the Khotan district. Jade is said to be obtained at Yarkand, which is not very far distant from Khotan in a north-westerly direction, in much the same way as pearls are in other parts of the world. The "fishing," it seems, takes place in the presence of certain officials and soldiers. Twenty or thirty divers plunge into the water at the same time, and when they have found a piece of jade they throw it on the bank; each piece found is marked down in red on a sheet of paper. When the fishing is finished an inspector examines the pieces of jade to find out what they are worth; occasionally some of them measure nearly sixteen inches. In this connection M. Blondel makes one statement which shows that he has followed some of his authorities a little too blindly, and that he is not aware of the existing state of things in Eastern Turkistan; he asserts that the city of Yarkand every year sends from four to six tons of jade to Khotan to be forwarded to the Court of Peking! This ancient custom must certainly have fallen into abeyance for some years past. In his two concluding chapters M. Blondel makes some observations on a few of the best specimens of jade work now in Europe, and on the art of carving it. He dedicates his work to the Marquis d'Hervey St. Denys, the Professor of Chinese at the College of France.

In the May-June number of the *China Review* Mr. W. F. Mayers continues his valuable contributions on "Chinese Explorations of the Indian Ocean during the Fifteenth Century." In the present instalment "the translation of the body of Hwang Sing-tsêng's compilation is entered upon. It begins with the kingdom of Chan-chêng, occupying the central portion of the modern kingdom of Yüeh-nan (An-nan or Anam)." Besides foot notes, Mr. Mayers adds four notes at the end, displaying much careful research. "The Folk-Lore of China" is also continued, the present portion treating of superstitions relating to "death" and "days and seasons." The Rev. John Chalmers follows with a review, in an unfavourable sense, of Canon M'Clatchie's "Confucian Cosmogony." The number also includes "The Grain Transport System of China" by G. M. H. Playfair, "Chinese Official Ranks" by Dr. Sitel, and "A Last Word about Tones" by A. Lister. The paper, however, of the greatest general interest is an unsigned one on the "Province of Shantung." This article abounds with information in regard to what is to be found in the province. We have not space to enumerate the topics touched upon, but we make room for a short paragraph on a subject which is of much importance. "A little further than Lai-chôw," the writer observes, "all the hills are of a black marble, and when approaching Pao-shan, to the black or deep blue carboniferous marble is added the sandstone formation, then comes the silurian clay, and under it the coal measures, which are there very plentiful. Numerous pits, reaching to a depth of fifty to sixty feet, are dug in the hills, and the coal is extracted till the water stops the work. This coal finds the way to Chi-nan Fu, being extensively used in some places for lime kilns. It is often burnt to coke on the spot, and then exported in that state. The carboniferous and slaty clay of Pao-shan is used for making pottery ware, after having been crushed under mill-stones and mixed with water. . . . . The mining district presents a certain resemblance to our manufacturing towns, the large kilns always burning, clouds of smoke rising from the ovens, and the black colliers completing the illusion." We should be glad to see equally minute descriptions of the other provinces of China.

Writing from India, Captain Henry Trotter, R.E., who was the geographer on the scientific staff of Sir Douglas Forsyth's mission to Kashgar, contributes to the current number of the *Geographical Magazine* some valuable "Notes on Recent Explorations in Central Asia." He notices briefly, but in some detail, the additions and rectifications which have been made in our knowledge of the geography of that region through the agency of British officers and others working from the side of India. The more important of these were effected by the mission of which he was himself a member, and of its labours he gives here a summary of the principal results, viz., the correct fixing of certain important towns by astronomical observations, and the survey of about 3,000 miles of route lines, a great portion of which is entirely new. The latter portion of this paper deals with the work of the explorer (the well-known "Havildar") who was employed by the Great Trigonometrical Survey in the regions beyond the Oxus. A paper on the "Amu Darya Expedition" gives a *résumé* of the work performed by the scientific mission which accompanied the Russian expedition against Khiva in the exploration of the old bed of the Amu Darya. The other papers in this number are "Recent Journeys in Paraguay," "Paris Geographical Congress," and "The Voyage of the *Challenger*." The next number, we believe, will contain the Editor's account of his trip to the island of Disco with the Arctic Expedition, from which he only returned a few days since.

The *Anti-Slavery Reporter* for September opens with a sarcastic paper on Mr. Clements R. Markham's recently published observations on the condition of Chinese coolies in Peru. This number also informs us that the committee of the Anti-Slavery Society have issued a warning to Chinese coolies against emigration to Peru. They "happily secured the co-operation of an eminent scholar and linguist, who has, at their request, caused some 10,000 copies in Chinese to be distributed in placard form at various seaports, while the address has also been inserted as an advertisement in several native papers." There are also accounts of deputations to Lord Derby in reference to Cuba, and to the Seyyid of Zanzibar, followed by some extracts on slavery from Dr. Mullens's "Twelve Months in Madagascar." The remainder of the number comprises "The Abolition of Slavery by Portugal," "Gordon Expedition," and papers relating to the condition of "labourers" in Mauritius.

An enterprising illustrated native journal in Shanghai has, we understand, made a contract with the proprietors of the *Illustrated London News* for a quantity of their illustrations to be printed on blank sheets of paper, these being covered, on arrival in China, with descriptive matter, in Chinese characters. The scheme is good, and deserving of all success.

A society is about to be founded in Paris for the exclusive study of the Japanese language and institutions. A Japanese library, and the publication of a Japanese newspaper form part of the society's programme.

Messrs. Trübner and Co., of London, have arranged to publish a series of "Notes on China," collected from the columns of the *Celestial Empire*.

OUR POSITION IN CHINA.

(THE TIMES.)

When our Shanghai Correspondent last wrote, the anticipations of our countrymen in China seem to have been very gloomy. Chinese diplomacy has endless resources of equivocation and delay when it is not peremptorily stopped, and it seemed determined to baffle all our attempts to reach the murderers of Mr. Margary. It had promised to examine the particulars of the outrage, and to punish the criminals if they could be found; but it also set to work in such a fashion as to show that its real object was to gain time. Nobody believed that any good would be done by the Mission which was to start to Yunnan. Meanwhile, the Chinese Government was arming with suspicious speed. Word had come to Shanghai that it was making torpedo experiments, of all things in the world, and that it intended to buy Armstrong guns. Mandarins were examining the best way of fortifying the Yang-tse-kiang, and the *Peking Gazette* contained an elaborate report of a tour of inspection made by the Governor-General, Li-Hung-Chang, to survey the fortifications in the lower part of that river. Thus it seemed as if the Chinese had come to believe that they could at last afford to defy our demands, and that the end of the strife must be another vexatious, costly, and inglorious war. It is rather more than six weeks since our Correspondent wrote, and the atmosphere is now somewhat clearer. The Chinese Government would not have offered to send an Embassy to England if its temper had been warlike; and its promises that the murderers of Mr. Margary shall be punished, that Yunnan shall pay an indemnity to his family, that a trade route shall be opened between China and Burmah, and that the imposition of certain vexatious internal taxes shall be regulated reveal a wish to keep on good terms with this country, at least for a time.

Those Englishmen who reside in the Treaty ports are not impartial judges of these concessions. Too often they go to Canton or Shanghai in a frame of mind that would exasperate a much less vain people than the Chinese. They sometimes act as if they thought it a mere impertinence on the part of an inferior race to have a pride of its own, and they act as if the chief end of the Chinese were to minister to the demands of British commerce. Not unfrequently they have gone out of their way to shock the prejudices of the most conservative people in the world. Even our diplomatic agents have not always been so cautious or courteous as they are to-day. The origin of the last war with China is not one of those chapters of history which it is desirable to open, and a little more respect for the prejudices of centuries might sometimes have smoothed our relations with the Chinese. The French can give us some valuable lessons in the art of treating subject races. Although they lack our faculty for colonisation, their inborn politeness makes them better fitted to keep on good terms with inferior races.

Digitized by Google

They know how to humour prejudices better than we do; they are less abrupt; they are less eager to go to the point of dispute with a precipitation peculiarly hateful to the tortuous natures of Oriental peoples. Our traders, and even our diplomatists, too often sum up all the resources of negotiations with the Chinese in one word—firmness. That word implies an admirable maxim when it is tempered by patience and politeness, but, unhappily, it is often merely another name for undisguised dictation. It means that we should not waste our time in standing upon ceremony with so false, ignorant, and vain a people as the Chinese, and that the only way to bring them to reason is to tell them we will burn their cities, and shake their rickety Empire to pieces if they do not obey. An example of such impatience has been seen during the negotiations about the murder of Mr. Margary. Believing that the Government of Peking was trying to shield the criminals, some of our countrymen seem to have thought that the only way to have justice done was to do it ourselves by sending an armed English force to the scene of the outrage, and hanging the first guilty mandarin it could catch. We have not the slightest doubt that such a feat might be performed by a small, well-disciplined, well-armed, and well-led troop of British soldiers. English nerve, muscle, habits of obedience, and breechloaders form a wedge that would cut through and through the pulpy mass of Oriental life. What was done in India can be repeated in China. But we must warn any budding Clives that it can be done only at the expense of the same consequences to ourselves. If we shatter the Chinese authority, we shall next be loaded with the responsibility of putting some authority in its place. The necessity would not come in a rush; it would appear insidiously, and in a hundred disguised forms, just as it did in Hindostan. But we should be dragged on bit by bit, often against our will, and as if we were blindfolded. We should be dragged on as we were in India more than a century ago, and as the Russians in Central Asia are to-day. Peremptory orders against conquest would of course be sent from London, just as they are sometimes despatched from St. Petersburg to Turkestan. Adventurous spirits would be punished for striking too hard and going too far, just as they sometimes are reprimanded for committing these offences in Central Asia to-day. But young, ardent, daring spirits would not give a thought to such cobweb checks. Fired by the passion for self-distinction, by a civilised man's hatred of disorder, and by his detestation of the atrocities which would stain Chinese warfare, they would run the risk of receiving rebukes from the authorities at home, and if they should be peculiarly successful, as they would be, they would of course be forgiven. Thus are built up the responsibilities of Empire. Nor is this a mere visionary peril. More than once it has seemed that the Chinese Empire was going to pieces, and that, in spite of ourselves, we might be forced to give a perilous extension to the Sovereignty which has already begun to grow in the Treaty ports. Now, it is well for our countrymen in China to understand once for all that we are not in the mood to undertake the responsibilities of another India. One is quite enough for our energies. Hence the last thing we shall think of doing is to send a British force to do the work of the Peking Government. We must hold that Government responsible for the misdeeds of its own subjects; we must insist that punishment shall be applied by its officials, and not by ours; and, in order that we may not defeat our own purpose, we must exhaust all the resources of diplomatic courtesy and patience before we can look to the short cut of violence. "Anybody can govern in a state of siege;" yes, and anybody can get the better of Governor-General Li-Hung-Chang by means of a few English regiments.

We say all this the more frankly because we do not pretend to believe that the disposition of the Chinese Government is satisfactory. The rulers of Peking do not like our people, and perhaps they despise us in much the same spirit as the citizens of decaying Rome displayed in presence of the invincible barbaric hordes. No doubt the mandarins would outwit us if they could. We have not the slightest reason to believe that the authorities at Peking were grieved by the news of Mr. Margary's death, and, without being uncharitable, we may assume that they would be glad to shelter the murderers. But there is a good deal to be said on the other side. The Chinese are commonly a dispassionate people, free from the promptings of fanaticism or of blind patriotism, and peculiarly alive to the dictates of self-interest. They are the shrewdest race in the East, and they know we bring wealth to their shores. Their sense of our commercial value to themselves is strikingly shown by what our correspondent says about the angry protests the native merchants have directed against the Tax-office for fining them because they have bought sugar from foreigners. These traders know that, "barbarians" as we are, we still pour wealth into their pockets. The same idea is slowly spreading through the whole trading class of a vast Empire. The chief hostility to our presence comes from the literary class, which is cut off from the vulgar details of trade, and despises its prosaic necessities. But the Empire is not wholly ruled by the heroes of competitive examinations, for it is far more at the mercy of what may almost be called Democratic impulses than it is usually supposed to be. During our former troubles with Peking the Emperor declared that he did not dare to offend the deepest prejudices of the people, and it is equally true that the Government must more and more regulate its negotiations with us by the manifest interests of its subjects. The prospect is not, indeed, eminently hopeful, and even a slight mishap might darken it; but we must, nevertheless, do our best to keep both ourselves and the Chinese in the groove of peace. If the preparations for punishing the murderers of Mr. Margary should turn out to be a mere pretence, we must exact redress; if the trade route to Burmah should not be opened by the free will of Peking, we must insist on the fulfilment of the pledge to clear the way for our merchants. If the Embassy to London should be a mere blind for Chinese opposition, we may have to send stringent instructions to Peking. But, meanwhile, let us avoid the error of asking too much. Unlike Japan, which has now its Parliament and its Press, China is the typical land of Toryism. But we may, nevertheless, lead it far, and save ourselves from incalculable embarrassments, by listening to its prejudices as well as to its reasons with the courtesy and the patience which befit a higher civilisation and a superior strength.

Naval and Military.

The inquiry by court-martial into the sinking of the Vanguard by the Iron Duke (in which China residents will doubtless be specially interested on account of the latter vessel having long been on the China station) is now proceeding, and it will probably be some time before the decision is published. It appears that prior to the fog coming on the whole fleet were going at about seven knots an hour, and that the Vanguard slackened to five knots, and immediately after had to alter her course on account of there being a vessel ahead, and was thus turned with her broadside towards the Iron Duke, which was behind her. It will remain to be seen, by the verdict of the Court, whether the naval authorities consider it prudent that the fleet should have been kept moving at the rate it was when enveloped in a fog. A significant letter upon this point has appeared in *The Times*, from the pen of a Rear-Admiral, who assumed that the captains of both vessels would be honourably acquitted, and impliedly, but very plainly, intimated his opinion that there could be no doubt that the blame, if any, attached to head-quarters.

The following officers who last served in China have received appointments as under:—Lieutenant G. L. Atkinson (in the Iron Duke, from 1870 to 1875), to the Sapphire, 14, screw corvette, Devonport; Lieutenant John Durnford (in the Rinaldo, from 1872 to 1874), to the Sultan, 12, Channel Squadron; Lieutenant the Hon. A. C. Littleton (in the Salamis, from 1872 to 1874), to the Express, 6, gunboat, Devonport; Lieutenant S. B. Roupell (in the Thistle, from 1870 to 1873), to the Sirius, 12, sloop, Devonport; Navigating Sub-Lieutenant W. F. Thompson (in the Avon, from 1874 to 1875), to the Express; Mr. Alfred Palmer, Engineer (in the Iron Duke, from 1874 to 1875), to the Revenge, 32, flagship, at Queenstown; Mr. J. V. B. Thompson (in the Hornet, from 1873 to 1875), to the Weazel, gunboat, Sheerness; Dr. W. R. Bennett, Staff-surgeon (in the Princess Charlotte, from 1872 to 1875), to the President, naval reserve drill ship, West India Docks; Dr. W. Galloway, Surgeon (in the Elk, from 1871 to 1875), to the Excellent, gunnery ship, at Portsmouth; Mr. James Hallahan, gunner (in the Victor Emanuel, from 1873 to 1875), to the Implacable, training ship, at Devonport.

Admiral Sir Charles Elliot, on the reserved half-pay list of the Royal Navy, and late Governor of St. Helena, died on the 9th inst., at Wythycombe, near Exmouth. The deceased, who was born at Dresden in 1801, was the son of the late Right Hon. Hugh Elliot, Governor of Madras, brother to the first Earl of Minto, a former Governor-General of India. He was educated at Reading, and entered the Royal Navy in 1815, at the close of the great war, reaching the rank of Captain 1828, Rear-Admiral 1855, Vice-Admiral 1862, and Admiral 1865. He was present at the bombardment of Algiers in 1816, and served subsequently in the East Indies; was Protector of Slaves and member of the Court of Policy in Guiana from 1830 to 1833, when he was sent out to China as Superintendent of British trade. Admiral (then Capt.) Elliot was British Plenipotentiary in China during the first Chinese war in 1841, and served subsequently as Consul-General in Texas from 1841 to 1846, when he was appointed Governor of Bermuda, and transferred to Trinidad in 1854. His last colonial appointment was as Governor of St. Helena from May, 1863, to December, 1869, when he retired from active service. He was created a K.C.B. in 1856.

The expected court-martial on the Captain of the Valorous will not take place, he having shown the First Lord of the Admiralty that the rock on which she struck is not marked on the Admiralty chart. The Valorous has been docked at Plymouth. The Admiralty have granted the officers and men double pay for the time she was employed in connection with the Polar Expedition.

Lieutenant-Colonel P. Bedingfield, of the 25th brigade of Royal Artillery, who served in the expedition to China in 1860, and was present at the capture of the Taku forts and the surrender of Peking, for which he received medal with clasp, and Brevet of Major, is about to be promoted to the rank of colonel.

The Oxford, hired transport, has arrived at Gravesend, from Ceylon, with time-expired men and convalescent troops from several of the regiments in Ceylon and the Straits Settlements. She also has on board a number of military prisoners who have been sent home to undergo their punishment.

Vice-Admiral Sir W. King Hall, K.C.B., has been presented by the *employés* of Devonport and Keyham Dockyards with an illuminated address, expressive of their great regret at his leaving the command, and thanking him for his ever kind and courteous bearing towards them.

Colonel Peregrine H. Fellowes, of the Portsmouth division, has been selected to succeed Colonel Rodney in command of the Chatham division of Royal Marines. He joined the corps of Royal Marines 1838, became lieutenant 1842, captain 1851, lieut.-colonel 1862, and colonel 1867.

Captain R. W. Stone, of the 80th Regiment (Hong Kong), has obtained twelve months' leave of absence. During the leave of absence of Surgeon-Major D. C. M'Fall, Surgeon-Major Gaye has taken the medical charge of the regiment.

Major Tremlow, 80th Regiment, sailed for Hong Kong per O.S.S. Company's steamer Antenor on the 7th inst. On arrival at Hong Kong Major Tremlow will resume command of his regiment.

Captain H. G. Carleton and Lieutenant R. G. Warton, of the first battalion of the 10th Regiment (Singapore), have been taken on the establishment of the Depôt.

Lieutenant J. S. O'B. Blake, of the first battalion of the 10th Regiment (Singapore), who has been for four years Fort Adjutant at Hong Kong, has been invalided.

The ironclad Audacious, flag-ship on the China station, has been successfully docked at the Japanese Government docks at Tokoska.

The gunboat Midge will have new boilers placed in her. The work will be done at the Naval Yard at Hong Kong.

THE CASE OF THE "OCEAN" AND THE "FUSING."

THE unprecedented and extremely unsatisfactory proceedings which have taken place at Shanghai in connection with the collision of the vessels above named are only the natural out-come of the extraordinary ruling giving by Sir EDMUND HORNBY some time ago in respect to the steamer *Kwangtung*, and upon which we commented at the time. Our readers will recollect that the ruling in question had the effect, contrary to all precedent and to cases heard before Sir EDMUND HORNBY himself, of placing cases arising out of collisions at sea in which the owners of Chinese vessels were concerned as plaintiffs, under the jurisdiction of a mixed tribunal, in which the British Consul and a Chinese official sat together as co-judges; and in the case which has just been heard in Shanghai this principle is carried a step further, and the relatives of certain Chinese who were drowned in consequence of the collision in question have been allowed to sue the captain of the *Ocean* before a Court composed in the same manner, that is, consisting of Mr. MEDHURST, H.B.M. Consul at Shanghai, and the Chinese Taoutai at that place, for damages, or rather for compensation, on account of their deaths. The case was gone into at considerable length on behalf of the Chinese claimants, and Mr. HANNEN, counsel for the defendant, after hearing it out, respectfully protested on behalf of his client against the jurisdiction of the Court, and abstained from making any other defence. It is to be hoped that the line of conduct which has thus been adopted will have the effect not only of obtaining justice to his clients but also of having the question of jurisdiction definitely settled. It would undoubtedly seem in the present case, even more than in that of the *Kwangtung*, that there are no grounds whatever for the assumption that, under the Seventeenth Article of the Treaty, a claim such as this should be heard by a Mixed Court. In the case of the *Kwangtung*, as we pointed out when commenting upon it at the time, there was just a shadow of ground for the conclusion that the matter might be tried by a Mixed Court, because the proceedings in Admiralty in respect to collisions are *in rem.*, and so far might not be affected by the Exterritorial Clauses of the Treaty, exterritoriality being strictly a personal right. But in the present instance the sole ground upon which by any plausibility the case could be considered one to be treated in this manner is wanting, as the proceedings are simply an ordinary claim for damages at common law against the captain. The reason given by the counsel for the claimants why this case should be heard by a Mixed Court, namely, that a claim for damages on account of deaths from collision could not be made in Admiralty, and would not be good at common law, and therefore the case was one in which the Consul ought to call in the aid of the Chinese authorities in order to settle it equitably, is certainly one of the most original that has ever been advanced. If damages could not be obtained in the case in question at common law, there was probably some good reason for such being the fact, and it is simply absurd to say that wherever the existing English law fails to meet what the Chinese may consider equity, recourse is to be had to a Mixed Court presided over by the Consul and Taoutai, and subject to all the irregularities which must of necessity attach to a tribunal so constituted. There is upon this basis absolutely nothing to prevent the Consul being called upon by the Chinese authorities to review every single judgment of the Supreme Court which may not be in accordance with Chinese ideas of justice, and we may be perfectly certain, unless the practice which is at present being followed be put a stop to, the next step will be the denial altogether of the right of British subjects in China to be tried by their own authorities, and according to their own laws; a right which has been clearly conceded by the Treaty, and has hitherto been recognised without question by the Chinese authorities. Most assuredly we shall have reason to feel that the large sums of money which have been expended in the establishment of the Supreme Court and in the salaries of its officers have been spent to very poor account if this is the magnificent result at which we have arrived after ten years.

TREATY REVISION.

ACCORDING to the *North China Herald* received by the last mail, it is reported that there is a likelihood that a revision of the Treaties with China will be attempted on the basis of the celebrated Alcock Convention of 1870. If there be any foundation for this statement—which we presume could easily be ascertained by inquiry in the proper official quarters—it would, we think, be highly desirable that the Home Government should take some steps to obtain direct information as to the state of the China trade, and the exact nature and bearing of the changes which are likely to be required in order to place it upon a satisfactory footing. The plan which was adopted by Sir RUTHERFORD ALCOCK no doubt seemed to be well advised, but the result proved that it was not in every respect adapted to the end in view. He sent an intimation to the various Chambers of Commerce that he was prepared to receive their views on the subject, and the result was that a large number of memorials were sent in to him from the different ports, each advocating such changes as seemed necessary or desirable to the merchants at the place from which it emanated. Upon this basis the Minister proceeded to enter upon his negotiations with the Chinese, which culminated in the Convention of 1870. There was enough concurrence of opinion among the various Chambers of Commerce to make it clear what were the main evils which required remedying, and it is not to be denied that Sir RUTHERFORD clearly discerned the points—the chief of which was with reference to internal trade—at which the Treaty required revising. But after the Convention was agreed to by the Minister, the matter was taken up by the Chambers of Commerce at home, and the result was, as our readers are mostly aware, that the Home Government saw sufficient in the objections which were raised to cause them to decline to ratify the Convention which had been arrived at after so much trouble and difficulty. This unfortunate result might probably have been avoided had the Home Government, in view of the approaching revision, taken steps to obtain information at home in the same manner as the Minister was obtaining it in China, and we think it would be very desirable if any revision is at present contemplated that steps should be taken with this object. There are a large number of mercantile men in high positions at home who are thoroughly acquainted with the subject, and whose advice would be of the greatest possible value to the Government in coming to a decision as to the points upon which revision should be asked for from the Chinese. Two modes might be advantageously resorted to to gain the requisite information. The Chambers of Commerce at Manchester, Bradford, and the other large manufacturing and commercial centres interested in the China trade might be invited to furnish the Government with their views, and a Select Committee of the House of Commons might also be appointed to take the evidence of mercantile men, officials, and others conversant with the China trade, and draw up a report upon the subject accompanied with recommendations as to revision. At the present time a proposition to this effect would in all likelihood be met favourably, as there is a general feeling that there is something wrong in the China trade; but the large majority of people are in complete ignorance as to the direc-

Digitized by Google

tion in which an improvement can be looked for. The plan suggested would also have the great advantage of making the matter a public question at home, and so strengthening the Government in the action they might think necessary to adopt, as well as in abstaining from pressing for revision in such directions as it might appear to them that action was not desirable.

THE MIXED COURT AT SHANGHAI.

THE Mixed Court at Shanghai was instituted with the best motives, but, though it has to some extent answered the purpose for which it was called into existence, it cannot be considered to have been entirely successful and satisfactory as an institution. Indeed, it has long been manifest that some radical reforms were imperatively needed in it, and before taking any actual steps in this direction, the Treaty-power Consuls appear to have acted wisely in consulting the three experienced officers who have watched over British, American, and Austro-Hungarian interests in the Court. Dr. YATES and Mr. HAAS have furnished short reports, but Mr. ALABASTER, who has had the most experience of the working of the institution, has treated the subject far more fully and exhaustively, and his report, so far as his suggestions are practicable, will, we hope, meet with the consideration which it deserves, when the matter is finally debated at Peking. The recent ruling of Chief Judge HORNBY as to the class of cases which should be properly heard before Mixed Courts makes it especially desirable that the whole subject should be speedily and authoritatively settled on a new basis, more particularly in regard to the permanent Mixed Court at Shanghai.

In his elaborate report Mr. ALABASTER deals with four prominent defects in the present Mixed Court at Shanghai:—(1) the absence of a definite code of law, (2) the nature of its punishments, (3) the want of permanence in the officers attached to it, and (4) the dependent position of the Chinese magistrate. As regards the first defect, it is manifestly useless to think of carrying out the Chinese Penal Code, because "their law is as solely directed to the repression of personal violence as ours is to the protection of property once acquired;" this being the case, Mr. ALABASTER thinks it is highly desirable to endeavour to induce the Chinese to adopt the Indian Criminal Code, as being of recent date and "drawn up with special reference to oriental conditions." A graver objection to the existing Court than even the want of a proper code is the nature of its punishments, and this raises a very difficult question, the solution of which is not at first sight obvious. The reintroduction of the "chain-gang" system has been proposed, but though it is better than the cangue and flogging, inasmuch as the punishment thus inflicted is not purposeless or brutal, still on several grounds the proposition appears impracticable. Mr. ALABASTER is of opinion that the only way to make the Mixed Court really effective in this particular is to provide machinery "by which long terms of imprisonment can "be awarded, and some such system as has been estab-"lished in the Alipore and other Indian jails." To carry out the reformatory system advocated, it would be necessary to have a jail, which, however, the Municipality or the Chinese Government will be obliged to have in the long run. "As a matter of expense at first, the institu-"tion of a jail," on Mr. ALABASTER'S plan, "would cause "considerable outlay; at first every restraining power "would have to be free and paid; but as the system got "into work, the expenses of supervision would almost dis-"appear, the higher class prisoners guarding and control-"ing, as is done at Alipore, those less advanced, while the "industrial arts practised by the prisoners would in time "make the institution almost, if not entirely, self-support-"ling." The plan enunciated is an admirable one, but we doubt its practicability at Shanghai, at least until the Chinese have made further progress in the arts of civilisation, and we do not think that the Chinese can at present be induced to depart so far from their time-honoured practices as to consent to its adoption. Touching the third defect in the constitution of the Mixed Court, Mr. ALABASTER wisely advocates as a remedy the appointment of a *permanent* Foreign Assessor. The reason for this suggestion is obvious, but we fear the question of nationality will be a difficult one to overcome. "As regards the fourth point," Mr. ALABASTER observes, "the necessity of "making the Chinese magistrate more independent than "he is at present, and the giving him more extensive "powers than he at present possesses, there is no doubt "that the present conflict of jurisdiction between the "magistrate of the Mixed Court and the district magistrate "of Shanghai should be set definitely at rest, and this, it "would appear, can only be done by erecting the settle-"ments into a distinct Chinese jurisdiction." This suggestion is certainly a reasonable one, and ought on every ground to be insisted upon at Peking.

THE HOME PAPERS ON CHINA.

ALL who have perused with any attention the comments upon China affairs which have of late appeared in the home papers—and especially those which have been published since the murder of the late Mr. MARGARY—must be struck by the change in tone which has come over them, as compared with what for years past we have been accustomed to read. The more important of these comments have been, from time to time, reproduced in the columns of this paper, as specially interesting to readers in China, and to those at home who are concerned in Chinese affairs; and it is curious to observe that in respect to a number of different matters the arguments over and over again urged in this paper and in the columns of our Chinese contemporaries, and systematically ignored by the general run of home journals, are now brought forward with marked emphasis, more especially by *The Times*. The remarks we have made with reference to the recent news from Peking, to the effect that Mr. WADE was being thwarted and insulted in the course of his negotiations with regard to the MARGARY affair, and the comments made a short time since with reference to the seizure of the steamer *Carisbrooke*, are peculiarly noticeable as showing the change which has taken place. In the former, the leading organ of public opinion at home does not hesitate to counsel the firmest action on the part of our representative. "If," it says, "Mr. WADE were "to relax the rigour of his demands for reparation on the "score of the Manwyne disaster with the hope of averting "some dreaded explosion of popular rage, he would do more "to precipitate the catastrophe than if he exacted success-"fully the punishment of a hundred criminals." In speaking of the *Carisbrooke* affair, *The Times* does not hesitate to point out the anomalous state of our relations with China, and to urge that the Treaty of Tientsin is too limited in its bearings to be of a permanent character. "As long "as the Tientsin Treaty forms the basis of intercourse "between us and the Chinese, we must conform to its "provisions, and let our countrymen understand that "they cannot be supported in any material breach of that "or any other agreement. But stipulations so narrow, "exclusive, and restrictive of mutual advantage ought not "to be construed with the utmost strictness. We know "they cannot be permanent; the Chinese know it too; "we are, therefore, in a position to impress on them the "necessity of mutual forbearance, the duty of treating "the present with a view to the future, and regarding the "intercourse with the outer world by the forecast of en-"lightened observation, and not with the prejudices of "1842, or even of 1860. It is perfectly certain that "the barriers which Imperial jealousy has erected against "the foreigner will be broken down either by the "enterprise that belongs to peace or by future wars." This is plain speaking for the paper which is generally accredited with indicating to a considerable degree the views of the Government and the general opinion of the public, and which possesses sufficient standing and authority almost entirely to lead public opinion in regard to such matters as our relations with a country like China. Hope of any decisive action to vindicate our rights, position, and *prestige* in China has been so long deferred that we cannot but hesitate to draw conclusions even from such a noticeable change as that which has taken place; but the inference seems almost irresistible that at last the Government and the public are beginning to bestir themselves, and that the patience which has characterised their dealings with China is beginning to become exhausted.

HER MAJESTY'S CONSULS ON OPIUM.

IN view of the recent discussions in the House of Commons and elsewhere with regard to Opium, it will not be uninteresting to survey briefly what Her MAJESTY'S Consuls have to say on the subject in their last Reports, of which we have already published a summary. From Tientsin we learn that in 1874 an increase of 452.92 piculs in the importation of Malwa more than counterbalanced a decrease of 78.52 piculs in Bengal and Persian. The total import of Opium in 1874 was 5,310.75 piculs, or some 1,470 and 1,570 piculs less than it was in 1871 and 1870, but more than 2,400 piculs in excess of the import of 1864. Mr. MONGAN draws attention to the way in which the abundant supply of native Opium is driving Persian out of the market, and as we have before remarked, he gives a table showing the prices and general character of the crops of native Opium in the provinces of Shantung, Chihli, Shansi, Honan, Kuantung, Kansuh, Szechuen, and Yunnan, though, of course, the figures are only approximate. His observation on this is an odd comment on the supposed hostile attitude of the Government to Opium cultivation. "The mere enumeration," he says, "of the above places in which the poppy is now "undoubtedly cultivated, compared with the names of "the provinces referred to in the Imperial Edicts of "1865 and 1869 against poppy culture, shows how the "production of native Opium has been increasing. The "first of these Edicts named only Kansuh, Shensi, and "Shansi as poppy-growing regions; but the second enu-"merated, in addition, Kiangsu, Honan, and Shang-"tung, and now it may be seen that particulars are "even obtainable as to the character of the crop and "price of the article in the metropolitan province of "Chihli." Although Malwa is unquestionably the favourite in the Tientsin market, still from the high price paid for the native drug in Shansi he "thinks that it may "fairly be inferred that the taste for it is being established "in North-Western China, and that this must sooner or "later operate injuriously on the future development of "our Indian trade." There can be little doubt that the large falling off in the price of Malwa in recent years is in a great measure due to "the increased production and improved quality of its native rival." At Hankow the import of Opium was about 2,861 piculs, against 2,994 piculs in 1873, or a decrease of 133 piculs, "explained by the increased consumption of native Opium." In 1864 the import was 2,018 piculs. "Native Opium," says Mr. HUGHES, "seems, in fact, to be rather more in favour in this part "of China than formerly. . . . Many well-to-do "Chinese, who had been in the habit of smoking foreign "Opium, have given it up in whole or in part in favour of "the native article, the use of which is believed to be less "hurtful to the constitution, and attended with less physi-"cal inconvenience." The improved facilities recently offered for trade at Kinkiang have not, according to Mr. KING, been without their effect on the Opium market, and the importation has been slowly but steadily increasing; last year it was about 2,900 piculs, against some 2,200 in 1864. It is impossible, however, to arrive at any definite idea of the amount of foreign drug actually imported into the district, as much of its supply has come overland from Canton and Swatow. "Attempts to introduce the culti-"vation of the poppy having proved hitherto unremunera-"tive, Kiangsi is thus more than the northern ports, and "even Hankow, dependent on the foreign supply." At Ningpo an increase of 178 chests of Malwa, and a decrease of 79 in Patna and other kinds, give a net increase of 99 chests. The total import was 7,723 piculs, against 3,304 piculs in 1864. Mr. FORREST furnishes some interesting details with respect to the manner in which the foreign drug is taxed in Chekiang and the neighbouring provinces, and he goes more fully than most of his colleagues into the subject of native Opium. "The increase," he says, "in the growth of the poppy in Chekiang is very start-"ling. . . In the Taichow district little else is grown "in the plain; . . . it is to be found close up to the walls "of Ningpo, and in the gardens at the back of the foreign "settlement. . . . The vast plain of the Sanpo dis-"trict, on the shores of the Hangchow Bay, where three "or four years ago the poppy was unknown, is now a vast "and ever-extending opium farm. Of course, the officials "put out the usual proclamation prohibiting the growth, "but the principal use of these and all other Chinese pro-"hibitory proclamations is to set clearly before the eyes "of the people illegal courses which can be pursued in "safety on payment of certain sums to the magisterial "runners. The principal grower in the Hsiang shan dis-"trict is a retired provincial governor, and not a few "officers on the active list are largely interested in the "culture of the prohibited drug." H.M.'s Consul is of opinion that native Opium is entering more and more closely into competition with the Indian article, and he is convinced that the present defects in its manufacture will soon be remedied. Any real attempt, he says, to stop it would throw the natives, mostly hardy mountaineers and never well in hand, into open revolt. No information whatever on the subject of Opium is obtainable from the Amoy Report. At Tamsuy the import is almost stationary, being 1,665 piculs, of which three quarters were Benares. Nothing is said in the report with regard to native Opium. Into Swatow about 9,374 piculs were introduced in the year 1874, nearly two thirds being Malwa; "a great proportion of this is supposed to have been carried to far off districts in different provinces," the Opium taxes at Swatow being lighter than at the neighbouring treaty ports. In 1864 only 4,378 chests of Malwa and Patna passed through the foreign Customs. Apparently there is no demand for native Opium in this district, as no mention is made of it. The same remark applies to Canton; but foreign Opium there shows an increase of 149 piculs over the previous year, the total being 973.12 piculs, but, of course, this does not include the import through native Custom-houses and from other sources. The amount of Malwa and Patna imported in 1864 was 2,490 piculs, and in giving these figures the then Commissioner of Customs, Mr. G. B. GLOVER, laconically observes,—"The amount "stated above is about one-tenth of the entire importa-"tion, the remaining nine-tenths being smuggled." Speaking of the Canton Opium trade Sir BROOKE ROBERTSON says:—"Taking an average of the past ten years, the "amount of Opium imported into Hong Kong is almost "at par, thus showing that the increase, if any there be, "is very slow, and by no means supports the assertions of "philanthropists at home that it is gradually sapping the "life of the Empire. . . . That its use may be abused "is probable, but excess carries with it, among the "Chinese, the same amount of moral degradation as "inebriety does with us."

THE CHINA TRADE.

(CONCLUSION.)

IN the last article which we published on the above-named subject we showed that the various circumstances connected with the history of commerce in China since the conclusion of the Tientsin Treaty go to prove that the chief cause of the present depression in the trade is the degree to which enterprise is limited in China through the restrictiveness of the officials, which almost entirely excludes capital from local investment. In confirmation of this view, we would, in conclusion, call attention to one salient fact, which is of itself sufficient to show the magnitude of the field for foreign enterprise which exists in China. A comparison of the normal rates of interest in the large monetary centres of Europe with those in China will demonstrate conclusively what could be done were the country opened up to foreign enterprise. In Europe interest on money lent on good security varies between three and four per cent., while in China, as is well known to all who have been engaged in the trade, the normal rate of interest is twelve per cent., with good mercantile security in the form of cargoes and the like pledges. In Hong Kong and the Treaty ports, where foreign banks are established, this rate is no longer to be obtained, but that it is the average rate among the Chinese is proved by our experience in the earlier days of the China trade. The measure of what could be done in China merely as a direct means of investing capital, were the country opened up and due protection to commerce afforded, is represented by the difference between three and twelve per cent. interest. No doubt as trade progressed this difference would naturally be shared between the Chinese trader

Digitized by Google

and the foreign capitalist, and an average rate of interest between these two extremes become established. The extent to which that average rate was under twelve per cent. would represent the direct gain in a purely financial point of view to the Chinese borrower and the extent to which it would be over three to four per cent. the advantage to the foreign capitalist. In precisely a similar way would advantage be gained both to producer and consumer in respect to British manufactures were the restrictions removed which at present prevent our goods having free access to the interior marts; and which enhance the price of produce brought down from the country for sale to foreign merchants. The benefits which it has always been held would accrue from the opening up of China will thus be seen to be of no mere imaginary or visionary nature. Facts familiar to all who have watched the progress of events prove the results which would be anticipated upon general grounds as likely to accrue from the attempt to conduct a large import and export trade upon the restricted basis of our relations with China to have been brought about, and make it impossible to doubt that, though well adapted as a temporary and tentative measure, the conditions of the Treaty limiting our right of trade to the Treaty ports, and precluding all enterprise or even any legitimate sphere for the investment of foreign capital in the interior, are too restricted to admit of that progress and expansion of trade which must of necessity arise in the process of years. It is therefore the part of those interested in our trade with China to endeavour to induce their respective Governments, and more especially the British Government, which is most largely interested in the question, to bring about some revision in the Treaty, which will give further play to foreign enterprise in China, and tend to make the trade one with the whole country and not merely with the coast. In proportion as this end is attained there will be a field opened to foreign capital and enterprise, the limits of which can scarcely be over-estimated. The time has, therefore, assuredly come for a consideration of a future revision of the Treaty with a view to meeting the state of affairs actually existing, and it is to be hoped that between this and the year 1878, when another decade from the signature of the Tientsin Treaty will have passed, and the time will have again arrived for demanding a revision, the Chambers of Commerce not only in China, but also in London, Manchester, and other commercial centres largely interested in the trade, will have taken steps to place the Government in possession of such information as will induce them to insist upon the Chinese granting such concessions for trade in the interior of the country and for the introduction of foreign improvement, if possible also of railways and the like enterprises, as will have the effect of making the field for our trading powers and our capital much more in proportion to the appliances and industry we are able to introduce than they can possibly be while our trade consists only in the comparatively small business which is filtered through endless sieves of obstructiveness between the Treaty ports and the interior of the country.

A REUTER'S telegram was received on Friday last in which it is stated that the reported settlement of the difficulty consequent upon the murder of Mr. MARGARY was premature, and that the only terms agreed upon are that a Special Ambassador shall be sent to London, and that LI-HUNG-CHANG will institute a commission of inquiry in Yunnan. It is important to note that it is not stated whether this is to be a joint commission or one exclusively under Chinese direction. If it be the latter, we may take it for certain that nothing will really be done to punish the offenders. The change in the aspect of the news is probably to be accounted for by the Chinese having agreed to the conditions as before reported, but afterwards, according to their inveterate custom, having commenced to hamper them with conditions such as will render them completely nugatory. It is evident that the loophole of sending the Special Ambassador to England is being availed of as the means to gain time to afford an opportunity of evading giving any substantial reparation, and that unless prompt steps be taken and a firm attitude be adopted, the guilty parties will be allowed to escape unpunished.

AN extraordinary rumour has, according to the *North China Daily News*, gained currency to the effect that the Chinaman for whose murder one FAWCETT was tried at Chefoo was not killed. It appears that at the trial the only proof of the death was a written report of the inquest, to which the prisoner's counsel took exception. We fully agree with our China contemporary that the most searching investigation ought to be made upon the subject, as it is a most serious matter if the English law Courts in China are to be made the means of bringing false accusations in capital cases. The mere fact that this rumour has gained general currency ought to be a warning of the paramount necessity of rigidly adhering to the strictest rules in the reception of testimony from Chinese witnesses.

WE observe that the Hong Kong, Canton, and Macao Steam Navigation Company have decided to have their business conducted by a board of directors instead of placing their vessels in the hands of agents. In consequence of this they have been threatened with opposition, in one instance in a very pointed manner; but they will at least have general sympathy in not having submitted to coercion of this character, and it is to be hoped that they will be able to carry on the affairs of the company in such a way as will enable them to continue to command the position which they have hitherto held. The Company's vessels are well and favourably known to the Chinese, and when once this is the case it is not very easy to establish a successful opposition.

SIR ARTHUR KENNEDY, accompanied by Captain O'CALLAGHAN, will sail for Hong Kong, to resume the office of Governor, on the 24th of October.

Monetary and Commercial.

Tenders for £700,000 in bills on India were received on the 15th inst. at the Bank of England. The amounts allotted were:—To Calcutta, £446,500; Bombay, £184,200; and Madras, £11,000. Tenders on all Presidencies at 1s. 9¾d. will receive in full. No allotments were made under that price. These results show a better demand existing for means of remittance to the East.

The report of the directors of the London Bank of Mexico and South America states that after paying charges, deducting rebate, and making provision for bad and doubtful debts, there is an available balance of £16,272. Owing, as stated, to the financial crisis in Peru, the directors are unable to recommend a higher dividend than at the rate of 6 per cent. per annum, which will leave £1,272 to be carried forward.

The directors of the Ionian Bank have declared a dividend and bonus for the half-year ending June 30, at the rate of 8 per cent. per annum.

A telegram from San Francisco states that the financial situation continues to improve. The subscriptions to the guarantee fund of the Bank of California now reach $7,000,000.

It is announced that the Anglo-American Telegraph Company will on and after the 15th inst. reduce its rate for messages to New York to 1s. per word. In lowering their charge by 50 per cent. the company evidently has made up its mind to run the Direct United States Cable Company very hard, whose tariff at present is 2s. per word for day messages, and 1s. 2d. in the night to New York. At the existing rate of 2s. per word the average receipts of the Anglo-American Company are about £36,000 per month, or say £430,000 per annum, from which all expenses of working and management have to be deducted, and a dividend paid on a capital of seven millions. The rival company's capital is a little over a million and a quarter. With the reduced rate of 1s. per word it would, of course, require double the existing number of messages to be forwarded to produce the same amount as at present, and, were these obtained, there would of necessity be an increase in the working expenses.

The suspension has been announced of Mr. John Entwisle, of East India-avenue, in the East India trade. The liabilities are understood to be about £100,000. The business originated in 1839 under the title of Entwisle and Gartnett, and the firm has enjoyed a good credit.

It is stated that Mr. John H. Watt, merchant, and member of the Town Council of Glasgow, has been unable to meet his engagements. The amount of his liabilities is estimated at £50,000. It is expected that the estate will turn out well.

Advices from New York announce the failure of Messrs. F. Schuchardt and Sons, bankers and merchants of that city. The house had been established for half a century, and its business

Digitized by Google

connections were extensive. It is understood that the suspension was partly occasioned through railway ventures. The liabilities are not stated, and, although they are considered to be very large, the belief at present is that they will be ultimately paid in full.

The failure of Messrs. Hallett, Manning, and Prentis, insurance brokers and merchants, is also announced.

The deliveries of tea from the bonded warehouses in London for the week ended the 11th inst. amounted to 3,762,847 lb., of which 2,172,839 lb. was for home consumption, 847,058 lb. was removed coastwise, 610,478 lb. was exported, 129,409 lb. was sent coastwise for export, and 3,063 lb. was for ships' stores. The duty received was £54,321, being about ½ per cent. more than in the previous week.

Bar Silver has been in good demand, and the price has been maintained at 56¾d. per oz. standard. The supply has been very limited. Mexican Dollars to the amount of about £190,000 have been disposed of at 55¼d. per oz.

ARTICLES OF IMPORT.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—The firmer tone noticed in our market during the past two weeks still continues, with a fair amount of business doing, buyers only purchasing for actual wants. Importers generally are holding for full prices, the arrivals being still moderate. The second crop black-leaf Congous have sold at full rates, quality considered. Public sales have been on a limited scale. The public sales have been again small, comprising only 6,334 packages, the whole of which were sold without reserve. The Deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.		1874. lbs.
Home Consumption	2,225,463	...	2,147,765
Coastwise	873,278	...	870,744
Exports	662,415	...	859,606
	3,761,156	...	3,878,115

Congous.—Red-leaf kinds : Siftings show no alteration. Old season's common to fair remain as before. Fair Kaisows have been saleable at last week's prices. Fair to good medium Saryunes have been in request at full prices. Good to fine Kaisows show no change, finest being in limited request. Pak Lin kinds maintain the improvement lately quoted. Black-leaf kinds : Common to fair of old import still realise low rates. In new, common are difficult of sale from 10d. to 11d. per lb. Fair to good medium from 1s. 2d. to 1s. 5d. have been in demand, and full prices have been paid ; good to fine show no change ; in finest there has not been much done. In new-make kinds common have sold at previous prices ; fair show no change ; good kinds have been in demand. Oolongs still remain difficult of sale. Souchongs have sold at full prices for good to fine kinds. *Scented Teas.*—Canton Capers maintain the improvement last quoted, and a fair amount of business has been done. Orange Pekoes remain as before, Macao kinds selling better than the long-leaf kinds. Foochow Capers show no change. Orange Pekoes have been in request from 1s. 6d. to 1s. 8d. for good to fine. Some finest have been sold from 2s. to 2s. 1d. per lb. *Green Teas.*—The sale of new Ping Suey went off heavily, and prices ruled low. Gunpowders from 10½d. to 2s. 1½d. per lb. Young Hysons from 9¼d. to 1s. 1¾d. per lb. Other kinds also sell slowly at auction.

SILK.

The tone of the Market has improved, and there is a better demand for nearly all classes of Silk. Prices of Chinas and Cantons are steadier and those of Japans have advanced fully 6d. per lb. Deliveries 1st to 15th inclusive :—China, 1,670 Bales ; Canton, 224 ; Japan, 226 ; Total 2,120 bales.

Messrs. Arles, Dufour, and Co.'s Lyons Circular, dated 11th inst., says :—Chinas have led to a very moderate business, in consequence of the large figures of direct imports in the hands of consumers. This circumstance, coupled with the poor quality of the silk, has established prices in favour of buyers. We may, however, safely anticipate a large consumption of Asiatic raws for the season, and it is to be hoped that prices will show more firmness when supplies are partially exhausted.

COFFEE.

The market for Plantation Ceylon has remained in a dull state, and prices have continually given way until Thursday, when the demand revived, and rather dearer rates were paid, still leaving prices quite 2s. 6d. lower than a fortnight ago, middling closing at 112s. 6d. to 113s. Native has declined about 2s., fine ordinary selling at 97s. The current quotations are plantation triage and ordinary 87s. 6d. to 100s., grey to coloury small 101s. to 108s. 6d., low middling grey 109s. to 111s. 6d., middling 112s. to 113s. 6d., good middling to good bold coloury, 114s. to 117s. 6d.; fine 118s. to 119s., pea-berry 125s. to 131s. 6d. Native triage 84s. 6d., fine bold 104s. to 105s., pea-berry 105s. 6d. to 106s. 6d., fine ordinary 97s. per cwt. The only sale of other East India has been 276 bags mixed brownish Singapore at 85s. per cwt.

The Dutch Trading Company have announced their next public sale for the 22nd inst., when 96,856 bags Java will be offered ; good ordinary valued at 60c.

SUGAR.

With a plentiful actual supply, and an exceptionally abundant crop of beetroot in anticipation, the previous depression and languor has been further prolonged, and, as holders have shown an increased desire to sell, prices have again given way, and are now not only the lowest for the present year but for several preceding. The market for *Manila* continues stagnant, and only a moderate business has been done, consisting of unclayed Ilo Ilo at 15s. 6d. In other kinds little has been done. In auction 22,025 bags clayed were all bought in, good to superior at 17s. 6d. to 19s. 6d. *Penang.*—Native kinds, of which supplies almost entirely consist, are neglected, and in auction of 9,453 bags only 2,000 bags good sold at 16s. 3d., the remainder being bought in at 16s. to 17s. per cwt.

COTTON.—Almost uninterrupted dulness has prevailed in this market, and prices have shown a downward tendency throughout, but the actual variation in value is slight. On the spot Tinnivelly has been in fair request, closing at 5⅝d. for good fair, and Western Madras at 4⅝d. for fair, but the total transactions are considerably less than in the preceding interval. Afloat the sales have been small, consisting chiefly of good fair Tinnivelly, closing at 5⅝d., or ⅛d. lower.

COCOANUT OIL.—The demand for Ceylon has continued to expand, and prices are again rather higher ; 120 hhds. have been sold at £38, 40 to 50 tons at £38 5s., 100 tons in pipes fair to fine at £37 10s. to £38, and 100 tons in course of landing at £38, whilst for arrival of August and September shipment several hundred tons have changed hands at £37 10s., with further buyers thereat ; since when 80 tons June sailing have realised £38 5s. for pipes and £38 10s. for hogsheads, and 100 tons May sailing, chiefly pipes, at £38 5s. per ton.

CUTCH.—At auction of 2,600 boxes fine Pegue (Cock mark), just arrived, 200 boxes sold at 26s., being easier transactions. Privately small transactions have occurred in fine Pegue at 27s., Elephant at 27s. 6d. per cwt.

CANTHARIDES.—8 cases China sold at 3s. 4d. to 3s. 6d.

CHINA PRESERVES.—At auction 150 cases Ginger (Chyloong) of old

Digitized by Google

import sold at 7d., also 32 cases (20 tins each) dry ditto at 8d. to 8¾d.

CAMPHOR.—The market has been rather firmer, and about 300 cases China have changed hands, old reweights at 70s.; new landing weights at 69s. to 69s. 6d., closing with sellers of the former at 72s. 6d., and the latter 70s. per cwt.

CUBEBS.—Market steady; of 175 bags offered about one-third was sold at 25s. to 25s. 6d. for fair stalky quality.

COLOMBO ROOT.—Good and fine quality continues scarce, and in request.

COIR GOODS.—At auction about 400 bales and 100 tons Yarn met a good demand, and the bulk found buyers at full prices to an advance of £1 per ton. Of 750 bales Cochin Fibre, about 500 sold at rather dearer rates. About 40 tons Rope retired.

DRAGON'S-BLOOD has been steady; at auction 30 cases offered, 10 sold, good at £8 10s., fair £6 17s. 6d. per cwt.

EBONY.—Market firm. At auction 18 tons (133 logs) Ceylon common small at £8 to £8 10s. per ton.

ESSENTIAL OILS.—*Anniseed* quiet; small sales at previous value; 25 cases at auction retired. *Cassia* easier; about 25 cases sold at 4s. 2d. to 4s. 3d. *Nutmeg* steady; of 13 cases, one-third sold at 6½d. for yellowish. *Cinnamon* quiet. *Citronelle* firm; 23 cases retired and held for an advance; 1 case sold at 1⅝d. for middling. *Lemon Grass* steady; 29 cases at auction sold at 2½d.

GALLS.—The upward movement in value of China has continued, and privately 50 cases have been sold at 75s. At public sale 105 cases China were offered and bought in at 72s. 6d. Statement of the movements of China and Japan Galls for the first eight months of the three years:—

	1875.	1874.	1873.
Landed ... ... boxes	4,983	4,620	6,281
Delivered	4,334	4,748	4,889
Stock, Aug. 31	1,066	1,543	3,365

GUMS.—*Benjamin:* Siam steady, and 5 cases offered sold at £8 for seed, in block. *Sumatra* steady; of 53 cases, two thirds sold at £8 5s. to £9 for fair seconds, and £6 7s. 6d. to £6 15s. dark dull drossy. *Copal* steady, but only small sales; 1,064 bags at auction retired. *Damar* firmly held and little offering; 96 cases retired, and other parcels offer this day. *Gamboge* quiet, but firmly held; 10 cases offered and sold at £10 10s. to £10 12s. 6d. for fair pipe partly run, and £10 5s. little mixed.

GALANGAL ROOT.—Market steady; of 460 packages in public sale, 50 cases sold at 22s. per cwt. for fair quality.

GUTTA-PERCHA has been extremely dull.

GAMBIER has assumed a firmer tone, but the sales of block amount to only about 100 tons, at 28s. ex ship, and 28s. 6d. to 29s. for whole bales, and ex quay. At auction of 1,104 bags free cubes of fresh import, 445 bags fine pale sold at full to dearer rates, at 40s. to 41s. per cwt. For arrival 200 tons have been sold at higher rates, viz., July at about 27s. ex ship. Statement of the Imports, &c. of Gambier in the first eight months of the three years:—

	1875.	1874.	1873.
Landed ... ... tons	3,773	2,896	4,151
Delivered	3,543	3,897	3,773
Stock, Aug. 31	540	233	917

HEMP.—Supplies of Manila keep the market in a dull state; only about 400 bales have changed hands privately, and at the auctions 1,138 bales met only lower offers, and were all bought in or withdrawn; 50 bales white Quilot have been sold at £46, and 39 bales Sunn, No. 1, at £20, extra £23 10s., No. 2 at £15 10s. to £16, No. 3 at £13 15s. to £14 per ton.

HIDES.—In the public sales Singapore Ox and Cow were in small supply, and very little was done. Buffalo, Singapore, &c., were rather easier, with a limited inquiry, and other sorts unchanged.

HORNS.—In the sales Siam and Calcutta Buffalo sold at full to rather dearer prices, and Deer Horns were generally higher, especially for small kinds; 39,044 (49 tons) Siam Buffalo partly sold, average 731 to 643 horns 42s. 6d. to 43s., damaged, &c., from 37s. to 42s. 6d. per cwt.; 4,436 (2 tons) Ceylon Deer sold, average 2,010 horns at 83s.

JAPAN WAX exhibits a slight decline; early in the week about 250 cases fair saucer changed hands at 49s., and of 593 boxes at auction a very small proportion sold at 52s. for fine and 48s. fair but yellowish. Further offers were made yesterday when 50 boxes good squares sold at 51s. 6d. per cwt.

MUSK.—Pod has again brought high figures for good and fine quality, but rough and horny has sold slightly easier. Public sales have embraced 78 caddies and tins Tonquin, of which 50 were sold, fair to fine selected even well-shaped pods at 40s. to 49s.; skinny flat pods 23s. to 24s. 6d., rough horny and bally 13s. to 16s.; 8 tins Yunan fair sold at 36s. 6d. to 37s. 6d.; and of 13 tins grain retired about 6 sold subsequently at 47s. 6d. to 50s., being about the previous value.

PEPPER.—Towards the close of last week a speculative demand was apparent, and some quantity changed hands, Singapore up to 5½d., Penang 4⅞d. At auction, of 8,400 bags offered, a very small proportion only sold, Singapore at 5⅜d. to 5½d., Trang last week at 4⅝d., West Coast at 5d. Afloat about 100 tons are reported, Singapore 5⅜d., Penang at 4⅞d. *White* has been rather firmer, with sales of 400 to 500 bags privately, and at auction was again higher; of 960 bags offered half sold, Singapore, good, at 8¼d., fair at 7¾d. to 8d., Penang, good, at 7⅞d.

PLUMBAGO.—At auction 481 barrels new Ceylon were offered, of which 274 barrels found buyers at about former rates, common to fair dust 7s. 9d. to 8s. 3d., fine chips 11s. 6d., small lump 15s. per cwt.

RHUBARB.—China continues steady, but quiet. At sale of 115 cases offered 50 sold at 9d. to 10d. for ordinary wormy; 1s. 1d. to 1s. 6d. for middling pale dull; and 1s. 11d. to 2s. 9d. for good medium and bold.

RATTANS.—At sale 103 bundles Rangoon damaged sold at £16 10s. to £17s. 5s., and about 20 tons good sold at £24 to £26.

RICE.—Extensive arrivals of floating cargoes at ports of call have depressed the market, and sales have been effected slowly at declining prices, closing 3d. lower for Rangoon, and Necransie, which is proving of indifferent quality, is 6d. lower. On the spot the demand for all descriptions has been limited, and only scanty sales have been made, Bengal as well as soft grain kinds rather cheaper, but Madras is slightly higher. On the spot white Bengal has been sold at 11s. 3d., Ballam at 11s. 3d., Madras at 10s. to 10s. 3d., and old Necransie at 7s. 3d.

SPICES.—*Cassia Lignea* has been more inquired for, and business has been done in unworked at 54s., also contracts afloat, to the extent of about 10,000 boxes, supposed at 45s. c. and f. At auction of 948 boxes unworked only about 200 boxes sold at 54s., mouldy and broken at 51s. to 52s. *Cloves:* Penang have not been dealt in to any extent. Amboyna have been quiet and are easier; of 100 bags offered, the bulk old "without reserve" at 1s. 6¾d. for good. *Mace:* No business done. *Nutmegs* are about 2d. per lb. lower for medium and large, and 1d. small. The sales have embraced 250 casks and cases, of which over half sold; 63's fair at 4s. 2d.; 79's to 72's 3s. 6d. to 3s. 9d.; 121's to 110's 2s. 10d. to 2s. 11d.

STICKLAC.—Of 211 boxes Siam brought to auction 60 boxes sold, fine free from wood but part shivered at 95s., hard block 75s. to 76s. Small private sales reported at 92s. 6d. to 97s. 6d. per cwt.

STAR ANNISEEDS.—Market steady; small sales of fair quality, but broken, effected at £5 10s. per cwt.

SAPANWOOD continues scarce; a portion of 25 tons damaged Manila offered was quitted at £9 5s. per ton.

SOY.—Small business doing at 2s. 2d. per gallon.

SAGO.—A larger supply of small Pearl has been offered at auction than for some time past, and prices gave way 1s. per cwt. Of 1,972 bags small about 1,000 bags sold, fine at 18s. 6d. to 19s., fair 18s., dull 17s., heated at 13s. to 14s.; 151 bags medium bought in at 17s. to 17s. 6d., and 340 bags large at 17s. 6d. *Flour:* 275 bags good Singapore were sold at 13s. 3d. to 13s. 6d.

TAPIOCA.—Of 1,321 bags Singapore 700 bags sold, good at 2¼d., chiefly bold Malacca sort at 2d. to 2⅛d., the remainder bought in at 2½d. 460 bags Alma Penang partly sold, superior bold white at 3d. *Pearl Tapioca:* Of 240 bags good small about 100 bags sold at 21s. *Flour:* 782 bags Alma Penang went off slowly, and only 200 bags sold rather lower at 2½d.

TIN.—The advancing tendency in the market noted last week has continued; Straits is now firm at £83 10s. on the spot and afloat; Banca is quoted £91, Billiton £86 per ton.

VERMILION.—Small sales of China reported at 5s. 6d. per lb.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Quietness has again been the predominant feature in this Market, with a slack demand in most departments, the exception being low qualities of Shirtings, which have been in fair inquiry, principally for Calcutta. Business however has not been extensive, owing to the steadiness of producers, who will not entertain the offers that would lead to increased activity.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 15s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

The Moonlight, Waterhouse, which arrived at New York, Aug. 30, from Batavia, had encountered heavy S.W. and W. gales for fourteen days off the Cape of Good Hope, during which she sprung mizentopsailyard and lost sails.

The St. Kilda, at St. Helena, Aug. 17, from Zebu (sugar and hemp), and proceeded for Liverpool, had experienced a succession of gales from lat. 32 S., lon. 32 E. to the meridian of the Cape of Good Hope. On July 24, in lat. 32 S., lon. 31 E., it blew heavily from W.N.W. to W.S.W., and the vessel, after losing upper fore-topsails and main-topgallantsail, was hove-to for fifteen hours; very heavy sea. The gale continued, but less heavily, for thirty-two hours more.

The Straatsraad van Ewyck, ship, from Batavia to Amsterdam, with a cargo of coffee, sugar, hides, and sundries, arrived at Mauritius on Aug. 14, making from 8 in. to 9 in. of water, when in the roadstead. On Aug. 8, when in lat. 40.35 S., lon. 87 6 E., the vessel experienced very heavy weather from SSE. to E. Sprung a leak, making so much water that the pumps had to be kept going all the time. On Aug. 9, bore up for above port for repairs. She is about to begin discharging her cargo.

Advices from Hong Kong, dated Sept. 14, report:—The Deerhound, from Shanghai for London (tea), grounded on Palawan Shoal Aug. 30, and is breaking up; master and crew took to the boats, and were picked up and brought in here by the Lesmond (? Leemona).

MISCELLANEOUS.

CAPE ST. VINCENT.—Sept. 11, passed, Conrad (str.), from Nieuwe Diep, for Batavia.

CADIZ.—Arrived, Sept. 14, Leon (str.), from Manila, for Liverpool.

PORT SAID.—Arrived, Sept. 14, Priam, from Shanghai; Glenroy, from Hong Kong, both for London; Thomas Sorby, from Batavia, for Neuwie Diep; 12, from Liverpool, for Manila, Aurrera; for Shanghai, Agamemnon; 14, from London, for Shanghai, Glenfinlas.

SUEZ.—Sept. 8, arrived, from Foochow, for London, Egeria; 10, Sea Gull; from Shanghai, Glengyle.

ROTTERDAM.—Sept. 11. The Maria Adolfina, from Java, which sunk in the Meuse, Sept. 6, has been raised, and is said to be staunch.

ST. HELENA.—Aug. 13, Moskwa, from Akyab, for Havre; Famiglia Prima, from Rangoon; 14, Emma F. Secor, from Akyab; 16, Eliza A. Kenny, from Rangoon, all three for Falmouth; Pactolus, from Bassein, for Bordeaux; 17, St. Kilda, from Zebu, for Liverpool; Dorothea, from Rangoon, Nereid, from Akyab, both for Channel; 18, Justitia, from Batavia, for New York; 20 W., G. Russell, from Akyab, for Channel; Shield, from Colombo for London.

MAURITIUS.—Arrived, Aug. 5, Secondo Tre Franciuli, from Rangoon; 14, Straatsraad van Ewyck, from Batavia; 16, Palestine, from Colombo, Star of India, from Rangoon; 19, Formosa, from Singapore.

LAUNCH.

On the 7th inst. Messrs. Lobnitz, Coulborn and Company successfully launched from their building yard, at Renfrew, a handsome screw-steamer of about 260 tons B.M. and 50 H.P. nominal, for a Singapore firm. The ceremony of naming the vessel the Pontianak was performed by Mrs. John Campbell, wife of the company's superintendent.

NOTICE TO MARINERS.

Cochin China.—Reported Rock off Cape Ti-wan.—Information has been received from Her Majesty's Consul at Saigon of the existence of a rock, lying in a south-easterly direction from Cape Ti-wan, and on which the British steam vessel Pernambuco (drawing 15 feet) struck, on her voyage from Hong Kong to Saigon, on the 18th June, 1875. This rock (Pernambuco rock) appeared to be about 40 feet in extent, but as the ship merely struck and passed over, no soundings were taken on it. The rock was, however, subsequently searched for in a boat, but no bottom was found at 10 fathoms. The position assigned to the rock by the master of the Pernambuco is 3¼ miles S.E. by S. from Cape Ti-wan; this places the rock in lat. 10° 19′ 18″ N., long. 107° 16′ 18″ E. As the position of this reported danger is uncertain, vessels should not approach Cape Ti-wan nearer than 6 miles nor shoal the soundings to less than 11 fathoms at low water, until further particulars are known. —*Hydrographic Office, Admiralty, Sept.*, 1875.

THE LOSS OF THE "ROBERT BOAK."—An inquiry, at the instance of the Board of Trade, has been held at Liverpool Police-court into the circumstances attending the abandonment of the barque Robert Boak, on the 4th July last. Mr. Raffles presided, with Admiral Powell and Mr. Quiggan (shipwrights' surveyor) assessors. The Robert Boak was a wooden vessel, built in Nova Scotia in 1864. She had a registered tonnage of 639 tons. The vessel sailed from Cardiff on the 27th March last, but she lay in Penarth Roads for about a week, after which she proceeded on her voyage, having a crew of sixteen men all told. She was bound for Hong Kong, with a cargo of 900 tons of patent fuel. After being out a short time she sprung a leak, which necessitated her putting into Falmouth, where she underwent certain repairs. She again proceeded, and experienced heavy weather from time to time, but on the 3rd July she sprung a very serious leak, and on the 4th it became so serious that the crew requested the captain to make for the nearest port, which was Rio—about 800 miles off. The master was consulting with his officers when a vessel hove in sight, and a signal of distress was hoisted. She turned out to be the Coloma, and Captain Irish went on board of her, and, in order to make sure that the Robert Boak was not in a condition to proceed further, the carpenter of the Coloma was taken on board, and in consequence of what he observed it was deemed advisable to abandon the ship, which was done on that day. At the time there were about eight or eight and a half feet of water in the vessel. The Court was of opinion that the master was justified in leaving his ship, which the Court did not consider was overladen. The captain's certificate was therefore returned.

STEAMER POINT, ADEN.

Drawing and Reading-room free to Passengers.
The *London and China Express* on Sale.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

MONDOLLOT FILS (late BRIET),

MANUFACTURING ENGINEER,

72, RUE DU CHATEAU D'EAU, PARIS.

Medals awarded at the Exhibitions of Paris, London, Lyons, 1872; Vienna, 1873, &c.

BRIET'S GAZOGENE APPARATUS.

Exclusive Patent.

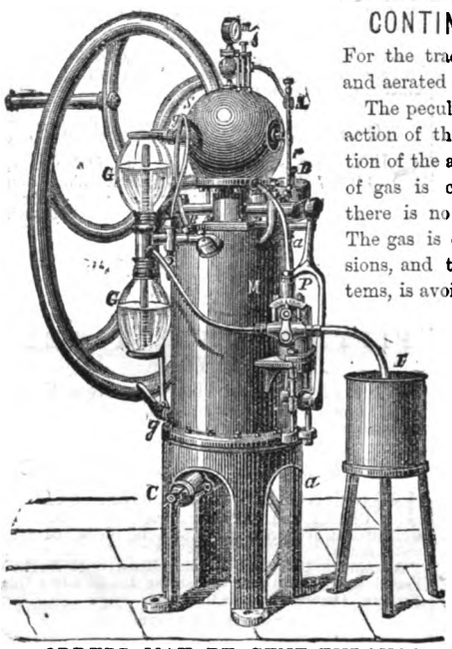
THE ONLY ONE APPROVED BY THE Academy of Medicine.

THE ONLY ONE ADMITTED IN THE Hospitals of Paris.

With BRIET'S GAZOGENE every one can make in a moment, and at a trifling expense, his own soda water, or other kind of aerated drinks, such as Vichy, sparkling lemonade, wine, &c.

In the principal cities of the world BRIET'S GAZOGENE is on sale at druggists or fancy goods' stores.

Ask for the Trade Mark stamped on the tap of the Gazogene.



CONTINUOUS GAZOGENE APPARATUS

For the trade, to manufacture—wholesale—soda water and aerated drinks. Patented.

The peculiar character of this apparatus is that the action of the pump regulates automatically the distribution of the acid, and consequently the necessary quantity of gas is continued without interruption. Therefore there is no danger in the use of the tap of the acid. The gas is obtained purer in washers of smaller dimensions, and the gasometer, so troublesome in other systems, is avoided.

So simplified, the apparatus is easily and safely managed; all the pieces of which it is composed being joined as one body, take very little space, and are delivered ready for use without any expense of setting.

The conditions of hygiene and economy, as well as the simplicity of this apparatus, have caused it to be exclusively admitted in the laboratory of the central pharmacy of the hospitals of Paris.

The SYPHONS are of first rate crystal, tried with high pressure, and set in English tin, without any mixture of lead.

ORDERS MAY BE SENT THROUGH THE CHINA AND JAPAN AGENCY, and the Apparatus obtained of Messrs. JOHN LITTLE and Co., Singapore, or Mr. E. L. B. MCMAHON Yokohama.

DRUGS, CHEMICALS, &c.,

WHOLESALE AND FOR EXPORTATION.

DRUGS, &c., guaranteed genuine as imported, and PHARMACEUTICAL PREPARATIONS made in strict accordance with the Pharmacopœia.

All Orders accompanied by Drafts, or sent through Merchants, attended to promptly, and executed upon the best terms.

DYSENTERY, CHOLERA, FEVER, AGUE, COUGHS, COLDS, &c.

DR. J. COLLIS BROWNE'S (Ex Army Med. Staff)

CHLORODYNE

IS THE ORIGINAL AND ONLY GENUINE.

The Public, therefore, are cautioned against using any other.

REMEDIAL USES AND ACTION.

This INVALUABLE REMEDY produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium.

Diseases in which it is found eminently useful—Cholera, Dysentery, Diarrhœa, Colics, Coughs, Asthma, Rheumatism, Neuralgia, Whooping Cough, Cramp, Hysteria, &c.

EXTRACTS FROM MEDICAL OPINIONS.

The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months severe suffering, and when other remedies had failed."

Dr. Lowe, Medical Missionary in India reports (Dec., 1865) that in nearly every case of Cholera in which Dr. J. Collis Browne's Chlorodyne was administered the patient recovered.

Extract from *Medical Times*, Jan. 12, 1866.—"Chlorodyne is prescribed by scores of orthodox medical practitioners. Of course it would not thus be singularly popular did it not 'supply a want and fill a place.'"

Extract from the General Board of Health, London, as to its efficacy in Cholera.—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

Beware of spurious and dangerous compounds sold as CHLORODYNE, from which frequent fatal results have followed.

See leading article, *Pharmaceutical Journal*, Aug. 1, 1869, which states that Dr. J. Collis Browne was the Inventor of Chlorodyne; that it is always right to use his preparation when Chlorodyne is ordered.

CAUTION.

None genuine without the word "Dr. J. Collis Browne" on the Government stamp. Overwhelming medical testimony accompanies each bottle.

Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. Sold in bottles at 1s. 1½d., 2s. 9d., 4s. 6d., and 11s. Sold in Hong Kong and Shanghai by Watson and Co.

BUTTER FOR HOT CLIMATES.—THE MUNSTER DAIRIES' KEEPING BUTTER, "Red Star Brand," specially prepared for export to hot climates and for ships' use, has been satisfactorily shipped to all quarters of the globe, retaining its splendid quality in all climates. The Cork Customs' Lists show that the exports of this celebrated Grass Butter exceed 90,000 firkins, in value about £400,000 sterling.
Address, THE MANAGER, Munster Dairies Depot, Cork.

CHILDREN'S FOOD.

TO strengthen children or persons weak in the Chest or the Stomach, or affected with Chlorosis or Anemia, the best and most pleasant breakfast is the **RACAHOUT DES ARABES**, a nutritive and fortifying food. Prepared by DELANGRENIER, Rue Richelieu, 26, Paris (beware of counterfeits). Depots at all Chemists abroad

QUENTIN'S VANILLA.

The most pleasant purgative. May be taken in tea water, wine, or other liquid. Recommended by the medical profession.

VERMIFUGE VANILLA.

An infallible specific against worms.

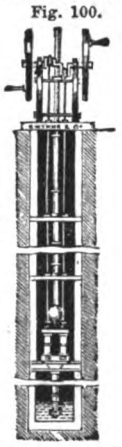
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

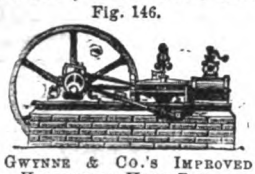
For Hand-power, or adapted for ordinary power, of any depth, of the most careful construction, and on the most approved system

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gear, for economical working. From 4 to 100-horse power

Fig. 154.

GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

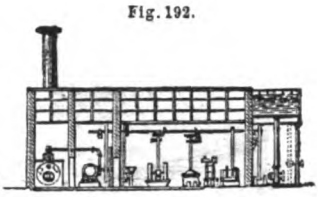
These boilers are simple and compact They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler

Fig. 142.

GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines. From 2½ to 30-horse power

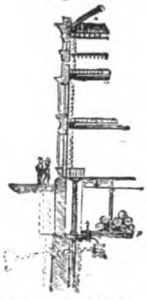
Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES FAT, &C., &C.

The above shows an arrangement for a seed of mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.

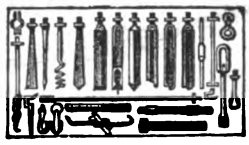


GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

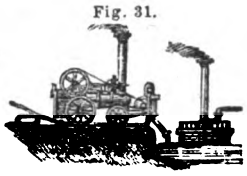


GWYNNE & CO.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

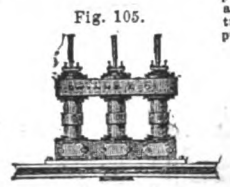
Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

PETROLEUM, KEROSENE, AND PARAFFIN

OIL LAMPS,

TO BURN WITHOUT A CHIMNEY.

ROWATT'S PATENT ANUCAPNIC LAMP,

FLAT WICK, FOUR SIZES;

ROWATT'S PATENT RADIATOR LAMP,

CIRCULAR WICK,

Are the only Lamps yet made to burn the above Oils without Chimney, Smoke, or Smell.

They are easily trimmed, NEVER GET OUT OF ORDER, and save great annoyance, trouble, and expense of Chimneys breaking. They are easily managed, simple in construction, and inexpensive.

THOS. ROWATT & SONS,

4, RADSWORTH STREET, BALDWIN STREET, CITY ROAD, LONDON, E.C.

126, FOUNTAIN BRIDGE, EDINBURGH. KILRENNY OIL WORKS, ANSTRUTHER, FIFE.

JOHNSTON'S

23, IRONMONGER LANE, LONDON,
(The Old House).

CORN FLOUR

Ask for JOHNSTON'S CORN FLOUR, and take no other; it is the Best.

IS THE BEST.

As an invaluable article of Food, CORN FLOUR was first made universally popular through the efforts and agency of J. & G. JOHNSTON.

Being perfectly pure, it keeps sweet in any climate, and is not liable to ferment. For export it is packed specially with great care, and is supplied through Merchants for every Market in the World.

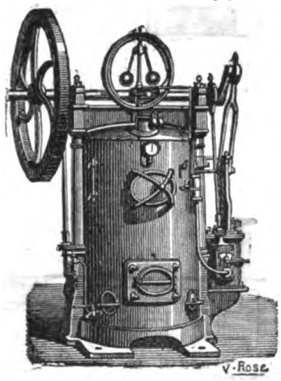
SPECIAL MANUFACTURE OF VERTICAL STEAM ENGINES,

Pumps with Plunge Pistons moved by Vertical Steam Engines.

Vertical Engines from 1 to 20-horse power. Boilers with tubes. Important saving guaranteed.



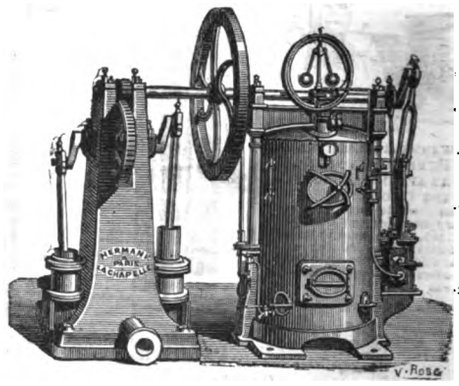
GOLD MEDAL
AT THE
EXHIBITIONS OF
ALTONA and SANTIAGO, 1869.

DIPLOMA OF HONOUR,

GOLD MEDAL, & LARGE GOLD MEDAL
AT THE
EXHIBITIONS OF
LYONS and MOSCOW, 1872.

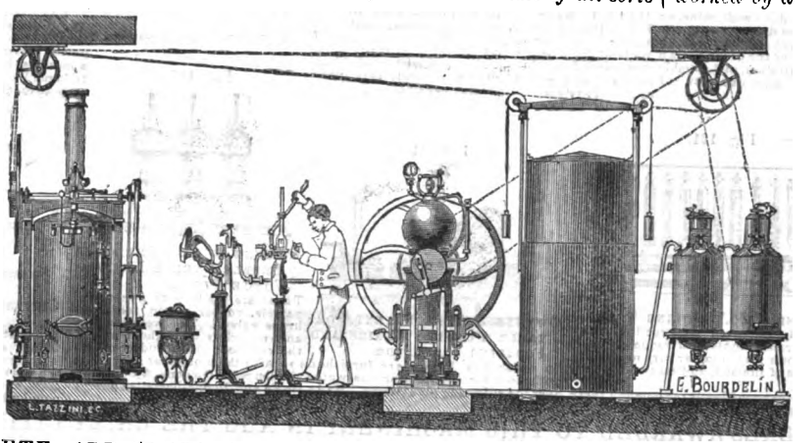
MEDAL OF IMPROVEMENT
(EQUAL TO THE LARGE GOLD MEDAL)
at VIENNA, 1873.

Pumps with plunge piston, moved by Vertical Steam Engines for irrigation and drainage.



CONTINUOUS APPARATUS for manufacturing Gaseous Drinks of all sorts (worked by a Steam Engine).

This apparatus, with mechanical compression and continuous action, is able to produce from 25 to 10,000 bottles of all kinds of aerated drinks per day. It is the only one which complies with all the requirements of the Committees of Health and Safety. The only one which has undergone, before leaving the workshops, the proofs required for any apparatus which has to work at high pressure. The only one adapted to working this branch of industry practically.

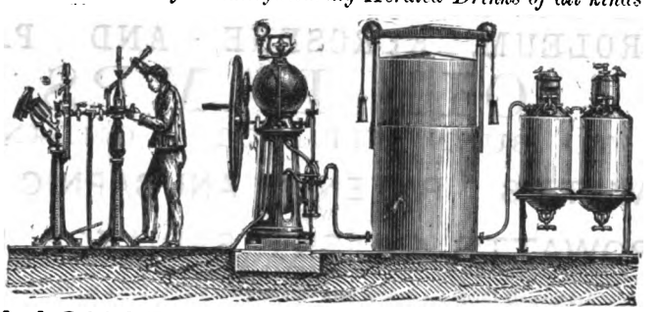


J. Hermann-Lachapelle's Syphons are also very remarkable. Their mechanism is very carefully made, and the decanters are in crystal glass of the best quality. The top of these Syphons is plain, without ornament, and easy to clean, which is an advantage.

COMPLETE APPARATUS for manufacturing Aerated Drinks of all kinds (moved by hand).

SYPHONS.

Large Lever, f.2.25.



SYPHONS.

Small Lever, f.2.15.

To Hong Kong: Mr. Everard, Mr. and Mrs. Daac. To Saigon: Mr. Mace, Mr. Ch. Cany, Mr. D. Doyle and four Missionaries, Mr. H. Seraphin. To Batavia: Mr. Weusman, Mr. Delabarre, Mr. van Swieten. To Singapore: Mr. and Mrs. A. Breker, Mr. Thomas, Mr. Francis Drake, Mr. Neave.

Per French steamer *Iraouaddy*, from Marseilles, Oct. 10.—To Shanghai Mr. R. H. Artindale, Mr. Edward Meyer. To Batavia: Mr. Sentius. To Singapore: Mr. and Mrs. Goldie, Mrs. Spooner, Mrs. K. B. Spooner, Mr. C. W. Groskamps, Mr. A. van Delden. To Galle: Rev. W. F. Kelly, Mr. R. G. Corbet.

Per French steamer *Sindh*, from Marseilles, Oct. 24.—To Yokohama: Mrs. Watanabe, Mrs. Nakasima. To Shanghai: Mr. Laing. To Hong Kong: Sir Arthur and Miss Kennedy, Mr. and Mrs. Coxon. To Singapore: Mr. W. H. Read. To Galle: Mr. E. Vex.

Per French steamer *Meikong*, from Marseilles, Nov. 7.—To Singapore: Mrs. Harvey, Capt. and Mrs. Ross, Mr. John Ross, Mr. and Mrs. Adamson and child.

Per P. and O. steamer *Poonah*, from Southampton, Sept. 23.—To Yokohama: Miss A. Hoare, Miss M. A. Cattell, Mr. and Mrs. T. Willcox, Mrs. Chipps. To Shanghai: Rev. and Mrs. R. Palmer, Mrs. Bryant and party, Miss Rowe. To Hong Kong: Mr. J. Lauksbury, Miss Chalmers. To Singapore: Mrs. Surwongse, Capt. and Mrs. Worsley, Mr. G. Ward, Mr. G. Bryant. To Ceylon: Mr. L. Young, Mr. J. Cowie.

Per P. and O. steamer *Baroda*, from Venice, Oct. 1.—To Batavia: Capt. Eno.

Per P. and O. steamer *Baroda*, from Brindisi, Oct. 4.—To Singapore: Miss M. H. Jones. To Penang: Mr. A. Man. To Ceylon: Mr. J. L. Sim.

Per P. and O. steamer *Hydaspes*, from Southampton, Oct. 7.—To Yokohama: Mrs. Goodall. To Shanghai: Mrs. Clark, Rev. J. Hoare. To Hong Kong: Sub. Lieut. H. C. Savage, Com. H. Salmond, Mr. F. H. Chapman. To Singapore: Mr. and Mrs. Griffin, Mr. J. Wilson. To Ceylon: Mr. R. S. Fraser, Mr. A. M. White, Mrs. Skinner, Mr. F. D. Watson, Mr. E. B. S. Mercer.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 18.—To Ceylon: Mr. F. H. Izard.

Per P. and O. steamer *Gwalior*, from Southampton, Oct. 19.—To Yokohama (*via* Bombay): Capt. Saunders, Marquis of Kildare.

Per P. and O. steamer *Pekin*, from Southampton, Oct. 21.—To Yokohama: Rev. and Mrs. J. Bates, Mr. C. G. Dunlop. To Ceylon: Mr. C. W. Jebb, Miss Jebb, Mr. C. H. Cameron, Mr. and Mrs. H. H. Cameron, Miss M. Cloystown, Miss E. O. Wignon.

Per German steamer *Galatea*, from Hamburg, Sept. 19.—To Shanghai: Dr. C. Nissen Mr. K. Aghte. To Hong Kong: Capt. Bertelsen. To Singapore: Mrs. A. Mensell, Mr. H. Oehlers, Miss Emilie Löctge, Mr. E. Wiedeburg.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 4th August, and by the Pacific mail we have news to the 14th August; the French mail from London, June 18, arrived out on the 1st August, and the following P. and O. mail of June 25 was received on the 6th August. The *Japan Herald* supplies the following items of news:—

The new and severe Press Laws have been put into active operation, and the manager of the *Akebono Shimbun* has been fined and imprisoned for articles which appeared in three issues of that paper. Several other cases are already under adjudication, one paper remarking that it will have to keep 365 editors, as a fresh one is arrested every day. The press throughout the country has been intimidated by the severity of the penalties to which it is now made subject. The rulers of Japan have manifested the most creditable zeal for the establishment of schools throughout the Empire, but this fettering of the press is taking a decisive step backward, and altogether in the wrong direction. It appears to have been taken in haste, but the Government will, if it is so ill-advised as to persist in its present course, have time to repent at leisure. It has committed a grave political blunder of the first magnitude.

Nothing further has been heard respecting the rumoured rupture with Korea, the Government seeming determined to keep everything connected with the question as secret as possible, and however "willing to wound, are yet afraid to strike the blow." The Formosan *fiasco* gave the Government a salutary lesson; that "little war" cost the Treasury so much that the gap made by it has not been filled since. Rather than declare war against the Koreans no effort is being spared to avert it. A majority in the Council of State are averse from it, and the national finances are so low as to oblige the Government to put up with the Koreans' conduct, however insulting and lowering to Japanese pride. In this view, though war has been considered imminent, it cannot at the present time be undertaken by Japan.

Digitized by Google

Chinese assistance to the Koreans is dreaded; and this fear, in addition to the financial difficulty, operates as a useful restraint upon the military ardour of the Government. According to the *Daily Advertiser*, the Koreans got rid of the Japanese, with whom they did not desire to treat, by snubbing the Commissioners for appearing in Europeanised costume. We wonder whether there is any equivalent in the Korean vocabulary for what is termed "cheek?" Getting rid of accredited Envoys from another State on the plea that their dress was objectionable is very much like it.

According to the *Nichi Nichi Shimbun*, most disastrous floods have occurred in the province of Rikuzen, destroying almost the entire crops, and laying waste about 14,000,000 tsubos of cultivated land. Forty-two lives were lost, six horses, 150 houses destroyed; and several hundred bridges and embankments swept away by the waters, besides 2,520 bushels of cocoons, over 2,000,000 lbs. of flax, and a million and a quarter bushels of rice and wheat, which have also been lost. The amount of the damages sustained is probably exaggerated, the native papers being rather prone to increase than decrease anything that is calamitous or out of the usual course. The inundations in the province of Echigo are stated by the *Echo du Japon* to have been terrible. The dikes at Sinano have been broken in several places. One hundred and eighty small villages, situated in the neighbourhood of Lake Yoroigato have been entirely submerged by the waters. Eighty thousand *kokus* of rice are completely lost. In those places which have suffered the least the water has risen to a height of six or seven feet above the floors, but in other places the roofs of the houses cannot be seen. It is impossible to fix, even approximately, the number of the victims.

Tempestuous weather has effected considerable damage on the Bluff and in the Settlement. Tiles, water-spouts, tops of chimneys, and shutters were wrenched off by violent gusts of wind, and many a roof supposed to be waterproof leaked badly. A chimney at No. 83 was blown down, and tore a large hole in the roof and side of the building. The O. and O. S. S. *Gaelic*, which left Hong Kong for this port on Aug. 2, experienced tremendous weather during the passage, which was unfortunately attended with the loss of life, Mr. G. Ritchie, first officer, and a seaman named Patterson having been swept overboard by a sea whilst at work on the whale's back, a deck built over the forward part of the ship for throwing off seas in bad weather. The decks were frequently swept with seas, which filled the cabins with water, and bent and smashed the stout iron rails as if they had been made of wire. A tremendous sea pooped the ship and crushed part of the after wheel-house, besides breaking many of the plate-glass ports. The stranding of the British barque *James Paton* is reported. She is on shore about two miles to the westward of Tenru-gawa, and some five miles from Simoda; she lies in a perfectly upright position, and does not appear to have lost any of her masts or yards, although much of her copper is rubbed off. A tent has been erected on the shore, and the stranded vessel is surrounded by crowds of natives.

A pamphlet has appeared on the Formosan question. It has been written by a gentleman who is strongly imbued with pro-Japanese ideas, and as it is composed solely with the idea of lauding the Japanese, and attacking everybody who was opposed to them, its facts and arguments must be taken *cum grano salis*. It is believed that it is intended by the Government for circulation abroad, where, from its fallacies not being detected, it will pass as history. A pamphlet is also announced by the same author on the Simonoseki question, and another is, we believe, in preparation on the Kagoskima bombardment.

The most extensive and destructive fire that has occurred in this Settlement for a long time past has happened at the Japan Hotel. At about 1 A.M. the fire-bells began clanging forth their alarm, and the slumbering community, aroused from its rest, thronged to the scene to witness and assist at the conflagration. A light northerly breeze fanned the flames, and at one time it seemed as if the fire was going to be more extensive than it ultimately turned out to be. As it is, the damage done is great, and the total loss of buildings and property generally cannot fall far short of $25,000. The engines soon arrived and took up a position on the Bund, the nearest point where water was to be had, but unfortunately it was low water, and for a considerable time the flames roared on unchecked. A scanty supply was at length obtained, but far less than the requirements demanded. The whole hotel and out-houses were soon enveloped in flames, and beyond hope of saving, so the efforts of the fire brigades and others were directed to save the surrounding buildings if possible. The out-houses of the premises on Main-street occupied by Messrs. Durand and Culty, however, soon caught and were destroyed, together with a Chinese exchange shop that formed the corner on Main-street. The shops of a shoemaker of the name of Dominique, and some Chinese that adjoined the hotel, and formed part of the little cross street in which the hotel stood, were likewise burned down, the occupants fortunately managing to save the major portion of their stock-in-trade and effects. Durand and Co., saddlers, were burnt out. They were uninsured, but saved a large portion of their goods. The buildings opposite the hotel and the destroyed shops were saved with the greatest difficulty. They frequently caught fire, but the vigorous efforts of the firemen as often put out the flames. Another fire has occurred, which destroyed a ship-chandler's store situate at No. 31.

Mr. A. E. Olarovsky, a member of the Commission for the transfer of Saghalien and the Kurile Islands, having arrived, it is expected that the *Vsadnick* will start in a few days to fulfil her mission. The Russian and Japanese Commissioners will, it is expected, first proceed to Saghalien, where the formalities of handing over that island will be gone through. From thence the *Vsadnick* will proceed to the Kurile Islands, where similar ceremonies will take place. As, however, the Japanese Commissioners wish to visit the three largest islands of the group some time will necessarily be consumed there. The ship will from thence proceed to Petropavlovsk for coal, and will then return to Yokohama. Meanwhile the Russian Commissioners are staying at the Okurasho, in Yokohama, as the guests of the Japanese Government.

The case of Lum Hok Pang, the defaulting compradore of the Deutsche Bank, who embezzled some $28,000 belonging to the Bank, will hardly be forgotten. He has been in prison ever since, and still is, though his accomplices have been released. The compradores and Chinamen generally of Yokohama have started a subscription to raise a lump sum, which it is intended to offer as a compromise to the Deutsche Bank if the Bank will get him released from prison. The sum to be offered, we hear, will be about $7,000, or a fourth of the money embezzled. Yung Cho, late compradore of the Comptoir d'Escompte, has been ordered by the Japanese authorities to make good the sums of money—amounting in all to $7,867—which he paid away by order of the defaulter Cantelli. He is held to be responsible because he failed to inform the manager or the Bank of the payments he had made by order of Cantelli.

There has just been issued a neatly-printed translation of the Gospel of St. Luke, prepared by the committee of the American Bible Society in Japan. The translation is printed from wood blocks, on Japanese paper, and is in the simple Hiragana characters, so that all may read. It is illustrated with a coloured map of Palestine. The book is to be sold at a cheap rate. If there should prove to be a popular demand, the committee have it in contemplation to publish a very large edition, to be sold at an extremely low price, and also for gratuitous distribution.

Four seamen of the *Jessie McDonald* have been charged before Mr. Robertson, H.B.M.'s Consul, with refusal of duty. As this was the second time the prisoners had been charged with the same offence, they were sentenced to four weeks' hard labour each, to be put on board should the ship leave before the expiration of their sentence.

The Consuls at Hiogo have resolved—"That a Memorial Tablet be placed in the Union Church Kobe, to the memory of the late Daniel Turner, Esq., U.S. Consul for Hiogo and Osaka, and that an expression of the deep regret of the Consular Body at Mr. Turner's death be drawn out to be sent to the family of the lamented Consul."

Several very successful Promenade Concerts have been given in the Public Gardens.

The Pacific Mail Company's steamer *City of Tokio*, from Yokohama 24th August, arrived at San Francisco on the 10th inst. The following summary of news has been telegraphed to New York:—

The Russian and Japanese Commission have sailed to complete the transfer of the Kurile Islands to Japan and the Saghalien Islands to Russia. On retiring from the Japanese service next month, General Le Gendre will receive the first Imperial decoration ever offered to any foreigner. The question of the Korean invasion remains unchanged. The most influential members of the Government are against it, though they are not in the majority.

Judge Richardson, of the United States Court of Claims at Washington, and Commander Lewis, of the U.S. steamer *Yantic*, while travelling within the Treaty limits of Yokohama, were arrested by local officers, and sent back to the Foreign Settlement. The act was undoubtedly illegal, and was immediately recognised as such by the Government at Yedo, which took immediate measures for an investigation of the case before any complaint had been made of the offending parties; and they were promptly punished, and such apologies were offered as to give full satisfaction to the gentlemen concerned.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *Celestial Empire* writes as follows:—

This is a very dull time in this part of the world, for the foreign inhabitants are scattered far and wide, seeking some relief from this steaming mudhole. The little Emperor may imagine that the prayers he has ordered have done wonders, but he should have told his deities how much he wanted, for now the crops are in danger of being spoiled or swept away. The Chinese say that this year the Empresses-Regent have reverted to the old order of things, and have ordered Buddhist and Taouist priests to pray for rain.

H.B.M. ship *Mosquito* reached this port from Chefoo on the evening of the 30th July, bringing Mr. Mayers of the British Legation, who awaits the arrival of Mr. Wade, who is supposed to be on his way with the ultimatum of his Government in the Margary case. What that ultimatum may be no one of course knows. The possible existence of an ultimatum at all, after these months, causes considerable commotion among the Chinese officials.

On the night of the 23rd July four sailors on board H.B.M.S. *Dwarf*, all of whom were in irons awaiting trial by court-martial, left the ship in company with a marine named Robinson, who was supposed to be guarding them, but who evidently unlocked their chains, and assisted them to take advantage of the temporary absence of the quartermaster on duty, and pass over the gang-plank. The four men subsequently gave themselves up at Taku to the British Consul there, having made a vain effort to reach Chefoo overland. The marine was deserted by them at some point on the way, having been overtaken by sunstroke, and has not yet been found. The sweets of liberty do not prove to be all that the imagination of these poor fellows painted them.

It is reported that the Che-hsien of Tientsin has been degraded from office, and will be replaced in a few days, on account of failure to arrest all the robbers who murdered a family at a village thirty *li* distant from here last week. He has made it sultry for the whole staff of constables, who will probably continue to eat bitterness for some time to come.

The river is very high, and the flooded places on the Tientsin side between Chang-chia-wan and Ma-t'ou are several miles wide. The rains in the hills and near Peking have been much heavier than at Tientsin.

A sailor on a Dutch vessel, the *Beethoven*, has been dangerously stabbed in an affray on shore.

SHANGHAI.

The present mail brings advices from this port to the 8th August; the French mail from London June 25 was received on the 3rd August. The following summary of news is from the *North China Herald*:—

On the 3rd August another batch of about 100 Chinese soldiers marched through the Settlement, but this time, as far as we can learn, were quite well behaved. They were perfectly amenable to the one or two police on the spot, who restrained them to the open space of ground in front of the public garden, while they persuaded two boatloads of sick, who appeared in a deplorable condition, to move further up the river before landing. On the morning of the 4th another body of nearly 2,000 soldiers, headed by the usual proportion of banner-bearers, marched along the French and English Bunds to the Soochow Creek, both banks of which, we believe, they lined for a considerable distance. The object of the display was apparently to do honour to the corpse of a high military mandarin, which was to be taken that way on the route to its final resting-place. On the march the men were exceedingly quiet and well behaved; but we are informed that, while halting at the creek, their conduct was not quite so good, as will be seen from the following memorandum furnished us by the agent of the Great Northern Telegraph Company :—

This morning, at seven o'clock, we found the telegraphic communication disturbed. The wires were evidently in contact together somewhere. At half-past seven it was discovered that a number of Chinese soldiers stationed along the Soochow Creek had placed their banners against the wires which follow that creek from Szechuen-road to Honan-road. I proceeded at once to the place, and counted seventy-eight banners resting against the wires, causing them to overlay. The police-sergeant in charge had already sent to the station for reinforcements; and whilst waiting for these a military mandarin passed. We complained to him through the medium of a native policeman, but although he well understood that the wires were "deen-seen" (telegraph), he rode away without taking any notice of our complaint. After the police reinforcement arrived, the soldiers were induced to clear their banners from the wires; but as I passed up and down the line some of them grossly abused me, and many of them dashed their banners against the wires. A number of them loaded their guns, and others exploded percussion caps. I cannot say what the loading meant, but the guns were not fired when the boat with the coffin passed.

The appearance of these troops, in physique, bearing, and equipments, was much superior to that of the Formosa contingent who behaved so badly. Many of them were upright, stalwart men, evidently foreign-drilled, and their arms and uniforms were, for Chinese, in good condition. They were evidently picked for the occasion. The *Flamingo* has returned from Formosa, with another cargo of troops, and anchored off Dent's godowns. This time, we are glad to say, the authorities ordered her up to the Arsenal, where she accordingly discharged her freight. There are now a large number of troops encamped round the outskirts of Shanghai, and we hear that there is a great deal of sickness in the camps.

The passage of Chinese troops through the Settlement was discussed at a Council meeting on the 26th July, and it was resolved to address the Treaty Consuls on the subject. The Council would prefer that Chinese soldiers should not be moved through the Settlement; or, where that is unavoidable, that information may be given to the Police in order that measures may be taken to keep the peace.

We have received the Customs *Gazette* for the second quarter of 1875. The import of Grey Shirtings has been much less than during the corresponding quarter of 1874—1,126,379 pieces against 1,822,759; but the latter figures were exceptionally high. The import of T-Cloths, on the other hand, were more than double that of the corresponding quarter, viz., 794,136 pieces against 330,946; but those figures again were exceptionally low. Chintzes stand 20,000 pieces less than in 1874, and lower than they have been for three years. Turkey Reds nearly double the corresponding quarter, and about equal 1873. Camlets figure for 7,000 pieces more than in 1874, and nearly the same as in 1873. Lastings, 10,554 pieces, against 6,693; Long Ells, 31,053, against 13,440, the import being larger than it has been for four years. Lustres on the other hand stand lower than they have done for four years, 26,716, against 49,479. Spanish Stripes show an increase of 5,000 pieces. The import of nail-rod Iron was exceptionally large, 73,753 piculs; that of Lead 19,000 piculs less than in 1874. Opium shows a considerable decline in Patna and Benares kinds. There has been an enormous import of Kerosine oil, twelve times greater than in the same period of 1874. The Internal Transit figures call for no special remark, except the large quantity of Sugar sent inland under pass, and a considerable increase in nail-rod Iron. The revenue of the quarter was Tls. 788,628, against 825,264 in 1874, and Tls. 794,531 in 1873.

About nine o'clock on the evening of the 3rd August the fire alarm-bells were rung, a strong glare in the sky apparently indicating that a fire of some magnitude had broken out in the French Settlement. The various fire-brigades with the Hook and Ladder Company turned out with their usual alertness, when information was received from the French Police Station that the scene of destruction was somewhere in the Tunkadoo district, and therefore along a road impracticable for fire-engines. It was found that a large timber-laden junk, moored close in shore at Yuen-zing jetty, nearly opposite the old cathedral, was burning furiously. It was nearly low water, and a large fleet of junks, almost all with timber on board, were aground, some of them dangerously near the flames. Fortunately the wind blew off the river, and the burning vessel being the nearest inshore, it was thought likely the fire would not extend to the others. The Chinese turned out in thousands, and as nearly every one carried a lantern hoisted on a bamboo, the sight was a novel one. The district magistrate and other native officials were present, with several detachments of soldiers, and companies of firemen with their useless little engines. Only one of these was got into active use, the man with the nozzle standing about thirty yards from the junk, and exerting himself greatly to cause the water to spout more than a dozen feet towards the flames. The fire burnt itself out without doing further damage.

The last number of the *Wan-kwo Kung pao* contains an abstract of memorials on Foreign Affairs and other questions of State policy that have been lately addressed to the Chinese Government by the Chief Mandarins in the Empire. They are supposed to be secret, but have shared the usual fate of official secrets. Rumours of them have from time to time got abroad, and now at last the whole abstract prepared for submission to the Cabinet has found publicity. Judging from it, these memorials must be among the most important State papers that have been penned in China. Eight memorials are quoted—from the Viceroys of Chihli, the two Kwang and the two Kiang, the Governors of Shantung, Anhwei and Fohkien, and certain Peking magnates. Chief among the subjects advocated, are the appointment of Ministers to foreign countries; Li Hung Chang specially urges the case of Japan, and that measures should be taken to seek out and train officials who may be utilised in foreign matters when needed. The memorials are no doubt in response to an appeal from the Central Government, such as was made at the time revision of the Treaty was being pressed. Their purport is that it is clearly time for China to relax her policy of concentration within herself, and to go out into the world; and there are three from the Yamên itself, approving the tenor of the collective suggestions.

The decision of the Registrar and Merchants, in the reference case "*Fusing v. Ocean*," has been given. The total of the claims on behalf of the *Fusing*, her cargo, officers', crew's, and passengers' effects, was Tls. 197,742.93, the sum allowed being Tls. 141,335.56. On behalf of the *Ocean* the sum allowed was Tls. 29,079.01. This, under the law limiting the *Ocean's* responsibility to £8 per ton, as decided by Sir E. Hornby on the 19th June, leaves the *Ocean* a loser of about Tls. 85,000 by the catastrophe, of which she has to pay roughly Tls. 55,000 to the *Fusing*. The sum to be paid will bear interest at 6 per cent. from the 1st June until payment.

Several cases of heat apoplexy, or sunstroke, have occurred in the settlements, one of them terminating fatally. The deceased, formerly steward of the barque *Corea*, came to reside at Hongkew, where he was found by a foreign constable lying in the roadway, nearly insensible, and taken to the police-station. Dr. Macgowan was called in, and at once applied ice and other remedies, and then directed his removal to the General Hospital. He was taken there, but never rallied.

A meeting of the Artillery has been held to talk about reor-

Digitized by Google

ganising the corps. It was resolved to dissolve the existing organisation, and to meet again the next night to reform the Company and elect officers. At a second meeting Mr. J. H. Scott was unanimously elected captain. Mr. Scott, it will be remembered, was the first captain of the Company on its organisation in 1870, and resigned when he left Shanghai shortly afterwards.

Good hopes are entertained of saving the *Fusiyama*. The water has been reduced thirty-four inches, and as much of the submerged cargo as could be got at has been fished up. Another powerful pump has been sent up, with which it is expected to free the wreck of water sufficiently to enable the leak to be got at.

We understand that the Quinsan magistrate has been removed by his superiors, who are dissatisfied with his proceedings in regard to the attack on Mr. Cooper. We are glad to notice such an energetic step, and hope that we shall soon hear now of the matter being carried to a conclusion.

On the 3rd Aug. an open cargo-boat, containing an overload of kerosine, was capsized in the river opposite the Naval Yard, through the swell on the turn of the flood-tide. There was the usual scramble consequent on such accidents. With the exception of forty-eight cases all were recovered.

The Chinese gunboat *Foo-pao*, No. 4 of the Foochow fleet, is at present alongside the Hongkew Wharf, taking on board eleven heavy guns, ammunition, &c., destined, we believe, for the defence of Ningpo.

The offices of the Japanese Consulate have been removed to the building formerly occupied as the United States Consulate-General.

The *Celestial Empire* says :—

We regret to record the death, last Saturday morning, of the Baron von Gumpach. The deceased had, as it is well known, been actively engaged in literary pursuits, and at the very time of his seizure was supervising the proof sheets of his able and long-talked-of work, "Treaty Rights of the Foreign Merchant," which is now passing through the press. The Baron enjoyed a certain reputation in scientific circles in Europe as a man of brilliant parts—but heterodox to the verge of mania on many articles of universal acceptation. He openly avowed his scepticism in the oblate spheroidity of the earth, in the most elementary teachings of popular astronomy, and in the theory of gravitation. The works he has left behind him are probably more curious as a study for a speculative mind than valuable to the world at large from a scientific point of view. One of the saddest things about his death, however, is the fact that it was brought about, indirectly, by inanition. Severe mental labour, combined with periods of enforced abstinence from food, undermined the Baron's constitution, inducing first partial paralysis of half the brain, and then an attack of dysentery from which he never rallied. Such sustenance as he received he owed to the hospitality of friends ; we believe he was almost, if not entirely, without the means of procuring food himself. With such splendid talents, and so admirably fitted as, with a better balanced mind, he might have been for a sphere of usefulness and distinction, it is deplorable to think he should have come to so premature and sad an end.

A correspondent writes us from Chefoo that the *Mosquito* went to the Promontory the other day having on board Mr. Mayers, who has been authorised by Mr. Wade to pay the widow of the man supposed to have been killed by Fawcett a certain sum of money. The lady, however, with virtue worthy of a Lucretia, indignantly rejects the proffered coin, which she persists in looking upon as a bribe, and continues to clamour for a head. No head having been forthcoming, however, for now nearly a year, the faith of the woman is great. But it is rumoured that the Chinese are egging her on in her refusal, and it is quite possible that they are anxious to keep the affair an open grievance.

The Pacific mail Company's steamer *City of Tokio* brings nine days later news, viz., to the 17th August, and the following telegram has reached New York :—

The British Minister, Mr. Wade, has left Tientsin for Peking there to deliver the ultimatum of the British Government with reference to the murder of Mr. Margary. Several Attaches of the British Legation preceded him on different dates to give the Chinese Government full and timely warning of the action which Mr. Wade would take. It is commonly understood that if his demands are not acceded to within twenty-four hours he will withdraw his Legation and declare open hostilities. These demands comprise a complete investigation of the case, the punishment of the offenders, and heavy pecuniary damages. It is not doubted that the Chinese authorities will agree to everything and pay the indemnity promptly, though as to the punishment of the guilty parties much evasion is expected. The relations between Mr. Wade and Li Hung-Chang while at Tientsin were not cordial.

The treaty between China and Peru has been ratified at Tientsin after a long delay and many difficulties.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald* :—

We are informed that the reconstruction of the telegraph line between this place and Amoy will commence on the 15th August, in compliance with the terms of contract. The Great Northern Telegraph Company's *employés* will be accompanied by a guard of soldiers. Some petty Mandarins will also join the working party ; and the Viceroy has promised, we are informed, to afford every protection to the company. It remains to be seen whether these promises will be faithfully carried out. One point, however, is clear enough, and that is the absence of any real opposition to the line on the part of the country people. If the Chinese officials on the route refrain from exercising underhand influence over the peasantry and townspeople, there is every reason to believe that this desirable public work will be successfully accomplished.

The fact that British Piece Goods are no longer conveyed (or if conveyed, only in very small quantity) to the interior of this Province under transit passes—as provided by the Tientsin Treaty—may not be generally known. A glance, however, at the Customs' *Gazette* for the first quarter of the coming year will show plainly enough that the clause in the above-named Treaty, giving protection to goods of British manufacture, is virtually a dead letter. Briefly, then, there were, according to the Customs' *Gazette*, only fifty pieces of Cotton and Woollen Goods sent up country under transit pass during the first three months of the present year, against 17,000 pieces in the corresponding period of 1874 ; 36,000 in 1873 ; and 14,000 pieces in 1872. These figures are unmistakeably clear, and should serve to indicate, beyond all doubt, how very remote is the prospect, under present circumstances, of foreign merchants or commission agents being able to take any advantage of privileges secured to them by treaty. We cannot but conclude that it has been the fixed object of the Chinese officials to ruin foreign trade in the interior ; and if such a policy has been pursued, it has succeeded remarkably well.

The British barque *Min*, which arrived at this port on the 28th July, passed through a very heavy typhoon on the passage from Hong Kong.

HONG KONG.

Our advices by the present mail extend to the 14th August ; the French mail from London July 2 was received on the 9th August.

A correspondent writes :—Another vessel has been taken by the Spanish gunboats blockading the Sooloo Islands, viz., the steamer *Sultana*, the property of the Sultan of Bonni, but chartered by him to the Victoria Trading Company of Labuan. She was commanded by Mr. Howard, late Surveyor-General of Labuan, and was employed in the trade between the latter place and the Sooloo Islands. She was a fast vessel, and had made many successful trips before she was captured in one of the rivers of Sooloo, through the treachery of some natives who had informed the Spaniards of her whereabouts. Mr. Howard had barely time to escape into the jungle, leaving everything behind him except the night clothes he had on. The *Sultana* is said to have had a valuable cargo on board belonging to British subjects.

We take the following items of intelligence from the *Hong Kong Times* :—

The new Government Wharf, near the Recreation Club, is now completed and ready for use. It is a substantial and well-built structure, and reflects credit on the Surveyor-General's Department. A wharf of the same description, to replace the one opposite the office of the Messageries Maritimes Company, destroyed last September, would be found exceedingly useful.

The threatened opposition on the Canton line will soon become a fact. The steamer *Ichang* will leave on the 16th Aug., for Canton, returning the next day. The *Ichang* is a nearly new boat, having arrived here in March, 1874. Her tonnage is 700 tons, and she has beam engines of 270-horse power, built by Mr. A. J. Inglis, of Glasgow. Since her arrival in China she has been engaged in the Yangtsze trade.

We learn from the *Jornal de Macao* that three of the Annamite girls who, along with others, had been kidnapped by Chinese pirates, as reported by us, have been discovered at Macao, and hopes are being entertained that some more will be found. We are glad to hear that the Macao authorities have obtained a clue as to the whereabouts of the pirates, and are trying their best to bring the scoundrels to justice.

H.M.S. *Growler*, Captain Walter Stewart, arrived in port the 7th Aug., having left Amoy on the 5th, where she was relieved by H.M.S. *Hart*, Captain Royse, in the duties of Senior Naval Officer of the Amoy sub-division of this station—a post the *Growler* has occupied for the last fourteen months. Both the officers and crew of this ship having made many friends, not only at Amoy, but also at Swatow and Takao ; part of their duty being to make monthly visits to the two latter ports. The departure of this ship from Amoy, her head-quarters, was the cause of much regret on both sides. A farewell dinner was given on board by the officers to their friends on the 3rd August.

We observe that the Martini-Henry rifle (the adopted arm of the British army) has been served out to the 80th Regiment, stationed here.

Inspector Burns has just retired from the Police Force, after ten years' service. He was a zealous and efficient officer.

Digitized by Google

The following items of intelligence are from the *Hong Kong Daily Press*:—

On the 9th August Mr. Bailey, the United States' Consul, received a deputation of some of the leading members of the Chinese community, who waited on him for the purpose of discussing the means of carrying out the new Act prohibiting the emigration of Chinese women to America for immoral purposes. After a good deal of conversation it was decided the Chinese should form a committee to assist the Consul in ascertaining whether intending female emigrants were of respectable character. It was also proposed that a place of rendezvous should be selected where women designing to go to America could assemble. Mr. Bailey expressed himself anxious, while seeing that the Act was faithfully observed, not to interfere with the emigration of respectable women.

The Lieutenant-Governor of Canton has written a despatch to the Board of the Coast Defences, summoning the head members to give an explanation why they issued a notification authorising the revival of the Wai Sing lottery, which was strictly prohibited by the Imperial edict last year, and why the members of the coast defences neglected the prohibitory edict. He further requested to know why they did not consult with him, and directed them on receipt of his despatch to immediately order the Wai Sing lottery to be stopped. They were also to prosecute a diligent search for the gamblers and punish them when caught. Finally, he demanded a prompt explanation of their conduct with reference to the matter, and expressed surprise that they should have under any circumstances sanctioned the lottery.

Since the Sam Shuay Lekin tax station was attacked by pirates, the Viceroy of Canton ordered the two head men of the Peh Kong coast-guard junk, named On and Yen, to prosecute search for the robbers; they, however, failed to find any of them, and the Viceroy has sentenced them to forty blows with the bamboo each, and threatens them with dismissal if they do not arrest the robbers within a month's time.

The authorities of Canton are seemingly conscious that their streets might with advantage be widened. Orders have been issued to the owners of houses destroyed by the recent fire in Tah Toong street to rebuild them two feet further back on each side. This will widen the street by four feet, no trifle in a Chinese city.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 21st August; the French mail from London July 16 arrived out on the 16th August, and the following P. and O. mail of July 23 was received on the 21st August. We take the following items of intelligence from the *Straits Times*:—

What is ultimately to be done with respect to the unconfirmed Government appointments is still unknown. Mr. Birch, our former Colonial Secretary, is holding an unconfirmed appointment as British Resident at Perak; Mr. Braddell, our late Attorney-General and present unconfirmed Colonial Secretary, is absent on leave; Mr. C. J. Irving, Auditor-General, is Acting Colonial Secretary; Mr. E. A. Irving, Assistant Colonial Secretary, is Acting Auditor-General; and Mr. Knight, Chief Clerk in the Audit-office, is Acting Assistant Colonial Secretary. Besides these, we have an Acting Judge of Penang, an Acting Lieutenant-Governor of Malacca, and several other officials absent on leave. It is evident that the public service must suffer unless the Secretary of State gives the changes his approval or relegates the various officials to their former positions, in which latter event it is to be feared the success of our policy towards the Native States would be seriously jeopardised.

Whether or not the appointees have the confidence of the Secretary of State for the Colonies, it is evident to all here that Sir Andrew Clarke's selections were made with a keen intuition of the peculiar fitness of the officers for the respective positions into which he placed them; and to entrust those duties to other officers, new to the Colony or to the work, must not only entail serious delay and confusion, but might be disastrous in its effects. The constant influx of new and inexperienced men from home or from other Colonies into the public service of this Colony, and their advancement into positions of grave responsibility, has acted deleteriously upon the working of those departments, and in some instances occasioned much confusion, that would have been avoided by the system adopted by Sir Andrew Clarke, of choosing the incumbents of his most important offices for their great experience and special fitness for the duties, rather than with regard solely to their official antecedents.

The telegram which reported the loss of the Messageries Maritimes steamer *Nera*, plying between this and Batavia, in connection with the company's main line from Europe to China, is confirmed. On the night of the 6th August, on the voyage from this port to Batavia, and when within eight miles of that port, she ran upon a reef near Horn Island and filled soon after. The mails, passengers, and crew were safely taken off and landed at Batavia, but the vessel was advertised to be sold at auction as she lay on the reef, from which it is evident that there was no probability of getting her afloat.

In addition to the proceeds of a concert given here by Mdlle. Jenny Claus, the accomplished lady violinist, a subscription has been opened by the Consul for France for the relief of the sufferers by the disastrous inundation at Garonne; and though in our small European community the amount of the subscription cannot be very large, yet it is satisfactory to know that Singapore is contributing its mite to swell the fund for this charitable purpose. After generously devoting the proceeds of her first concert to charity, Mdlle. Claus gave two or three excellent concerts here, and the fortnight has been more than usually gay, having been prolific of public entertainments.

The last *Sarawak Gazette* announces the formation of the Sarawak steamship Company, who have begun business by buying the *Royalist*, and thoy have another steamer, the *Rajah Brooke*, newly built, on the way out from home.

PENANG.

Our advices extend to the 23rd August; the P. and O. mail from London July 23 arrived out on the 19th August.

The Penang Association held their third general meeting on the 4th Aug., and a full report of the proceedings appears in the *Penang Gazette* of the 7th Aug. The report is a very interesting one to read. There was a large attendance of the principal residents, European and Chinese, and the greatest unanimity prevailed. Mr. David Brown, of Messrs. Brown and Co., was Chairman, and opened the business of the meeting by a speech, in which he discussed in general terms the three important questions that were to be submitted in the shape of resolutions. The three questions were, the merely nominal power and responsibility of the Lieut.-Governor of Penang, the Penang Wharf Scheme, and the Government Sea Wall Scheme. Mr. Brown reiterated a former statement of his that the present position of the Lieut. Governor is a mere sham. The Wharf Scheme, he maintained, is an urgent necessity for the public benefit; if Penang is to compete successfully with other ports it must possess facilities for the quick discharge and loading of steamers. This scheme is the only one which will afford these facilities, and it in no way clashes either with the proposed Government Sea Wall, or the smaller scheme for a Roadway and Quay which was petitioned for in November last year. Mr. Walter Lorrain Hill, of Messrs. Lorrain Gillespie and Co. proposed the first resolution with regard to the Lieutenant Governorship. The resolution was:—

That the Committee prepare a letter to be forwarded through the usual channel to his Excellency Sir William Jervois, handing him a copy of the Memorial of May, 1873, and call his attention to the fact that no reply has been received thereto; and, also, reiterate the general wish of this Settlement, that full responsibility be put on the Lieutenant-Governor, so that he may be empowered to deal directly with questions effecting Penang and Province Wellesley, without reference to Singapore.

Mr. Ventre concluded with the following resolution, which was seconded by the Hon. J. B. Vermont, and carried unanimously:—

That the Committee be requested to take up the matter of the "Penang Wharf Scheme," together with the scheme of Government for erecting a Sea Wall and Quay, and to draw up a memorial for presentation to his Excellency the Governor, expressing the views of the community on the subjects to be laid before the next general meeting of the Association.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—An improved demand had been apparent for Yarns and Shirtings, but prices still kept low, though the former had somewhat recovered from the depression previously existing. Black Velvets had attracted attention at slightly improved values, and light weights of Turkey Reds had been rather more inquired for. Woollens remained dull, with exception of Mousselines, which were readily saleable at better prices. For Cloth some inquiry had commenced, but the rates offered scarcely induced business. In Metals small nail rod Iron had attracted some attention—sales were reported of about 150 tons at $3.50 per picul and upwards, according to quality.

TIENTSIN.—A moderate business is reported with slight improvement in tone.

HANKOW.—There had been little or no improvement in the market. Excepting in Grey Shirtings there was scarcely any business doing.

CHINKIANG.—Messrs. Spencer and Wolff write from this port:—Dealers seem at last to have arrived at the conclusion that there is no likelihood of a further fall in Grey Shirtings, and, consequently, a fair business has been done during the past week at about the equivalent of Shanghai rates. The demand runs almost entirely on 8¼lbs. Grey Shirtings, T-Cloths and Fancy Goods continuing very quiet. Our market closes firm, with a strong upward tendency.

SHANGHAI.—The Chamber of Commerce Report says:—Cottons.—The fortnight has witnessed a fair business in Grey Shirtings. 6 lbs., 7 lbs., and 8¼ lbs. have been very generally inquired for, and were sold liberally during the first ten days or so of the period under review. Latterly, holders have endeavoured to get a slight advance on previous rates, but with only partial success, buyers, as a rule, not being prepared to pay higher prices. The demand has run entirely on common goods, only one or two of the most favourite chops of superior Cloth

Digitized by Google

having been saleable at proportionate rates. Quotations may be called 4 to 5 cands. per piece higher, but for the moment they are more or less nominal. Heavy Shirtings have been sold at an advance on previous rates, but are not freely current. White Shirtings have been in rather better demand, but holders have had to accept low rates to effect any sales. T-Cloths continue extremely quiet, but prices are nominally maintained, there being no paessure to sell. Light weights of common Cloth are wanted to "arrive." English Drills have been more freely sold, but it has not been possible to establish any improvement in values. Jeans have been largely sold, and are worth 4 to 5 cands. over the quotations of a fornight ago. They could still be placed on those terms, but the higher rates asked by holders seem to check business. Fancy Cottons.—Not much doing, little change in prices. Velvets have been in demand, and present rates are firm. Woollens have been in better demand. Spanish Stripes: Market strong with good business. Medium Cloths: In moderate inquiry at unchanged rates. Long Ells are in small stock, and the quotations given are well maintained. Common Crape Lustres have declined considerably.

HONG KONG.—A large business had been transacted in Yarns during the fortnight, at slightly advancing rates, buyers having been attracted by the low prices ruling for this article. In Piece Goods, only a small business had been done, but prices continued firm.

BATAVIA.—There had been no improvement whatever in the market for Cotton Manufactures. The business transacted during the fortnight had been on the most restricted scale for the season of the year, and the tendency of prices was decidedly downward. It was, however, hoped that the somewhat better telegraphic advices from home would prevent a further decline in this market.

CANTON.—Lead: Quotations were—L.B. $8.55 to 8.60, and W.B. $8.60 to 8.65. Small sales had been effected at these rates. Quicksilver had declined in value, and was quoted at $105 to 106 per picul.

SINGAPORE.—The arrivals with general cargoes had been the Henrietta from Amsterdam, the Kate Carnie and steamer Naples from London, and the steamer Diomed from Liverpool. The market had been quiet but steady during the fortnight. Advices from Manchester had been in favour of importers, and in some instances a slight advance in quotations was noted, but owing to the unsatisfactory nature of advices from the outports the business done had been very limited.

PENANG.—The demand for imports generally had been quiet, but still transactions in the aggregate had been larger than during the previous fortnight; prices as a rule remained unchanged but rather weak.

EXPORTS.

—o—

TEA.

YOKOHAMA.—Settlements of Tea had continued on even a larger scale than for the preceding fortnight, being estimated at 14,000 to 15,000 piculs. Prices had become decidedly firmer, at an advance of $1 to 2 per picul. The John MacKean had sailed for San Francisco, and the Mora, Walton, and s.s. Galley of Lorne (*viâ* Hiôgo, China Ports, and Suez Canal) had sailed for New York. The P. M. S. Company had reduced the rate of freight per City of Tokio to 3 cents. per lb., gross weight, to New York.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s Report says:—Date of our last was 28th July, since when but a small business has been done here, viz.:—594 chests, 4,426 ½-chests, and 1,300 boxes at 1s. 1d. to 1s. 2½d., and 1,024 chests, 1,536 ½-chests at 1s. to 1s. 0⅝d. Sales consist chiefly of Oonfars which have ranged from Tls. 14¼ to 17¼; Toong-shans and Soong-yongs realising Tls. 13¼ to 17¼, and Young-low-toongs Tls. 13 to 14 per picul. The second crop leaf is now pretty well all to hand, but no third crop has yet arrived. We should have musters in a few days. Customs export shows three millions excess over last year and this does not include the cargo of the "Aegean" now nearly complete.

KIUKIANG.—Black: Settlements since 20th July amounted to 1,547 half-chests, all other arrivals had been forwarded to Shanghai on native account.

Export from the commeneement of season to 3rd August, 1875	18,148,155 lbs.
Ditto 3rd August, 1874	16,903,786 lbs.
Increase, 1875	1,244,369 lbs.

SHANGHAI.—Black: The decline recently quoted brought several new buyers into the market, and an active business had resulted at prices about on a par with selling prices ruling in London during the spring months of this year. Supplies had been liberal, and the stock showed an increase of about 4,000 chests. Third crops had not yet come to hand. The export continued to be about 3,500,000 lbs. over last season's at same date. Steamers were still preferred to sailing vessels, although the amount of new Black Tea from China, due in London before 30th September, is about 75,000,000 lbs., against 56,000,000 lbs. last season. Settlements are 35,600 chests; shipments on owners' account, 1,900 chests; stock, 34,500 chests Quotations: Hohow 0s. 10d. to 1s. 6¾d., Oonam and Oanfas 0s. 10½d. to 1s. 4½d., Ning chow 1s. 0½d. to 1s. 8½d., Oopack 0s. 11d. to 1s. 4½d. Green: In the early part of the fortnight Pingsueys with any quality were taken to a fair extent, and prices gradually hardened until an advance of fully a tael was established. Subsequently, owing probably to the unsatisfactory character of most of the chops on offer, less demand had existed, and teamen were more anxious to rid themselves of their stocks. Several chops of Taiping and Fychow kinds had been taken at about last rates. The Teenkai market remained unopened, teamen being very slow to sell their produce at prices which leave them a heavy loss. Moyunes were expected in about a fortnight from date.

FOOCHOW.—Messrs. Westall, Galton and Co.'s Weekly Letter says:—Owing to the unfavourable telegrams received from London, with reference to the reception of the new Teas, there has been a considerable falling off in the daily settlements during the past week. Buying is now confined to a very limited number of operators, and the market closes extremely quiet.

AMOY AND FORMOSA.—Amoy Congous: Settlements had gone on steadily for the colonies at rather easier rates. Amoy Ooloongs: Some trifling transactions were reported for the London market, but prices had not transpired. Formosa Ooloongs were quiet, a good deal of medium quality, belonging to Chinese, being on offer without attracting buyers. Really fine teas were in request, at full rates, but the supply was extremely small.

CANTON.—Messrs. Deacon and Co.'s Report says:—There has been rather more inquiry for Teas during the past fortnight, but the aggregate of settlements is again very small. Buyers display little eagerness to recommence business, but teamen now appear somewhat more ready to listen to offers; and it is likely that before very long prices will be ruling more in accordance with selling rates at home. The picking of the fourth crop leaf has commenced and the weather so far has been favourable; it is reported that a large quantity of the leaf is being made into Congou; the present dull state of our market here and the likelihood of low prices ruling for the remainder of the season, giving natives but little inducement to prepare Capers. Congous.—The few purchases recorded show a slight decline on rates of the previous mail. From Macao shipments continue to be made, and at that port also prices have been in favour of buyers, especially for clean common sorts. A large proportion of the stock is of a very mixed and inferior character, containing a considerable quantity of spurious leaf. Scented Teas: A few small parcels are reported as settled, and for these teamen have submitted to lower rates. Natives are beginning to feel that they have held out nearly long enough and are showing signs of meeting buyers; they, however, have not yet reduced their prices sufficiently to induce business, though they would accept a decline of about Tls. 2½ to 3 on prices of a month ago. A small business has been done in Pekoes, and has been confined with one exception to "long leaf" kinds; of these fine and finest have been taken at former rates, while medium teas at Tls. 19 show much better value than previously. One chop of "new-make" has been settled on rather easier terms at Tls. 13. Canton Greens: Only 500 boxes have been settled during the fortnight. The following is a summary of the fortnight's business:—Congou, 700 boxes at Tls. 18 to 20 per picul; Scented Caper, 1,000 boxes at Tls. 15 to 24 per picul; Scented Orange Pekoe, 6,000 boxes at Tls. 13 to 33 per picul; Gunpowder, 500 boxes at Tls. 22 per picul.

SILK.

YOKOHAMA.—A fair business had been done in this staple. Arrivals had been on a larger scale, and had met with ready buyers at a considerable advance on former quotations, thus preventing any accumulation of stock. A few bales of new Sinshiu and superior Joshiu Hanks, also fair parcels of Hamatski, had been brought to market, and were taken up, chiefly by Continental houses. Several parcels of Oshiu native filatures had been settled at from $600 to $630 (equivalent to a cost of 22s. 3d. to 23s. 4d. in London, and f.61 to f.64 in Lyons).

SHANGHAI.—There had been hardly any change in prices, and just sufficient business going on to prevent holders feeling any uneasiness. The bulk of the transactions had been again in the common and medium grades of Tsatlees, although Kiahings were much inquired for, and (being in small stock) were difficult to buy even at some advance on previous quotations. Re-reels were taken for America to a fair extent for the steamer of the 31st July. The market closed with price just a shade in buyer's favour, owing to the smaller business of the week. Settlements for the fortnight, Chinas, 4,100 bales. Total settlements since 1st June, 1875, 23,700 bales; against 1874-75, 22,000 bales; 1873-74, 16,500 bales. Comparative unsold stock on this market on the 7th August, 1875, 16,000 bales; 1874, 18,000 bales; 1873, 8,000 bales.

CANTON.—Messrs. Deacon and Co. report:—Recent telegraphic advices from London put the value of No. 4 Tsatlee 10s. 6d. per lb., but the receipt of such announcement has, so far, had hardly any apparent effect on this market, and we can only quote a very trifling decline in prices paid for No. 4 and common sorts, while the better classes show no change. Large shipments of Silk, previously contracted for, were made, by last French mail steamer, and there are still several hundred bales to go forward. Settlements on the market are estimated at about 700 bales. It is too soon to speak regarding fourth yield. The weather to date has been very favourable for producing. Loong-kongs: This description is quite out of favour and no sales have taken place lately. Long-reels: Parsees are said to have bought 160 piculs. Re-reels; 400 boxes (chiefly Lacklow) are reported under contract, for America. Stock is estimated as follows: 700 bales Tsatlee, 100 bales Loongkong, 150 bales Cumchuck and Lacklow, 50 bales Kowkong, and about 390 bales of inferior kinds.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Sept. 22, at London, from Rangoon, Delaide; from Akyab, Guinevere; at Falmouth, from Akyab, Wistawarf; 21, at Havre, from Akyab, Cesira; 22, at Hamburg, from Rangoon, Dora; at Rotterdam, from Rangoon, Lofvald; 23, at London, from Singapore, Proserpina; from Colombo, Dunelm; at Liverpool, from Rangoon, Armanalle; at London, from Ayab, Sollicito; at Falmouth, from Rangoon, Mary Ann, Belle Morse, Caroline; from Bassein, Battistina; from Maulmain, for Sunderland, Royal Visitor; at Queenstown, from Rangoon, Apeninno, Serra ed Elena; from Samarang, Idella; at New York, from Singapore, Our Annie; 21, at Bremen, Lycka Fill; 23, off Deal, from Batavia, for Rotterdam, Johanna Maria; 24, at Falmouth, from Rangoon, Amdrauth; from Bassein, Caterina G.; at Liverpool, from Rangoon, Pride of England; at Queenstown, from Rangoon, Princess Eugenie; at Queenstown, from Akyab, St. Bartholomew; 25, at Falmouth, from Rangoon, Jose Maria; 26, at Liverpool from Rangoon, Martaban (str.).

DEPARTURES.—Sept. 22, from Glasgow, for Rangoon, Bay of Bengal; from Cardiff, Moltke; from Sunderland, for Singapore, Lizzie Barry; 23, from London, for China and Japan, Venice (str.); for Colombo, Coldinghame; from Cardiff, for Singapore, Anna Bertha; 25, from Liverpool, for Rangoon, Theresa; 26, for Manila, Grurac Bat (str.).

SPOKEN.—Iphigenia, from Hamburg, to Hong Kong, Sept. 16, 46 N., 11.30 W.; Jacob Roggeveen, from Amsterdam to Batavia, 22, 49.30 N., 5.53 W.; Laju, from Newport to Hong Kong, 6, 34 N., 24.22 W.; Hopewell, from London to Hong Kong, Aug. 21, 8.31 N., 23.59 W.; Y.N.D.K., from Bordeaux to Batavia, 21, 13 N., 27 W.

MISCELLANEOUS.—Gibraltar, Sept. 23, passed Glengyle (str.), from Shanghai, for London. Malta, Sept. 16, arrived from Foochow, for London, Sea Gull (str.), Egeria (str.). Port Said, arrived Sept. 24, from London, for China and Japan, Lotus; for Shanghai, Viking; 19, from Nieuwe Diep, for Batavia, Conrad. Suez, arrived Sept. 22, from Batavia, and proceeded for Nieuwe Diep, Koning der Nederlanden.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, SEPT. 23.—The P. and O. Company's steamer Baroda, with the India, China, and Australian mails, arrived here at 2 A.M. to-day, and the mails left for London at seven this morning.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, SEPT. 20.—The P. and O. Company's steamer Cathay left here at 9 A.M. to-day for Southampton, where she may be looked for about the 3rd of October. Specie, £763,284.

NEXT INWARD MAIL.—MARSEILLES, SEPT. 27.—The Messageries Maritimes steamer Peiho, with the inward French mails from China and Japan, arrived here at 6 A.M. She brings ninety passengers and a full general cargo, including 668 bales silk, 6,649 packages tea, and £1,510 in specie for London, which will be forwarded by the Company's steamer Euphrate, due on or about the 12th proximo.

INWARD MAIL DUE OCTOBER 18.—GALLE, SEPT. 19.—The Messageries Maritimes steamer Meikong, with the inward French mails from China and Japan, left here to-day for Aden.

LAST OUTWARD P. AND O. MAIL.—SUEZ, SEPT. 24.—The P. and O. Company's steamers Delhi and Nizam left here at 11 A.M. to-day for Bombay and Calcutta respectively.

OUTWARD MAIL OF AUG. 27.—GALLE, SEPT. 20.—The Messageries Maritimes steamer Ava, from Marseilles 29th ult., left here to-day for Singapore.

OUTWARD MAIL OF AUG. 6.—SHANGHAI, SEPT. 18.—The P. and O. Company's steamer Geelong, with the London mails of Aug. 6, has arrived here.

DUTCH OUTWARD MAILS.—SOUTHAMPTON, SEPT. 7.—The Rotterdam Lloyd steamship Hampton sailed this evening for Padang, Batavia, Cheriboa, Samarang, Sourabaya, &c., with mails and passengers, 160 Dutch troops, and a full cargo of general merchandise, including a quantity of machinery.

A CORRESPONDENT informs us that the Treaty signed between France and Annam is of great importance, and will probably lead to the opening up of trade in Southern China. The French Government are to present to the King of ANNAM five steamers of 500-horse power each, 100 cannon, and 1,000 stand of small arms, as also to be under French protection in case of necessity. In return, however, for these benefits, he is to open up three of the Tonquin ports, and promote trade in the interior.

THE current number of *Vanity Fair* contains the subjoined paragraph:—

"We have a most grave and lamentable piece of intelligence to give. The Government have come to the conclusion that another war with China is inevitable, and every preparation is about, at once, to be made for it. The declaration of war or outbreak of hostilities is but a matter of Time."

We have authority for the announcement that the above statement is entirely without foundation.

IN the Economic Department of the Social Science Congress now being held at Brighton, the question of the Opium Trade will be discussed, Mr. RICHARD, M.P., and others connected with the Anglo-Chinese Association taking part.

The London & China Telegraph.

LONDON: MONDAY, SEPT. 27, 1875.

THE PENDING NEGOTIATIONS IN CHINA.

THE mistake which was made by *The Times'* correspondent in telegraphing the terms upon which it was stated the difficulty with China consequent upon the murder of the late Mr. MARGARY had been settled, is somewhat unfortunate, as tending very much to mystify the subject in the public mind. Previous to the receipt of the telegram in question, there was a marked unanimity among the leading journals as to the necessity of a decisive attitude being adopted. The nature of the case was well understood, and it was generally felt to be one in regard to which it was imperative that a firm stand should be made; and, but for the unlucky error which was fallen into, this feeling would doubtless have continued. The statement, however, that terms had been agreed to had naturally the effect of considerably altering the aspect of matters; and, although the majority of the leading papers were so far consistent that they pronounced the settlement as reported to be unsatisfactory, *The Times*, which has a predominant influence upon opinion in England, very greatly modified its tone, and congratulated the nation upon an arrangement having been come to. Pending further details, it would be premature to speak definitely as to the nature of the mistake which has been made. In briefly noticing the subject in our last issue, we stated that it might possibly prove susceptible of a simple explanation, and shall look with interest for detailed news on the subject. It is quite possible that there may have been some foundation for it, and that negotiations had been very nearly brought to a conclusion upon some such basis as that which was indicated in the original telegram. It is, however, very important whether the investigation into the murder of the late Mr. MARGARY is to be made by a joint Commission of English and Chinese officials, as originally proposed, or to be proceeded with merely by the mandarins, under the direction of LI-HUNG-CHANG. In the former case there is a chance that something like the truth may be arrived at; but if the Chinese be left to investigate the affair by themselves, we know only too well the plausible shuffling to which they habitually resort, and the small likelihood there is of any satisfactory conclusion being arrived at. It is noticeable that, although *The Times* at first backed up the reported settlement of the affair, it saw reason to modify its tone in a second leader upon the subject (which we reproduced in last issue), and was disposed to doubt whether the terms stated to have been agreed to would really form such a conclusion of the affair as would be in accordance with the rights of the case or the necessity for maintaining our *prestige*. It is to be hoped that the Government have given Mr. WADE the necessary instructions and powers to maintain a firm attitude in the matter. What he may do will, of course, depend upon the view taken by the Foreign-office, as, unless he be backed up at head-quarters it will, of course, be impossible for him to negotiate satisfactorily. At present little is known of the view which is adopted, but there is reason to believe that the gravity of the matter is not overlooked, and that, although the Chinese may succeed in creating some delay by the plan of despatching a Special Ambassador, that official will not find it so easy a matter as is probably imagined to satisfy Earl DERBY on the subject. The precedent of CHUNG HOW'S visit after the Tientsin Massacre no doubt affords great encouragement, but it is not to be overlooked that, at the time of his arrival, France was in the throes of a gigantic war at home, and was not in a position to face complications in distant parts, where also her interests are small in comparison with those of Great Britain.

SURVEY OF THE CHINA SEAS.

THE telegram received regarding the accident to the P. and O. steamer *Sunda*, occasioned by her striking on a sunken rock, though it does not mention whether the danger is a known or unknown one, brings forcibly before us the necessity for a re-survey of the coast, more especially on the steamer track between Hong Kong and Shanghai. There is nothing more perplexing or disastrous than the idea that the coast line may have hidden rocks, which captains are not acquainted with, and it is, and has been for long, a complaint of commanders of vessels that, from the continual discovery of unknown dangers a feeling of mistrust naturally interferes with their course of navigation. It is perfectly well known that an active volcanic strata lies, sub-marine, between the continent around Amoy and Swatow, and the groups of islands lying between Hong Kong and Australia, and what continuous revolutions in the formation and position of rocks and shoals these movements may cause cannot, of course, even be conjectured. As we have said, we are in ignorance as to the rock on which the *Sunda* has struck, but it will be remembered that, not very long ago, another P. and O. vessel, the *Madras*, came to temporary grief on a sunken and unmarked reef at the entrance to the harbour of Swatow. Some years ago, also, the Oriental Steamship Company's steamer *Ulysses* struck on a rock not far north of Hong Kong; but though a notification was issued by the harbour authorities, no practical testimony was gathered as to the captain's observations as to position being correct, which might easily have been done, had a gunboat gone out and investigated the matter. There may be a sunken rock, or there may not. But these rumoured dangers are of more trouble and anxiety to navigators than those they know of, for they have not only to keep a sharp and keen outlook to steer clear of dangers which are, but also of dangers which may be. Thus, when dangers are reported, they should be investigated as to their reality. But while the China coast has been so successfully supplied with lighthouses, it would be well were the steamer tracks resurveyed; and surely the numerous gunboats, idling about the coast ports, might be supplied with an officer capable of making surveys, and by degrees, the matter could be arranged. Apathy is the ruling idea of things relating to China, but, possibly, a man-of-war may strike a sunken rock some day, and then the mercantile navigator will get some attention paid to the clear marking of his highway at sea.

RUSSIA AND KHOKAND.

IN a recent issue we briefly recorded the news of a decisive victory which General KAUFFMANN had gained over the insurrectionary troops in Khokand, and now we learn by telegraph that another of the Khanates of Central Asia has been virtually brought under the dominion of Russia. Events have marched with startling rapidity, for in less than a fortnight from his last encounter with the enemy, General KAUFFMANN occupied the town of Khokand itself on the 16th of September, without meeting with any resistance at all. The greater portion of the Russian troops—our information runs—remained in the fortified camp outside Khokand; and we may, therefore, conclude that their opponents, sufficiently warned by their previous defeat, thought discretion the better part of valour, and quietly retired at their approach, leaving their leader to settle his differences with the Russians as best he could. The conditions imposed upon him by his conqueror have not been telegraphed in detail, but we are told that "all Russian prisoners have been set at liberty, and the "Khan has agreed to all the conditions of peace demanded "by the General." The basis of the arrangement, we presume, includes a Russian protectorate over Khokand, a monopoly of the external commerce for Russian traders,

Digitized by Google

and an annual allowance to the deposed Khan, who, we may remark, was the father of the leader who has so easily been made to succumb to the power which is gradually, but surely, spreading its sway over the independent Khanates of Central Asia. Khokand being now practically under the control of Russia, in much the same way as Khiva is, Kashgar alone now intervenes between Russia and the upper portion of the western frontier of the Chinese Empire. How long Kashgar, menaced both on the east and the west by its overwhelming neighbours, will remain independent, it would be rash to predict; but, perhaps, by judicious management, YAKOOB KHAN'S Envoy, now at St. Petersburg, may contrive to stave off the evil day, when Kashgar must almost inevitably share the fate of Bokhara, Khiva, and the other districts, which have, one by one, been compelled to give in their submission to the Czar of All the Russias.

THE MAIL SERVICES TO THE FAR EAST.

A LETTER has appeared in *The Times* regarding the time occupied in the transmission of letters to and from China and India. It has been known for long that the time could be considerably shortened, but the P. and O. service, having a contract to maintain a certain rate of speed, naturally object to enlarge their consumption of coal by increasing that speed. Their contract, moreover, being founded on calculated expenses of the work required of them, they have right and justice on their side, and, therefore, in the present age, it behoves the Postal Authorities to make some new arrangement towards facilitating the more rapid transmission of correspondence. It must be remembered that the class of steamer now in use is more powerful, and in every way is superior, to that formerly run by the P. and O. service. It is admitted on all sides that the route to China and India—or, at least, the time occupied on the route—might be shortened by almost a week. Proof of this is given by the frequent arrival of the French mail considerably in advance of its due date at Marseilles. It is a remarkable fact, however, that the French mail steamers on their outward voyages are, as a rule, behind time, while the English mails are more often ahead of contract date. The writer to *The Times* alludes to the deviation of the French mail to Saigon, but forgets that the English mail calls and remains six hours at Penang, a port which the French service altogether avoids. But, again, by the new Occidental and Oriental Company's steamers running across the Pacific, letters from Shanghai have been delivered in London considerably in advance of the time occupied by either the Brindisi or Marseilles route; and instances are on record of Hong Kong letters being carried by "outside" steamers, sailing subsequently to the departure of the mail boat, and posted at Suez, arriving in London at the same time as the mail. All these points suggest the necessity of alteration; and, with an accelerated speed, and increased facilities for shortening the detention at ports of call, it is quite practicable that, on the all-round voyage, a saving of some ten days might be effected, a period of time of immense value to those engaged in commerce. It remains for the Postmaster-General to take the matter under his careful consideration.

MR. CHARLEY, the member for Salford, is spoken of as the probable successor of Sir EDWARD CREASY in the Chief-Justiceship of Ceylon.

CHINESE PROFESSORSHIP AT OXFORD.

As we have already briefly announced, endeavours have recently been made with the very desirable object of founding an University Chair for the promotion of the study of Chinese Language and Literature at Oxford, and we are now enabled to add further particulars, which will doubtless interest our readers. Subjoined is a list of the Committee formed to confer with the authorities of the University; and though no actual agreement has yet been entered into (which, indeed, must depend on the extent to which public help is afforded) there is every reason to expect that a satisfactory arrangement will be made. It is proposed to raise by public subscription a sum which, with an equal amount that the Committee are hopeful the University will supply, will be sufficient for the adequate endowment of the Chair. It is also proposed that the Committee of Subscribers should have the first nomination to the Chair, the patronage of which will subsequently rest with the University. The Rev. James Legge, D.D., LL.D., late of Hong Kong, has been nominated to the University authorities as the first Professor, and no wiser choice could be made. His merits as a Chinese scholar are so conspicuous and so well known that his name will at once occur to all our readers familiar with the Far East as the most fitting occupant of such a position; and it is a happy augury of success that at the formation of the Chair the services of so distinguished a scholar can be obtained, whilst his long and successful career as a missionary will attract to him the sympathies of a far larger class. We may add that the Jullien Prize, founded by the late distinguished sinologue, Stanislas Jullien, to be awarded annually by the *Académie des Inscriptions et des Belles Lettres* of Paris for the most valuable work on Chinese literature recently published, was inaugurated in June last by its presentation to Dr. Legge.

The importance of a Chair at one of our Universities for the special study of the Chinese language cannot be too highly estimated, and it is remarkable that no endeavour should hitherto have been made to found one. Our interests with that vast country are of great magnitude, both commercially and politically, and are destined to become still more important. Under such circumstances every facility that can be afforded for efficiently studying the civilisation and language of China becomes of moment. It is somewhat descreditable to us as a nation, that with interests in the Far East exceeding those of all other European nations put together, we have allowed the Universities of France and Germany to anticipate us in this direction; and we appeal to all interested in the East, or in the cultivation of Oriental literature, to aid the efforts now being made by the Committee to obtain the necessary funds for an adequate endowment. The Committee is at present constituted as follows:—

Sir Rutherford Alcock, K.C.B., Chairman; Sir John Davis, K.C.B., Admiral Sir Charles Shadwell, K.C.B., Venerable Archdeacon Gray, of Canton, Rev. John Searth, Messrs. W. S. Brown, Eldred Halton, Thomas Hanbury, John Holliday, Robert Jardine, James Macandrew, Alexander Michie, Arthur Sassoon, Arthur Smith, T. Sutherland, W. Walkinshaw, Dr. Winchester, and Messrs. J. B. Taylor and Alfred Howell, Honorary Secretaries.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, SEPT. 21.

The season is fast advancing, the trees begin to drop their leaves, merchants, bankers, and the high class of Government people have returned to the city, and business once more resumes its normal progress. In politics there is as yet not much doing, but here we do not care about politics and diplomacy; self-government and free trade are what we want, and these pillars of public welfare are still in our possession. And really we need them for a good while yet, for notwithstanding the solid basis of Hamburgish business, yet the great crash, and the many little crashes that have been experienced throughout Germany, have not left us untroubled, and seventy-four millions of thalers, by the calculation of one of our cleverest financiers, is the sum which has been lost by our capitalists through unproductive and unpracticable speculations. This sum certainly does not signify much for a place of such importance as Hamburg, but it is, anyhow, a drawback. But let us take a look around. Regarding our communication with East India and China I have to report the departure of the *Galatea*, s.s., Captain Boehm, belonging to the "Deutsche Dampfschiffs Rhederei," which vessel left our harbour on Sunday last. She did not go to sea directly, but came to an anchor on the lower river, to take in some more cargo, and went to sea yesterday evening. Notwithstanding her staying here a week over her advertised time she has not been able to obtain a full cargo, and therefore goes to London to fill up. Her cargo from here consists for the greater part of unmanufactured iron in different shapes, glassware, &c., and her cabins are occupied by about twenty passengers. Next in turn will be the *Egeria*. s.s., which is taking the berth now, and will be despatched at the end of October. A splendid new steamer for the same employ is being built at Kiel under the inspection of Captain Johannsen, who formerly commanded the *Galatea*, an able and experienced sailor, well known in the Far East. The steamer *Altona*, belonging to Mr. von Pustau, at Altona, is expected from China *via* London, in a few days. This steamer has recently been under the command of an English captain, but as the German shipping Act does not allow of foreign commanders carrying the German flag unless they hold a German certificate, the present captain will either have to pass his examination in Germany, or give up his place to a German master. The trade between Hamburg and the East for sailing vessels is falling off more and more; in fact, rates of freight on the China Coast are too low to induce owners to send out their vessels, and one of our most active brokers has been running about some six weeks after a vessel to take the berth for Tientsin, without being able to obtain one. Our countrymen at the small ports on the eastern coast of Sehleswig-Holstein seem not to be of the same opinion, and only a few days ago a splendid new full-rigged ship, the *Taiwan*, Captain Tessen, specially built for the China coasting trade, went to sea from Sonderburg, where she was built. The number of sailing vessels on the berth for the Far East is at present only five, viz., the *J. H. Wappans*, Diedrichsen, for Penang and Singapore; the *Norma*, Runge, for Singapore; the *Marie*, Petersen, for Manila; the *Formosa*, Schween, for Hong Kong; and the *Condor*, Steffens, for Chefoo. The *Esmeralda*, a splendid new barque-rigged vessel, belonging to the well-known firm of A. T. Herz and Sons, and commanded by Captain Hansen, an old China trader, is gone for the first voyage to Cardiff, to take out coal to Singapore, and very likely will remain to be employed in the coasting trade.

Our coal-labourers, that is to say, the men that "jump" the coal

Digitized by Google

out of the many steam-colliers now in trade between here and the eastern coast of England, have of late felt somewhat uneasy owing to a rumour being spread that the directors of the Koln Minden Railway were going to lower the rate for the transport of Westphalian coal another twenty per cent. This, of course, would enable the Westphalian coalpits to undertake a successful competition against English coal; but the report has not yet been confirmed from any side, and the fact remains that, on the average, English coals are uniformly better than Westphalian. The trade in general is very quiet, and it is to be feared that at the close of the year the arrivals and departures in our river will be a good deal fewer than what they have been in preceding years.

The lack of enterprise which has characterised business operations during the past two or three years will be found fully reflected in the statistical details which are given below. The opinion generally entertained that the lowest point in the downward movement of trade for the year 1874 had not been reached, and that the total results would indicate no improvement is unfortunately fully supported by facts, and it will be seen that although there was an increase upon 1873 of about 170,000 tons in the weight of the goods imported, the value shows a decrease of nearly nine and a-half millions sterling upon the previous year, and of more than thirteen millions as compared with 1872. The falling off in imports is partly to be attributed to the large decrease in bullion. Total imports of Hamburg:—

	Weight.	Value.	From Great Britain.
1870	... 52,877,650 cwts.	... £54,761,000	... £17,269,711
1871	... 68,186,321 „	... 89,360,490	... 36,886,237
1872	... 73,087,103 „	... 99,615,940	... 37,164,890
1873	... 68,649,198 „	... 96,003,316	... 32,202,374
1874	... 72,062,815 „	... 86,538,084	... 25,387,422

During the past week we have had a very interesting trial before one of our law courts. Ch. van Diemen and Co., a commission firm, that may perhaps be known to many of your readers, were charged with defrauding the Customs to the amount of 450,000 marcs. The members of the above firm are Ch. van Diemen and E. Friedrich, against whom, as their present domicile is unknown, the proceedings were taken *ad contumaciam*. Besides these two and several other minor persons, there was also a merchant, Bass, charged with being concerned in the frauds, and after a five days' trial the Court sentenced van Diemen and Friedrich to thirteen months' imprisonment with hard labour, and a fine of 3,165,396 marcs each (both are bankrupt, and each has consequently to undergo a further imprisonment with hard labour for eight months), and Bass to a fine of 544,500 marcs, or imprisonment for one year.

The steamers of the Hamburg-American Company to Aspinwall (Colon) continue to leave on the 8th of every month, and a through rate of freight and passage-money has been arranged by the Company for Japan and China, *viâ* San Francisco. Passengers who desire to avoid the fatigue of the railway from New York can proceed by this route, crossing the Isthmus of Panama, and proceeding thence to San Francisco, China, and Japan by the Pacific Mail Company. The passage-money from Hamburg to Yokohama is 2,410 marks (about £120), to Shanghai and Hong Kong 2,610 marks, or £130. The steamers of the line are over 2,000 tons, and well fitted.

The semestral balance of the "German Bank" is now made up, and shows a balance of about 8 per cent. After deducting from this the general cost and the dotations of the reserve fund in the same proportion as last year, there will, in all probability, if the second semester shows the same favourable result, remain an annual dividend of 5 to 5½ per cent., from which must be deducted the losses which the bank has sustained by the liquidation of the branches at Shanghai and Yokohama, as well as by the reduction in the value of silver, and by other circumstances.

The Siberian Trading Company's steamer *Vindex* has arrived at Wladiwostok, and the chartered sailing vessel *Rowena*, from London, with cargoes for the stations on the Amoor. The report of the directors of this company will shortly be issued.

PRODUCE MARKETS.

A quiet feeling has prevailed in our markets during the past fortnight, and transactions have been of a detailed character.

TEA.—Business moderate, and only for consumption; quotations are—

	Marks per half-kilo.
Souchong, ordinary good middling	1.20 to 1.70
„ fine	2.60 to 4.00
Caper	1.50 to 2.00
Sauchong	0.90 to 3.00
Sesso, ordinary good middling	1.80 to 2.40
„ fine	3.80 to 5.00
Orange	1.25 to 3.40
Haysanschin	0.90 to 1.80
Tonkay	0.90 to 1.80
Younghaysan	1.10 to 2.70
Haysan	1.70 to 3.60
Imperial, country	1.50 to 3.60
„ Canton made	0.90 to 1.70
Gunpowder, Canton made	0.85 to 2.60

RICE has been in good demand and quotations are supported, viz.:—Bengal, 11 to 15 marks per 50 kilo.; Siam, Madras, Ballan, 8 to 11m. per 50 kilo.; Rangoon, 9¼ to 9½m. per 50 kilo.; Bassein, 9 to 9¼m. per 50 kilo.; Arracan, 8¾ to 9m. per 50 kilo; Moulmain, 9 to 9¼m. per 50 kilo.

COTTON is hardly inquired for; quotations, Bengal, 0.76 to 0.96m. per kilo.

SAGO.—Pearl in good demand at 20 to 26m. per 50 kilo.

SPICES.—Mace, 6.40 to 6.50m. per kilo.; Nutmegs, 6.40 to 7.00m. per kilo.; Cloves firm, 170.00 to 175m. per 50 kilo.; Pepper in moderate demand. Singapore, 110.00 to 111.00m. per 50 kilo.; Penang, 100.00 to 102 m. per 50 kilo.

EXCHANGE.—London, three months, 20.26 to 20.20m. per £.

Naval and Military.

Major W. H. Burton, of the Royal Engineers, who has, for the last six or seven years, been stationed at Yarmouth, in charge of the Isle of Wight district, is about to be removed to Hong Kong. Assistant-Controller C. R. Shervington and Assistant-Commissary T. J. Kernaghan, of the Control Department, have also been ordered to Hong Kong.

The sentence on Brevet-Colonel Burton, R.M.L.I., who was recently tried by Court-martial at Devonport, was promulgated Thursday at the Royal Marine Barracks, Stonehouse. It will be remembered that Colonel Burton was charged first with scandalous conduct, unbecoming an officer and a gentleman, in having made false statements reflecting on the character of Lieutenant-Colonel and Brevet-Colonel Richards, then commanding the battalion of Royal Marines in Japan, under whose orders he had recently been serving, to Lieutenant F. R. Beachy, R.M., in saying to him that Colonel Richards was a drunkard. The second charge was of scandalous conduct in having at Plymouth, between the 27th and the 30th of May, 1873, made false statements reflecting on the character of Colonel Richards to Colonel Wright, Colonel Forbes, Captain Cobb, and Captain M'Meehan, all of the Royal Marines, to the effect that Colonel Richards was given to intemperate habits, being commonly known at Yokohama as "the Drunken Colonel of Marines," and suffered from and had been treated for *delirium tremens*, although the medical officer who attended him returned him as ill from other causes. The third and fourth charges were to the effect that in having made these statements other than officially the prisoner had been guilty of conduct prejudicial to good order and military discipline. The Court found that Colonel Burton was not guilty of the first and second charges (those for scandalous conduct); that the statements made by the prisoner were false, but that the prisoner believed them, on reasonable grounds, to be true at the time of their utterance; and that the prisoner was guilty of the third and fourth charges. The sentence is that he is to lose four years' seniority as a captain.

The sentence of the Court, condemning Colonel Burton to lose four years' seniority as a captain, brings him from his position as one of the senior captains of the Royal Marine Light Infantry to the fifty-fourth place on the list of captains of his corps, and thus shutting him out from the hope of any further promotion, as by the terms of Mr. Childers's retirement scheme he would have to retire before he could ever reach the rank of a substantive lieut-colonel. Captain and Brevet Lieut-Colonel Cuthbert Ward Burton, who has been thus severely punished, entered the corps of Royal Marines as a second lieutenant in June, 1849, became captain December 26, 1861, brevet major June 10, 1862, and brevet lieut.-colonel January 2, 1873, obtaining brevet rank for distinguished service in the last war with China, when he was on several occasions markedly mentioned in despatches, receiving on one occasion the thanks of Her Majesty's Government and the Lords of the Admiralty. Hart's "Annual Army List" records the fact that Colonel Burton served as adjutant to the Battalion of Royal Marines in all the operations which commenced in 1856, with the actions in the Canton River, and the assault and capture of Canton, when he was mentioned in despatches, and ended with the breaking up of the battalion in September, 1858. On quitting the China station he received the thanks of the Commander-in-Chief for general services throughout the campaign.

The colonelcy of the 35th (Royal Sussex) Regiment is vacant by the death of General Simcoe Baynes, at his residence at Tarxien, in the island of Malta, on the 13th inst. The deceased, who was born in 1797, served originally in the Royal Navy for three years before entering the Army, and was present as a midshipman at the capture of Ischia, Zante, and Cephalonia, in 1809, and in the action of the Spartan frigate in the Bay of Naples in 1810, for which he received the naval war medal. He was appointed to an ensigncy in 1812.

Lieut.-Colonel William Tod Brown, C.B., Royal (late Bengal) Artillery, has been appointed Assistant-Adjutant-General of Royal Artillery at the Horse Guards, in succession to Colonel George Shaw, C.B. Colonel Brown's name will be remembered in connection with the Indian Mutiny, when "Tod Brown's" guns did such excellent work at Lucknow and Cawnpore, and earned their gallant commander the C.B., a Brevet Majority, and repeated mention in the despatches of Colin Campbell (Lord Clyde).

The command of the 28th Regiment is vacant by the retirement of Colonel Daniell on half-pay, after over thirty years' service. Colonel Daniell, who served on the Staff throughout the Crimean War, has commanded the 28th since November, 1866, and leaves the regiment to the regret of all ranks. The steps will be given regimentally.

It is now stated that Admiral Sir Thomas M. C. Symonds is to succeed Admiral Sir Henry Keppel, on the latter hauling down his flag at Devonport, on the 31st of October, and that Mr. George Love, at present Secretary to Rear-Admiral Sir Beauchamp Seymour, will act in that capacity to Sir Thomas Symonds.

Colonel R. G. A. Luard, of the 62nd Regiment, who has been appointed Assistant Adjutant and Quartermaster-General in the Northern District, served in China as brigade-major in 1857-58, and was the first to reach the top of the wall at the taking of Canton.

Lieutenant-Colonel Crossman, R.E., has been appointed Special Commissioner in Griqualand West. This officer's name will be familiar to residents in Shanghai and Yokohama.

Captain Anthony Hiley Hoskins, who has been appointed to be Commodore on the Australian station, commanded the gunboat Slaney in China in 1858.

The *Broad Arrow* contradicts a report that the Admiralty contemplate a survey of the Malay Peninsula.

Sub-Lieutenant John Casement has been appointed to the Ringdove, now on the China station.

The sloop Lily left Gibraltar on the 13th inst. for China.

KNATCHBULL-HUGESSEN—On the 29th Aug., in his 43rd year, of typhoid fever, at San Francisco, Richard Astley Knatchbull-Hugessen, son of the late Right Hon. Sir Edward Knatchbull, Bart., M.P., and late Captain in 57th Regiment.
TURNER—On the 23rd July, at Yokohama, Daniel Turner, late U.S. Consul for Hiogo and Osaka, formerly of Philadelphia, U.S.A.

Miscellaneous.

CHARGE OF DEFRAUDING THE DUTCH GOVERNMENT.—At the Southampton Police-court, on the 21st inst., Garnel Pascul Elbron and Paillard Edward, two Frenchmen, passengers on board the steamship *Hampton*, bound for Java, with Dutch troops, were charged, under the Extradition Treaty, with obtaining 300 guilders, value £25, by false pretences, with intent to defraud the Netherlands Government of the same. Mr. Vandenberg, the Dutch Consul at this port, prosecuted, and it appeared that the men had taken the money in the shape of bounty to proceed to Java, but that they now refused to proceed, the one alleging that he was the wrong man, and the other that he had not received a sou. The men strenuously refused to return on board the vessel, preferring to be sent back. Some difficulty arose as to the nature of the charge, and as to how it could be proved, and the case was adjourned for the production of some of the officers who were on board the same vessel. Two of these officers attended, but the difficulty was not lessened, and eventually the two sitting magistrates decided that the men should be set at liberty.

LOSS OF THE P. AND O. COMPANY'S STEAMER "SUNDA."—The P. and O. Company have received the following telegrams dated Shanghai, 5.30 P.M., 18th Sept., and Hong Kong, 4.55 P.M., 19th, to the following effect:—Shanghai.—The *Sunda*, while on her voyage from Hong Kong to Yokohama, struck upon a rock off Turnabout Island at noon on the 14th instant, and was beached. Mails, passengers, and crew have arrived here per *Geelong*; seven natives missing. The commander of the *Sunda* has gone to Foochow for assistance, the chief officer remaining by the ship. Hong Kong.—*Sunda* beached; Station Island. Only fore-compartment damaged. Main deck dries six feet at low water. *Bombay* proceeds to-morrow with divers and appliances for floating.

ADVICES have reached St. Petersburg that General Kaufmann had occupied Khokand on the 16th inst. without resistance, that all Russian prisoners had been set at liberty, and that the Khan has agreed to the full conditions of peace demanded by the General. It is stated that Khokand will be garrisoned by Russian troops, and that General Kaufmann is to receive a diamond-hilted sabre as a reward for the success of his campaign.

THE Postmaster-General, replying to a memorial from the East India Association advocating a reduction of the postal rates between Great Britain and the Colonies, states that, being aware of the importance of such reduction, it was now under consideration whether India should become a party to the General Postal Union.

COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street, and 25, Cockspur-street, Pall-mall.

German Steamship Company, Hamburg, Robertson and Co., agents, 5, Newman's-court, Cornhill.

* *Companies omitted in the above list will be included if the particular are forwarded.*

Monetary and Commercial.

It is with great regret that we announce the death of Mr William Robert Dalziel, who for many years was connected with the P. and O. Company's service in China and Japan, occupying, as his last post, the seat of general manager of the important branch at Yokohama. Mr. Dalziel in business matters was courteous and obliging, while in private life he won for himself many friends; and in the Far East his early death will be regretted as sincerely as among his friends at home.

An extraordinary general meeting of the Chartered Bank of India, Australia, and China will be held on the 20th proximo for the purpose of declaring an interim dividend.

Mr. E. Leutz has become a partner in the firm of Lafreutz and Co., of Cullum Street, which has increased its capital by the amount of £100,000.

The report and accounts of the Hong Kong and Shanghai Banking Corporation, will be found in our Advertising columns.

The twelfth report of the Directors of the Mauritius Land Credit and Agency Company (Limited) states that the net profit, after setting aside £1,500 on account of interest, suspense, and depreciation account, amounts to £7,414. After placing £1,000 to the reserve fund, a dividend is recommended of 3s. per share, making, with the 2s. paid in March last, 12½ per cent. for the past year, leaving £164 to be carried forward.

The directors of the Credit Foncier of Mauritius (Limited) have declared an interim dividend of 12s. 6d. per share, being at the rate of 12½ per cent. per annum for the half-year ending 30th June last.

The London Assurance Corporation will pay a dividend for the half-year ending Michaelmas, 1875, of 15s. per share, thus making the dividend for the year 1875 60s. per share, or at the rate of 24 per cent. per annum.

At a meeting of the board of the Anglo-American Telegraph Company, it was resolved to pay an interim dividend of £1 per cent. free of income-tax, for the quarter ending the 30th of Sept., payable on the 1st of Nov., leaving an estimated cash balance of £18,000 in addition to £25,000 placed to reserve. The last quarterly dividend was 1¼ per cent.

The liquidators of Overend, Gurney, and Co. (Limited) announce a seventh return of 10s. per share, payable on the 27th inst., on the shares held by contributories in the company who have paid all the calls thereon.

An extraordinary general meeting of Hooper's Telegraph Works (Limited) has been held, when, after a lengthened discussion, during which the defalcations of the late secretary were stated at £7,000, a committee of inspection, consisting of five shareholders, was appointed to confer with the directors into the position of the undertaking, and to report thereon to an adjourned meeting, to be held in a fortnight.

The Bankruptcy Court has appointed a receiver to the estate of Mr. Charles Carnie, East India and China merchant, of New Broad-street. The liabilities are estimated at £56,000.

The P. and O. steamer *Gwalior*, from China, has arrived at Southampton with £722,522, of which £472,928 is in sovereigns from Australia and Hong Kong, £186,802 in bar gold from Australia, £60,488 in foreign coin from Yokohama, Shanghai, &c., and £2,394 in bar silver from Australia. The greater part of the bar gold and foreign coin has been sold for the Continent, and the sovereigns have been taken to the Bank.

The amount of bullion per P. and O. steamer *Poonah* from Southampton on the 23rd inst. was:—In silver, to Penang, £25,300; to Singapore, £41,855; to Hong Kong, £23,021; total, £90,176.

Bar silver has been in good demand at 56¾d. per oz. standard, but the inquiry is now rather less active, and sales have been effected at 56 11-16d. per oz. standard. Mexican dollars show no change to report.

ARTICLES OF IMPORT.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—Our market remains steady with a moderate amount of business doing, prices for all the better kinds being well maintained, but in some instances the commoner kinds have gone rather easier. Large quantities of Green Teas from recent arrivals have been sold at public sale without reserve, prices ruling very irregularly and showing a considerable decline on the previous week's rates. The public sales have been rather larger, consisting of about 15,482 packages, the whole of which were sold without reserve. The Deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	2,121,522	2,091,992
Coastwise	845,022	866,735
Exports	814,663	811,461
	3,781,207	3,770,188

Congous.—Red-leaf kinds: Siftings have been firm at previous prices. Old season's common to fair kind show no change. Common to good common, of new import, have sold rather lower. Fair to good medium Kaisow and Saryune kinds have been saleable at former rates. Good to fine have been wanted from 1s. 6d. to 1s. 9d. per lb.; finest selling in small quantities without change in prices. Pak Lin kinds are wanted at 1s. 8d. to 1s. 9d. for good quality, the better kinds from 1s. 10d. to 2s. sell only slowly. Black-leaf kinds: Common to fair, of old import, have sold from 9¾d. to 11d. per lb. In new, siftings have sold at a decline of ½d. to 1d. per lb.; common to good common have sold from 10½d. to 11d. per lb. Fair to good medium remain firm at last week's prices, say 1s. 2d. to 1s. 5d. per lb.; good to fine are only in moderate demand, as also finest, but prices are well supported. In new-make kinds the sales made have been to a fair extent at about previous prices, the good kinds being in request at from 1s. 3d. to 1s. 4d. per lb. In Oolongs there is no improvement to notice; a few parcels at public sale went at rather lower prices. Souchongs remain without material alteration. *Scented Teas:* Canton Capers have been in fair demand; common chaffy-leaf has sold at 9d. per lb., common to fair 11½d. to 1s. 3d. per lb., fine 1s. 5d. to 1s. 8d., and finest 1s. 10d. to 2s. per lb. Orange Pekoes show no change, the demand being inactive. Foochow Capers remain as before. Orange Pekoes: Good kinds have been saleable from 1s. 6d. to 1s. 8d. per lb. Fine: A few have sold from 1s. 10d. to 2s. per lb. *Green Teas:* The market has been unsettled owing to the large quantity brought to auction, comprising nearly 11,000 packages, the whole of which were sold without reserve—consisting of Moyune, Ping Suey, and Japan kinds. The prices obtained were very irregular, but showing a considerable decline on those of the sale of the 10th inst.

Messrs. Goddard and Co.'s Circular says:—The market has been quiet, but very firm; there has been rather a scarcity of the useful grades of Congou, say from 1s. 2d. to 1s. 7d., and the advanced prices held for by importers have rather hindered business, the trade in the country being slow. The telegraphed export figures from China are now rather under last year, but supplies from India are in excess, making our total known quantity to be dealt with about the same as last year. Old Season's black and red leaf Congous are still offered at auction, and also privately at 10d. to 11d., showing that, although at the close of the season stocks were much reduced, they were still in excess of the requirements of the trade. Scented Teas are without change. Green Teas, of new import, have been offered largely at auction, and have sold irregularly and cheaper. Public Sales.—China Sorts: 16,099 packages "without reserve." More than half this quantity consisted of New Season's Green Teas, chiefly Ping Sueys, of which 8,138 boxes were sold at about fair value; No. 1 Gunpowder, 1s. 10½d. to 2s. 6½d. 1,800 half-chests Moyune sold without improvement, excepting Hysons, which were dearer. 2,400 packages Black leaf Congou (1,700 New Season's, 700 Old), obtained 10d. to 10¾d.; 1,600 Moning Siftings, 7d. to 8¼d., Deliveries from London, from 1st to 19th instant, inclusive, or seventeen days, 1875, 11,000,000 lbs., against seventeen days, 1874, 11,131,887 lbs. Imports, Deliveries, and Stocks in London, from 1st January to 31st August :—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
86,886,033	116,404,130	109,629,939	117,850,335	66,558,440	76,968,040

SILK.

A steady although not a large business in China Silk has been the feature of the past week, and prices of the lower and medium classes of Tsatlees show an improvement on last quotations. Best Kahings are also taken at rather stiffer rates. Importers are very firm holders. Deliveries are good, being from 1st to 23rd inst.:—China 2,481, Canton 400, Japan 370, Bengal 174; total, 3,425 bales.

COFFEE.—Smaller supplies of Plantation Ceylon, with an improved demand, caused prices to advance early in the week, the decline noted in our last report being almost entirely recovered. The result of the Dutch sales was favourable, and fully supported the advance in this market. During the past two days, however, the supply has again been large, and with exceptionally heavy quantities advertised for to-day, the demand has been slow, and prices in most instances have declined 1s. per cwt. Current quotations are:—Triage and ordinary 90s. to 101s., gray to fine small 104s. to 111s. 6d., fine ordinary to fine fine ordinary 109s. 6d. to 112s., low middling 112s. to 113s. 6d., middling coloury 114s. to 115s. 6d., good middling to fine middling 116s. to 117s. 6d., good to fine bold 118s. to 120s., pea-berry 128s. to 131s. The Dutch Trading Company's public sales of 97,486 bags Java, &c., held on the 22nd inst., went off with spirit, and good ordinary Java sold at 1 to 1¼ cent above the valuations at 60¾ to 61 cents, against 60¼ cents at the August sales.

COIR GOODS.—At the weekly auctions there was a better demand for Yarn, and nearly the whole supply was disposed of at full rates. Fibre met a strong demand at an advance of £1 per ton. Rope continued dull of sale.

CANTHARIDES.—China has been sold at 3s. 6d. to 3s. 7d. per lb.

COCOA-NUT OIL has been steady, Cochin at £41 to £42, Ceylon at £38 to £38 5s. per ton.

CAMPHOR.—Small sales of China have been made during the week at 70s. per cwt. landing weights.

CHINA MATTING.—At public sale 998 rolls China, ex Galatea, from Canton, were all sold, fancy size 4/4 and 5/4 at 29s. to 31s. 6d., chiefly red check 6/4 to 4/4 at 23s. 6d. for common to 36s. for fine, white 4/4 to 6/4 at 21s. to 30s. per roll.

GALLS.—105 cases China were offered by auction and bought in at 72s. 6d. per cwt.

GAMBIER has been in good demand on the spot at 29s. per cwt.

GUM BENJAMIN.—In public sale 3 cases Siam, medium and small almond, partly in block, bought in at £16. Of 10 cases good brown Sumatra thirds 6 cases sold at £5; 6 cases rather dark seconds sold at £8 5s.; 5 cases were withdrawn.

HEMP.—No business done in Manila.

HIDES.—There was a fair demand for East India kinds at the public sales Thursday, and of the moderate quantity offered nearly three-fourths were sold. Prices on the average are without quotable alteration, and a few Singapore Ox and Cow were sold at late rates. Singapore Buffalo sold slightly in buyer's favour. Of 6,407 Singapore Buffalo offered, 3,950 sold; slaughtered, inferior, 1st heavy, average 34⅞ lb. 5¾d.; 2nd heavy, average 33¾ lb. 5¼d.; fair ordinary, 1st heavy, average 28¾ to 32¾ lb. 5¼d.; 2nd heavy, average 30½ to 31 lb. 4⅞d. to 5d.; 1st light, average 13¾ lb. 6d.; light, unassorted, average 12 to 14½ lb. 5¼d. to 5⅝d.; thirds 4d. per lb. Of 4,722 Batavia 1,554 sold; shaved, light, average 11½ to 12½ lb. 8d. to 8¼d.; unshaved, ordinary, 1st heavy, average 24⅛ lb. 6¼d.; 1st light, average 12¼ lb. 6½d.; seconds 5½d. per lb.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £32. To Shanghai: £30. To Hong Kong: £26. To Singapore: £20. To Penang: £23, f.c. To Colombo: £23. To Galle: £23. To Batavia and Sourabaya: 23s.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 32s. 6d. To Shanghai: 30s. To Hong Kong: 27s. To Manila: 24s. To Singapore: 18s. To Colombo: 21s. To Galle: 20s. To Batavia and Sourabaya: 23s.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

Advices from Hong Kong, Sept. 21, report that a fire broke out on board the Pilgrim, from Shields (coal), but was extinguished with little damage to ship or cargo.

The Golden City, at Batavia, Sept. —, reports master (Owen) died at sea, and was buried at Anjer. Three of the crew were also drowned during bad weather.

The Amity, barque, from Ilo Ilo for the Channel (sugar), stranded on Bawean Island, Java Sea, previous to Sept. 20, and will become a total wreck; crew saved.

MISCELLANEOUS.

GIBRALTAR.—Sept. 19, passed, Oxfordshire (str.), from Amoy for New York.

PORT SAID.—Sept. 22, arrived, from Liverpool for Shanghai, Antenor.

ADEN.—Arrived, Sept. 21, Lord of the Isles (str.), from Shanghai, and left for London; 18, J. B. Walker (str.), from Batavia for Nieuwe Diep.

GALLE.—Sept. 17, arrived, Tom Morton (str.); 20, Crocus (str.), both from Foochow, and proceeded for London.

HONG KONG.—The steamer Glenlyon, having docked to receive a new crank shaft, left on the 22nd Sept. for Shanghai.

PORT ELIZABETH.—Aug. 21: The Tecumseh, from Singapore to Liverpool, which put into Port Alfred on the 3rd inst., with loss of rudder, and was towed round to this port, has been surveyed, and found that the lower rudder gudgeons have been carried away. It will be impossible to replace them here, but the rudder will be temporarily fastened in such a manner as to enable the vessel to reach her destination. The cargo aft is being discharged for that purpose.

LAUNCHES.

There was launched on the 18th inst. from the shipbuilding yard of Messrs. Russell and Co. a fine iron steamer of 600 tons, and of the following dimensions:—Length, 175 feet; breadth, 25 feet; depth, 18 feet 6 inches. She has been built to the order of Pile and Co., London, for the China trade, and will be engined by Kincaid, Donald, and Co., Greenock.

On the 18th inst. there was launched from the building-yard of Messrs. Caird and Co., Greenock, an iron screw steamer for the Javanese and Sumatran coasting trade, for the Netherlands India Steam Navigation Company of Batavia, of the following dimensions:—Length, 255 feet 8 inches; breadth of beam, 31 feet 6 inches; depth of hold, 17 feet 3 inches; ditto to awning deck, 25 feet 11 inches; 1,249 tons; builders' number, 198; two engines, of 220-horse power nominal. Commander, Captain Lindemann, under whose superintendence the vessel was built. She was named the Gouverneur-General Loudon by Miss Turner, of Gareloch.

AT Lloyd's no fresh insurances can now be effected on the steamer Coromandel, which left Bombay for this country on the 30th June. A premium of 80 guineas has been paid on the Strathnaver, which has been out 144 days from Sydney for London; and 10 guineas on the Strathmore, which left London for Otago on the 17th April, and has not been heard of since the 21st May, when she was spoken with.

IT is stated that the Pacific Mail Steamship Company's steamer City of Peking, on her arrival at San Francisco, on her last voyage from China, was found to be in a defective condition, so much so as to be unseaworthy. It will cost the company at least $125,000 to repair her.

THE P. and O. steamer Poonah, which left Southampton Thursday with the heavy portion of the next outward Mail, has been fitted with new engines and boilers, and has been lengthened eighty feet. Originally a vessel of some 2,000 tons burden, it was determined to increase her carrying capacity by one-third, and at once to secure her maintenance of speed and to increase economy in the consumption of fuel—a great matter in these days of keen competition and lowered freights—by fitting her with new engines and boilers of the most approved modern construction. The task of lengthening the ship was entrusted to Mr. James Lang, of Sunderland, and new compound engines of 550-horse power nominal were supplied by Messrs. Hawthorn and Co., of Newcastle-on-Tyne. The ship has been overhauled, strengthened, and redecorated throughout, so that she is now one of the finest, most commodious, and most beautiful vessels in the Company's fleet. The Poonah has now state-room accommodation for over 200 first class, and 50 second class passengers, and in her spacious saloon 160 persons can dine at one time.

HONG KONG AND SHANGHAI BANKING CORPORATION.

The following is the TWENTIETH REPORT of the Court of Directors to the Ordinary HALF-YEARLY GENERAL MEETING of SHAREHOLDERS, held at the CITY HALL, HONG KONG, on WEDNESDAY, the 18th August, 1875.

To the Proprietors of the HONG KONG AND SHANGHAI BANKING CORPORATION,

Gentlemen,—The Directors have now to submit to you a General Statement of the affairs of the Corporation, and Balance Sheet for the half-year ending 30th June last.

The net profits for that period, including $3,059.44 brought forward from last account, after paying all charges and deducting interest paid and due, amount to $263,127.50, of which, after taking out Rebate on Bills not yet due, there remains a balance of $260,023.42.

The Directors have taken $153,997.42 from this sum, and placed the amount to Contingent Account, to provide for known and probable losses, and they recommend that the balance of $106,026 be carried forward to the credit of New Account.

The Directors regard the half year's profit as satisfactory, but they regret that they again feel unable to recommend the payment of any dividend, as, in view of Mr. McLean's Report (though they have since become possessed of information which authorises them to take a much more hopeful view of the position of the "doubtful accounts" than he held), they deem it advantageous, in the permanent interest of the shareholders, to retain the whole balance of profit until the end of the year.

During the past half-year and more especially recently, many large and important failures connected with Eastern trade have taken place, and, although fortunately the Bank has had to provide an unimportant amount for anticipated losses on such accounts, they have naturally been the subject of considerable anxiety to the Directors. There seems, however, every reason to suppose that the worst is past, and there are signs that the depression to which trade has been so long subject is being gradually removed.

LOCAL COMMITTEE IN LONDON.

The Directors have not yet definitely appointed the London Committee, but considerable progress has been made, and they new expect shortly to complete the appointments.

INSPECTOR'S REPORT.

Mr. David McLean has duly inspected the Head Office and Branches, and his report to the Directors, dated 10th May, is to the following effect, viz :—

He estimates losses at $116,888.68, and recommends that they be written off at 30th June, although, he says, possibly a portion may be recovered. He adds: "Taking the doubtful accounts as eventually turning out *all* bad, I estimate the (further) total losses to be, at the outside, $340,000." He considers the current business of the Bank as being on a much safer basis than in former years, and continues :—"I feel certain you will not be called upon to provide more than the amounts mentioned above." He expresses his entire confidence in the management of the Bank at the Head Office and Branches. He considers it extremely difficult to reduce "Charges Account" very much without impairing efficiency, but feels confident that where it can, it will be done.

The Directors, acting on Mr. McLean's Report, have written off the above sum of $153,997.42, which includes the $116,888.68 estimated by him as lost (less certain portions of it which have been recovered), $41,000 included in his estimate of "doubtful accounts" (since ascertained to be bad), and all probable losses by recent failures. Several amounts estimated by Mr. McLean as probably lost have since been recovered, and the position of the "doubtful accounts" has improved so much since his Report was handed to the Directors, that of the remaining $299,000 they have every reason to anticipate that a considerable sum, probably as much as one-half, will turn out good. They expected to know definitely the position of these accounts by the end of the current half-year.

MARINE INSURANCE ACCOUNT.

The balance of this account now amounts to $43,534,34 ; no losses have been sustained during the half-year.

DIRECTORS.

Mr. Albert F. Heard, the Deputy Chairman, ceased to be a Director on the suspension of his firm, and Mr. H. Nicaise was appointed in his stead. Mr. Nicaise has since resigned under instructions from home, and Mr. Alexander MacIver has been appointed to supply the vacancy.

Mr. William H. Forbes has been selected Deputy Chairman

AUDITORS.

Mr. F. W. Mitchell resigned his appointment as Auditor on leaving the Colony, and Mr. H. B. Gibb has been appointed in his stead.

ADOLF ANDRE, Chairman.

Hong Kong, 11th August, 1875.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,
48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Makers of Epps's Glycerine Jujubes (throat irritation).

TO PARENTS AND GUARDIANS.

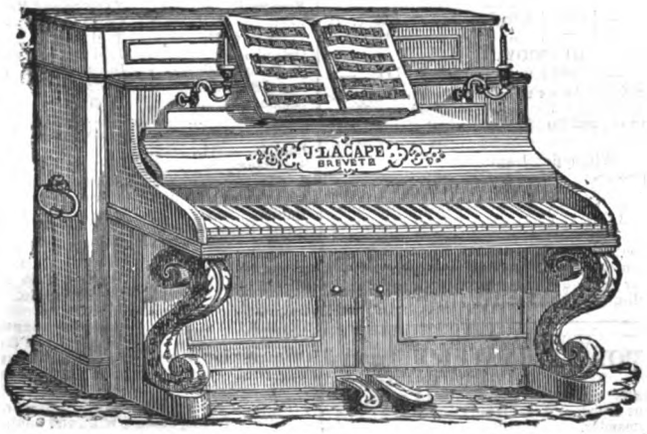
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

FLETCHER and Co., Liverpool; or to SMITH and Co., Rotterdam; also at the Offices of the Messageries Maritimes in Paris, Lyons, Bordeaux, and Marseilles.

*** Passengers eastward of Suez securing their Berths in London are entitled to the conveyance of their luggage free to Marseilles.

GLEN LINE OF INDIA,

CHINA, AND JAPAN STEAMSHIPS.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on their advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Glengyle	100 A1	1,676	200	Oct. 15
Glenroy	100 A1	2,121	250	To follow
Glenlyon	100 A1	2,119	275	To follow
Glenartney	100 A1	2,016	330	To follow
Glenearn	100 A1	2,120	330	To follow
Glenfalloch	100 A1	2,126	275	To follow
Glenfinlas	100 A1	2,120	330	To follow
Gleneagles	100 A1	2,120	300	New boat

For terms of Freight and Passage apply to McGREGOR, Gow, and Co., No. 1, East India-avenue, London.

GELLATLY, HANKEY,

SEWELL, and CO., will despatch the following high classed SCREW STEAMSHIPS as under:—

Ports	Ship.	Class.	Tns.	Dock.	Sailing.
Pen., Sing., Hg. K., and Japan	Bengal... — Genoa ...	— — 100 A1	2026 1900	V.L.D. V.L.D.	Oct. 10 Oct. 25

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W., and 109, Leadenhall-street, London, E.C.

SHORT SEA ROUTE to

AUSTRALIA, for First-class passengers only, via Marseilles and Singapore, by STEAMERS of the EASTERN and AUSTRALIAN MAIL STEAM COMPANY (Limited), under Postal Contract with the Queensland Government, leaving every four weeks.

Offices, No. 34, Leadenhall-street, London, E.C.

SHAW, WILLIAMS, and CO

will despatch the following high clas vessels as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Hong Kong	Carricks ...	A1 14 yr.	—	—	With des
Hong Kong	Belted Will	A1 15 yr.	812	S.W.I.	With des

For Freight or Passage apply to SHAW, WILLIAMS, and Co., 9, Fenchurch-street, E.C.

FOR CHINA AND

JAPAN.—The following splendid first-class STEAMERS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Pen., Sing., Hg. Kg., Yoko., & Hiogo	Montgomeryshire, s.s. ...	100 A1	S.W.I.D.	Sept. 30
Do. ...	Burmese, s.s.	100 A1	S.W.I.D.	Oct. 23

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate street Within, E.C.

Steam via the Suez Canal.

TO PENANG, SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO, taking cargo for

transhipment to Java, Australia, &c., at through rates at shippers' risk, last shipping day 30th Sept.; the favourite full-powered screw steamer MONTGOMERYSHIRE, 100 A1, 1,751 tons gross, 1,146 tons net register, 200-horse power nominal; GEORGE BUTLIN, Commander; South West India Dock. This magnificent steamer, built on the Clyde in 1873, has proved herself well adapted for the China trade. She has elegant and spacious accommodation for saloon passengers replete with every comfort.

For Freight or Passage apply to the Owners, D. J. JENKINS and Co., 17, Lime-street, E.C.; or to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

Steam via the Suez Canal, to follow the s.s. VENICE.

FOR YOKOHAMA and

HIOGO calling at PENANG, SINGAPORE, and HONG KONG, the splendid screw steamship, BENGAL, 1,303 tons register, 2,036 tons gross register, 275 h. p. nominal, 1,375 h. p. nominal, 1,375 h. p. effective; A. DOUGLAS, Commander; Victoria Docks. This fine steamer has just discharged a cargo of new season's teas from Hankow insplendid order, making one of the fastest passages of the season.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W.; and 109, Leadenhall-street, London. E.C.

CASTLE LINE of

STEAM PACKETS from LONDON (via the Suez Canal) for SINGAPORE HONG KONG, and SHANGHAI, and taking goods at through rates for Java, Japan, and Eastern Australian Ports, last shipping day 4th Oct., the magnificent Clyde-built steamship CAWDOR CASTLE, 2,173 tons 100 A1, 300-h.p. nominal, J. GREIG, Commander, to load in the South West India Docks. The attention of shippers is directed to this splendid steamer.

For Freight apply to THOMAS SKINNER and Co., 5, East India-avenue, Leadenhall-street, E.C.

FOR Tanjong Pagar, SINGA-

PORE.—The following VESSELS are now on the berth in LONDON.

	Tons.	Brokers.	To Sail.
Cawdor Castle, s.s. ...	2,173	Thos. Skinner & Co.	Oct. 4
Galatea, s.s.	1,290	Robertson & Co	Oct. 30
Montgomeryshire, s.s.	1,751	Norris & Joyner ...	Oct. 30
LIVERPOOL.			
Glaucus, s.s. ...	1,604	Alfred Holt ...	Sept. 27
Anchises, s.s. ...	—	„ „ ...	Oct. 7
GLASGOW.			
Ione	520	T. Skinner & Co.	Oct. —

Scale of wharf and dock charges may be had on application to the Company's London Agents, Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall-street, E.C.

With quick despatch.

FOR YOKOHAMA and

HIOGO, the well-known China clipper BANDA, A1 13 years 481 tons register; —— Commander; West India Docks. This fine vessel is confidently recommended to shippers, and has excellent accommodation for passengers.

For Freight or Passage apply to J. D. WILLIS and Co., 115, Leadenhall-street, London, E.C.

With despatch.

FOR YOKOHAMA AND

HIOGO DIRECT, the favourite China clipper TAMESA, A1 16 years, 713 tons register, South West India Docks; F. J. GREEN, Commander.

For Freight or Passage apply to JOHN WILLIAMSON York Chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, E.C.

OUR DIFFICULTY WITH CHINA.

WITHIN the past few days two telegrams have been received from Shanghai, one through Reuter's Agency, and another from *The Times'* Correspondent at Shanghai. The two telegrams agree in the ominous fact of Mr. WADE having sent a final message to the Chinese Government, intimating that unless his demands are complied with by a certain day he will leave Peking. The only difference relates to the date thus fixed. According to *The Times'* Correspondent the 13th of October was the day named, whereas according to Reuter's telegram Mr. WADE would leave unless his demands were complied with by the 30th September.

* By Pacific mail *via* San Francisco.

THE MAILS, &c.

The French mail, bringing the above advices from China and the Straits Settlements, was delivered, *via* Marseilles, on the 29th ult., being five days in advance of its due date. The Pacific mail, with the Japan advices also, reached London, *via* San Francisco, on the 29th ult. The next inward (P. and O.) mail, with a week's later advices, viz., Yokohama 18th, Shanghai 22nd, Hong Kong 28th Aug., Singapore 5th Sept., is due on Monday next, the 11th inst.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Peiho*, arrived Sept. 27.—From Yokohama: Mr. Aspinall, Mr. Benjamin. From Shanghai: None. From Hong Kong: Mr. Adams, Mr. Wilgard, Mr. Charles, Miss Algar. From Batavia: Mr. Van Hemert, Mr. Van Baltzingalowen, Mr. De Lavalette, Mr. Kempe. From Singapore: Messrs. Patacos, Kallssen, Jalagar, Barnett. From Galle: Mr. Mercer, Mr. Hairland, Mrs. Porquier.

PASSENGERS OUTWARD.

Per P. and O. steamer *Baroda*, from Venice, Oct. 1.—To Batavia: Capt. Eno.

Per P. and O. steamer *Baroda*, from Brindisi, Oct. 4.—To Singapore: Miss M. H. Jones. To Penang: Mr. A. Man. To Ceylon: Mr. J. L. Sim.

Per P. and O. steamer *Hydaspes*, from Southampton, Oct. 7.—To Yokohama: Mrs. Goodall. To Shanghai: Mrs. Clark, Rev. J. Hoare. To Hong Kong: Sub. Lieut. H. C. Savage, Com. H. Salmond, Mr. F. H. Chapman, Major and Mrs. W. H. Burton. To Singapore: Mr. and Mrs. Griffin. To Penang: Mr. J. Wilson. To Ceylon: Mr. A. M. White, Mrs. Skinner, Mr. F. D. Watson, Mr. E. B. S. Mercer. To Galle: Mr. W. Scott.

Per P. and O. steamer *Malta*, from Venice, Oct. 15.—To Yokohama: Mr. H. O. de la Camp.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 18.—To Ceylon: Mr. F. H. Izard.

Per P. and O. steamer *Gwalior*, from Southampton, Oct. 19.—To Yokohama (*via* Bombay): Capt. Saunders, Marquis of Kildare.

Per P. and O. steamer *Pekin*, from Southampton, Oct. 21.—To Yokohama: Rev. and Mrs. J. Bates. To Hong Kong: Mrs. P. B. C. Ayers. To Ceylon: Mr. C. W. Jebb, Miss Jebb, Mr. C. H. Cameron, Mr. and Mrs. H. H. Cameron, Miss M. Cloystown Miss E. O. Wignon, Mr. R. S. Fraser.

Per French steamer *Irawaddy*, from Marseilles, Oct. 10.—To Shanghai: Mr. R. H. Artindale, Mr. Edward Meyer. To Hong Kong: Mr. Ross. To Batavia: Mr. Sentius. To Singapore: Mr. and Mrs. Goldie, Miss Spooner, Mrs. K. B. Spooner, Mr. C. W. Groskamps, Mr. A. van Delden. To Galle: Rev. W. F. Kelly, Mr. R. G. Corbet, Mr. G. Harper, Mr. Bremer.

Per French steamer *Sindh*, from Marseilles, Oct. 24.—To Yokohama: Mrs. Watanabe, Mrs. Nakasima. To Shanghai: Mr. Laing. To Hong Kong: Sir Arthur and Miss Kennedy, Mr. O'Callaghan, Mr. and Mrs. Coxon. To Batavia: Mr. and Mrs. Greig. To Singapore: Mr. W. H. Read. To Galle: Mr. E. Vex, Mr. Pauncefote.

Per French steamer *Meikong*, from Marseilles, Nov. 7.—To Shanghai: Mr. Bavier, Mr. Choppard, Mr. H. Relph. To Singapore: Mrs. Harvey, Capt. and Mrs. Ross, Mr. John Ross, Mr. and Mrs. Adamson and child, Miss MacNair.

Per French steamer *Amazone*, from Marseilles, Nov. 21.—To Galle: Mr. and Mrs. J. F. Dickson.

Per steamer *Glaucus* (Holt's line), from Liverpool, Sept. 28.—To Hong Kong: Mr. Smith. To Shanghai: Miss Radcliffe.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present French mail brings advices from this port to the 11th August, and by the Pacific mail we have news to the 24th August; the French mail from London, July 2, arrived out on the 17th August, and the following P. and O. mail of July 9 was received on the 22nd August. The *Japan Herald* supplies the following items of news:—

In Japanese political affairs but little has transpired. The attention of the newspapers is still directed to the Press Laws. Several additional prosecutions have been commenced, but in two cases the accused have been acquitted. In others, sentence has been pronounced upon the offenders, and these warnings are having such effect, that already one editor has publicly stated that not liking either fine or imprisonment, he has resigned his position.

A supposed breach of Treaty rights has again occurred. The Hon. W. A. Richardson (late Secretary of the United States Treasury), and Captain Lewis (senior officer of the Asiatic squadron), whilst making an excursion to Hachoji, a town regarded as within the Treaty limits, were arrested by the Japanese police, kept under surveillance, returned to Yokohama under the escort of a policeman, and retained in custody here until security was given for their reappearance. The affair is now under investigation, and we hope that the United States Minister will exert himself to have justice done to his countrymen. In so doing we are sure that he will be supported by all the other Ministers, for an attack of this sort is not one simply on American citizens, but it is directed against the rights of all.

The Japanese Government is continually on the watch, through the police detectives and spies, for opium smokers. It is well known to many that opium smoking is extensively carried on here secretly by the Chinese, and in many cases by the Japanese employed by them, notwithstanding the severity with which the law deals with this offence. Constable Mansbridge, whilst out with a body of the native police to see that they did not enter the houses of Europeans whilst engaged in their search for un-

Digitized by Google

licensed public women, thought that he smelt opium coming out of a Chinese den; he quickly forced the door, and found two Celestials stretched at full length and inhaling the smoke of the noxious drug. One of them rose to a sitting position, and drew a Japanese sword about two feet long, with which he aimed a a blow at the constable; but his aim was unsteady, as he was quite under the influence of the drug, and the blow only cut through the trousers of the constable, who immediately struck the fellow down with his staff. Both men were caught, and are now in prison awaiting trial.

A serious affray, between some men-of-war's men and the Japanese police, occurred in Takashimacho on the 15th Aug. It appears that the men were drinking in a house, when a fight arose, and on the police being called, and attempting to arrest them, three men of the Italian corvette, *Vettor Pisani*, drew knives, cutting and stabbing the officers with them. The police used their clubs very freely, the men's heads and faces being badly cut and bruised. Ultimately the sailors were handcuffed and taken to the Police-station.

It will be remembered that some few months ago the Japanese despatched a mission to Siam, with a view of making inquiries as to the commerce and resources of that country, and as to the desirability of concluding a treaty with it. We now hear that the Government has, after consideration of the report, arrived at the conclusion that there is no likelihood of there ever being sufficient trade between the two countries to render it necessary to enter into a treaty with Siam.

The Commission for the cession of Saghalien will leave in a day or two for that island. It is reported in one of the native papers that the 800 Ainos who constitute the Japanese population of the island wish to remain under Japanese Government, and that they will probably be transferred to Yesso.

The annual report of the Japanese Postmaster-General has been issued. From a financial point of view, this department is not a success, as the receipts for the year amounted to $352,000, whilst the expenditures reach $502,000. A still larger deficiency is expected next year.

Some astonishment has been caused here by the *New York Tribune* stating the number of Protestant missionaries in Japan at seventy, and the converts at 200,000. Attention has been called to this, and Dr. Hepburn, one of our oldest and most respected missionaries, has stated, in reply, the number of Protestant missionaries at sixty-five, and the baptised native church members at 550, a very different total from that given by the *Tribune*.

The monument sent out by the Messageries Maritimes, in memory of the sufferers in the *Nil* disaster, has been fixed in its place near Cape Idsu. The stone is pyramidal in shape, and bears on one of its faces a marble tablet, on which are engraved the names of those who perished on that occasion.

It is reported that the Japanese are going to do away with one of the worst blots in their criminal procedure, and, for about the fifteenth time, it is announced that torture is about to be abolished.

Attention has been called here to the immense extent to which the forging of trade marks is carried on by the Japanese.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

On the 31st July H.B.M.'s gunboat *Mosquito* arrived from Chefoo, conveying Mr. Mayers, Chinese Secretary to the British Legation at Peking; and on the following day His Excellency Mr. Wade, accompanied by Mr. Grosvenor, reached here per steamer *Chihli*. The arrival of these dignitaries has created a good deal of excitement in official and private circles. Various rumours are afloat respecting Mr. Wade's intended movements. How much is true, and how much fiction, no living man seems to know but Mr. Wade himself, and he does not appear to be willing to tell. It is positively certain that he will remain in Tientsin for some days yet. The arrival of the British Admiral from Japan is expected in a fortnight.

Mr. Wade visited the yamen of the Governor-General at Tientsin on the 3rd Aug., at ten o'clock A.M.; but it has just come out that the long confidential conference which was reported to have followed was summarily postponed by an unhappy circumstance, which it is now my business to relate. Every resident in China is familiar with the peculiar way Chinese officials have of receiving foreigners, by keeping them in waiting for an indefinite time in front of the great central door of the yamen, before permitting them to come into their presence in the Hall of Audience. Of all the numberless devices to which the cunning mandarins have resorted to gratify their ancient pride there is not a happier one than this. The very idea of keeping an official—especially if he is a "Barbarian" as well—waiting before the yamen door, is pleasing beyond degree. And like all other earthly pleasures, the longer it can be spun out the better it is. It is hardly to be expected that Li Hung-Chang despises these vanities. Indeed it is said of him that he is exceedingly partial to these sweets—that the attentions of Foreign Ministers and other high dignitaries are his great delight, and that nothing cuts him so deeply as to be passed by unnoticed. Chinese officials, by long experience and shrewd observation, have learned just about what length of time a Foreign Minister will *wait* for an interview, and they generally give the full measure of it. But once in a while they make a mistake and overdo the thing; and that is exactly what Li did with Mr. Wade. It appears that the Minister, accompanied by Mr. Mayers, left the British Concession in their chairs, and in due time they appeared before the Viceroy's door. The visit had been arranged the day before, and a messenger had gone a-head to notify their coming, as is usual in such cases. When they reached the Viceroy's Yamên, they found the great door shut. How long the party waited in that hot broiling sun, no one seems to know; quite long enough, it seems, to wear out Mr. Wade's patience. Without further ado, therefore, he turned himself about, and leaving a verbal message that he had made his visit, proceeded homeward straitway. He had not gone far, however, when he was overtaken by the Viceroy's runners, who begged him to return. "I have made my visit, and now I am going home; give my compliments to the Viceroy, and tell him I am sorry he could not see me when I called upon him," said Mr. Wade, as he passed on.

The consternation which the incident caused amongst the inmates of the yamen, including the Viceroy himself, can be better imagined than described; there was gnashing of teeth and general confusion. Some explanation was necessary on the part of the Viceroy. With the single exception of the case of Sir Rutherford Alcock, with the Viceroy at Nanking, a similar case has never before happened in the intercourse between Foreign Ministers and high Chinese officials. In this instance, too, there was no plausible excuse for Li; he knew the day before that Mr. Wade was coming; the hour of the conference had been fixed. What excuse could he make for thus detaining Her Majesty's Minister at his very door? It is to be hoped that his apology,—which I am assured he did make,—was sufficient. The unfortunate *weiyuens* whose business it is to record visits and attend the opening of this great central doorway of the Viceroy's yamen, have been made the victims; they have been degraded and dismissed from their office, for *not announcing* Mr. Wade's visit. A poor excuse is better than none. The Viceroy has done the best thing possible under the circumstances; but it must be confessed that, after all, there is little to be said for him. Mr. Wade's action appears to have been most dignified and becoming, and he deserves well for his praiseworthy conduct in this matter. Let up hope that the lesson which he has thus taught the Viceroy will have a wholesome effect.

The weather for the last seven days has been intolerably hot—the thermometer rising by day from 98° to 104°, and at night not going below 86° to 92°. Many deaths have occurred among the Chinese, and the European community is greatly exhausted by this unparalleled continuance of extreme heat.

The ratifications of the Treaty between China and Peru were exchanged on the 7th August in Tientsin, between their Excellencies J. Fedrico Elmore, Peruvian Minister, and Ting, late Footai of Kiangsu.

A member of the British Legation arrived in Tientsin on the 7th August, and it is reported that Mr. Mayers is to leave for Peking on the 9th.

A Chinese gunboat has arrived from Newchwang, with rebel (? banditti) prisoners on board, said to have been sent across for execution.

The marine who lately liberated four prisoners from the *Dwarf*, and escaped with them, and who was missing when they were recaptured, has since been taken near Taku, and has been returned to his vessel. All of the six deserters have now been secured.

SHANGHAI.

The present mail brings advices from this port to the 15th August; the French mail from London July 2 was received on the 14th August. The following summary of news is from the *North China Herald*:—

It is with very deep regret that we have to record the sudden death of Mr. J. A. T. Meadows. Mr. Meadows was an old resident in China, and was well-known to all the older foreign residents in Shanghai and Tientsin. He commenced his career in the British Consular Service, and was at one time H.M. Vice-Consul in Shanghai. He resigned this appointment in order to start in business as a merchant at Tientsin, directly after the opening of the port; and there he has since permanently resided. As Consular representative of more than one nationality, as Steward of the Race Club, as a member of the Municipal Council he has always taken an active share in current events, and it is suggested that the work and worry he has lately had as interpreter to the Peruvian Legation—coincidently with the great prevalent heat—may have had to do with his sudden illness and death. As a correspondent of the *North China Herald*, he has been long well-known to our readers. His letters were verbose, and sometimes rugged in style, but betrayed a knowledge of China and the Chinese, and of current Chinese politics, greater than most foreigners possess. It is a testimony to the respect in

Digitized by Google

which he was held, that H.E. Mr. Wade, H.E. Dr. Elmore, Messrs. Mayers, Mongan, Bismark, Waebar, Sheppard, Dillon, Benavides—in fact all the foreign officials in Tientsin, and nearly all the foreign residents—followed him to the grave. Sailors from H.M.S. *Dwarf* carried the body, and the funeral service was read by the Rev. J. Innocent.

In regard to the passage of Chinese soldiers through the Settlement, the Senior Consul has informed the Municipal Council that the Taoutai has voluntarily expressed regret that the peace of the Settlements was disturbed, and promised to take steps to prevent a similar occurrence in future. The French Consul have asked the Consul-General to take steps to prevent the passage of Chinese troops through the Foreign Settlements, and have been informed that the Taoutai has given orders that the troops shall in future be transported by water to the Tongka-doo suburb.

It will be remembered that, about a month ago, the native doorkeeper of one of the London Mission Chapels inside the City, was murdered, and that another man, much younger, was found badly wounded, lying near him. This man was taken to the Chinese Hospital in the Shantung-road, where, under the care of Dr. Johnston, who undertook the case, he recovered so fast as soon to be considered out of danger. His story was that the doorkeeper was murdered, and himself wounded while defending him, by a third person, still undiscovered. It is said that the people employed by the Chehsien to watch him in the hospital, were in the habit of talking to him about the murder, and telling him that as soon as he got well he would be taken before the Taoutai and his head cut off. This always seemed to excite and alarm him, and seizing a favourable opportunity while his guards were asleep, he made his escape from the hospital, and has not been retaken. This escape, coupled with that of the City prison, places the Chehsien in an awkward position personally, as Chinese law holds magistrates responsible for the safety of their prisoners. Although the strictest search has been made by the Municipal Police and the Chehsien's officials, throughout both the Settlement and City, no trace of either of the culprits has been detected.

Some excitement was occasioned among the Chinese residents at the lower end of the Canton-road on the 9th August, consequent on the sudden death of a youth, the second son of a blacksmith living in that neighbourhood. It appeared that the deceased had as isted his father as hammerman until recently, when he began to suffer from weakness of the right arm, and could no longer pursue his calling. A native doctor was called in, who, in accordance with the usual Chinese custom, engaged to cure the sufferer for a certain sum, payable on his recovery. The *douceur* in his instance was $14, and for a day or two the patient seemed to be progressing towards recovery. Subsequently, however, unfavourable symptoms set in, and the patient died. The workshop is very small, and for want of better accommodation the corpse was laid upon a sort of bench, amid the ironwork, not far from the forge. The relatives, believing deceased had not had fair play, sent for the tepaou of the district, and, in order to secure the doctor until his arrival, fastened him with a chain round his ankle to the leg of the bench on which the corpse was lying. Gradually the news spread that the doctor was chained up because he had killed the youth, and the house soon became surrounded; and when the matter was reported at the Central Police Station and Inspector Fowler hastened to the place the stench was dreadful. The unhappy doctor was at once released from the chain and conducted to the police station. While all this was transacting, the bereft father and the tepaou had gone to a teashop to talk the matter over, and there the two contrived to settle it in true Chinese fashion; an arrangement was made with the deceased's family that the unlucky doctor should pay $20 in full of all demands, for coffin, burial fees, joss observances, and funeral feast.

When Chen was appointed to Li Han-Chang's staff, a Wei-yuen named Chang, who was lately Magistrate of the Mixed Court on the French Concession, was nominated to succeed him. But Chang is head of the Lekin Tax office in the Settlement, and was objected to on that and other accounts. The objection has been deferred to, and another official nominated. The new magistrate seems a man of very different stamp from his predecessor, and it is remarkable that he seems not to be hampered by the want of power, which was always put forward as an excuse for Chen's leniency. He is disposed to punish criminals, and he passes fitting sentences when Chen would have suggested the City as the only possible alternative from a mild bambooing. Judging from present experience there will be no great cause for regret if Chen is promoted after his Yunnan experiences are over.

A correspondent calls attention to a system of gambling which is, we are told, carried on largely at present in the Settlement. Our informant says that invitation cards are sent round to "boys" and others known to affect gambling, with a sign on each indicating the evening's place of assembly, and that very heavy gambling does undoubtedly take place. This system of a moveable table, however, makes it more difficult for the police to capture the culprits. We are aware that they have been watching the locality indicated for some time; but have not succeeded in discovering any gambling there, of late. Probably they would do well to accept the offer of guidance. We are all interested in th matter; for gambling very frequently leads to thieving, with servants, and we have heard of several cases of household robbery lately, traceable to this cause.

A parade of the Volunteers was held the 12th August. Only the Rifle companies attended, and these mustered in fair strength, considering the heat. It is not that the heat is really sufficient to deter, for it was pleasantly cool on the racecourse; but the anticipation is so much worse than the reality, that men are deterred. Having mustered in front of the Custom-house, fifteen rounds of blank cartridge per man were served out, and the force marched off in the usual order for the racecourse. After one or two simple battalion movements line was formed fronting the cricket-ground, and volley firing was practised. The men have had no practice in this for a long time, and it is not surprising that the firing was at first very irregular. It improved, however, after a few rounds. Some skirmishing drill was then gone through very creditably, and line was again formed and the order given for independent firing—which was only brought to a close by failure of ammunition. After the march back down the Maloo and a few words from Major Hart, criticising the movements, the men were dismissed.

The steamer *Flamingo*, the improvised Chinese troop-transport, has been fitted with six additional rice-boilers on deck, the former cooking apparatus having proved insufficient to provide food for the troops on board. The result of this oversight was frequent squabbling and fighting amongst the men, which always resulted in some of the more weakly of the soldiers being deprived of their rations. On one occasion a sailor was carrying some bread for his mess, when he was beset by a crowd of hungry soldiers, who tried to take the bread from him. In defending it he was slightly stabbed in the left breast, but unfortunately was unable to identify the man who inflicted the wound. The *Flamingo* sailed again for Takow on the 7th Aug., to embark 2,500 more troops for this port. She is a new Glasgow-built vessel, this being her first trip from home. By her three troop-charters to Formosa she will, it is said, earn $36,000.

It is stated that the Canton and Macao Steam Navigation Company are chartering foreign steamers to take tribute rice to Tientsin, at 14 to 20 dollar-cents a picul, whereas the price they get from the Government is 6 mace. It instances the case of the *Culabar* chartered for 20 cents, the *Cheviot* 14, and the *Consolation* 14. Of course, we do not know whether the Government or the Company get the benefit of the cheaper rate. But it would be hard to demonstrate more clearly the extravagance of the rate allowed.

We learn that the British barque, *Storm King* has been purchased by the C. M. S. N. Co., with the view of being dismantled, and converted into a hulk for one of the ports on the Yangtze. The purchase money, it is said, amounts to $20,000.

The Dutch wooden corvette *Curacao* arrived in port on the 12th Aug., and after a stay of a few days will resume her voyage to Batavia, visiting Hong Kong, Singapore and Manila on her way.

The old steamer *Aden*, which her present owners could never make remunerative owing to her great greed for fuel, is to be overhauled and fitted out as a sailing ship.

The subjoined items of news are from the *Celestial Empire*:—

The past week has been upon the whole a fairly busy one, although the actual occurrences are not numerous. Among the political incidents we may briefly notice the departure of Ch'ên, the late magistrate at the Mixed Court, to join His Excellency Li Han-Chang preparatory to setting out upon the expedition to Yunnan; an enterprise which, as far as the British Commissioners are concerned, is rapidly achieving the height of unpopularity. Another collision is reported from the North, this time, however, between Mr. Wade and the Viceroy of Chihli—in which the latter magnate appears to have come off second best.

It may, perhaps, be some consolation to the local magistrates, in their difficulties of late, caused by the sudden and unauthorised departure of several important prisoners, to know that a capture recently made by one of the city officials' detectives is of some value. This man is said to be a subordinate chief in a large body of robbers or brigands who infest a mountain named Chu-lung-shan, a place which we are told is somewhere on the other side of the Ta-'hu. It is stated that the total number of the banditti massed in this place amounts to no less than 50,000 men. This sounds prodigious; but even in Shanghai we have some means of seeing in what crowds the Chinese can sometimes congregate; though, of course, the general native disregard of accuracy leaves the figure open to some doubt. It is added that this band or rather army of outlaws has affiliated members everywhere about in the towns and cities; and that it is supposed that the man just captured came to Shanghai in order to obtain information which would enable him and some confederates to plan a robbery.

This week there has been no issue of our youngest Shanghai contemporary, the *I-pao*. It is said that there has been trouble in the ranks of its contributors; that the journal is without an editor; and that even if its present suspension be intended to be temporary only, it is very likely that the swoon may turn out to be fatal. The *I-pao* commenced in a small way, though with some signs of vigour; but had latterly fallen into bad habits, and

Digitized by Google

was too fond of inserting sensational paragraphs of a tone and colour that to foreign readers were insufferable, and which, even respectable natives viewed with disapproval—a fact on which we lately felt impelled to remark.

The 12th August, being the birthday of the Empress Dowager Tsze-An, chief wife of the Emperor, whom foreigners call Hsien-fung, the yamens were all closed, no business being transacted. We are told that the present age of the Imperial lady is forty-three years.

FOOCHOW AND AMOY.

The subjoined items of intelligence from these ports are taken from the *Foochow Herald*:—

In a recent issue we drew public attention to the case of Mr. Boysen of the Great Northern Telegraph Company's service. This gentleman while engaged in taking delivery of property belonging to the Company, at a place called Hungkow, about thirty miles from this port, was assaulted and robbed of all the money in his possession. We now learn that the ringleader in the attack and robbery has been identified, but that the native officials decline either to arrest him or obtain restitution of the stolen money. The man is still at large at Hungkow, and the mandarins alleged that they dare not interfere with him. As in small matters, so is it in greater; Mr. Blacklock's murder is quietly slurred over; the robbery and assault to which we now particularly refer is winked at. Possibly, when half-a-dozen more foreigners are killed, and the entire community plundered, we shall hear of measures being devised by those in authority to ensure the protection, which is now apparently claimed in vain. The Chinese officials were ready enough to cause all the power of 'British law to bear upon Mr. Fawcett at Chefoo, the other day, even to the length of bringing up sham evidence. In the *Fu Sing* case, they have been, most energetic; but they entirely fail to see that there is anything undignified in their repeated protestation of inability to enforce the law against their own countrymen. We think, however, that when really roused to action they can act, and to make them do so is the manifest duty of the Foreign Government.

A *canard* was current in the Settlement a few days since to the effect that Mr. Wade had hauled down his flag, and that war was declared. The excitement was intense, and certain tea shippers were for the moment in a state of jubilee, loudly expressing their belief that the rise of 6d. per lb., announced many years ago was about to take place. It turned out, however, that Mr. Wade had not decided to leave Peking, and that war was not declared. The story originated, we believe, at Pagoda Anchorage.

To the great relief, we should think, of the foreign community, the "Joss" processions have ceased for a time—all the devils, little and big, black and white, having been driven, let us hope, into the infernal regions. We have not, however, heard of any marked improvement in the value of tea; and we do not credit the report that several teamen interested in second crop Pan Yongs and Fock Oans subscribed liberally to the processions in the expectation of a further rise taking place in the value of these fashionable descriptions of tea.

The troops lately quartered at the Customs, Pagoda Anchorage, have been withdrawn. Beyond exercising a certain amount of moral influence, we should say that their presence was entirely useless. An attack upon the smuggling village might have resulted in some good; but this, although talked about, could not, it seems, be carried out.

We are reliably informed that the forts recently constructed for the eighteen-ton guns, purchased at the time of the difficulty with Japan, are already tumbling to pieces, having been built for "look-see," and nothing more. This is another beautiful illustration of the way public money is squandered—with a view to carrying out sham reforms.

Two of the Arsenal gun-boats, with a number of Chinese officials and their body guards, &c., on board, have left Foochow for Tai Wan-fu. There is apparently a lull in the contest between the aborigines and Imperialists, owing, we understand, to the prevalence of sickness and disease in the ranks of the latter.

H.B.M.S. *Growler*, after a stay of fifteen months at Amoy, has at last been relieved by the *Hart*, a vessel of the same class, commanded by Commander Harvey Royse. The *Hart*, it will be remembered, accompanied the *Charybdis* on her expedition to Lukut in November, 1874, when there was some pretty severe fighting done by the Naval Brigade under Lieutenant Jones, lately in acting command of the *Hornet*.

The British Consular residence at Amoy, which has been so long in a state of decay, is being pulled down in earnest, the roof having already disappeared. It is to be hoped that Her Britannic Majesty will be in future better represented—architecturally.

The reconstruction of the telegraph line from Foochow to Amoy was commenced on the 15th Aug., the day appointed by contract. Captain Hoskiær, R.D.E., the engineer-in-chief of the Great Northern Telegraph Company, will, we understand, superintend this important work.

The new Club at Amoy is to be commenced shortly, and the Club Elders have taken time by the forelock in framing rules. The rules, it is believed, are very stringent—especially in the matter of dogs and touching the barometer.

HONG KONG.

Our advices by the present mail extend to the 21st Aug.; the P. and O. mail from London July 9 arrived out on the 15th Aug. The following items of news are from the *Hong Kong Daily Press*:—

The meeting of the shareholders of the Hong Kong and Shanghai Banking Corporation passed off more pleasantly and satisfactorily than that of February. The report was so much more palatable that this is not surprising. None but pleasant words passed, confidence in directors expressed, and congratulations on the stability and improved prospects of the Bank exchanged. The meeting was therefore perfectly harmonious, although the directors were unable to announce a dividend. But there was consolation in the announcement made by the Chairman that if the Bank does as well during the current half-year they would be enabled to return to the old and satisfactory practice, and declare one.

A boat accident, in which some of the leading residents in the Colony had a narrow escape, occurred at Cape D'Aguilar, late on the night of the 16th August. It appears that on that evening H.E. the Administrator gave a bachelor's picnic to a number of the leading residents in the Colony. Among those present were:—Sir J. Smale (Chief Justice), Sir Brooke Robertson (of Canton), Hon. J. Bramston (Attorney-General), Hon. C. C. Smith, Hon. W. H. Alexander, Hon. W. Keswick, Hon. Charles May, Mr. Russell, Mr. McIver, Captain Buller (of the *Modeste*), Captain Turton (of the *Egeria*), Mr. Robb (of the Naval Yard), and a number of others. The party left the Harbour at a quarter to six o'clock in the evening in the new Government steam launch, bound for Cape D'Aguilar. After a very pleasant sail, the destination was reached a little before seven o'clock. Owing to the nature of the beach in that locality it was impossible to get the launch close alongside, and the party were landed in boats. After partaking of dinner on shore, a visit was paid to the new lighthouse, and the remainder of the evening was spent in an enjoyable manner. The party started to return to the launch about half-past eleven o'clock. On reaching the beach several boats were waiting to convey the excursionists to the launch which was lying at some little distance off. Among these was a small fishing coble, which was very shallow and exceedingly cranky. Into this vessel went Sir John Smale, Mr. Bramston, Mr. Robb, and Mr. Keswick, and they seem to have been the last in putting off. There was a bit of a swell on at the time, and the launch, from which there projected a ladder, was rolling considerably. The occupants of the other boats seem to have got on board all right, but the coble, in which was Sir John and the three others named above, in getting alongside ran right under the projecting ladder. The launch at that moment came rolling to that side, the latter struck the gunwale of the cobble, and turned it right over, pitching all its occupants into the water. The Chief Justice went down, but on rising to the surface again received a rope, to which he clung for some time; subsequently several of those on board managed to pull him up, and he was thus rescued from his perilous position. Mr. Keswick was fortunate enough to catch hold almost at once, and he was also pulled out. Immediately on the coble upsetting Mr. Bramston struck clear of it, and swam some short distance away; he was keeping himself afloat, but Captain Buller, who was on board, was afraid he might get exhausted, and courageously jumped in to assist him. They were both got on board a few minutes afterwards. Mr. Robb, who happened to be at that side of the coble next the launch, caught hold of the ladder and clung to it all through. Of the four gentlemen in the water Sir John Smale seemed to have suffered most, and as soon as he was rescued he was taken below, and was made as comfortable as surrounding circumstances would admit it. The launch then at once started for Hong Kong, and was alongside the Praya shortly before one o'clock yesterday morning. We are pleased to state that the gentlemen immersed are none the worse for their ducking.

A case has been tried in the Police Court, before Mr. Russell which forcibly illustrates the mischief often arising from the readiness with which the Chinese will sell their services, no matter in whose or what behalf. The prisoner in question, it turned out, was an old offender; on his last appearance before the Bench he had been ordered to find security in two sureties for, $50 each; this, it would seem, he had no difficulty in doing—for a consideration. Two men appeared in Court, said they knew the prisoner to be an honest individual, and stood security for him, stating that he was going to leave the colony. Mr. Russell very properly sent for these worthies, and read them a severe lecture. They confessed they did not know the prisoner, and bailed him out on the representation of his relations that he was going to leave the colony. Of course they ran the risk of losing their bail; but this the Chinese, who are born speculators, are too ready to do. It is to be hoped that Mr. Russell's remark will be productive of good, and do something towards checking the system. The native journals will do well to make the case public and warn the Chinese against becoming bail for fellows of whose character and position they know nothing satisfactory. Not only are they likely by doing so to place themselves in an awk-

Digitized by Google

ward position, but they are also, as a matter of fact, aiding and abetting the escape of criminals from justice.

THE HONG KONG AND SHANGHAI BANKING CORPORATION.

The ordinary half-yearly general meeting of shareholders in this Corporation was held at the City Hall, Hong Kong, on the 18th August. There were present :—Messrs. A. André (chairman), Forbes, Hayllar, Q.C., Belilios, Cordes, Hoppius, McIver, F. D. Sassoon, Greig, Burrows, H. H. Nelson, Dr. Adams, Anton, Bottomley, Grobein, Newton, H. Gibb, Hon. P. Ryrie, Bertrand, Middleton, C. P. Chater, Baron de Overbeck, P. S. Woonwalla, D. M. Mehta, Dickie, Chinoy, Green, Kingsmill, Vaucher, Landstein, Fairbairn, Karberg, Beart, C. C. Cohen, W. Morgan, Laurie, Mardfeldt, Hancock, Strack, J. E. Sassoon, M. D. Ezekiel, S. J. David, J. A. de Carvalho, Rozario, Robinson, H. Smith, Mallory, Cope, de Guigne, Alabor, Romano, Simonis, Wheeler, Mylne, Dr. O'Brien, Heaton, Deacon, J. T. Chater, &c.

The Chairman having read the notice calling the meeting, Mr. Kingsmill said he thought the Chairman had better read the report; he always liked it to be read at the meeting. The Chairman accordingly read the report, a copy of which has already appeared in our columns.

The Chairman then said :—Gentlemen, I am somewhat more fortunate than my predecessor in this chair, for although the Report and Statement of Accounts now presented to you are not altogether so favourable as could be wished, yet, taking into account the unprofitable state of trade generally in the East, and the numerous failures that have occurred during the past six months, the profits realised cannot be regarded otherwise than as satisfactory. For the half-year they amount to about 5 per cent. on the Bank's capital, and if we can do as well during the current half-year, and no unforeseen disasters occur in the meantime, we shall, I trust, at the beginning of 1876 return to the satisfactory practice of declaring a dividend. The result of the past six months at any rate proves that even during exceptionally bad times, and in the face of unusually grave mercantile complications, the Bank has been able to do a fairly remunerative business. Reverting to the failures that have taken place during the past half-year, I think you will agree with me when I say that the very trifling losses which the Bank has incurred through them afford convincing evidence of the prudence and forethought applied in managing your business. It is almost impossible to escape from some loss in times such as we are now witnessing, but the cautious policy which has carried the Bank uninjured during the recent crisis will, you may rest assured, continue to be followed up by the board in future, and I trust with the same fortunate results. As promised by the Chairman at our last meeting, the substance of Mr. McLean's report has been placed before the shareholders. He carefully inspected all the Bank's establishments and accounts,, valuing, as far as he was able, the various assets, and although my co-directors and myself were certainly unprepared for so serious a depreciation in the valuation of the Bank's securities as Mr. McLean found, we have accepted without question the accuracy of Mr. McLean's estimates, as we fully recognise the care with which they were made, and we ourselves had reason to know that in the interval some accounts had gone somewhat to the bad. Mr. McLean estimated $116,888.68 as lost, and recommended the amount should be written off at 30th June. It will be satisfactory to you to know, however, that, while providing for all the items referred to, we have only had to write off $100,911.14, thus showing that $15,977.74 had been in the meantime made good, and we consider that a fair amount of that now written off will yet be recovered. Again, McLean estimated that we might lose on "doubtful accounts," if they eventually turned out all bad, at the outside a further sum of $340,000. This of course includes the doubtful accounts at the head office as well as at all the branches in London, India, China and Japan—everywhere. As stated in the report, $41,000, have since been ascertained to be bad, and have been written off. This item forms a portion of the sum of £10,211 0s. 8d. which the Chairman at the last meeting, in reply to Mr. Kingsmill, referred to as an account under litigation. That litigation has since resulted in a compromise under which the Bank, by advice of counsel in England, accepted £2,000 in liquidation of its claim. It is a satisfaction to the directors, as it must be to the Bank's shareholders and depositors, to have their views confirmed by Mr. McLean as to the general soundness of the Bank's position and business. The directors are also pleased that he confirms their views as to the management of the Bank at the head office and branches. Mr. McLean's summary of his report to the directors will be found on the manager's table for the perusal of such shareholders as wish to consult it. You will have noticed in the accounts that the directors have not set aside any sum for their remuneration during the past half-year; they have preferred to leave the matter in abeyance pending the result of the whole year's operations becoming known. The directors regret that they cannot yet inform the shareholders that the several properties so often referred to in their reports have been realised, but I am in a position to state that as regards two of the most important of them they are in a fair way of being taken out of the Bank's hands, and that before next general meeting I have great hopes we shall have nothing more to do with them ; I am happy to inform you that during the past half-year they have cost the Bank nothing. The delay that has arisen in the appointment of the members of the London Committee is due to the directors deeming it advantageous to leave the matter somewhat in abeyance until Mr. McLean's return to London, that gentleman having been placed while here in possession of their views. The matter has already been placed on a satisfactory basis, and will shortly come into operation. Before I move the adoption of the report I shall be glad to answer any questions.

Mr. Kingsmill : Do I understand aright that the profits of the six months have been 5 per cent. on the paid up capital ? The Chairman: Yes, they have. Mr. Kingsmill : That is, 10 per cent. per annum ? The Chairman : Yes. Mr. Kingsmill said there was a sum of losses estimated in the first instance at $116,000 odd, he might say in round numbers $117,000 ; did he understand that in consequence of having recovered part of that it did not appear written off ? The Chairman said that about $16,000 had been saved ; Mr. McLean had over-estimated the losses. Mr. Kingsmill said the result would be that if any of them made any calculations from the balance-sheet they would be about $16,000 out. The Chairman said they would be. Mr. Kingsmill said he had made an estimate about their position, but he found he would be $16,000 out ; well, $16,000 was not much ; but $153,997 had been reserved for contingencies ? The Chairman said that amount had been reserved. Mr. Kingsmill said that the result of his calculation would be that, taking no account of the Reserve or Marine Insurance funds, and supposing one half of Mr. McLean's estimate of losses to be correct, the Bank would be about $43,000 on the wrong side. The Chairman said that would be so.
